This morning a shiny yellow school bus stopped at Janie's door and took her to the school five miles away. She wore a new red dress, all crisp from St. Joe's dryer rack, and she felt good after a breakfast of fresh fruit and cereal.

Last week Janie's mother was working with the Homemakers of America, and last winter Janie visited Michigan State University with her family when her father attended Farmers' Week on the campus.

Michigan State's public service programs have evolved from the basic philosophy of the University put down by the founders. This philosophy says that the teaching of knowledge should not be restricted to any one group or class, but should be freely available to all who can make good use of it.

Today Michigan State has established for itself a definite position in our country's national life. As the society becomes more complicated and polyvalent, the University must lift people into a new kind of education. THE UNIVERSITY must lift people into the heights of thinking and reasoning, into the atmosphere of ideas. Aptitude, expertness in learning, must be replaced by ability, sound scholarship by original thought. The University is the University only if educational opportunity is extended a helping hand to deserving people around the world.

As the society becomes more complicated and polyvalent, we must look to the University for solutions of social and cultural problems. The University is the University only if it makes possible for a new kind of education. THE UNIVERSITY must lift people into the heights of thinking and reasoning, into the atmosphere of ideas. Aptitude, expertness in learning, must be replaced by ability, sound scholarship by original thought. The University is the University only if educational opportunity is extended a helping hand to deserving people around the world.

A good university has serious purpose. The faculty knows what it is trying to accomplish, and students themselves are involved in it. They believe that all men's lives must be broadened and deepened, that the education of the individual must become more of a whole life process.

The roots of education are in the minds of its students and in the minds of its teachers. The University is the University only if educational opportunity is extended a helping hand to deserving people around the world.

What is a University?
Freshmen To Begin
Looking At Sparty...

College is many things. Look at it as a "Sparty" statue, a football game, or a Christmas formal. Look at it as classes, lectures, and see everything. And there's always the Union grill. Those who withdraw from social activities are setting too many hours over the books or too many hours in the Union grill. Those who find out that nothing they ever heard about this or any other university accurately described it.

Pitfalls for opportunists are as numerous as for freshmen. Many are the campus needs new people. But try more than one and you're asking for trouble. Each demands as much effort as necessary to make it a success. The Freshman's decision of what will be most important to him can decide the success or failure of his college career.

Here's Top Summer News You May Have Missed

The New Academic Senate and the Board of Trustees meet weekly to discuss campus policy and to hear reports on university matters.

Fuzak, Williams Give Views on Teaching

Individual Must Choose Method, Fuzak Believes
CHARLES RICHARDS
State News Staff Writer

John A. Fuzak is a good person to ask about effective teach-
ing methods.
The new Dean of Students can look at the subject from both
sides—the instructor and the student as an adminis-
trator. Fuzak has been a professor for 20 years at the Uni-
versity and has been associated with the students
from the student activities viewpoint since his work
as a residence hall director.

Fuzak feels that the best method to teach is the
one best suited to the student and the instructor.

"How should be taught?" Fuzak asks. "That
question should be asked by the instructor first.

"What are the methods?" he asks.

"What are the methods for the student?"

"It is up to the instructor to decide what
method is best for his particular purpose and the
student," Fuzak concludes.

He believes that it is important to keep in
mind that there are different methods of teaching
for different subjects and that the instructor should
choose the method that is best for his particular
subject.

Fuzak feels that the student should be
given the freedom to choose his own method of
learning. He believes that the student should be
given the opportunity to experiment with differ-
ent methods and then choose the one that works best
for him.

Fuzak also feels that the instructor should
be able to adapt his teaching methods to the
student's needs. He believes that the instructor
should be able to change his methods as the
student progresses and as the student's needs
change.

Fuzak feels that the best way to teach is
the one that the student finds most effective.

"It is up to the student to decide what
method is best for him," Fuzak states.

He believes that the instructor should be
able to adapt his teaching methods to the
student's needs and that the student should be
given the freedom to choose his own method of
learning.

Fuzak feels that the student should be
given the opportunity to experiment with differ-

given the freedom to choose his own method of
learning.
University Divided Into Eight Colleges

Michigan State University's College of Agriculture has been divided into eight colleges. This action was taken to make the college more efficient and to meet the changing needs of society.

The new colleges are:
1. College of Science and Letters
2. College of Engineering
3. College of Home Economics
4. College of Agriculture
5. College of Business and Public Service
6. College of Arts and Sciences
7. College of Education
8. College of Journalism

The division is expected to have a significant impact on the university's operations, with each college focusing on specific areas of study.

For more information, contact the College of Agriculture at (517) 355-1111.

---

MSU History Dates Back to 1855 Morrill Act

In 1855, the Morrill Act was passed, providing federal funds for the establishment of agricultural and mechanical colleges. Michigan State University received its share of this funding, which helped to establish the College of Agriculture.

Today, the College of Agriculture remains one of the university's most important departments, offering a wide range of programs in fields such as horticulture, animal science, and agricultural economics.

For more information, contact the College of Agriculture at (517) 355-1111.

Hannah Serves Many Roles

President John A. Hannah has recently completed his second decade of service to Michigan State University. Hannah became the 12th president of the University in July 1, 1941. He was born in Grand Rapids on October 9, 1890.

After he was graduated from State in 1913, he became a member of the faculty as an agricultural extension specialist. In 1925 he was appointed secretary of the Board of Trustees, the governing body of Michigan State. He served in this position until his appointment as president.

In 1929-30, Dr. Hannah served as president of the American Association of Land-Grant Colleges and State Universities.

During the next two years, he was chairman of the executive committee. He is still active on several committees of the land-grant association.

Dr. Hannah has a record of service on several major councils of the American Council on Education.

He has served on the Sectional Committee of Higher Education of the American Council on Education, and on the Government, New York, and Illinois Sections of the American Council on Education.

Dr. Hannah has been a member of the Board of Trustees of the University of Michigan, the Board of Directors of the University of Illinois, and the Board of Trustees of the University of Wisconsin.

He has also been a member of the Board of Trustees of the University of Michigan, the Board of Directors of the University of Illinois, and the Board of Trustees of the University of Wisconsin.

President Hannah was appointed Assistant Secretary of Defense for Manpower and Personnel by ex-President Eisenhower in 1952.

He took a leave of absence from MI and was sworn into office on February 13, 1954. He resigned from this position on July 22, 1954.

In conclusion, Dr. Hannah has served the University and the nation in many capacities, and has made significant contributions to higher education.

SHOP DOWNTOWN AND PARK FREE!

Up to 4 Hours Free at All Attendant Operated Lots and Garages . . . Over 100 Downtown Businesses Are Participating in the “Park and Shop” Plan

Now you can get from two to four hours free parking, depending on the rates of the attendant operated lot at which you park. It's just another big step in making your shopping hours in Downtown Lansing more convenient than ever! Shop in any establishment displaying the official Downtown Lansing Park and Shop sign. You may obtain stamps at any establishment, and the stamps can be obtained from the parking lot attendant. You will receive 10, 20, 30, or 40 cents in stamps for parking fees at all Downtown Lansing parking lots.

Hannah Completes 20 Years As MSU President

Situation Different Here in '41

Dr. John A. Hannah has ended the twentieth year as president of Michigan State University. This has been the most significant period in the history of the university.

This period under his leadership saw MSU emerge as one of the nation's leading universities, both in terms of enrollment and physical facilities, but also in terms of overall academic standards.

THE CLOCK is now timed in '41

Dr. Hannah has been president of Michigan State for a little over two months. Six thousand students were enrolled this term. Michigan enrolled the largest number of students in its history for the first time in a year.

Hannah's influence has been felt in all facets of the university. New buildings sprang up almost overnight. New programs were started and old ones expanded. A special registration bureau was set up in the Union ballroom for all students to finish registration as quickly and as efficiently as possible and get into lessons.

The world was at war and MSC had to prepare for all men interested in the military. A special meeting is called by President Hannah to adopt a draft. J-Hop committees okay uniforms as formal wear.

A SECOND war convocation is ordered by President Hannah. A special meeting is called by President Hannah to explain draft to male students to explain draft to male students. A special registration bureau was set up in the Union ballroom for all students to finish registration as quickly and as efficiently as possible and get into lessons.

A special meeting is called by President Hannah to explain draft to male students. A special meeting is called by President Hannah to explain draft to male students. A special registration bureau was set up in the Union ballroom for all students to finish registration as quickly and as efficiently as possible and get into lessons.

The clock is now timed in '41. Six thousand students are enrolled this term. Michigan enrolled the largest number of students in its history for the first time in a year.

And a war was being fought. A special meeting is called by President Hannah to explain draft to male students. A special registration bureau was set up in the Union ballroom for all students to finish registration as quickly and as efficiently as possible and get into lessons.

Thus ended Dr. Hannah's first full year as president. The enrollment was fast dropping off as college men went to fight for their country.

State News Editorial Of 1951 Issue Pays Tribute to Hannah

(Editor's note: This editorial appeared in the July 5, 1951 issue of the Michigan State News honoring President Hannah on his tenth anniversary as president of Michigan State.)

This issue of the Michigan State News is dedicated to one of the finest men ever to claim the title of college president—Dr. John A. Hannah.

Here is a man who stands as a symbol of the greatness that is Michigan State College. For it is he who engineered this greatness.

To look at the sprawling arms of green grass, newly-concreted buildings and shade-giving trees, of the MSC campus, one would never realize that its architectural beauty is a comparatively new thing.

And all because of a man with a dream, a dream that put thoughts of self in the background of his mind, and rankled there for dreams of a Michigan State of the future.

Hannah stepped into the halls of Michigan State in July 1941. Five short months later, the country was plunged into a manpower-sapping war.

The next four years were slim ones for MSC. The enrollment fell off to less than 2,000 at times. But the dream that was Hannah's never wavered.

Then the bright years came. The enrollment grew, and the rest of the college grew with it. New buildings sprang up almost overnight.

Hannah could have said, "I told you so." For the things he had foreseen were becoming a reality. But he just smiled and went on with his work, not satisfied with a partially fulfilled dream.

Today, John A. Hannah's titles are many. He is the past president of the Association of Land Grant colleges. He is a member of President Truman's famed "Point Four" advisory board. He holds honorary degrees from both the state's top universities, MSC and the U. of M.

But to John A. Hannah these titles are superficial. One name stands out in his mind, and that is "Uncle John."

"The most beautiful and most profound emotion we can experience is the sensation of the mysterious. It is the dower of all true science. He to whom this emotion is a stranger, who can no longer wonder and stand rapt in awe, is as good as dead." Albert Einstein.

Science and The University
Research..., The Parent of Success

Science Editorial

By William E. Small, Jr.

Science is the basis of man's needs and beliefs. The wonder of science for man begins with conception and birth. And when the latter first cries, it cries through science. The vocal cords vibrating to a pitch within the wave length of the human ear, the child's first cry is heard through the ears of man.

THE VOCAL CORDS are voice organs and breathing organs. As the infant grows stronger, the cry grows louder. The crying and smiling and laughing of the infant is the beginning of an understanding of the world around him. The world around is perceived by one or more of the senses: sight, sound, touch or taste by the infant in an effort to become aware of his environment.

THERE ARE THOSE who do not understand the importance of science education. But science, especially in this "Space Age," is a rapidly advancing, ever changing field of human thought and phenomena.

Last year, for example, the world watched, amazed, as man's rocket scientists sent a rocket to the moon. And the rocket was not a "spaceship" as we think of it; it was a sophisticated instrument which carried the scientists to the moon, and which carried back valuable data and samples of the moon's surface. This "Space Age," is a rapidly advancing, ever changing era of human thought and phenomena.

One professor at Basic University would request every student to take all courses offered at the university. One professor at Basic University would request every student to take all courses offered at the university. He says the world is in a state of transition, and the students must be prepared for the transition. If I could, I would request every student to take all courses offered at the Basic University. If I could, I would request every student to take all courses offered at the Basic University. This is the only sure thing in the world; every student must be prepared for the transition. If I could, I would request every student to take all courses offered at the Basic University. If I could, I would request every student to take all courses offered at the Basic University.

**Cyclotron Speeds Protons For Atomic Energy Study**

Protons, the particles that make up the nuclei of atoms, are used in research to study the structure of atoms. The cyclotron, a device that accelerates protons to high energies, is used in this research.

The cyclotron produces protons by bombarding a target with deuterons. The protons are then accelerated in a magnetic field and extracted at the desired energy and speed. The protons are then used to study the structure of atoms.

The cyclotron is a device that produces high-speed protons. It uses a magnetic field to focus the protons and accelerate them to high energies. The protons are then used to study the structure of atoms.

Agriculture Ranks High On Campus, Still National Model

Oldsident College at the University

Was the First to be Established

For the Teaching of Ag Science

To Prepare Students for Careers of Higher Education, according to President John A. Hiltz.

"This college was established primarily as a small,experimental station in agriculture," Hiltz added. "It was the first college in the world to offer this particular type of training.

Oldsident College, which is now known as the College of Agriculture and Home Economics, was founded in 1857. It was established as a small, experimental station in agriculture, and has since grown into one of the leading agricultural colleges in the nation.

The college is divided into eleven departments and a research laboratory. The departments are: organic chemistry, agronomy, entomology, animal husbandry, dairy farming, farm crops, horticulture, agricultural economics, agricultural education, and rural sociology.

The research laboratory is concerned with the development of new crops, improvement of existing crops, and the study of the effects of various environmental factors on plant growth and development.

Scientific research is conducted in the laboratory, and the results of this research are used to improve agricultural practices and to develop new crops.

In 1857, the college had an enrollment of 63 students. Today, the college enrolls about 6,000 students.

The college is located in a city with a population of 500,000 people. The city is known for its beautiful parks and gardens, and its many cultural events.

One of the most active fiddlers in the world is a member of the college faculty. He is a member of the Marine Biological Laboratory, and has been involved in several studies dealing with marine life.

For more information about the college, please contact the Admissions Office at (555) 555-5555.
Science Aids Popular

Students, Outsiders
Use Museum, Library

Two educational aids of science on campus stand apart from instructional departments, and yet contribute much to the knowledge of those who use them. A third is in the planning stage.

The Museum and the Library are centers of activity and culture, open to students, faculty and guests of the University. A third is in the planning stage.

The Museum, under the direction of Rollie J. Baker, is unequalled educationally, emotionally and operationally. It opened with flower gardens and a program that would be an addition to the campus. The Museum building as an educationally open to students, faculty and guests of the University.

THE MUSEUM, under the direction of Rollie J. Baker, is unequalled educationally, emotionally and operationally. It opened with flower gardens and a program that would be an addition to the campus.

The Museum has three floors in the three-story structure on the south side of the Michigan State University, according to Robert T. Talbot, director of the Development Fund.

The Library contains more than 600,000 volumes and 1,000 maps with a capacity of 1,000,000 volumes. It receives five related periodicals a week, more than 8,000 periodicals and is adding about 30,000 volumes each year.

The science department of the Library contained 1,000 exhibits and 2,000 periodicals in June.

Handbooks of science, textbooks, encyclopedias, manuscripts, theses and dictionaries are only a sample of the types of literature available for scientific research. The Library contains 106,011 volumes. It receives more than 825,000 volumes and is adding about 50,000 volumes each year.

The seating capacity of the Planetarium will be 400. It has a Spitz model, can project the stars and planets on the dome of a young G.E. research scientist.

AN ARCHAEOLOGIST, Maxwell, and his assistant, an archaeologist and museum curator, attributes his interest in the past to his third grade studies and the "hero worship" of young G.E. research scientist.

WHO'S BEEN EATING MY PORRIDGE?—This family of bean plant seedlings, only one of the-life-like animal exhibits at the Museum.

Fossil Plants Will Undergo Studies Here

A well-known geologist begins to study the fossils in the collection of the Geology Group of the National Academy of Sciences.

Cross, with degrees in both biology and geology, is trying to learn more about one of the most ancient life forms, plants, together with modern plant specialists. Cross believes that plant fossils supply us with a key to understanding the evolution of plant life.

 crosses the fossil plants and the growing plants of today into the search for fossil plants. With NC training in both fields, he is working to correlate past and present plant life, an area of the earth whose study is a part of paleobotany, and can only be studied in fossil form. Cross has published 46 technical papers and has had three books published.

Health Center Sees Students During Day

On Memorial Health Center during the day and evening at various times. Students are participating in their recovery process.

Medical Program May Start Here

This University has a medical program. Medical residents will be able to participate in the educational process.

Research Studies

...continue from page 2...

Research studies will be conducted at the University of Michigan and the University of Pittsburgh. The programs will include studies of the biological, physical, and cultural effects of natural and man-made resources. The studies will be conducted in various fields, including biology, chemistry, geology, and anthropology.

Cross, with degrees in both biology and geology, is trying to learn more about one of the most ancient life forms, plants, together with modern plant specialists. Cross believes that plant fossils supply us with a key to understanding the evolution of plant life.

Cross will serve the University in two capacities: in research with the Geology Group on several phases of this study. In addition, he will work with the National Academy of Sciences and the National Geographic Society. Cross will also serve as a consultant to the New York Botanical Garden.

In 1938, Cross was appointed to the Department of Botany at the University of Michigan. In 1942, he was named professor of Botany and Plant Pathology. Cross has been a member of the University faculty since 1936.

Chemist Gets High Positions

Dr. Harold Hart, professor of chemistry, has been invited to join the staff of the University of Illinois as a research professor. His principal interest is in the chemistry of the natural products of living organisms.

The well-known researcher and teacher was appointed to this position by the University of Illinois president, Dr. A. H. Stimson. This appointment is in recognition of his contributions to the field of organic chemistry.

This form of research is essential to the advancement of knowledge in the biological sciences. Hart's work has been concerned with the chemistry of the natural products of living organisms.

The university recently received the second grant in a series of research projects. This grant is in recognition of his contributions to the field of organic chemistry.

Dr. Hart has been a member of the faculty since 1936. He is a member of the American Chemical Society and the American Association for the Advancement of Science.

The Antarctic Emission Experiment is one of many projects in the field of polar research. The experiment was conducted by the University of Illinois, in cooperation with the National Science Foundation, and was supported by the National Science Foundation.

Engineering College Has Many Projects

Research Laboratories

In All Buildings Facilitate Studies in Other Areas

The College of Engineering was established in 1909 with the foundation of the Engineering College. This college includes seven engineering departments, a research division, and a computer laboratory.

Dr. John F. H. Voorhees heads the college and reports to the University president. The college includes the following departments: Civil Engineering, Mechanical Engineering, Electrical Engineering, Chemical Engineering, and Metallurgical Engineering.

A NEW COLLEGE of Engineering has been established in the University of Illinois, which includes the following departments: Civil Engineering, Mechanical Engineering, Electrical Engineering, Chemical Engineering, and Metallurgical Engineering.

This college is made up of several departments. Each department is headed by a professor or a group of professors. This college is made up of several departments. Each department is headed by a professor or a group of professors.

Science and Arts Offers a Liberal Science Program

The College of Science and Arts employs the largest teaching staff of any college at the University, under the supervision of Dean Lloyd C. Ferguson. The college is divided into five divisions: Biological Science, Fine Arts, Languages and Literature, Mathematical and Physical Sciences, and Social Sciences.

MISCELLANEOUS, Biological Science and Mathematical and Physical Sciences, are directly related to the Science Section of this paper, and will be featured in future issues.

The Biological Science division offers training in botany and plant pathology, entomology, ornithology and public health, physiology and pharmacology, ecology and nursing.

The study of such sciences include botany, biology, zoology, entomology and zoology.

MATHEMATICS, on the other hand, deals with numbers which seem to have been lost in the far distant past, with the development of a system of numbers. Mathematics provides the elements, producing design and material, which make the world a better place in which to live.

Dr. Wolterink

Dr. Lester F. Wolterink, professor of physiology and biochemistry in the College of Science, was formerly professor of physiology in the College of Veterinary Medicine, came to this University in September, 1943.

He received his A.B. degree from Hope College in 1930 and his M.A. and Ph.D. degrees from the University of Minnesota in 1932 and 1936, respectively.

Wolterink is a member of the American Academy of Science, the American Association for the Advancement of Science, and the American Medical Association.

He has written many articles for professional journals.

Welcome to campus and to Jacobson's

Jacobson's — your on-campus fashion headquarters... the store you'll learn to depend upon for style and top-quality, whatever the limitations of your budget. The store that's famous for fashion-favorite names... makes you've come to know and depend upon as national symbols of quality.

Although taught and studied in a number of departments here for many years, the University, after a late start, recognized the potential of the Biological Science Laboratory. The third floor of Agriculture Buildings, the third and fourth floors of Agriculture are being utilized. Presently there are 300 undergraduate and 70 graduate students in the Agricultural Sciences. It is expected that 100 more will be added, said President R. H. Bixler. The number of graduates will also increase. Research has been given to the staff. Research has been given to the Agricultural Sciences.

The department was organized by Bixler and many students have shown interest in the undergraduate level. Bixler said, "This may lead to the training of a major for undergraduate students.

Infection from the disease are spread out in

Home Economics Offers a Broad Home Education

The College of Home Economics here is one of the largest in the United States.

The College is headed by Thelma E. Porter, dean. The Home Economics building is located just east of the Union building.
New Biophysics Program To Begin October 1st

A biophysics program will be instituted at this University this fall. It will become upon the arrival of a noted biophysicist from New York.

Dr. Barnett Rosenberg leaves New York University and will join the staff here Oct. 1, 1962. His arrival of a noted biophysicist from New York University and will join the staff here Oct. 1, 1962. His arrival

The program will conduct a plan at this University to be under the direction of Dr. King, as director of Biophysics.

The program is organized in five departments and a school. These are anatomy, physiology, genetics, neurology and pharmacology, and physics.

The program is designed to train students for laboratory work in bacteriology, pathology and biochemistry.

Rosenberg's field of special interest is "Electrical Characteristics of Biological Systems."

In connection with the program, a survey has revealed that 400 students are interested in the subject. Rosenberg plans to establish a department in Biophysics, which will be headed by Dr. David B. Aronson, for the study of the effects of heavy ions and radiation.

The medical technology curriculum is designed to train students for laboratory work in bacteriology, pathology and biochemistry.

Rosenberg has asked for three graduate assistants to be assigned to him. The program will be under the direction of Dr. King, as director of Biophysics.

The program is organized in five departments and a school. These are anatomy, physiology, genetics, neurology and pharmacology, and physics.

To Train For Peace Corps Here

Thirty-five Trainees To Begin Fall Term Study

Thirty-five men and women began training at MSU on Sept. 5 as candidates for Peace Corps teaching assignments at the new University of Nigeria at Nsukka.

The project, to be announced by the Peace Corps, is in the first of Michigan and is the first in the nation in which the entire group will be assigned to a university abroad.

Training at MSU will run three through Nov. 30. The volunteers will have five weeks of training on the East Lansing campus and the final eight weeks at the University's Gull Lake facility at Ironwood, Mich. Each week of the peace training will include study trips to various institutions during their training period.

They selected for the Peace Corps program will depart for Nigeria Nov. 22 for the University of Nigeria at Nsukka. The Peace volunteers will work with the administration of the University to provide assistance in the basic education curriculum during the first year of the program. They will also help train the new cadre of secondary school teachers.

In addition to teaching, the Peace volunteers will work to administer and stimulate the development of the new University. They will help the administration determine the courses of study, develop the curriculum and other academic requirements.

Application Booklet containing detailed information on the Peace Corps program are available at the following MSU offices: Office of International Education, Room 108, Administration Building; and the Office of Vocational Education, Room 202, Administration Building.

Those wishing to apply are urged to seek consultation with the above offices. Although normal age limits are set at 18, other and retired persons will be accepted on the basis of their qualifications and purpose of the service.

By W. STANFORD McCANN

Around the World in Eighty Years

Around the world in 80 years: the story of the University of Michigan's involvement in international education, and its development into a university of international scope since the first foreign student received his degree here in 1898, nearly 10 years ago. MSU has developed programs to provide service and training in more than 70 countries.

Our accompanying maps and pictures document this eventful journey of the Carnegie Institution of Washington that has served the University for 100 years. The Institute of International Education, founded in 1919, has played a vital role in the development of our nation's public and private universities.

China Has Own MSU Village

By KEVIN YOUNG

MSU was not on the mainland of China when it became one of the first universities to establish an educational base in Taiwan, capital city of Formosa, and the other in Shanghai, central China. In Taiwan, the University's facilities are located in Taipei, the island People in the Village call "Hills." And in Shanghai, the University's facilities are located in Taichung, halfway down south Taiwan.

According to Dr. Maurice P. Perkins, director of agricultural education and training programs, the University is charting its own role in the serious problem of short-range training to graduate scholars abroad on their return to their countries. The training is designed to help them understand new techniques and facilitate their return to their countries. The training will be given in Taipei and Shanghai.

Seminars Help Internat. Relations

The University's international programs have been designed to convey the message of peace and understanding to other nations. MSU has been actively involved in programs of all types around the globe to help the development of national programs abroad. The Seminars for World Leaders are sponsored by the International Development and Education Administration. The seminars are designed to help the leaders of foreign nations understand the philosophy and resources of the University of Michigan.

For example, the Peace Corps was established in 1961 to promote international understanding and to foster goodwill and cordial relations among the people of the United States and those of other countries. The Peace Corps provides opportunities for American men and women to share their skills and knowledge with people of less developed countries and to become aware of the people and cultures of the world. Peace Corps volunteers are assigned to a variety of projects in a wide range of fields, including education, health, agriculture, and community development.

The Peace Corps has been active in over 150 countries around the world, providing opportunities for American volunteers to gain valuable experience working in different cultural contexts. Peace Corps volunteers have contributed to the development of local communities and have brought new ideas and technologies to the regions in which they serve. The Peace Corps has also had a significant impact on the personal growth and development of its volunteers, providing them with valuable skills and perspectives that they can carry with them throughout their lives.

The Peace Corps was established to promote the goals of both the United States and the host countries, and to build bridges of understanding and cooperation between the two nations. Peace Corps volunteers work closely with local leaders and community members to achieve their goals, and they are expected to contribute to the development of the host communities in which they serve.

In addition to working directly with local communities, Peace Corps volunteers are also expected to contribute to the United States government's overall foreign policy goals. The Peace Corps is a key element of the United States government's strategy to promote stability and development in countries around the world. By working with local communities, Peace Corps volunteers help to promote democratic values and institutions, and they also help to build the economic and social infrastructure of the host countries.

The Peace Corps has been successful in achieving its goals, and it has contributed significantly to the development of many countries around the world. However, the Peace Corps is not without its critics, and there have been concerns raised about the effectiveness of its programs and the impact they have on local communities. Despite these concerns, the Peace Corps continues to be an important part of the United States government's strategy to promote stability and development in countries around the world.
Does Costa Rican Research Projects

Deutschmann

The Campus University of the United States, only college organization in the U.S. to hold model UN sessions throughout the school year, is planning to fill existing vacancies in the 90 member legislative centers at Ohio State, the University of Illinois and other universities.

Secretary General Nirimal Singh, graduate student from India, President Walter Shab, junior from Iraq, Vice President Mike Krueger, graduate student from Austria, and Treasurer John Gardner, also a graduate student, will be returned to their posts.

The university is one of the last to participate in the AFS program, maintaining a student to student program abroad for research and writing on political, economic, and social development in Costa Rica since 1956.

The University of Costa Rica is a constituent of the AFS program, providing its students with the opportunity to study and reside in Costa Rica.

The program, which was scheduled to return to its regular schedule, has been granted an 18-month leave of absence.

The university is also considering the possibility of extending the program for another year.

Dr. John T. McNelly, coordinator of the AFS program, said that the program has been successful in providing students with an opportunity to study and reside in Costa Rica.

The university is also considering the possibility of extending the program for another year.

'Revolution'

(continued from page 1)

The project's objectives also include the development of an extensive program of foreign aid and assistance. The project is expected to provide assistance in the form of science, education, and technical assistance.

However, the project is not limited to the development of new programs. The project also seeks to enhance the existing programs. For example, it will support the development of existing programs in Latin America, Asia, and Africa.

The project is expected to result in the establishment of a new public administration and management program, which will be supported by the project.

The Headquarters for the project will be located in Washington, D.C., and will be responsible for the coordination and implementation of the project.

The project is expected to have a significant impact on the development of new programs and the enhancement of existing programs. It is expected to provide assistance to a large number of countries, and to have a positive impact on the development of new programs.

Peace Corps

Established by the Peace Corps Act of 1961, the Peace Corps was created to offer American students and professionals an opportunity to contribute to the development of less developed countries and to gain a greater understanding of the world and its people. The Peace Corps is a volunteer program that provides American citizens with the opportunity to serve as volunteers in developing countries, helping to bring new ideas and skills to these nations and sharing the best of American values and culture. Peace Corps volunteers are assigned to projects in their area of interest and expertise, working closely with local communities to implement development projects benefitting both Americans and the host countries. The Peace Corps is a unique and exceptional experience that allows volunteers to make a meaningful contribution to the world while gaining valuable skills and experiences that can last a lifetime.

New Language Center To Aid Foreign, American Students

A new agency was made up to aid the foreign students in their studies. The Center was established to provide a place where foreign students could come together to learn about American culture and to learn the English language. The Center is located in a building on the campus of the University of Nigeria, and it is open to both American and Nigerian students.

The Center offers a variety of programs and services to help foreign students succeed in their studies. These include language classes, cultural workshops, and social events. The Center also provides a place for foreign students to socialize and make friends with other students from different cultures.

The Center is staffed by professionals who are experienced in working with foreign students. These include language instructors, cultural coordinators, and social workers. The Center is committed to providing high-quality services to help foreign students succeed in their studies.

The Center is located in a building on the campus of the University of Nigeria, and it is open to both American and Nigerian students.

Revolution

Mission Statement

The mission of the Michigan State University Language Center is to provide a comprehensive language program for foreign students and for American students. The Center is committed to providing high-quality language instruction and cultural enrichment activities to help students develop language skills and cultural awareness.

The Center offers a variety of language programs, including intensive English language courses, intensive foreign language courses, and courses in cultural studies. The Center also offers cultural enrichment activities, such as music, dance, and film workshops.

The Center is located in a building on the campus of the University of Nigeria, and it is open to both American and Nigerian students.

MSU can be an international university if it takes advantage of the opportunities presented by the greater Northeast. The EXPANDING international opportunities for education of an enlightened citizen, expansion of knowledge between universities, training opportunities for international scholars, and improving technical cooperation all benefit the MSU student.

Welcome is the revolution, a revolution of international imagination. MSU's revolution is the beginning of a new era of internationalism...

Student Motives
In the Cold War
Vocational Training
No Longer Enough

By DAVID WILEY
State News Staff Writer

Why did you come here? Why do they want you to stay? The questions are
always the same: Where are you going? What do you want to do with your
life? What do you want to be when you grow up?

But today's college student is not like the college students of years past. Today's
student is more likely to ask the question: What is the meaning of higher education?

To further my education. To obtain a good job. To make money. To gain
knowledge. To discover the world. To have an enjoyable life. To gain prestige.

These are just a few of the motives that college students have. These motives
are not the same as they were in the past. Today's college student is more likely
to be motivated by the desire to obtain a good job, to gain knowledge, and to
discover the world.

To obtain a good job with only a high school education. To acquire a skill that
will enable them to do for themselves. To have a lucrative career.

These are some of the reasons why today's college student is more likely to
be motivated by the desire to obtain a good job. Today's college student is
more likely to be motivated by the desire to obtain a good job because the
world is changing and jobs are becoming more specialized.

Today's college student is more likely to be motivated by the desire to gain
knowledge. Today's college student is more likely to be motivated by the
desire to gain knowledge because knowledge is power. Today's college student
is more likely to be motivated by the desire to gain knowledge because
knowledge is the key to success.

Today's college student is more likely to be motivated by the desire to
discover the world. Today's college student is more likely to be motivated by
the desire to discover the world because the world is changing and
opportunities are endless. Today's college student is more likely to be
motivated by the desire to discover the world because the world is
changing and opportunities are endless.

Today's college student is more likely to be motivated by the desire to
have an enjoyable life. Today's college student is more likely to be motivated
by the desire to have an enjoyable life because the world is changing and
opportunities are endless. Today's college student is more likely to be
motivated by the desire to have an enjoyable life because the world is
changing and opportunities are endless.

Today's college student is more likely to be motivated by the desire to
gain prestige. Today's college student is more likely to be motivated by
the desire to gain prestige because prestige is power. Today's college
student is more likely to be motivated by the desire to gain prestige because
prestige is power.
AUSG Heads
Organizations

200 Student Groups Fill Service, Honorary Needs

Student governing bodies on campus are a complex network of committees, boards, and student organizations. There are about 300 student groups on campus, each with its own purposes and membership criteria. These organizations are affiliated with professional interest areas, campus leadership, and intercollegiate organizations.

The purpose of the Student Activities Board (SAB) is to provide a forum for student expression and organization. The SAB is composed of students from various organizations who are elected by their respective organizations. The SAB meets regularly to discuss issues and concerns related to student activities on campus.

The University Senate is the representative body of the student body. It is composed of representatives from various student organizations, including the Student Government Association (SGA), the Inter-Fraternity Council, the Panhellenic Council, and the Inter-Sorority Council. The Senate meets regularly to discuss issues and concerns related to student affairs on campus.

The Student Government Association (SGA) is the official representative body of the student body. It is composed of representatives from various student organizations, including the Student Senate, the Inter-Fraternity Council, the Panhellenic Council, and the Inter-Sorority Council. The SGA meets regularly to discuss issues and concerns related to student affairs on campus.

The Inter-Fraternity Council (IFC) is the representative body of the interfraternity organizations on campus. It is composed of representatives from various interfraternity organizations, including Alpha Sigma Phi, Alpha Tau Omega, Beta Theta Pi, Sigma Chi, and Zeta Phi Beta. The IFC meets regularly to discuss issues and concerns related to interfraternity affairs on campus.

The Panhellenic Council (PC) is the representative body of the sorority organizations on campus. It is composed of representatives from various sorority organizations, including Alpha Xi Delta, Delta Sigma Theta, Delta Phi Epsilon, Gamma Phi Beta, and Kappa Alpha Theta. The PC meets regularly to discuss issues and concerns related to sorority affairs on campus.

The Inter-Sorority Council (ISC) is the representative body of the inter-sorority organizations on campus. It is composed of representatives from various inter-sorority organizations, including Alpha Xi Delta, Delta Sigma Theta, Delta Phi Epsilon, Gamma Phi Beta, and Kappa Alpha Theta. The ISC meets regularly to discuss issues and concerns related to inter-sorority affairs on campus.

The Student Services Hub of Activities, Organizations, personal and social adjustment. The counseling center provides a setting in which the counselor and the college student can discuss the counseling relationship, and problems which may be related to personal, social, or academic issues.

For students seeking information about activities, academic advisors, and counseling services, the Counseling Center also maintains an occupational library where students may read about the duties of various occupational groups and the qualifications required to fill those positions.

The Counseling Center is located in the East Circle Drive, Room 214. Students are encouraged to visit the center at any time of the day or evening.

The Counseling Center provides a range of services to students, including:

- Counseling services to help students deal with personal, social, and academic issues.
- Information about activities, organizations, and student services on campus.
- Information about occupational opportunities.
- Information about the duties of various occupational groups and the qualifications required to fill those positions.

The Counseling Center is open to all students, and students are encouraged to visit the center at any time of the day or evening.

Library - Student Aid

770,000 Volumes

With a rapidly growing collection of some 1,000,000 volumes, the University of Michigan Library is well equipped to serve as well as support the teaching and research programs of the University.

In order to bring the major areas of knowledge to the attention of the students, the University Library plan has been established. The divisions are humanities, science, social science, education, and science. Each room is staffed by librarians who are specialists in their fields.

APPROXIMATELY 1,000 student periodicals and reprints published by the United States government publications. With the exception of a few cases, these periodicals are kept in a separate collection from the current material and is readily accessible to students. A specialist in government documents is on duty at all times in the room to give assistance whenever needed.

DEPARTMENTAL libraries are maintained by the library authorities responsible for the department. These libraries include the libraries of the University of Michigan, the Medical School, the College of Engineering, the School of Agriculture, the College of Literature, Science, and the College of Arts and Sciences. Each divisional library is staffed by librarians who are specialists in their fields.

THE LIBRARY is a favorite place of many students who find its quiet and spacious facilities ideal for term paper writing, but subject research or just studying.

What is Faculty

The complexity of a large school is a challenge. "But we have big business, big industry, big government," Miller says. "We have big problems to deal with, but we have big solutions. We have big opportunities but we also have big responsibilities."

Miller refers here to the great complexity of modern society, and to the need for a well-educated and informed citizenry. He believes that the university's role is to help students develop the skills and knowledge necessary to function effectively in a rapidly changing world.

"We must now teach people to live in a technological age," Miller says. "We must teach them how to think critically, how to evaluate information, and how to make wise decisions."

The library is an important resource in this goal. The collections are designed to support the teaching and research needs of the faculty and students, and to provide access to the latest information in all fields of study.

"We have a well-trained staff who are dedicated to helping students find the information they need," Miller says. "The library is a vital part of our campus community, and we are committed to providing excellent service to our users."

Campus Religion - How Important?

Clergymen Note Student Apathy

Writing in the past year or two, there have been several articles written in various
sources concerning the part religious orga-
nisms are taking in the college
student. In each of the articles con-
cerned what a religious revival is being
planned, it has been pointed out that
Church attendance and participation
in other religious activities are increas-
ing and there is a strong undercurrent
of religiously alert students.

However, there are no differences
noted in the number of students who are
wholeheartedly religious. Many students
could consider college from where they
were forced to attend.

"Now that they are free to do the things they choose, church attendance is
an expendable item and there is a couple of hours of extra sleep on
Monday morning looking more attractive.

Campuses reflect rather than lead the culture, and there is a whole problem of church
attendance in religious undisci-
pline.

Too MANY people use reli-
gion in a selfish way. It's a great tragedy that religion is not seen in terms of selflessness and faith.

The majority of the clergy
in the nation are now toward the
age of retirement, and the younger
ones are not being replaced in the
Church.

A lack of religious dir-
rections felt that there was a change in the church. It is not
being replaced by the church, but
not necessarily in the sense of a revival.

A revitalization appears to be taking place, but it is
not necessarily in the sense of
a spiritual development.

The regular feature of Cath-
olic Students is the weekly
Mass, which is attended by
some students, but I wouldn't be
sure of the number involved.

Curiously enough most of the
clergymen who were inter-
viewed did not appear particularly
enthusiastic about this religious
apathy.

'Co-ops' Maintain Economical Living

Economical living, household management, and group living are among the various duties which help make the residence halls a truly unique experience at MSU. The co-op system, of which there are seven multi-family houses in East Lansing, originated in 1839 with Hedrick House and was followed in 1940 by Elsworth House. There are presently over 350 students living in these co-ops, ranging from 18 to 52 students per house. 

Blind students are provided through the household management, performed by the blind, with the supervision of the independent living council and the cooperation of the student welfare department. These services include reading to the blind, recording for the blind, typing, and assisting students at registration.

Organizations

The purpose of the Varsity Club is to provide a high standard of living for the students and faculty, and to promote the interests of the college.

Student organization at Michigan State which welcomes all Episcopal students and provides services and activities of All Saints Parish. It officially represents the Episcopal church on campus and is thus designed especially for Episcopal students annually sponsor a spring football tour to Ohio. The social side of cooperative living is not neglected, yet another is its organization. Each house usually has a term party during each term along with parties and picnics.

HORSEBACK RIDING is one of the many activities of SOC students. This sport is available to those who desire them. Canterbury Club is the Episcopal student organization at Michigan State which welcomes all Episcopal students and provides services and activities of All Saints Parish. It officially represents the Episcopal church on campus and is thus designed especially for Episcopal students annually sponsor a spring football tour to Ohio.

University Lutheran Church & Student Center

NATIONAL LUTHERAN COUNCIL
DIVISION & ANN STREET (2 BLOCKS NORTH OF BIRKLEY BALL) Rev. Robert Moreland, Minister

Student Od-Campus (SOC) is an organization of off-campus students who seek to promote unity among university students who live off-camps. Its purpose is to assist those students in maintaining a high standard of living, to promote the interests of the college, and to foster a spirit of cooperation and residence hall (1857-1919), the first building erected for the use of educational purposes. This building originally served as dormitory costs, and must meet any other problems that might arise. The Co-ops participate actively in the intramural athletic league, play on other co-ops, and with the independent living council. These Cooperative traditions are passed on from house to house, and each has a house manager elected from the small group elected from the living units at MSU.

The co-op system, of which there are seven multi-family houses in East Lansing, originated in 1839 with Hedrick House and was followed in 1940 by Elsworth House. There are presently over 350 students living in these co-ops, ranging from 18 to 52 students per house.

University Theatre Sets 1961-62 Season

The University Theatre's 1961-62 season will open with a feature-length movie, "Born Yesterday," starring Broderick Crawford and Jessica Tandy, and directed by George Cukor. The play, which is being shown in honor of the late President Harry S. Truman, will run from September 17 to September 23.

The season will continue with a variety of plays, including "The Diary of Anne Frank," "Death of a Salesman," and "The Glass Menagerie." The plays will be performed by the University Theatre's resident stock company, which will be directed by Don Stewart. The season will conclude with a musical production, "The Music Man," which will be directed by Leonard Falcone.

University Theatre

"Marching Band Plans 86th Year"

The Marching Band will take to the field again this fall, as they have since 1925. The band, under the direction of Bill Moffett, will be performing in a variety of venues, including stadium games and outdoor events.

WMSB Presents Cultural And Information Programs

From William Shakespeare to Edward Albee, from a Purcell opera to Richard Rodgers, "his "Great Composers" series.

At 7 p.m., Wednesday October 17. A special program featuring the graphic artist, will return with "Great Composers" series.

Wednesday night will again be "Face to Face" with Marcello, a distinguished German artist. The program brings Mr. Eleazar Moses Rabinovitch, professor of Art History. Dr. Rabinovitch will discuss the "Significant Persons" series on the life of Michelangelo. This series will continue to bring together concert shows for discussions of important subjects.

During the coming months WMSB will have the opportunity to produce a series of programs in the "Significant Persons" series. These reports will be broadcast for the purpose of promoting the encuentra with the problems of contemporary art and the understanding of the individual who makes up the individual. The series will bring to the public the works of such eminent persons as the 20th-century American composer, Aaron Copland, and the great Russian composer, Mikhail Glinka. The series will also include programs on important subjects, such as the life of Michelangelo and the work of the great sculptor, Donatello.

The "Significant Persons" series is produced by the International Television Federation, which produces television programs in Canada, Australia, and the United States. The series is designed to show viewers the work of great masters of the past and the present, and to promote an understanding of the problems of contemporary art.

The "Significant Persons" series is one of the many programs produced by WMSB which are presented on national television. These programs are designed to promote an understanding of the problems of contemporary art and to provide a means of communication between the public and the artists who work in this field.

1961 Summer Circle Theatre Proves Successful

For those students who were here last summer, the Summer Circle Theatre is in good memory. For those new to the campus or those who weren’t here during the summer season, it is something in brief.

Summer Circle Theatre was a ‘brand new’ outdoor summer theatre located in the southwest corner of the University of Michigan campus. The theatre was the forerunner of the present day University Theatre. The theatre was constructed to provide the students a place to enjoy the arts. The theatre was constructed to provide the students a place to enjoy the arts.

The theatre was constructed to provide the students a place to enjoy the arts. The theatre was constructed to provide the students a place to enjoy the arts.

An explosion will hit Michigan State University, but campus planners are prepared for it. The great wave of students expected to hit the university—23,500 by 1970—will demand a major construction program at Michigan State.

Campus planners have been preparing for the boom by looking ahead and pinpointing where new buildings and facilities will be placed. They want to avoid a haphazard arrangement of buildings and roads.

The current master plan calls for mass construction of buildings according to school and land use integration of buildings with parking, roads and walkways are also considered.

Michigan State's basic layout is simple, Lautner said, but a tremendously expanded campus will surpass it. "We have an excellent planning picture of the future," he said.

The outline guiding campus growth has moved the center of the campus south of the river for the first time. By 1970 the site of the engineering building will be set on a few feet west of the tower. This step to move all engineering education buildings to the center of the campus south of the river for the first time is being attempted at the present time with the engineering building being constructed next to Anthony Hall on Shaw lane in the first step to move all engineering education buildings to south campus. Already the agricultural engineering building is on the opposite side of Anthony. Eventually an experimental engineering wing will appear next to the new experimental building.

Each campus does its planning for its own good, but the Michigan State planning is the subject of widespread interest. The university is an important institution that has brought the future to many people. The future is here. It's in the planning for the future of the university.

An old farm lane had been constructed into the campus. There was an arbor in the area along the present Grand River avenue between Berkey Hall and Marsden dormitory. The roadway that eventually evolved into Circle drive was forming.

A crescent, long since disappeared, extended north from the university, and the river lay back of where the museum now stands. The site was that of the botanical gardens, now a part of the university.

By 1941 the athletic fields were laid out, and the entire area south of the river was developed. The area where the museum now stands was then that of President John Hannah's home, and the area where the intramural athletic fields are now on the east side of the museum.

The university has developed a new athletic area, the sports facilities, to replace the old athletic area.

Lautner said, "We have a good planning picture of the future. We have a good planning picture of the future. We have a good planning picture of the future."
Planners Ahead of Student Growth

(continued from page 11)

the education building when the temporary classrooms are completed. A south campus library is proposed across from Shaw Hall where the dairy barns now stand. Additional classroom facilities are planned for south campus in a new building east of the agricultural engineering and south of the proposed library. Also in the same area an electric power plant is to be built. A computer center is likely to be built south of agriculture and engineering on Farm lane.

Two academic buildings were proposed at the site of the north campus power plant and south campus would accommodate the needs for railroad tracks. This would allow the railroad to be built sooner. Power Plant road will extend northwest from the proposed library. A new classroom building on north campus and a dormitory for married housing will be on the west side of the campus. A new dormitory will be on the east side of the campus.

The new campus library will be on the north side of the river. It will be a four-story building and will be the new engineering building in the same area extending out from 1397.5. This new building will include a new classroom building on north campus and a dormitory for married housing will be on the west side of the campus. A new dormitory will be on the east side of the campus.

The new campus library will be on the north side of the river. It will be a four-story building and will be the new engineering building in the same area extending out from Hope road. ### Interested in International Affairs? Here Are Organizations for You

Two student organizations offering specialized programs in international affairs are open to the public.

1. **International Relations Club**
   - Offers speaker meetings on topics such as the impact of the U.S. on foreign policy and the role of the foreign student in American affairs.
   - IRC membership is open to students majoring in international relations, political science, and international economics.
   - IRC members participate in a delegation to a foreign country and meet with 20 MSU staff members.
   - IRC members conduct an intensive series of meetings on international affairs and attend conferences on future careers.

2. **D-Phi-Epsilon**
   - Offers a reorganization program for international affairs.
   - Members and sponsors organize meetings and a program of international relations.
   - The organization is affiliated with the Foreign Policy Association and the World Affairs Council.
   - Members conduct an intensive series of meetings on international relations and attend conferences on future careers.

### Lansingites

#### Open Homes To Students
A group of Lansing families will open their homes to MSU students in October. The hospitality committee of the Lansing World Affairs Council, sponsored by the Greater Lansing Community Foundation, will select the homes in September.

- **Mentioned homes:**
  - Fish nets
  - Bedspreads
  - Drapes
  - Fish nets
  - Decorative Japanese kites
  - Grass floor mats or room dividers

Scholarships Available to Students
With Good Scholastic Record, Need

If you are thinking seriously about the possibilities of a college education at MSU, it might be well to turn some of the thoughts of the scholarship trend of the past few years. For several years, there has been a greater interest in the need for scholarships to financially or otherwise aid a person who would be unable to afford college without aid. Scholarships are being awarded to students on the basis of good scholastic standing, and it appears that this trend is increasing.

3.000 scholarships are being awarded this year to approximately 2,000 students. The amount of money or a waiver of fees to the recipient can maintain a college education without such aid. Scholarships can be renewed for many awards available to be considered, they must have the same family financial need. A scholarship is a grant to financially aid a student to college.

TO BE ELIGIBLE for these scholarships, a student must rank in the top five per cent of the graduating class and have at least a 2.6 average by the end of the second semester, or a 2.8 by the end of the sophomore year. They must also have a B average or better at the end of the semester, or the last half year of work in a Michigan public community junior college.

A SCHOLARSHIP is a grant of money to provide support in a scholastic endeavor. To qualify for a scholarship a student must have a high scholastic average. The amount of money granted is based on the number of students available for the amount of money available. The amount of MSU scholarships usually do not exceed the amount of the student's general fee to the full amount of the MSU Distinguished Scholarship.

The amount of MSU scholarships varies from a portion of the general fee to the full amount of the Distinguished Scholarship. The majority of grants are to be used for college expenses, with long term benefit. The federal loan program is designed to assist students with the cost of attending college. A federal loan can be granted. The MSU Student Loan program provides small amounts for short periods to meet emergency needs. Only full time students are eligible and must maintain a 3.0 all college average. A freshman must rank in the top quarter of his high school graduating class. A student must also have a scholarship and be a resident of Michigan to be eligible and must maintain a 3.0 all college average. A freshman must rank in the top quarter of his high school graduating class.

For the Federal loan program, the recipient can maintain a college education without such aid. Scholarships can be renewed for many awards available to be considered, they must have the same family financial need. A scholarship is a grant to financially aid a student to college.

The field of scholarships with the Michigan Department of Public Instruction, the state and the college. These requirements do not apply to the MSU Alumni Distinguished Scholarship for entering freshmen. The majority of the awards are available to Michigan residents. At MSU per the National Merit Scholarship. They must also they have a B average or better at the end of the semester, or the last half year of work in a Michigan public community junior college.

A second requirement which a student must fill in order to qualify for a scholarship at MSU is to fill in a financial statement to the university. This is especially important in the awarding of a scholarship. Most scholarships awarded are on the basis of need. A student is becoming more important in the awarding of scholarships to financially or otherwise aid a person who would be unable to afford college without aid. Scholarships are being awarded to students on the basis of good scholastic standing, and it appears that this trend is increasing.

Third, there has been a greater interest in the need for scholarships to financially or otherwise aid a person who would be unable to afford college without aid. Scholarships are being awarded to students on the basis of good scholastic standing, and it appears that this trend is increasing.

Welcome Week Activities Start for Freshmen, Transfers

Traditional "Welcome Week" activities will mark the start of the academic year. There will be a full schedule of special convocations, seminars and tours to help new students become acquainted with the University.

Enrollment and registration will be centralized Monday through Thursday, Sept. 25-28, in the Auditorium Building and by the combined registration centers. The transfer student's enrollment will be handled in the same manner.

Checks start Thursday, Sept. 28, when new students can register for classes. These freshmen who have not attended the summer continuing program will have priority.

The climax of "Welcome Week" will be President John A. Hannah's welcome to all new students at 5:30 p.m. Sunday, Sept. 30, in the Auditorium. Closing remarks will be made by Dean of Men's Administration to the Men's Intra­

the appearance of the band under the direction of Dr. Leon­

mural Building and by the com­

4:30 p.m. Sunday. Those freshmen who transfer students during their registration conference for the summer.
