Says Students Better Than Ever, But Grading Needs Re-evaluation

President John F. Kennedy, chairing a new series of panel sessions at his request, broadened the scope of the National Advisory Council's study of the American educational system to include such factors as the impact of a world revolution on the classroom, the role of the American university as a world center of learning, and the nature of competition abroad. The University, he said, should transform itself from a university of service to a university of research, from a university of education and training to a university of knowledge. The role of the University as a forum for ideas, he said, was a major innovation, and it should be expanded to include an increased role for the editorial department.

At the request of the President, the Council was asked to consider the role of the University as a forum for ideas, and the President's commitment to the idea of the University as a world center of learning. The President also asked the Council to consider the role of the University as a forum for ideas, and the role of the University as a world center of learning. The President also asked the Council to consider the role of the University as a forum for ideas, and the role of the University as a world center of learning.

AUSG's New Action On The Grad Problem

We welcome the establishment of a committee, headed by President Jim Barnes, to investigate the grad problem. The Committee's first task will be to bring about a speedy conclusion of their new membership in AUSG to the student government. said. Second, there was not a question of including graduate comings; the re-opening of this issue will concern all the ramifications of the graduate presidency. We hope that this committee will be composed of graduate students in AUSO. We hope that First, sufficient information was not given to the graduate students prior to the voting, Fuzak.

Young Republicans To Elect
New Club President Tonight

Young Republicans will elect a new club president at their regular meeting tonight at 7:30 in L.180 Union.

The club's executive council announced that only full-term members of the club who paid their dues for winter term would be eligible to vote in the election.

The ruling was made in accordance with the new constitution ratified last term.

Harry Schoenfeld, city council member and outgoing president, announced that if elected he would be checked of all voting members. Other club members and visitors will be seated in a different section.

Kennedy Requests Tax Cut (Continued from page 1)

It is clear that the forces of diversity are at work inside the management team. Because all the employees are well-informed and well-organized, the potential for a major conflict is considerable. The key will be the ability of the president to maintain control and to negotiate a compromise agreement that satisfies the employees' demands.

The situation is further complicated by the fact that the employees have a strong tradition of solidarity. The union, through its leaders, has been able to maintain a disciplined and effective bargaining position. The employees are also well-organized, with a strong leadership structure. The union has been able to maintain a high level of morale and to mobilize its members effectively.

In this context, the president's request for a tax cut is seen as a major barrier to a peaceful resolution of the conflict. The employees are well-aware of the implications of the tax cut on their financial well-being, and are determined to resist any move that would weaken their bargaining position.

The president's decision to push ahead with the tax cut is seen as a calculated risk. He is aware of the potential for a major conflict, but believes that the benefits of the tax cut outweigh the costs.

It is unlikely that the employees will accept the tax cut without a major fight. The union will be determined to resist any move that would weaken their bargaining position. The employees will be determined to maintain their gains in the face of the president's efforts to undermine them.

The situation is further complicated by the fact that the employees have a strong tradition of solidarity. The union, through its leaders, has been able to maintain a disciplined and effective bargaining position. The employees are also well-organized, with a strong leadership structure. The union has been able to maintain a high level of morale and to mobilize its members effectively.
