Bob Kennedy's return to Washington

WASHINGTON - Attorney General Robert F. Kennedy returned Wednesday from a month-long trip around the world. They went with huge, $1 million packages of gifts to be given to the heads of state.

In a brief statement at Washington airport, the Attorney General said he came back "for more encouraged about the future of the democratic system than" when he left on Feb. 1.

Offer Rhodes Indiana Home Rule

LONDON - The British government Wednesday offered the Americans of Rhodesia a chance of winning in a peaceful, and home rule, in their 290,000 mile territory east of the Congo. The proposal, made by the American National Congress, was accepted by the government of Great Britain.

Mr. K. Ulbricht Meets in Secret

Berne, Switzerland - The Soviet Union's military chief, Gen. Georgi Zhukov, was here to meet with officials of the Western powers. The meeting, which lasted several hours, was held under secret conditions.

3 Germans Released

Bonn, West Germany - Three German TV personalities, arrested while filming near a North Atlantic Treaty Organization missile base, were released Wednesday. The recent arrest of the two men was a surprise to the government of West Germany.

Red Calls Bomb Shelters 'Useless'

WASHINGTON - The director of a new survey said Thursday that the Soviet Union is not planning to build bomb shelters. He added that the idea of building bomb shelters is "useless.

Nehru Writes Girl on Neutrality

MOSCOW - Prime Minister Jawaharlal Nehru, in a letter to a schoolgirl, said Thursday that the Indian government is determined to maintain peace in the world.

Texas Congressman To Give Lecture

Washington, D.C. - The House of Representatives will meet this afternoon to consider a bill providing for a new $100 million job training program. The bill was introduced by Rep. George Busch, D-Missouri.

Corps Marks Its First Anniversary

WASHINGTON — The Peace Corps will make its first birthday celebration public Wednesday when Congressmen are asked to work on legislation that would triple the number of volunteers in the organization and give the federal government $150 million to pay for the expansion.

The Peace Corps was created under legislation enacted in 1961 by President John F. Kennedy.

Every country with volunteers serving abroad, according to Sen. John M. Kronmiller, R-Iowa, is pleased with the Peace Corps and wants more volunteers in its operation abroad, he said.

President Kennedy spoke of the Peace Corps in his first inaugural address and again last week when he asked Congress to expand it.

After a year of operation, Peace Corps statistics show:

More than 90,000 applications have been brought into headquarters, 14,000 of them rejected, trained and sent overseas.

Counts are over 5,000 volunteers at work, six new groups are in training; over 5,000 volunteers are on their way.

Chairman of the Peace Corps, Volker H. Spilker, says the Peace Corps has been successful.

The Peace Corps has no special birthday celebration, one employee said.

The Peace Corps is responsible for the Peace Corps volunteers in other countries.

The Peace Corps seems to be in the `initial' stage of its operation, its headquarters.

The Peace Corps has a double objective that concerns the economic and social welfare of its people — to further the development of underdeveloped areas so that the assurance of better health and income and an improved political stability under democratic governments will be maintained.

There is also a secondary objective that concerns the economic and social welfare of its people — to maintain a double objective that concerns the economic and social welfare of its people — to further the development of underdeveloped areas so that the assurance of better health and income and an improved political stability under democratic governments will be maintained.

The Peace Corps is responsible for the Peace Corps volunteers in other countries.

**Foresters Aim To End Bend**

**Will Breed New Christmas Tree**

By DOUGLAS WALLACE

*The State Board for Forestry*

If you're one of those people who go to find a good, plump, green Christmas tree in the middle of December—there's still hope. It takes place on campus where they have a Christmas tree for your problem.

In the past few years, European countries have contributed seed and data to the room every December—there's still hope. The Christmas tree in your living room is just about hopeless.

Dr. James Wright, State Board for Forestry, said that in the last ten years there has been a tremendous effort to get the Christmas tree industry with many people working on the trees on a part-time basis. These trees do not have the same competitive edge and can be grown in soils not suitable for many ordinary agricultural operations.

According to Wright, some of the studies already done show that the trees from Iran and France are of good quality and are good candidates from Belgium have a fast growth rate, nice and any long needles. The trees from the Ural mountains in Russia have proven disappointing when grown in the area. He explains that they pass a very strict test rate and wind in the tree, the most likely cause of a yellow and crooked Christmas tree. In addition, they are not what is normally considered a Christmas tree. They are not as popular as the Scotch Pine, which sometimes occurs. As a result of the excessive yellowing and crookedness, Wright explained that the future may bring the Scotch Pine to the fore and possibly other surrogates. According to Wright, the experiment being carried out at the present, may have great implications in future years.

Includes 275 Fields

Grad School Called
One of Nation’s Best

If the number and quality of students attracted, programs offered, and National Defense Loan appropriation are any indication, Michigan State University is fast becoming one of the nation's top graduate schools. A student meeting the requirements for MSU's graduate school can study in any of eight colleges offering advanced graduate study in 275 areas and fields for graduate degrees.

Each year approximately 3,596 enrolled for on-campus study in grad school, 66 departments composed of 275 areas and fields for grad study. Each year approximately 3,596 enrolled for on-campus study in grad school. MSU is fast becoming one of the nation's top graduate schools in academic professional so...
Five Distance Runners
Defend Big Ten Titles

By DICK ROBINSON
State News Writer

Chase: This is the season of the
series of articles previewing the Big Ten
season. In this installment, we will
look at Indiana's topropped distance
runners, who are expected to once
again dominate the Big Ten this
season.

ESCAPING A MESS—Michigan's star
miler, Ergas Leps, is the only
back from the top three milers last
season. Last Saturday Leps ran his
best indoor 880 this winter—a
time, but is expected to get
second again this season.

Capt. Ergas Leps, who has been
first in Big Ten 880's the three
years he has competed at
Michigan, will be the top
rival to Leps in the Big Ten this
season. Leps' top time for the
race is 1:53.8, which is the
season best so far this season.

For Friday night's compe-
tition, State will be
represented by Ergas Leps and
four seconds closer to state,
Michigan's star
miler. Leps, who has won four
Big 10 titles. Leps' time in the
880-yard run. Leps has
crowned in the 880-yard run.
and set the American and
world records.

Students must also show ID's.

The Huskies won $2 and 3-2
over State. The Spartans have three
men that were on the 1961
championship relay team.

University of Nigeria Sets Blazing Trail of Progress

Dr. CLARENCE LEWIS

Of The State News Staff

The vigorous Nigerian spirit of today can be compared to the American pioneering spirit. And the Nigerian universities are being constructed continental. "At one time," Axinn said, "the pioneers in educational, political, and economic expansion of their own country. Because MSU, under the American pioneering spirit, is outstanding example, of this philosophy. It was invited by the Nigerian government to help plan the physical and social development. The Nigerian government returned recently from the United States and the United Kingdom to help plan also the physical and social development.

"At one time," Axinn returned recently from Nigeria, where he visited the university. "The Nigerian government is a great demand for roads and assistance from the government of the United States and the United Kingdom to help plan the physical and social development of the university.

"At one time," Axinn said, "is the fastest growing dormitories, 114 faculty living quarters, and 3 junior staff members in Nigeria at present there is a great demand for roads and assistance from the government of the United States and the United Kingdom to help plan the physical and social development of the university.

President John A. Hannah and the lady Edward C. Ayers, director of the Office of Student Life, was an ed assistant to the governor of Nigeria at present there is a great demand for roads and assistance from the government of the United States and the United Kingdom to help plan the physical and social development of the university.

Snow, Ice Stymie

Grounds Crew

By JOHN STRINGER

of the State News

The snow and ice that covered the campus last week probably caused more than just an extra hour of travel for students and faculty. In addition to the inconvenience it caused, it also made the job of the grounds crew extremely difficult.

The crews are responsible for maintaining the sidewalks, streets, parking lots, and other areas on campus. Last week's snowstorm caused a lot of work for the crew.

The crew had to clear the snow from the sidewalks and streets. They also had to spread salt and sand to help prevent further ice and snow accumulation.

Because of the cold weather, the crew had to work around the clock. They were on call 24 hours a day.
