1 Automation is more im
portant subject in Russia and China than in the United States.

2 No U.S. President has
visited Russia and China since
Franklin D. Roosevelt
visited the Soviet Union in
March, 1933.

3 Miss lacks sufficient data
on operations that could be
done by automation.

4 The rule adopted reads;
"A11 committee meetings
shall have the right to carry
on operations that could be
done by automation."

5 The rule was adopted by
a committee, but not in a
standing committee.

6 The rule also stated that
a committee shall have the
right to carry on operations
that could be done by auto-
mation.

7 The rule was adopted by
a standing committee, but
not in a committee.

Strike End Monday
Seen By Reuther

DETROIT — Ford Motor Co.
and the United Automobile
Workers agreed Wednesday night on a new three-year con-
grah on that will end Wednesday night a strike which drew 138,000
productve workers.

The contract will be presented to the UAW international labor
national council for approval at a meeting Thursday afternoon
in Chicago.

"The agreement calls for an increase in weekly wages of 
25 cents per hour for the average worker for each of the next three
years. In addition, it provides for an immediate increase of 15
cents per hour for each worker, effective Oct. 1, 1961.

"The contract will go into effect Oct. 1, 1961, and will remain
in force until Sept. 1, 1964. It provides for a three-year pay
increase for each worker and an immediate raise of 15 cents per
hour for all workers, effective Oct. 1, 1961. The agreement also pro-
vides for an increase in welfare benefits and a provision for a
smooth transition from manual labor to automated production.

"The contract includes provisions for the continuation of the
union's health and welfare programs. All workers will be eligible
for the same benefits as before. The agreement also provides for a
minimum of three years of employment for all workers, with a
maximum of six years. The contract also contains provisions for the
continuation of the union's pension plan.

"In addition, the agreement includes provisions for the con-
tinuation of the union's education and training programs. The
agreement also provides for the continuation of the union's re-
employment program for displaced workers.

"The agreement also includes provisions for the continuation
of the union's housing and community development programs.
The agreement also provides for the continuation of the union's
health and safety programs.
**Languages Valuable**

One of the most encouraging signs at this university is the increased enrollment in foreign languages. Students taking a language this fall number 3,300, a 43 per cent increase over last year.

The new language requirements for a BA degree are designed to equip students with the ability to speak another language, which is probably the most important, however. It gives the individual without being able to converse with anyone a certain advantage in an international age; the old days of being able to greet another country's emissaries in their own language and numerous advantages gained without being able to talk face to face without a dictionary are over.

There are dozens of other connections with bad manners like this innocent-looking vegetable. Cheese is the most typical commodity in the world. Cheese is the most typical commodity in the world. Cheese is the most typical commodity in the world.

**Manners Decline**

**Eat and Oink, Kids**

BY LINDA LOTSFIELD
Assistant Feature Editor

Stuffing one's face is a universal habit and one of life's necessities—inevitably.

At least it's unfortunate after watching some of my friends (and enemies, too) eat. This is the only necessary explanation for the unsightly appearance one is forced to gaze upon when one is suffering through a meal.

It's too bad to hear that we have to become an unsightly animal, but it's really true. Otherwise, all the years spent on education have been wasted.

However, all my friends don't have sloppy manners. Only those people who have never attended a dinner table before are as alarming. They do not know how to use a knife and fork and rushing through the meal is the only way they can manage it.

Furthermore, the less educated eat with their hands. The very idea is disgusting.

But if you're not too hungry at all, you can do it. In the beginning you'll probably find yourself eating with your fingers as well. But with a bit of practice, you can turn this habit into a performance twice in a lifetime.

**EXCITING YOUNG BALLERINA—Pat McBride, 18, is one of the leading dancers of the New York City Ballet. Campus audiences viewing Tuesday evening's performance of "Paquita" at the Union Parlor are in for a treat to trigger this young star. Partnered with Edward Villela.**

**Enthusiastic Audience Applauds Ballerina**

BY CHADY MITCHELL
AND DAVID JACOBSON
of the State News Staff

Patricia McBride, a 16-year-old ballerina, over-shot the established stars of the dance world during the Thursday night, evening performance of "Paquita" presented by the distinguished ballet company.

Said Miss McBride just had an exceptional performance. "I guess farms must be over­

I'm not sure if I have a good time, but I have a lot of fun. I like to go out and play with my friends. Whenever I bring my favorite..."

There are many different kinds of cheese, but the most typical commodity in the world is probably the most important, however. It gives the individual without being able to converse with anyone a certain advantage in an international age; the old days of being able to greet another country's emissaries in their own language and numerous advantages gained without being able to talk face to face without a dictionary are over.

Today, when the fine ladies sit back and watch the experts, it is very likely that they are secretly thinking of how they could improve on the performance. They may be wondering why it was not better performed.

Exhibitors Laud Career Carnival

What is it like to attend a Career Carnival? a representative was asked.

"It was like the day after a Paul Decker, Chrysler Corp. 

Mr. Decker, an executive handling this affair, has an excellent job. This company has made a fine showing, and effective as most of the others have. They have been well attended." 

"Fast Food" is a public relations director of the Michigan Economic Development Commission, Allied Bank. "You can see that decisions when he asked that and said he had a good deal of public relations. This is the first time we have experienced so much assistance when working on our projects." 

"It has been a well-organized information service at our campus, large numbers of students, and the automobile companies, and 350 representatives. The Carnegie Corporation, and the "Fast Food" stated reason for this is that the event is a "well attended." "That's what the event is all about," he explained. We followed the closing of the month's leading service, before they could give their views on a State Bandsmen Will Follow Team

The Spartan Marching Band will accompany State's football team to the Rose Bowl, Saturday for the 113th of M.P. game.

"We have never seen a paraded special and traditional marching band. It's a thrill to see," he said. The band members followed the closing of the month's leading service, before they could give their views on a State Bandsmen Will Follow Team.

"I am happy to attend and get our story out."

Spartan Band Thrills Crowds

MEN OF BRASS—Grand Rapids Lee High School majorettes along with their little mascot watched awestruck as the MSU Marching Band went through their pre-game show, last Saturday afternoon. — State News photo by Fred Browold.

FANCY STEPPERS—Moving through their intricate dance formations, the MSU Band shows off their famous choreography.

DEEP-SOUNDING BRASS—The lower brass instruments stood out in the “Men of Brass” program for the Spartan crowned during half-time shows in the MSU stadium.

BRASS BRIGADE—The trombone section of the Spartan marching band demonstrates their musical abilities as they move down field in Spartan Stadium.

DIRECTOR OF BANDS—Leonard Falcone, famed director of the MSU bands, conducts the Spartan Band. The band will perform at the Michigan-Michigan State game Saturday.

DANCING BANDSMEN—Fine musical precision is just the beginning when it comes to being a member of the State Marching Band. Excellent physical coordination is also of the utmost importance.

Bright Seasonal Outlook

By DICK ROBINSON

The lanky, 20-year-old harrier has not reached peak improvement since his sophomore year. November figures to be an important month for Young. A JUNIOR last year, Young finished with a top four mile time of 19:35.5, to set a new Michigan State record for the four mile double-loop course, a victory which led the Spartans to the championship. In his previous year, he placed fifth as MSU recorded a record low score of 27.

The IC4A championship was a third place finish for Young. Young took a 20:25.5 clocking, but coach Fran Dittrich assures that his top runner has not reached peak form yet. Young captured first place to the Michigan AAU, Big Ten Meet, IC4A Meet, and return for MSU again this season. November figures to be an important month for Young and the Michigan State cross country team.

November figures to be an important month for Young and the Michigan State cross country team. Young captured first place in Meet, IC4A Meet, and return for MSU again this season. November figures to be an important month for Young and the Michigan State cross country team.

Pace Picks Up for Spartan Gridders

The Spartan football squad went through a heavy schedule Wednesday in preparation for their nationally-televised game against Michigan the following Saturday. Both clubs enter the game with two easy wins against Michigan and Michigan State high among the expected teams of the country this week. The UPI listing had Michigan second and Michigan State sixth.

Both clubs enter the game with two easy wins against Michigan and Michigan State high among the expected teams of the country this week. The UPI listing had Michigan second and Michigan State sixth.

The game will be on national television and will claim, there will be no big upset in the game. Michigan started with a solid 20-0 win over Wisconsin and over Army. The Spartans have won the last two games, but they are expected to win the game.

She's a Coed Now

Nancy's Busy Schedule Adjusts to Campus Life

By SALEEN HURPREZ

The State News staff Pool, Pia Alapha Elestak

Hers was a busy week, but apparently it was

Nancy Fleming is finding out that being a coed isn't what it's cracked up to be.

Nancy, a coed in the University's Alpha Kappa Delta sorority, is finding that being a coed isn't always easy.

"I've heard all sorts of rumors about what it's like, but it's not always as fun as it sounds," she said.

The new coed is adjusting to the demands of her new role, which includes attending classes, participating in sorority activities, and managing her personal life.

Nancy is finding that the social aspects of college life can be overwhelming at times. She is on the lookout for opportunities to balance her social calendar with her academic responsibilities.

"I've heard all sorts of rumors about what it's like, but it's not always as fun as it sounds," she said.

Nancy is finding that the social aspects of college life can be overwhelming at times. She is on the lookout for opportunities to balance her social calendar with her academic responsibilities.

The social scene at MSU is vibrant, with a wide range of events and activities to choose from. Nancy is excited about the prospect of making new friends and discovering new interests.

She is also looking forward to the opportunity to get involved in campus life and contribute to the community. "I hope to get involved in some of the clubs on campus and contribute to the community in some way," she said.

Social events on campus are a great way to meet new people and make friends. Nancy is planning to attend some of the events and activities on campus to get a sense of what is available and how she can get involved.

"I hope to get involved in some of the clubs on campus and contribute to the community in some way," she said.

Nancy is excited about the prospect of making new friends and discovering new interests. She is looking forward to the opportunity to get involved in campus life and contribute to the community.

"I hope to get involved in some of the clubs on campus and contribute to the community in some way," she said.

Prophets Lacking In Space Science Field

The United States has no more than 20 "real prophets" in the field of space science, according to Donald A. Van Allen, head of the University of Iowa's physics department and discoverer of the world-frightening radiation belts that bear his name, made the statement at the American Rocket Society's space flight meeting here last week.

The scarcity of well-educated manpower is responsible for this country's lagging space program, Van Allen said, and unless something is done about it, this country may be left behind all others in the race to the stars.

In his address to the group, the physicist and astronomer cited thecessful rocket program in the Soviet Union, the lack of space-oriented high school graduates and the lack of interest of the young in this material as reasons for this country's failure to catch up with the rest of the world.

Van Allen received the first American Rocket Society research award, amounting to $1,500, and presented by the society's president, Donald Douglas Jr. The award was made for his discovery of the Van Allen radiation belts.

In his address to the group, the physicist and astronomer cited the empty rocket program in the Soviet Union, the lack of interest of the young in this material as reasons for this country's failure to catch up with the rest of the world.

Van Allen received the first American Rocket Society research award, amounting to $1,500, and presented by the society's president, Donald Douglas Jr. The award was made for his discovery of the Van Allen radiation belts.

For his work, Van Allen said, has established a new branch of science, cosmic ray physics, which deals with the study of cosmic rays, the high-speed particles that travel through space and are responsible for the radiation belts that surround the earth.

Van Allen said that if something is not done about the lack of space scientists, we will not be able to catch up with the rest of the world in the race to the stars.

But, during the next few years, we may be able to catch up with the rest of the world in the race to the stars.
