Critics Attack Aspects of NSA

At the same time they can bring home this new concept of international feelings to students on campus, AUSB has the opportunity Wednesday night to pitch itself to an outstanding audience in service to students. It can ignite charged hours for a few weeks and attempt to focus student attention on serious affairs of importance.

AUSB can take the lead in directing student interest toward the issues and problems which are uppermost in our minds—policies of the world problems which exist on the other side of Great River.

Specifically, AUSB can stimulate that NA" delegation be elected, and influence the political dynamics nationally. Students would put on pro and con forums. They would campaign on their campus for national policies.

It will lift the sights of students. In addition, MIU has the opportunity to give itself, AUSB can perform a truly great function by sharing some of the knowledge that has rubbed off on them from persons faculty members who have worked on MIU's overseas projects. MIU has an obligation to share this information, to help improve the existing MIU programs and to create new ones.

For the first time in several months, a bill is before Congress which would actually give that organization an opportunity to serve the student body. This year's Congress members will be less influenced by wild cries of "no service" and "communistic or capitalist" if they should be influenced by what NA" membership can mean for MSU students in particular and the world's students in general.

This is the first time in years that the American student has been called upon to participate in the world service. There can be no more direct and rewarding experience that the world service. Finally, much too little has been said about the problems of emerging from shelters. This month is in the shelter and then sound the all clear.
