Adding A Member
To Board of Trustees

The possibility of adding a student
to the Board of Trustees is not new. It has been
suggested by University of Illi-
canos, the State, for at least the last
decade. The Illinois State University
student body has always been aware
of the need for a student voice in the
affairs of the University, and the
Board of Trustees has always been
willing to consider such a move.

Spartan Roundtable is a once-
monthly dinner meeting of student
leaders, President Proctor, and
University personnel. It provides
for an informal exchange of op-
inions between students and
administration, and has been widely
copied by other universities.

Student Government, the other
channel, has proved for the most
part ineffective in communicating
student ideas to the administra-
tion.

The position of a student rep-
resentative on the Board of
Trustees would be non-voting; an
advisory one. It would give the
students a stronger voice in the
University's policy-making board.

The Illinois Student Federation
and the Student Government
both have attempted to determine
with the Board of Trustees.

We feel that the task of the
student representative would be to
reflect student sentiment on such
topics as disciplin.

We urge that the Board of
Trustees consider the implications
of such an arrangement. It could
be a strengthening of the system.

MU Band, Block "S":
Two Jobs Well Done

After last week's halftime
performance by Purdue's band,
many students of Michigan State's
college band noted the same
type formations as the Michigan
State Marching Band. The answer is simple enough:

The Michigan State Band, under
the direction of Dr. Leonard Falcone, should be
gratified for their fine perform-
ance all season both at home and
away games.

The something unusual about how
they achieved their interpretation of
popular music, but it is clearly
achieved through their thanks to the "Patterns In
Marching" arrangements by William M. Jennings and Marching band.

A Small Voice

We're Not Being Told
About Vietnam Operation

There's a lot of attention paid
by the press to President Nix-
on's Vietnam policy, but there's
also a lot of attention paid to the
student protests against the war.

The truth is that both sides
are being told, but not in the
same way. The government is
telling its side of the story to
the media, while the protesters
are telling their version of the
war to the people.

President Nixon has said that
the war is necessary to protect
American interests in Vietnam.

"Well of All the Nerve,
They're Still Watching Us.

The Illinois Federation and Student Government in-
vestigate the possibilities of such an
arrangement. It could be a
strengthening of the system.

FOR¬
**WASHINGTON** - Michigan is scheduled to receive $73,645 to build roads and expand facilities on its 72,000-acre farm at the University of Michigan Center for Agricultural Science. The grant will be used to purchase equipment, expand the farm's facilities, and improve the farm's operations. The University of Michigan Center for Agricultural Science is a research and education facility that focuses on sustainable agriculture and natural resource management. The grant is part of the U.S. Department of Agriculture's National Institute of Food and Agriculture, which supports research, education, and extension programs to address critical issues in agriculture.
Campus Noted For Landscape

The beauty of the Michigan State campus is not accidental. Thousands of trees are planted each year to develop and maintain the landscaping of the campus and to provide a scenic atmosphere for campus visitors.

In fact, the landscaping efforts extend beyond the campus itself. The State of Michigan has been named "Tree City USA," and Michigan State University is one of the top ten universities in the nation for its landscaping efforts.

Mixed Dating Experience Shows Shades Of Public Opinion

The experience of one college student, who has dated both men and women, provides an interesting perspective on the dating scene at Michigan State University.

Students and staff at Michigan State University are aware of the importance of relationships and the role that they play in shaping one's life. This student shared some insights into the experience of dating in a diverse and inclusive environment.

When asked about the difference between dating someone of the same gender and someone of the opposite gender, the student noted:

"When dating someone of the same gender, I feel a sense of connection and understanding that is unique. On the other hand, dating someone of the opposite gender is a different experience, as it involves navigating the typical dynamics of a romantic relationship.

"However, I do believe that there are many similarities between these two experiences. In both cases, I have had the opportunity to learn about myself and others, and to grow as an individual.

"Moreover, I have noticed that my experience of dating someone of the same gender has influenced my understanding of gender roles and expectations. This has been an important aspect of my personal growth as a college student."
