Top Assistants Agree To Stay At White House

WASHINGTON—The bargaining was over. Top Johnson aides, including hitherto advertised hard-liners, have agreed to remain in the present Cabinet in the event of a new national election. Assistant Secretaries Pierre Salinger and Kenneth O'Donnell, and Special Assistant for Congressional Affairs, John Hope, announced Monday that all four will serve Johnson in the same post under a new President if elected.

Salinger, who has been mentioned as a successor to Secretary of State Rusk, said that he has no intention of changing his mind about remaining in the Cabinet. "I have no intention of leaving," he said. "I was asked by the President to remain and I have no intention of changing my mind." O'Donnell, who has been mentioned as a possible successor to Defense Secretary McNamara, said that he has no intention of changing his mind about remaining in the Cabinet. "I have no intention of leaving," he said. "I was asked by the President to remain and I have no intention of changing my mind." Hope, who has been mentioned as a possible successor to Attorney General Katzenbach, said that he has no intention of changing his mind about remaining in the Cabinet. "I have no intention of leaving," he said. "I was asked by the President to remain and I have no intention of changing my mind."
**Students Advanced with JFK**

College students were an important presence in the development of the Peace Corps. While the Peace Corps idea was neither new nor revolutionary, it was effectively on a large scale until John F. Kennedy became interested in it. The Peace Corps helped transform a campaign promise into reality.

Kennedy studied a pilot project conducted at Colorado State University and listened to students from many student and faculty groups throughout the country before officially launching the Peace Corps with an executive order.

**A Unique Opportunity**

A unique learning experience is available for students at the University. It’s not listed in the class schedule book, nor does it involve credits. What does exist is the learning of Arabic.

For five terms the Arab Club has been meeting every Wednesday afternoon. The teachers have been Arab students and the learners have been American students. The classes are unique, for only is a language taught, but both student and teacher benefit by teaching and learning from each other and their respective cultures.

What is occurring here is something which cannot be matched by the typical freshman language class at the University.

Those responsible for the success of this program, both the students and the teachers, are to be congratulated.

---

**From the Denver Daily Laredo**

If you would like to bring up an interesting incident which occurred to you it is fine. However, it should be a unique experience and have a bearing on what you wrote about other and their respective countries.

I am writing this here is something which cannot be matched by the typical freshman language class at the University.

Those responsible for the success of this program, both the students and the teachers, are to be congratulated.

**Letters To The Editor**

**TO Tppers Irfan Kan**

To the Editor,

I read an article in the newspaper a few weeks ago about the Peace Corps and the efforts of the organization towards world peace. I was interested in learning more about the background and goals of this organization.

I would like to briefly discuss the Peace Corps and the efforts they are making towards peace and understanding among nations.

The Peace Corps was established in 1961 by President John F. Kennedy as a volunteer program to assist developing countries with projects that promote economic and social development.

Since its inception, the Peace Corps has sent thousands of volunteers to more than 130 countries around the world. Volunteers work on a variety of projects, including education, health, agriculture, and community development.

The Peace Corps provides an opportunity for young Americans to gain valuable experience and contribute to the betterment of communities abroad. Volunteers are trained in their field of interest and assigned to projects that align with their skills and interests.

Volunteers are typically stationed for two years and work closely with local communities, local governments, and other international organizations.

The Peace Corps experience is unique in that it offers a chance to learn, grow, and make a meaningful contribution to the world. Volunteers gain valuable skills and experiences that can be applied to various aspects of their future careers.

In addition to the direct benefits of volunteering, the Peace Corps also offers a chance to explore new cultures, languages, and ways of life. Volunteers have the opportunity to make lifelong friends and contribute to the betterment of communities around the world.

I encourage others to consider joining the Peace Corps and taking advantage of this unique opportunity to make a positive impact in the world. The Peace Corps experience is truly a life-changing opportunity that can open doors to new experiences and opportunities.

Sincerely,

[Your Name]

**From Other Campuses**

**From Freshmen Study “American Life”**

Freshmen at Concord College participated in an activity designed to familiarize them with the cultural and intellectual opportunities available on their campus. The students, under the guidance of Associate Professor of History, enjoyed a tour of the museum, which is given to all students by the Administration, in the evening and spent an hour in the museum. The group was then divided into smaller groups and each was given a guide to explore the museum on their own.

Cancer Theory Cuts Down Ads

Eliminating newspaper is not enough to save thousands of lives. The tobacco companies are engaging in a campaign of lies that will continue to endanger the public health. The American Cancer Society is working to educate the public about the dangers of smoking.

Tobacco is proven to have a direct connection to cancer. The American Lung Association is calling for a reduction in tobacco advertising.

At first, the tobacco companies refused to accept the findings because they were too controversial. They avoided publication for ten years because they would lose sales.

President Kennedy appointed a study commission to investigate the matter and report to the American Lung Association as soon as possible.

Papers were open for review. Tobacco companies were issued the opportunity to present their case.

The national fund for Mrs. Flynn and Aptheker is open to girls from 14 to 21 years old.

With the number of smokers growing, the American Lung Association is calling for a reduction in tobacco advertising and promotion.

LONDON, July 4—Princess Margaret, the Queen's sister, has turned forty-six, the Royal Family announced today.

The Queen's sister, who is thirty-six, was born on June 7, 1928, the same day as her brother, the Duke of Edinburgh.

The Princess Margaret is the only daughter of the Queen and the Duke of Edinburgh.

The Queen's sister would have been forty-five today, but the Royal Family said that she had turned forty-six.

New Hockey Entry Policy

A special game, recognized as the first formal entry for State hockey games was introduced Monday by Ticket Manager Bill Mervis. Student entering the hockey games must obtain a entertainment coupon to be permitted to enter the games in order to present a student activity book coupon if they have one past years. Each student will be able to get a warmer, "You students will be able to get in the stadium full of the activity book coupon as they have in previous years. It gets quicker and be a lot warmer," students will be able to get in Rose Bowl in 1953.

The old mark of 575,396 was established in 1953, with an average of 585,369 fans witnessing the State vs. Utah State game mark, with an average of 65,041 fans witnessing the State vs. Utah State game mark. The former record was 575,396 and the latter record was 65,041. The old record was set by the Spartans, and the new record was set by the Wolverines.

The All-University volleyball tournament was held at the IM Building. The tournament was won by the University of Akron, University of Michigan and Western Ontario. The tournament was won by the University of Akron, University of Michigan and Western Ontario.

Debaters Battling .650 This Year

Debate is an argue for the sake of arguing, said Jerry N. Anderson, director of Forensics. Debate topics are generally current issues and depend on the people who propose them. The topics are usually about five intercollegiate tournaments where 65 per cent of all students are debaters. This fall the squad participated in about 20 tournaments spread over the country, and it really pays off in the long run.

Debate topics are generally current issues and debates do thorough jobs of digging up the facts behind the question. The current issues debate functions as a means of communication, a commitment tendency to inculcate an ethic of public service. Some jolly old man I am! I forgive them all. Some jolly pu-pu I am! I forgive them all.

Some jolly old man I am! I forgive them all. Some jolly pu-pu I am! I forgive them all.

Some jolly old man I am! I forgive them all. Some jolly pu-pu I am! I forgive them all.

Some jolly old man I am! I forgive them all. Some jolly pu-pu I am! I forgive them all.

Some jolly old man I am! I forgive them all. Some jolly pu-pu I am! I forgive them all.

Johnson Honors Oppenheimer

WASHINGTOI—President Johnson, "With great pleasure and honor," presented the first of three newly designed medals to Dr. J. Robert Oppenheimer, renowned physicist and director of the Manhattan Project during World War II.

Oppenheimer was honored for his "exceptional contributions to the development of atomic energy, his leadership in the development of the United States atomic bomb, and his role in the development of the hydrogen bomb." The three medals represent "the highest honor a citizen can receive from this country," the president said.

The other two medals, to be presented in the near future, will be awarded to Dr. Oppenheimer's former colleagues, Dr. Edward Teller and Dr. Hans Bethe.

A team of scientists, including Oppenheimer, Teller, and Bethe, was responsible for the development of the atomic bomb during World War II. Oppenheimer is credited with helping to build the bomb, which was used to end the war.

The three medals, called the"Oppenheimer Medals," are designed to resemble the "Atomic Energy Medal" and will be presented to Oppenheimer in a ceremony to be held later this month.

In his acceptance speech, Oppenheimer said, "I am deeply grateful to the United States for this honor. It is a great privilege to be recognized for contributions to the development of atomic energy."

He added, "I accept this medal not only on behalf of myself, but also on behalf of all those who have worked on the development of atomic energy."

The medals were presented during a ceremony at the White House, where Oppenheimer was joined by his family and friends.

Johnson also presented the medals to Teller and Bethe, who were also present at the ceremony. Teller and Bethe are both members of the Manhattan Project and have made significant contributions to the development of atomic energy.

The three medals, which were designed by a team of artists, are said to represent the "highest honor a citizen can receive from this country."
