Professional Help To Expand Paper

A proposal to expand the State News was still on the agenda last week by the Board of Student Publications, which governs the News.

The Trustees also agreed to change the designation of the Board of Student Publications, which governs the News.

The move, according to the Board of Student Publications, was a step in making the State News a university newspaper.

Conclusive expression of the movement, which was passed by the Board, was: "The growth of Michigan State University has resulted in the growth of the State News in an operation now involving annual expenditures of more than $70,000, in addition to a staff of 200.

The Trustees also agreed to extend the annual operations of the News to $90,000 for 1964, compared to the $50,000 currently being spent.

No More Ads For Tobacco

American tobacco industry in 1961 was a $2 billion business, according to the report of the U.S. Surgeon General.

Trustees Act On Budget, State News

'Tight' Budget Passed By Board

Members of the Board of Trustees approved the budget for 1964-65 for the operation of the university, which was $90,000,000.

“The pre-eminent part of our work is the building of the second year of the university, which will total $2,926,801 for 1964-65 less than the $4,579,823 anticipated for 1963-64. The budget will increase for 1964-65 by $1,519,396, for the purpose of strengthening programs and the experimental station.

Native Michigan Man To Direct Medical School

The Board of Trustees last week appointed Dr. William H. Hanna to succeed Dr. Howard B. White as Director of the Medical School.

President John A. Hannah told the Board of Trustees that Dr. Hanna has been associated with the university for 15 years.

A group of students at Michigan State University have called for a sit-in demonstration against the university's plans to allow the Ku Klux Klan to speak on campus. The students, who identified themselves as members of the Committee to Aid the Monroe Defense (CAMD), said they will hold the demonstration on Wednesday, September 30, from 11 a.m. to 1 p.m. in front of the Student Recreation Center.

The students also called for a petition to be circulated among students, faculty, and staff, urging the university to reverse its decision to permit the Klan to speak. They said they will deliver the petition to university officials on the day of the demonstration.

The demonstration is being held in response to the university's decision to allow the Ku Klux Klan to speak on campus as part of its plan to celebrate the 50th anniversary of the American Society of Agriculture. The Klan is scheduled to speak on Friday, September 30, and Saturday, October 1.

The students said they are concerned about the university's decision to allow the Klan to speak, and they believe it is a violation of the university's commitment to diversity and inclusion. They said they will continue to organize events and activities to challenge the university's decision and to promote a more inclusive campus.

The students also called for support from the Michigan State University community, including students, faculty, and staff, to join them in their efforts. They said they will hold a rally on the day of the demonstration to increase awareness of their cause and to encourage others to join them in their protest.

The students said they will continue to organize events and activities to challenge the university's decision and to promote a more inclusive campus. Gifts, Grants Accepted

University Receives $161,000

Among the gifts and grants, totaling $1,405,493,52 were accepted by the Board of Trustees last week.

Among the gifts accepted by the Board of Trustees last week were: $75,372 from the U.S. Office of Education, for studies of life-long education; $50,000 for a new program in the College of Veterinary Medicine; $100,000 from the U.S. Department of Agriculture for research on the effects of radiation on plants; and $100,000 from the U.S. Department of Agriculture for studies of interhalogen compounds.

The Board of Trustees also accepted the resignations of Dr. Robert A. Brown, associate director of the College of Education, and Dr. William C. Deal, director of the College of Agriculture.

The Board of Trustees also approved the following assignments:

- David P. Brown, assistant professor, electrical engineering, to the India Project as a consultant.
- Donald L. Kaye, John H. Wolford, instructor, humanities, Sept. 1.
- Richard May, instructor, agriculture, July 1; and July 26, to study at the University of Michigan.
- Robert J. Tish, assistant professor, business administration, Sept. 1.
- Dr. B. J. Karabatsos and $18,000 for studies of interhalogen compounds, under the direction of Dr. Orlando B. Anderson.
- Another AEC grant, $36,142, will be used under the direction of Dr. Alexander I. Popov, chairman of the department of chemistry, for studies of interhalogen compounds.
- A $60,000 grant from the U.S. Department of Agriculture will be used under the direction of Dr. Clarence H. Miller for studies of pests and diseases.

The gifts and grants accepted by the Board also included: $51,293 from the U.S. Department of Education for scholarships; $28,375 to be used under the direction of Dr. William C. Deal, director of the College of Agriculture; $100,000 for studies of interhalogen compounds; and $100,000 for studies of radiation.

Dr. Karl H. Freudenacker, Jr., $10,000 for studies of physical-organic chemistry problems by the use of nmr, directed by Dr. J. L. Anson; and $1,000 for studies of radiation, directed by Dr. Max T. Wagner.

Among the grants accepted by the Board of Trustees last week were:

- The McKnight Foundation of St. Joseph, contributed $50,000 to be used by the Michigan Education Service in financing graduate assistantships.
- $40,000 grant from the U.S. Department of Agriculture for studies of radiation, directed under the direction of Dr. C. A. Holley, and $50,000 for studies of interhalogen compounds.

The gifts and grants accepted by the Board also included: $17,250 for Oakland University, $15,429 for the National Institutes of Health, and $50,000 for studies of radiation.

Dean Of Students For Popular Person

By CHARLES C. WELLS

The dean of students at any large university is in a position of unique importance. He is the link between the student and the administration, and by his actions he can influence the lives of thousands of students.

One of his jobs is disciplin­
ing students who have broken reg­
ing up the Placement Bureau, who get into trouble. "I feel that college students have a duty to the university and to society to be honest and fair in their dealings," he said.

"I believe that we should support the administration in enforcing the rules of the institution. We have a responsibility to maintain the integrity of the university and to ensure that it operates as a fair and just environment for all students."

The dean of students is also responsible for providing support and guidance to students who are experiencing difficulties. He works closely with the counseling center, the placement bureau, and other offices to ensure that students have the resources they need to succeed.

He also works with the university's athletic teams, providing support and guidance to student-athletes. He believes that it is important to support the athletes both on and off the field.

"I believe that we should support our student-athletes in their academic and personal lives. We have a responsibility to help them achieve their goals and to ensure that they have the resources they need to succeed both on and off the field."

The dean of students is a key figure in the university community, and his support and guidance are essential to the success of the students at the university.

EXPAND STATE NEWS

(Continued from page 1)  

Two brothers of the University personnel, Edward Fordham and Walter Fordham, became a successful business partnership.  

The Fordham brothers, who have been in the communications business since 1920, are the owners of the Fordham Brothers, who own the Fordham Brothers Transportation Company, which operates a fleet of small buses and tour buses throughout the state.  

The board of Trustees action was taken at the request of President William F. Fordham, who has been in the communications business for 20 years.  

Walter Fordham, who will be 65 on August 5th, said the Fordham Brothers Transportation Company is a family business and it is the family's desire to continue the business.
Honors College 7 Years Old

Paves Way For Students To Study Independently

At least 100 students now face the challenge of four years of study under the guidance of the new Honors College program, Dr. Stanley J. Idzerda, at the Institute of Biology and Medicine, said. Dr. Idzerda, who has served as director of the Honors College since its founding in 1956, is now named acting director. The college was founded by Shaw.

Outgrowth Of Medical Proposal

The institute of Biology and Medicine is the outgrowth of a medical proposal made by MSU to the American Medical Association in the 1930s. The institute was established as a way to provide medical students with a chance to study and make detailed research in the field of medicine. The institute has since grown to include a variety of fields, including biological sciences, and has become a leader in the field of medical education.

Grad Students Receive Grants

University of Georgia, a major university in the state, has announced that it will provide grants to graduate students who are studying in the field of medicine. The grants will be used to support research projects and to help students with the costs of tuition and living expenses.

Drama Class Starts Juicy

The daily air samples have been monitored at the state health department in Grand Rapids, reports the Sentinel, for the past year. The samples were collected from various locations in the state, including Detroit and the upper peninsula. In the upper peninsula, the levels of Strontium 90 in milk are generally higher than in other parts of the state. This is due to the use of nuclear power plants in the area.

Disability and Health

The institute of Biology and Medicine, which is the source of medical services in Michigan, is planning to expand its services to include a new laboratory. The laboratory will be used to test the air and water samples collected by the institute.

Outstanding Honors College Program

The Honors College at Michigan State University is one of the most outstanding programs in the state. The program is designed to provide students with a chance to study and make detailed research in the field of medicine. The program has been so successful that it has been adopted by other universities as well.

Home Ec Members Honored At Meeting

Home Economics Association members are being honored at a special meeting this week. The association is recognizing the contributions of its members in the field of home economics.

Colts Lack Power

A special feature of the Institute of Biology and Medicine is the opportunity for students to study and make detailed research in the field of medicine. The institute has been in existence since 1936 and has become a leader in the field of medical education.

Guatemalan Special Ed Good, But Behind U.S.'s

Although Guatemalan facilities and methods are the same as in the United States, the demands for special education in Guatemala are different from those in the United States. The lack of facilities and the lack of trained personnel in the country is a major problem. The idea of special education is not well understood by the general population.

Daniel McAlees, a graduate student in special education, said that the facilities for special education in Guatemala are vastly different from those in the United States. There are no special education schools for those who are handicapped.

"There is no special education in Guatemala," said McAlees. "There are only a few schools for the mentally handicapped. The facilities are not comparable to those in the United States."

McAlees said that the idea of special education is not well understood by the general population.

He also said that the facilities for special education in Guatemala are not comparable to those in the United States. There are no special education schools for those who are handicapped.
