NURSES CLASS

A new clinical approach is the feature of the nursing curriculum for students who entered the program in the fall of 1961. Directed by Dr. Florence Kempf, the program replaces a traditional approach in the instructional pattern of the first two years.

The new curriculum provides for practical experience at two hospitals, one being utilized by the University of Michigan and the other hospital whose facilities are being utilized.

The first two years of the program will prepare students for the University of Michigan in the second year of the program, which will provide a foundation for advanced study which will be available to students who are interested in the position of general practitioner.

For this reason the program is designed for two years, the first two years of the program being preparatory to the University of Michigan in the second year. The program will be available to students who are interested in the position of general practitioner.
