Faculty Group Downs Open Hearing Policy

By SUE JACOBY
State News Staff Writer

An attempt to the ASMC to make public the minutes of its executive committee meeting, which was held last Thursday, was defeated by a vote of 13-12.

The meeting was called to order by George W. Johnson, IV, president of the Inter-Club Council, at 8:30 p.m. in the Student Union. The purpose of the meeting was to discuss the question of whether the minutes of the executive committee meeting should be made public.

The motion to make the minutes public was moved by John Glenn, member of the executive committee, and seconded by Dick Harris, member of the executive committee. The motion was defeated by a vote of 13-12.

The American Student Movement on the University of Michigan campus (ASMC) is a non-partisan student government organization that seeks to improve the lives of students on campus.

Greeks, Co-ops Attack Tax Plan

By CARYS BALCERV
State News Staff Writer

A multi-pronged attack on the state tax plan was launched by the Greek organizations and the Co-operative Association of Michigan (CAM) at a meeting of the ASMC executive committee last Thursday.

The attack was led by the Greek fraternities and sororities, who opposed the tax plan because it would increase their costs in a time of decreasing real income. The Co-op Association of Michigan also opposed the tax plan because it would increase their costs in a time of decreasing real income.

The Greek fraternities and sororities, who opposed the tax plan because it would increase their costs in a time of decreasing real income, were represented by John Glenn, president of the Inter-Club Council. The Co-op Association of Michigan was represented by Dick Harris, speaker of Congress.

The tax plan was passed by the Michigan legislature and signed by Governor George Romney last week. The tax plan is expected to generate $250,000 for the State University.

SQUASHED BUG

This Volkswagen came out on the short end and a four-cylinder engine is a welcome addition to the U of M's fleet.

The car was damaged during a recent test drive. However, the damage was not severe and the car was able to be driven back to campus.

Student Congress OK's Resolution

By NICHOLAS LEACH
State News Staff Writer

The Student Congress of the University of Michigan has approved a resolution that will allow students to vote on a plan to change the student government system.

The resolution was approved by a vote of 27-12. The resolution was introduced by Bill Gillis, past chairman of the Student Congress.

The resolution states that the new system will be a "true representative democracy," where students will have the power to elect their own leaders. The resolution also states that the new system will be "responsive to student needs and desires," and that it will be "inclusive and democratic."
Emory Offers Apathy Cure

Inefficient student government and a student body sympathetic about campus issues is not unique at any single university. Almost 600 miles south of here, in Atlanta, Ga., Emory University students face these problems of inefficiency and apathy. Emory officers offered a possible solution to whip up student interest and government responsibility — the installation of campus political parties.

In a move to improve student government, this semester the 1,300-seat Student Senate, which is responsible for most of the activities in campus life, was divided into four "parties".

The students feel little enthusiasm for student government because they have no agency of recourse through which they can be heard.

The advantages of political parties are numerous. Because candidates would be nominated by a college, the student would be obligated to run on a political platform which would both effectively compete with the opposition party and maintain a reasonable record for future elections.

The party system would, by nature, create a larger and more unified electorate for a majority of votes would be solicited by each party for election. Thus, if representatives of various schools wished to be successful candidates, they would find it necessary to become increasingly aware and interested in the issues of concern to the total University enrollment.

The Academic Senate and the student government could take the "techniques of politics" out of a categorically "unacademic situation." This would not only equip students with the tools to compete, but also equip them in later state and national elections, but could effectively suggeast a lesson in political party functions.

"Such being the case, an entire body of students, not just a nominal fraction, and friends and foes would be out to solicit support for their candidate."  

Letters To The Editor

Is Housing Bias Found?

We are quite pleased that a move is underway to follow our Monday morning suggestion and determine a method for pushing the 60 percent to prevent an uneven distribution of the general administrative positions.

More than 2,000 of Jeonson's 13,000 seats are available to students.

The University Ticket Department's realization that students do not think the seats should be assigned in order, and that they really do not like to and want a chance themselves, is a ray of hope in the cloudy look-ticket picture.

The university officials are trying desperately to find a solution to the problem that will please all students.

We are quite pleased that a move is underway to follow our Monday morning suggestion and determine a method for pushing the 60 percent to prevent an uneven distribution of the general administrative positions.

"True Church" A Fallacy

By RAVEL LUTZ

"True Church" is a term that Christians use to describe their own religious group as being the only genuine expression of the Christian faith. However, the concept of a 'True Church' is problematic because it often leads to exclusivity and divisiveness. The idea of a 'True Church' can be traced back to the early Christians who believed that their church was the only true church. This concept has been maintained by various Christian denominations throughout history.

The concept of a 'True Church' is problematic because it often leads to exclusivity and divisiveness. The idea of a 'True Church' can be traced back to the early Christians who believed that their church was the only true church. This concept has been maintained by various Christian denominations throughout history.

In the 15th century, Martin Luther, a German monk, challenged the concept of a 'True Church' by arguing that the true church is the community of believers who follow the teachings of Jesus Christ. Luther's ideas helped to pave the way for the Protestant Reformation, which led to the creation of new Christian denominations like the Lutheran and Calvinist churches.

Since then, many other Christian denominations have emerged, each with its own understanding of what constitutes a 'True Church'. This has led to a great deal of division within Christianity, with some denominations viewing others as heretical or false.

In conclusion, the concept of a 'True Church' is problematic because it often leads to exclusivity and divisiveness. It is important for Christians to remember that the true church is the community of believers who follow the teachings of Jesus Christ, and that all people are welcome to join this community regardless of their denomination or background.

Interdenominational Hospitality Center

**HOURS**

Friday and return following Sunday.

By RAVEL LUTZ

The Interdenominational Hospitality Center at Michigan State University was founded in 1962 as a place where students of different faiths could come together to learn about each other's beliefs and traditions. Today, the center continues to serve as a hub for interfaith dialogue and outreach.

The center is located in the W.K. Kellogg Foundation Building on the campus of MSU. It is open to all students and staff of the university and is staffed by volunteers from various faith communities.

The center offers a variety of programs and services, including a weekly prayer service, a monthly interfaith dinner, and a regular schedule of lectures and discussions on religious and ethical topics.

In addition to its programming, the center serves as a place of prayer and reflection for students and staff of the university. The center also provides a space for students to study and read religious texts.

The Interdenominational Hospitality Center is a unique and valuable resource for the MSU community, and it is a testament to the power of interfaith dialogue and understanding.

State's Orme Number Two

Recitals Planned

In Piano, Voice

Two recitals were announced for this week. The first will be held on Thursday, January 17, at 5 p.m. in the Music Building. The program will consist of works by Scarlatti, Gluck, Schubert, De Falla, and other composers. The second recital will be held on Friday, January 18, at 7 p.m. in the same building. The program will include works by Pergolesi, Vivaldi, Mozart, and Beethoven. Both recitals are open to the public.

Higher Starting Pay

Seen For 1964 Grads

Job opportunities for the 1964 college graduates will be better than ever before. John D. Rockefeller, president of the Placement Bureau, said in a speech Wednesday that the demand for marketing, finance, and sales positions is expected to increase by 25%. The increase is due to an expected increase in earnings, which will result in a higher demand for skilled workers.

Ski Report

Avalanche, Big M, Brian Hill, Caberfae, and Moon Ridge report fair to good conditions. The crease in these slacks has been especially treated to stand up year around. nonatomic and xenon-133 isotopes will be used to map the underground structure of the Grand Canyon. The Grand Canyon is one of the most important natural landmarks in the United States, and the mapping of its underground structure is expected to provide valuable information for future development and conservation efforts. The mapping will be done using a technique called radioisotope method, which involves the use of radioactive isotopes to detect changes in the Earth's surface due to the presence of minerals or other substances.
