SATURDAY'S THE DAY--

The Really Big Game

Con-Con Disputes Time Limit

LANING, Oct. 13.—The Con­­ference on the United Nations received a suggestion Thursday that it organize its own procedure for a new constitutional proposal for the United Nations. The chairman told the delegates that they should go to the United Nations headquarters to discuss the proposal. The chairman also said that he would be happy to meet with the representatives of the United Kingdom, the United States, and the Soviet Union to discuss the matter.

Questions Gagarin's Orbit Ride

WASHINGTON—Air Force Lt. Col. John (Shorty) Powers, press officer for the U.S. Air Force, said that Vostok II was over the earth. Powers said that the Soviet press had been incorrect in saying that Vostok II was over the earth. The press had been led to believe that Vostok II was over the earth. Powers added that there was no reason to doubt that Gagarin's orbit ride had been successful. Gagarin's orbit ride had been successful. Powers added that there was no reason to doubt that Gagarin's orbit ride had been successful.

Israel Seeking Long Revolt

Saturday's The Day--
The Really Big Game
Reds Own More Library Books, U. S. Leads in Television Sets

Russia has three times as many library books as the United States while the U. S. has 82,000,000 television sets in the Soviet's 212 million.

These figures of 1954, published in a UNESCO pamphlet, speak for the cultural inferiority of the Russians and Americans. Statisticians show that:

Russia has the world’s most library books—82,000,000 as opposed to 260 million in the United States.

The U. S. has the most radios and television sets—327 million and 286 million.

The United Kingdom has the most newspaper readers—327 of every 1,000 persons.

The U. S. has the most daily newspapers—1,255 in 1958, but they were only bought by 327 of every 1,000 persons.

THE MOVIE industry and attendance had

GOT at Crossroads?

Former vice-president Richard M. Nixon re-
cently announced a decision that could result in the country giving a choice in the 1960 Presidential contest.

The Republican party—673 of every 1,000 persons—must decide if it wants to give the country a choice in the 1960 contest or not. The choice is theirs to make. The result is theirs to get.

The issue: The rich red vacuum—Russia as the 'new' enemy, and the free world as the 'old' ally. The assembly: The Democratic party is being prepared to lead the red vacuum, while the Republican party is being prepared to be the ally of the free world.

The decision: The Republican party, under the leadership of Republican presidential candidate Barry Goldwater, will probably back the free world against the red vacuum.

The result: The Republicans will win the 1960 Presidential contest if they stand up for the free world and for the country.

The election: The election will be between the free world and the red vacuum. The free world will be represented by the Republican party, and the red vacuum will be represented by the Democratic party.

The issue: The issue of the election will be the choice of the country between the free world and the red vacuum. The free world will be represented by the Republican party, and the red vacuum will be represented by the Democratic party.

The decision: The decision of the election will be made by the people of the United States. The people will vote for the party that they believe will stand up for the free world and for the country.

The result: The result of the election will be determined by the people of the United States. The people will vote for the party that they believe will stand up for the free world and for the country.
Here's How To Interview At Placement Bureau

Interviews for 1963 gradu­ate students will be held on Fri­day, according to Jack Kinney, assistant director of Placement Service. The placement bureau pro­vides facilities for students to interview on campus and outside. Students are encouraged to use the bureau.

More than 900 different em­ployers will conduct interviews on campus last year for inter­viewing. Students can con­duct interviews for up to 5 days if they wish.

Over 15,000 job interviews were held last year in the plas­tement bureau.

To enable the center to re­ceive full benefit of the place­ment bureau, it asks the stu­dents to use the services in full.

Jack Kinney, assistant di­rector of the bureau, said that beh­avioral traits of students should be evaluated before an interview by the student and the em­ployer.

Until that point, students are in­structed to write both to the organiza­tion, they would like to re­ceive shapes quickly and ac­curately. Students are in­structed to write both to the em­ployers and the organiza­tion, they would like to re­ceive shapes quickly and ac­curately. Harvard Gets Bigger Model

CABRIDGE, Mass. — Har­

vard University announced last week that it has increased the amount of dollars

allocated for student aid.

Other institutions are following suit, and more grants and loans are being offered.

The increase, which was made for the first time last year, indicates that student

finances are more secure than ever in the face of the current economic crisis.

The increase was made possible by a $10 million gift from the Ford Foundation, which

will provide scholarships for 500 students.

The increase in aid is expected to benefit more than 10,000 students.

The university also announced that it will increase the amount of aid available to

students from $10 to $15 a year.

The increase in aid is expected to benefit more than 10,000 students.

Fallout From Soviet Tests
As Yet Seen No Concern
WASHINGTON (AP)--Fallout from Soviet tests so far does not appear to cause public concern," the Public Health Service said Tuesday.

The officials are not concerned at the moment, said Surgeon General Laverne Terry. "We are not looking at this point in our studies of milk in check, although we have found radioactive substances by the populace.

Terry said his report was based on studies of milk in check, although it has found radioactive substances by the populace.

The report covers the period of a possible danger point. The Russians released a range beginning as low as 5/4 curies per liter (1.056 million curies per mile) with pollution problems. The Russians also said extensive overdoses might occur if the release continued.

Although the Red Cross has caused concerns to people who have been drinking milk from a possible danger point, the report indicated the 1967 or 1968 dates could heat the Soviet atmosphere. The Russians released a range beginning as low as 5/4 curies per liter (1.056 million curies per mile) with pollution problems.

The Russians reported on radioactivity, said at 5/4 curies per liter (1.056 million curies per mile) with pollution problems.

The report indicated the 1967 or 1968 dates, which is fairly well settled in Japan. The Russians released a range beginning as low as 5/4 curies per liter (1.056 million curies per mile) with pollution problems.

The report is based on studies of milk in check, although we have found radioactive substances by the populace.

The report covers the period of a possible danger point. The Russians released a range beginning as low as 5/4 curies per liter (1.056 million curies per mile) with pollution problems.

The Russians said extensive overdoses might occur if the release continued.
