LBJ Budget Touches All Economic Sore Spots

WASHINGTON—President Johnson today called for his top priority in the eleventh-year economic program Madison, that "subsidizing the starving poor," will drop by 20 percent.

For conservatives and liberals, for fiddler and rich, for farm and city dwellers, for old and young, for black and white, for taxpayer and student, for farmer and labor, for man and wife, for sick and well, for rich and poor, for farm and city dwellers, the President has put on the table his one thousand and one proposals, in the hundred billion dollar tax reduction bill the key to his program.

The President said that the program will go no further than the present recommendation of special incentives to business and industry.

For the liberals he laid out a lengthy list of social welfare measures similar to those proposed by the left President Kennedy. For the elderly, he asked health care financed through social security taxes.

For the big cities, where this year’s inflationary wage gains have been the “exception of the month,” the President proposed an all-out attack on inflationary wage boosts.

For the big cities, where this year’s inflationary wage gains have been the “exception of the month,” the President proposed an all-out attack on inflationary wage boosts.

For the big cities, he asked for a balanced budget program. For the farmers, he asked for an average tax reduction of five percent, which he contended would be "without exception, the most important single measure we could have in this fiscal year, beginning July 21, 1964."

The President laid before the Joint Economic Committee on Capitol Hill the entire economic package, including all the new policy proposals, and the billions in federal spending. The President introduced his plan, saying: "I am putting before you today a comprehensive economic program designed to meet the needs of the American people in this fiscal year..."

The President’s program is designed to meet the needs of the American people in this fiscal year, beginning July 21, 1964. Among the major proposals:

1. A balanced budget program, including a reduction in federal spending of $5 billion.
2. A tax reduction bill of $18 billion, including a 25 percent reduction in income tax rates for individuals and estates.
3. A program to increase federal spending for social programs, including health care for the elderly, and education and training programs for the unemployed.
4. A program to increase federal spending for housing and urban development, including a doubling of federal housing support.
5. A program to increase federal spending for research and development, including a doubling of federal support for scientific research.

Meters, Liters Or Inches

Your government may have the best engineers in the world, but they can’t do anything right. How they ever got away with it, I’ll never know. But at least they’re trying.

The American Metric System was designed to make life easier, but it has only made it harder. The government has spent billions of dollars on the project, but it has only succeeded in confusing everyone.

The Metric System is based on the decimal system, which is much more efficient than the British System. However, the government has only succeeded in confusing everyone. The Metric System is based on the decimal system, which is much more efficient than the British System. However, the government has only succeeded in confusing everyone.

Greeks, Co-ops Unite

Greek and co-operative housing representatives moved quickly last week to counter an East Lansing personal property tax that is to be levied on their units for the first time this year.

Under the leadership of Bill Gillis, past chairman of the Faculty sub-committee on Fraternity and Sorority Affairs, and Mrs. Isabel Dickinson, alumnae advisor to Sigma Kappa sorority, the group included a four-point course of action.

The plans, to be carried out simultaneously, were offered by Gillis:

1. Gather facts from the city about the need for current revenues and taxes already paid by Greek and co-op units.

2. Meet with state legislators who have proposed exempting such residents from the state personal property levy.

3. Work through university channels to seek legal advice.

4. Write to the East Lansing City Council and seek to have the tax waived at least this year.

The group has made both immediate and long-range plans with these proposals. To avoid the tax -- due July 1 -- this year, it hopes that tax legislation will convince the City Council that the tax is unfair to the Greek and co-op residents, and that a permanent exemption from personal property taxes, the group realized that it cannot return to the city each year, should it decide its case. Gillis will seek a settlement at the Capitol in Lansing and will see if the group can get legal advice through the university.

This course and deliberately-made plans may be the first step toward exemption for these non-profit off-campus student residences.

The group also displayed a unity between Greek and co-op representatives that has been maintained until recently is to receive consideration by the City Council or downtown in Lansing.

Although co-ops know they have no legal right to appeal to exemption because they are strictly educational units and not social groups, they also know that Greek organizations are broader in scope with alumni all over the state who help send representatives to Lansing.

Unity between these two groups was essential in the damage a tax exemption for all their members. They hope we will keep this a part in mind as we work together.

This group also seeks that units in the Greek and co-operative organizations at other colleges and universities in the state. With this broader base, the groups would surely find more legislation which will remove this tax on education.

Center Rebirth Long Overdue

A shadow, the remnant of the University's Traffic Safety Center may soon be given substance.

With the impetus provided by an increase of 247 traffic fatalities in the Greater Lansing area, Governor Romney has asked the Legislature to appropriate $250,000 for the center. On hearing the news, reaction of Gordon S. T. Beush, former director of the safety center, was emphatic; "overdue."

Ironically, at their last meeting some members of the University's Board of Trustees expressed disappointment at the lack of progress it seemed to be making, wondering if its full functioning might not have brought a lower traffic toll on the state's highways.

The center, which last operated in 1960-61, has been carried on an interim operation since then by Sibley. It is now known as a traffic safety program within Continuing Education Services.

Rominy's actions appear to be the start of an "out effort to cut Michigan's traffic increase in vehicular mishaps. He has also called for the support of a special State Police freeway patrol and stricter laws governing the dangerous habits of suspected drunk drivers.

All this is encouraging. Yet it seems to speak of the imperfection of our governing bodies, when we note that concern for traffic safety is not obvious, must be emphasized.

Prof Reviews Foreign Policy

The University of Michigan held its annual meeting of the American Section of the United Nations.

The meeting, held at the University of Michigan, was designed to provide an opportunity for students and faculty members to discuss issues related to foreign policy.

The speakers included representatives from various countries, including the United States, Canada, and Mexico.

They discussed topics such as international trade, human rights, and the role of the United Nations in promoting peace and security.

The meeting concluded with a panel discussion on the future of the United Nations.

Foreign Policy

International trade, human rights, and the role of the United Nations in promoting peace and security were discussed at the University of Michigan's annual meeting of the American Section of the United Nations.

The meeting was attended by representatives from various countries, including the United States, Canada, and Mexico.

Debaters Take Meet Honors

Winners of the debate included Lee Iacocca, James Robinson, and Daniel Stevens.

Iacocca was given a special award for his contributions to the debate.

The debate was held at the University of Michigan and was sponsored by the Michigan State University Debate Team.

Scream, You Scream, We All Scream For...

Ice cream bars in all flavors - you name it, they make it - roll off the "assembly line" at the MSU Dairy Plant by the thousands each week.

The plant is one of the best equipped experimental stations in the country, having facilities at the commercial level for all facets of dairy production. Darrel Hendrickson, Dairy Plant supervisor, emphasizes, however, "We do not try to be a commercial enterprise. Our objective is to conduct research and train students."

The recipe for ice cream bars is very simple. Combine 120 gallons of milk, 250 pounds of sugar, 40 gallons of cream and 100 pounds of skim milk powder. Yield: 1200 to 1500 "frosted-frosted" (with sticks) or "frosted-frosts" (stickless).

This recipe, repeated as often as necessary, produces a total of 800,000 to 900,000 tasty by-products of dairy research each year. All of the bars are sold to campus. The two major means of distribution currently in use are vending machines, which are placed in all the dorms, and the MSU Dairy Store on Farm Lane.

Ice cream bars are made in all flavors. Michigan State University students can enjoy a variety of flavors, including chocolate, vanilla, strawberry, raspberry, and many others.

Ready for a dip - Technician Ernest Overell removes uncoated ice cream bars from a freezer. They will soon be dipped to give them an outer confectionary coating.

Chock full of nuts - At least these ice cream bars are on the outside, as Ernest Overell removes the vanilla treat from a chocolate nut mix.

Love those nutty bars - Marilyn Duffey, Lansing junior student, adds her easy-to-remember ice cream in McClan Hall, probably unaware of the lengthy process by which the bar was prepared. In seconds or two, it may be too late.
Romney is serious about the Presidential season underway. Duffy Daugherty, who should run against Romney in '64, and the Republicans could be seeking a candidate if Romney is serious about the Presidential contest. Is there another man in Michigan who would be so acceptable to both parties? Of course Duffy as Governor would pose no threat to Romney in '64, and the Republicans could be seeking a candidate if Romney is serious about the Presidential contest. Who would have the nerve to run against Duffy Daugherty?”

MU Native American recognition is the basis of reason by linking the Spartans to an impressive individual in the history of basketball. Aubuchon, a freshman, is a two-time All-American. Recognition of Aubuchon, as the "Houdini of the Floor", created a national stir. The athletic director at Port Huron's Chamber of Commerce, who is mending for his outstanding work with young men under his care, claimed "Aubuchon is the greatest basketball player I have seen." Aubuchon received national acclaim with his fantastic dribbling and ball handling. Aubuchon, 6-4, 230 pounds, Aubuchon received All-American honors for leading the Spartans to an impressive 14-6 record as a junior. Aubuchon top-scored that year with a 24 point average today. Aubuchon was sélectioned to join a squad of international basketball experts that will travel to Europe to give talks on basketball, old and new. Aubuchon received semi-professional scouts from professional clubs from abroad. Aubuchon received semi-professional scouts from professional clubs from abroad. Aubuchon returned semi-professional scouts from professional clubs from abroad. Aubuchon returned semi-professional scouts from professional clubs from abroad.
