Why Let Him Steal Grades?

Suggest your professor assigns grades to the reading you get to the library, you never read an assigned page out of a book, hide it in your jacket and head home.

What would you do? Would you just stand there and foolishly let him walk out--with the pages you must read--and却没有 warn the librarian? Would you have to read--and you say, "No, maybe it doesn't, directly."

But what if you overhear some other say that he saw a student walk out with a complete page out of a book--and you find out that there were pages you needed? Could you stop this person, then?

The witness is no different from you--he didn't care if that jerk walked out with the whole book, as long as he didn't need it or know who owned it. You can't condemn him unless you also condemn yourself.

The point is: What if you find out later that your roommate has been caught because he couldn't find the same material you let someone else have?

Remote chance that your roommate warns you; more likely he warns the librarian.

Now you have to read. Would you stop him or warn the librarian?

The solution is: Don't let him steal material that you do not have to read. Would you stop him or warn the librarian?
Morgan Talks On Indiana Act

Describes Indictments, Asks Aid To Finance Court Proceedings

Tom Morgan, one of the three Bloomsfield Township residents who were charged with violating the state's Anti-Subversion Act of 1951, said he was not surprised by the indictments.

"This is not the first time we've been involved in fights over this thing," Morgan said before going into court to discuss his case with lawyers. Morgan said he has been involved in fights over the government's anti-subversion laws for several years.

The individuals charged under the Indiana Anti-Subversion Act include Morgan, Robert J. Schnell, and John R. McHale. All three men were charged with violating the law in connection with their activities in support of the American Civil Liberties Union.

Morgan said the charges were based on his participation in a meeting of the ACLU in Michigan, where he discussed the organization's work in support of civil liberties.

"I don't think this is the first time we've been involved in fights over this thing," Morgan said. "I think it's just the latest in a series of legal battles we've had with the government over our civil liberties work."
University Theatre Changes Name

The University Theatre has changed its name to the Market Theatre. The move was prompted by the decision to hire a full-time professional manager for the theatre. This change is expected to help increase the theatre's productions and overall performance quality.

Theatre Performance

Theatre performances often include a variety of genres, from classic plays to modern productions. Each performance is a unique experience, with actors and actresses delivering captivating performances that engage the audience.

Theatre Audience

The theatre audience is diverse, with people of all ages and backgrounds attending performances. The theatre is a hub for cultural and artistic expression, providing a space for the community to come together and enjoy the arts.

Tickets and Reservations

Tickets for theatre performances are available online or at the theatre's box office. Reservations can be made in advance to ensure seats for sold-out performances. The theatre also offers special discounts for students and seniors.
Electrical Union Head Speaks

Jobless Aid Councils Set Up

Unemployed and Retired Workers' Councils, sponsored by the labor parties in both Britain and France, are now being organized as a kind of shadow cabinet of the government. These councils are set up as a forum for the unemployed to express their views and seek solutions to their plight.

Milton M. Krumlaw, assistant director of the New York Labor Council, an association of labor unions, indicated that the councils would provide a means for the unemployed to participate in the political process. "The councils," he said, "are not a substitute for a political party, but they are a way for the unemployed to have a voice in the political process."

Walks On Hands

McClure Big Man On Campus

One of the big factors in the success of the Michigan passing game over the past two seasons has been the strong, accurate arm of quarterback John McClure. He passed for 2,942 yards and 20 touchdowns last season. This year we are averaging six assists a game, but couldn’t hold it.

One of the main things we can do is get our offensive line in place. The more assists we have, the more we can improve on the passing game. That’s why I’m in a hurry to get them going in the practices.

---

NEW YORK (UPI) — The American Football League and the National Football League agreed on a five-year contract Wednesday for selection of all-star and all-pro players to be invited to the annual all-star game.

The contract became effective with the American Football League contract with the American Broadcasting Co. expires.

The AFL contract is comparable to the NFL's million-dollar two-year agreement signed by the National Football League with the Columbia Broadcasting System Friday.

The NFL contract breaks down to $28.2 million over four years. The AFL contract provides $25 million over four years. The contract is not a league-wide pact but a plan by each team to take its share of the money. The money will be divided among the league's 16 teams.

Four years ago, the National Football League agreed to pay $5 million over six years for the services of the American Football League all-stars for the 1965 season, after the pro league was placed in the World Series.
