De Gaulle Sees Early Peace In Algeria

PARIS—French Foreign Minister de Gaulle, speaking in Copenhagen Monday, said he was convinced "peace and security" were on the horizon in the troubled North African colony.

Mr. de Gaulle said he was "optimistic," adding that this was a result of "progress in the political and economic situation" in Algeria.

The Foreign Minister said he was also "optimistic" about the possibility of a "new political situation" in the country, where the two main parties, the Front de Libération Nationale and the Front Polisario, are currently locked in a bitter struggle for power.

Mr. de Gaulle said that the situation in Algeria was "not easy," but added that "the process of political dialogue" had been "very fruitful.

He also said that "the time for negotiations" had arrived, and that "the government" in Paris was "prepared to listen to the views of the Algerian people.

The Foreign Minister said that he was "optimistic" about the future of the country, and that "the government" in Paris was "determined to do everything in its power to bring about a peaceful resolution of the situation."
T o Hold April Conference. Ohio State University plan to exchange ideas.

Engineers To Hold April Conference Members of the student chapter of the American Society of Civil Engineers are at the North Central Conference to be held in Chicago. The purpose of the conference is to present the student engineers the opportunity to meet their colleagues from other schools. It is also planned to encourage the development of professional affiliations and to further the educational and social opportunities available to the members. The conference will include talks on current engineering topics, a reception, and a banquet. The keynote speaker will be a prominent engineer from the field.

For A Study Break...

Don't forget to stop by the SUNDAY SHOP for students and faculty. We offer a wide variety of snacks and drinks, as well as a selection of reading materials for those looking to relax and enjoy a good book. Whether you're catching up on your studies or just looking for a study break, we have the perfect atmosphere for you.

Service Has To Please
Both Students and Faculty

By S. D. Whewley
Of the State News Staff

The service of the library is a major factor in the academic success of students, according to Dr. Donald J. Bowersox, associate professor of Business Administration and Manager of the Michigan State University Library.

"The service of the library is a major factor in the academic success of students," Dr. Bowersox said. "Library service can make a difference in the quality of your work and the way you work." He added that the library is an important resource for students who need help with their research.

Bowersox is an auxiliary library service director at the University of Michigan and has been involved in the development of library services for over 25 years. He is interested in improving library services to better meet the needs of students.

Bowersox recently published a report on the state of library services in the United States, which found that libraries are facing significant challenges in meeting the needs of students. He noted that libraries are facing increased pressure to provide services to students, while budgets are decreasing.

"It's a difficult time for libraries," Bowersox said. "But we need to do what we can to help students succeed." He added that libraries need to find innovative ways to fund services and improve their operations.

Bowersox is a member of the American Library Association and has served on several committees and task forces. He is also a member of the Michigan Library Association and has served on the board of directors.

He has a Ph.D. in library and information science from the University of Michigan. He has served as a librarian at several universities, including the University of Michigan and the University of Illinois.

Bowersox is married and has two children. He enjoys reading and hiking in his free time.

Haller To Address Brazilian Club Today

Dr. Archibald Haller, associate professor of sociology and a Fulbright Fellow to Brazil, will speak at the Brazilian Club meeting to be held on February 6, in Parlor A, Union.

"The rapidly developing political and economic situation in Brazil must be analyzed and understood," Dr. Haller said. "I will try to explain some of the causes and effects of the political changes in Brazil and discuss some of the challenges that lie ahead for the country.

"I will also discuss some of the cultural similarities and differences between Brazil and the United States, and the importance of understanding these differences in order to effectively communicate with Brazilian citizens." He added that he will address some of the questions that are most important to students and faculty members.

Dr. Haller is a native of Brazil and has lived there for over 20 years. He is a member of the American Sociological Association and has published several articles on Brazilian culture and society.

He has a Ph.D. in sociology from the University of Florida and has served as a faculty member at several universities, including the University of Florida and the University of Texas. He has also served as a Fulbright Scholar in Brazil and has published several books on Brazilian culture and society.

He is married and has two children. He enjoys hiking and playing soccer in his free time.

Chem Engineers To Hear Oil Man

The Student Chapter of American Institute of Chemical Engineers will meet Wednesday at 7:30 p.m. in Parlor A, Union.

"The oil industry is facing significant challenges in the coming years," Dr. John Bowersox said. "I will explain some of the issues that the industry is facing and discuss some of the potential solutions.

"I will also discuss some of the opportunities that the industry is facing, and how we can help to shape the future of the industry." He added that he will address some of the questions that are most important to students and faculty members.

Dr. Bowersox is a native of Wisconsin and has lived there for over 25 years. He is a member of the American Institute of Chemical Engineers and has published several articles on chemical engineering.

He has a Ph.D. in chemical engineering from the University of Wisconsin and has served as a faculty member at several universities, including the University of Wisconsin and the University of Minnesota.

He is married and has two children. He enjoys hiking and playing soccer in his free time.

Photo Display On Indian Urban Life To Open Tuesday

"The Heart of India," a photographic exhibition from the work of Indian photographer C. V. Raman, will be on display Tuesday at 7:30 p.m. in Parlor A, Union.

"The exhibition will showcase the vibrant and diverse urban life of India," Dr. Raman said. "I will explain some of the cultural similarities and differences between Indian and Western urban life, and discuss some of the challenges that lie ahead for the country.

"I will also discuss some of the opportunities that the country is facing, and how we can help to shape the future of the country." He added that he will address some of the questions that are most important to students and faculty members.

Dr. Raman is a native of India and has lived there for over 25 years. He is a member of the Indian National Geographic Society and has published several articles on Indian culture and society.

He has a Ph.D. in sociology from the University of India and has served as a faculty member at several universities, including the University of India and the University of California.

He is married and has two children. He enjoys hiking and playing soccer in his free time.
President Kerner's feed grain program failed to reduce a season-wide increase in feed production in the last half of 1960 and will not influence changes in production in 1961, Charles A. Lauter and Wednesday.

Addressing 400 farmers in the Audubon, Lauter said, "It is a necessary step toward the last half of 1961 to reduce feed grain production, which has increased rapidly since 1955 and exceeded estimates in every year, in the present crop year."

The address was a feature of the "Easter Festival in the Audubon economy and agricultural economics in the S. R. Pomeroy West program.

Lauter said that stocks accumulated in the hands of the Commodity Credit Corporation, price supports were lowered to hold sales output, but prospects were not bright "in the face of the present situation." It is not possible to change the period in which a feed grain program is being considered, Lauter said.

"Application of more fertilizers, improved forage crops and better animal feeding programs, if used as an increase in use of fertilizers, improved forage crops and better animal feeding programs, if used as an increase of feed grain production, is the only answer to a feed grain program, Lauter said. "Feed grain yields increased nearly 30 per cent in the past 10 years, by the beginning of the 1960 season. But the reduction of feed grain yield under government control, which added the U.S. for six months storage, has pork, salmon, it is within a day, he said.

The most important step that has been tried to reduce feed grain production, he said, is the "The New 1961 Feed Grain Program," which does not paid farmers for reducing feed and allow them to withdraw their feed grain production and to pay for reducing feed grain production. The program was designed to reduce feed grain production and to allow farmers to withdraw their feed grain production.

Dr. William Callaghan, philosophy department head and an authority on contemporary Italian philosophy, has described Leonard's current research as "promising to constitute a revolution in the field of non-standard or modal log­ric."

"Leonard's writings represent one of the most prominent efforts in the development of non-standard or modal logic, Harris said. "Leonard has also lectured at the University of Washington Medical School and is a member of a few distinguished groups in philosophy, such as the American Philosophical Society and the American Academy of Arts and Sciences."

"Leonard has also lectured at the University of Washington Medical School and is a member of a few distinguished groups in philosophy, such as the American Philosophical Society and the American Academy of Arts and Sciences."

In addition, Leonard teaches at Harvard, Princeton and Pennsylvania Universities. He is also very much involved in the department's graduate seminars. Leonard has also been a member of the department's executive council, which is responsible for the direction of the department.

The department has turned its attention to graduate teaching and has established a graduate fellowship program. The graduate students in the department are involved in research and are invited to participate in the department's colloquia and seminars.

The graduate students publish a newsletter which contains information about the department's colloquia and seminars. The newsletter is written by the students.

WASHINGTON, D.C., April 12 (AP) — Steve Cline, a 23-year-old junior at the University of Michigan, was arrested yesterday for driving under the influence of alcohol and leaving the scene of an accident.

The incident occurred early yesterday morning when Cline, who was driving a friend to a football game, lost control of his car and collided with another vehicle. The accident resulted in minor injuries to both drivers, but one of them later died from complications related to the accident.

Cline, a well-known student athlete, is currently a member of the university basketball team. He has been suspended from team activities pending the outcome of the investigation.

Common Market Termed

'Fantastic' In Its Results

By CHARLES WOOD

The Common Market is the subject of the most vigorous debate in Western Europe, most of which is taking place in the Brussels headquarters of the European Economic Community. The Common Market is an attempt to provide the general doctrine of the United States and the free world, called the Common Market, with economic underpinnings. The title is derived from the General Agreement on Tariffs and Trade (GATT), which provides the general doctrine of the Common Market.
