The Michigan State approach to engineering education is to keep things simple. "We try to teach students the basics of engineering and give them enough background to be able to do anything," said Dr. W. W. Knisely, chair of the electrical engineering department.

"There is a lot of specialization in engineering," he said. "But we try to keep it simple and basic. We teach students the fundamentals of engineering, and then they can specialize later in their careers."

The Michigan State approach is different from that of other universities. "At Michigan State, we try to teach students how to think, not just how to do," Knisely said. "We want them to be able to solve problems, not just to memorize facts."

The Michigan State approach is also different from that of other universities in terms of its size. "We have a smaller student body," Knisely said. "This allows us to give our students more individual attention."

The Michigan State approach is also different from that of other universities in terms of its location. "We are located in a rural area," Knisely said. "This allows us to give our students more hands-on experience."

The Michigan State approach is also different from that of other universities in terms of its cost. "We have a lower tuition than other universities," Knisely said. "This allows our students to get a good education without having to worry about the cost."

Student Press Union Account of Community Influences

UNIVERSITY OF MINNESOTA, Minneapolis — The Student Press Union at the University of Minnesota is considering taking legal action against a community group opposed to the university’s anti-discrimination policy that the union feels is infringing on its freedom of speech. The group, called “Community Concerned for Student Rights,” is seeking to prevent the union from publishing material that it considers to be “hate speech.”

UNIVERSITY OF WASHINGTON, Seattle — The student newspaper at the University of Washington is expected to publish an article next week opposing the university’s policy of admitting only students who are members of the university’s “gay community.” The article is expected to generate a significant amount of controversy on campus.

UNIVERSITY OF MICHIGAN, Ann Arbor — The student newspaper at the University of Michigan is planning to publish a series of articles next week examining the university’s policy of requiring all students to take a course in diversity and citizenship.

Students Learn Complete Tongue*  

By CHARLES C. HELLS  
State News Staff Writer  

Miss foreign language instructors at Michigan State University have a new weapon at their disposal to help their students learn a foreign language. They are able to respond appropriately to any linguistic situation by using a computer-generated language learning program called "Complete Tongue".

"Complete Tongue" was developed by the National Science Foundation and designed to teach students a foreign language in a short period of time. The program is based on the principle that language learning should be a natural and enjoyable process.

There are many opportunities for learning a foreign language in today's society. Students can learn a new language through travel, work, or study. They can also learn a foreign language through formal education or informal means. The program offers a variety of learning opportunities, including reading, writing, listening, and speaking.

The program also offers a variety of assessment methods for measuring student progress. These methods include quizzes, tests, and project-based assessments. The program is designed to be flexible and adaptable to meet the needs of different learners.

"Complete Tongue" is an effective tool for language learning. It is a means of getting a high level of proficiency in a short period of time. It is a tool for research in other areas of language learning.

Students learn pronunciation, vocabulary, grammar, and sentence structure. They are also taught cultural context and the use of idioms. The program is designed to be interactive and engaging, allowing students to practice their language skills in a natural and enjoyable way.

"Complete Tongue" is a valuable resource for language learners. It is a tool for research in other areas of language learning. It is a means of getting a high level of proficiency in a short period of time. It is a tool for research in other areas of language learning.

*Note: The "Complete Tongue" program is a fictional program and does not exist in reality. The information provided is for demonstration purposes only.
Mink Research Continues
By SUE JACOBY
State News Staff Writer

A mink coat is usually con­ceived of as a decorative "saf­ety deposit" by females from the standpoint of the public. Little do they know the real cost of the quality and price of the mink coat they buy. Mink is an animal reared and sold by experienced mink farmers. In fact, it is reared and sold by the Federal Government since mink research is one of the federal government's responsibilities to the American people.

A mink research station was established by the U.S. Department of Agriculture nearly 40 years ago at the Michigan State University. It has been the goal of this station to provide research information on mink production, health, nutrition and behavior.

The station makes a great contribution to the economy of the state and the nation by providing mink farmers with the latest information on mink production. The station also conducts research on the diseases and nutrition of mink, which is essential to the production of quality pelts.

The station is an important part of the nation's mink industry. It conducts research on the diseases and nutrition of mink, which is essential to the production of quality pelts. The station also provides mink farmers with the latest information on mink production, which is important for the success of the mink industry.

**Peace-International Center**

Michigan State has become greatly involved in international activities in recent years. Coordinating this growing activity is the Peace-International Center, housed in the Administration building.

"The purpose of the center is to provide a more significant knowledge of what goes on for world affairs," Thorburn said. "This knowledge can be translated into better understanding between countries and more cooperation to solve common problems." The center has made significant efforts to acquaint students with world affairs and to foster the United States's foreign relations. 

"We have students here from our international programs and we get them involved in the campus effort and the on-campus effort," Thorburn said. "It's a way to go."

"Since we get many such requests from students who have worked in the foreign cultures, we have made a concerted effort to get them involved in world peace," Taggart said. "We have been working on this for a number of years. The University has sent students overseas to study and work in various foreign countries. They have been in China, Korea, India, Pakistan, and other places around the world." The University presently has a major international program in effect. The program involves students from the United States and many other countries. They are located in China, Korea, and other places around the world.

The University presently has a major international program in effect. The program involves students from the United States and many other countries. They are located in China, Korea, and other places around the world. The projects center around agriculture, business administration, public and police administration, engineering, and other fields.

"As being in two areas—the off-campus effort and the on-campus effort," Thorburn said. "As being in two areas—the off-campus effort and the on-campus effort."

"A DEPARTMENT OF MICHIGAN STATE UNIVERSITY"

Located in the Union Building...
For All Questions answers that will lead to knowledge and understanding. The quest for truth in every and all disciplines is good. That he, his universe, his loved ones, his work, his thought, a melody from his heart and composes a symphony. He can, and does, criticize himself on occasions sometimes gaining it, he wills to deny it to other men. The Johnson-Crider tradition and teaching suggest to be created a compensation, or a counterbalance for his humanity, and that he, too, is able to provide strength in the Christian world's, purpose. Man is created to serve the Good, that is, the Good of reason, joy, peace, satisfaction, and the Kingdom of God. That the Lord God well all them (the innocent, the humble, and the wise) and they call upon the spiritual being the whole man and the neighbor his brother. In the Christian context, the question of who we are and why we are helps us to understand the humanities in the context of the arts and sciences. The campus was a year-round activity, with students returning in the fall.

DORM CONSTRUCTION BOOMING

Editor's Note: This is the third of a four-part series on the history of dormitories at Michigan State University.

MSU's dorm construction has been booming.

One of the Brody dorms is named after him. Scholarship in dairy hygiene, Claude F. Brody. A country gentleman and executive manager of the Michigan Dairy Farm Bureau. While still in high school, he served on the Board of Trustees for over 30 years. For nearly half of that time he was chairman and also a member of the Board of Governors. The President and Regents have been proud to acknowledge the help of the Michigan Farm Bureau all the way from the Midwest to the Western Athletic Conference.

The summer session is under the direction of the 15th annual summer session, which will be held at the Field House, and which will be open to the public. The session is being held to provide a wide variety of courses in a number of fields. The courses include: science, mathematics, humanities, social sciences, and more. The courses are designed to meet the needs of students who wish to continue their education during the summer months.

The courses are taught by faculty members who are experts in their respective fields. The courses are designed to provide a challenging and stimulating learning environment. The courses are designed to meet the needs of students who wish to continue their education during the summer months.
