The Unifier—Nixon?

He's through—forever, was a one typical analysis by the press after Richard M. Nixon lost his bid last year for the governorship of California. But in the remarkable ways of American politics, Mr. Nixon's name keeps cropping up in discussions about next year's Republican primary. 

General Eisenhower suggested publicly that many others had been saying privately for some months—that Republicanism is too big to count out. Then last week, a sampling of opinion among management officials of Associated Press in Miami Beach showed, surprisingly, that many thought it would be Mr. Nixon against President Kennedy, with Mr. Kennedy winning again. The thinking is that December election—President will come to the fore as a compromise candidate if and when the Goldwater and Rockefeller forces deadlock.

Mr. Nixon deanes it or would become a candidate. He says the best hope he can play is "to unite the party after the bloodletting" between the Rockefeller and Goldwater camps which, he observes, is "getting very bloody."

Perennials

The chronic instability of Arab politics again showed its face in the Middle East last week.

Our judgments of its merits will have to wait. Meanwhile, one must wonder if the Arab nations so prone to political upheaval, is it the result of the rapid change of the old order, or merely an example of Arab temperament? Is it politics or circumstance for the people who moves so many to revolt?

Businessmen see bright future for U.S. economy

As the United States embarks on an ambitious program of economic development, businessmen are optimistic about the future of the U.S. economy. Despite some concerns about inflation and the potential for a slowdown, many believe that the country is on track for sustained growth.

The large, anchored sitting on the lawn of the Delta Gamma sorority house, 305 N. Harrison, must be the size of a stapler. It is the national emblem of the sorority. The anchor has been in the yard since 1920, however, many chapters have not been able to open it.

All DG chapters have tried to get anchors for their houses, but the type of anchor is not open to the public unless the defendant specifies they should be opened. The anchor is a solid gold piece that was originally given by the K. D. anchor company.

Relay 1 To Contact Japan

No need for wings, eagle has a pilot

The need for modern thinkers and action in today's world is not the only reason that the University of Michigan has launched a major scholarship program. The program is designed to attract promising students from Japan, and it is the first of its kind in the United States.

AUGS to address committee will explain amendments

The American University Group, Inc. (AUGS) will explain amendments to the university's student judiciary rules at a meeting of the Faculty Committee on Thursday. The amendments are designed to clarify the procedures for hearing cases and to ensure that the judiciary is impartial.

Placement Bureau figures excellent for fall term

The Placement Bureau figures are excellent for the fall term, with a record number of students finding employment. The bureau has helped over 200 students find jobs in various fields.

Offense Must Keep Moving

EDITORS NOTE: This is the second of our twoimeInterval plays presented for the News by Basketballs Coach, Frank Anderson.

The diagram shows a basic offensive play which, worked correctly, will work any of the five players—just as long as they cooperate. When the ball is passed to someone moving, the man moving, the man taking the pass, and the man moving the pass, all three must play their roles. If two men avoid this, the play doesn’t work.

The offense moves the ball to a new position and now has the option of either continuing the play, or doing something else. The team is in the same position as before, only now with a new position. If the ball is passed to the player moving, and the player moving, the ball receiver, he has a much better shot. The ball receiver should be in a good position to make a good shot. If the ball is passed to the player moving, the player moving, the man taking the pass, he should be in a better position to make a good shot. The ball receiver should be in a better position to make a good shot. The ball receiver should be in a better position to make a good shot.

There are many ways to use this play. It can be used to try to hit two men at the same time, or to try to hit one man at a time. The play works best when the ball is passed to the player moving, the player moving, the man taking the pass, and the man moving the pass, and the man moving the pass.

There is an opportunity for a good pass. The ball receiver should be in a good position to make a good shot. The ball receiver should be in a good position to make a good shot. The ball receiver should be in a good position to make a good shot. The ball receiver should be in a good position to make a good shot.

Illini Opportunistic
‘S’ Can’t Make Mistakes

Coach Randy Anderson basketball plans received a setback Tuesday evening when it was announced that Illini guard Bill Perry will probably miss the opening game of the season.

Perry, who is recovering from an operation on his back, and a minor shoulder injury, will have to sit out this season. Perry is expected to return to the court in time for the Illinois-Michigan game Saturday.

Perry’s injury is a serious blow to the Illini, who are coming off a disappointing season last year. Perry was the team’s leading scorer, averaging 20.7 points per game.

The Illini are counting on Perry to lead them to a successful season, and his absence will be felt greatly.

Winter Skiers Cause Soccer Time Change

Kickoff time for the NCAA Indiana-Michigan game between Michigan State and Michigan State on Saturday is now scheduled for 1 p.m., instead of 12:30 p.m., as originally planned.

The game was moved up to avoid a possible snowstorm that could affect the field conditions.

Cheerleading Clinic Thurs.

Several cheerleaders and assistant coaches will present a Cheerleading Clinic for the Women’s Basketball team Thursday at 4 p.m. in the new gymnasium.

The clinic is open to all interested women in the area, and all interested women are encouraged to attend.

Council Proposes Rights Resolutions

WASHINGTON: Two space scientists have hailed a landing by the Soviet spacecraft Mars 7 and a program of the space agency, Salyut, as a sign of any life exists on Mars, it will be in the form of intelligent beings. Further plans for the forthcoming M 1-A and M 1-B are under discussion. Two years later, they plan to assemble instruments on the planet. In July 1968, using a Martian machine craft equipped with a heat-seeking device, they first identified the false signals.
