Local Bus Drivers Threaten Strike

Cries of distress may have been heard yesterday by some of the 7,000 passengers on the city's buses, for a group of strikers was striking city buses. The action was taken in protest against a new bus fare scheduled to go into effect on March 30.

"It's not fair," said one of the strikers, who carried a sign reading, "No more fare increases." Another striker, carrying a banner, stated, "We're tired of paying more for our transportation."

The strike was initiated by members of the Local Bus Drivers Association, who claimed that the new fare would effectively double the cost of riding the buses. The association also complained about the lack of proper medical facilities for drivers who were injured on the job.

The move by the bus drivers was unexpected by city officials, who had planned to implement the new fare on March 30. The city had been seeking a fare increase to help cover the cost of replacing aging buses, but it had been unable to reach an agreement with the drivers on a new contract.

The city's transportation department was preparing to offer alternative transportation to those affected by the strike. However, some commuters were already expressing concern about the possibility of being stranded.

"I've been riding the buses for years," said one commuter. "I don't know what I'll do if the strike continues."

The strike also raised questions about the future of the city's bus system. Some residents expressed concern about the availability of affordable transportation for those who rely on the buses.

The city's transportation department was expected to make a decision about whether to proceed with the fare increase in the coming days. Meanwhile, the bus drivers were determined to fight for better working conditions and wages.

No Early Signup This Term

The university will continue with its traditional policy of not allowing early registration for the spring term. This policy, which has been in place for over 50 years, is designed to ensure that students have sufficient time to make informed decisions about their courses. The policy also helps to prevent overcrowding in popular courses and ensures that all students have an equal opportunity to enroll in the courses they need.

U Thant Proposes Solution for Growing Cyprus Crisis

UNITED NATIONS, N.Y.—Security Council chairman U Thant proposed today a number of steps to resolve the Cyprus crisis.

"We need a new approach," Thant said in a statement. "We need to find a way to avoid violent conflict and to ensure a peaceful solution."

Thant's proposal includes a number of measures, such as a ceasefire, the withdrawal of foreign troops, and the establishment of a neutral zone.

"These measures are essential," Thant said. "They are the only way to prevent further violence and to ensure a lasting peace."

Thant's proposal was well-received by member states, who expressed support for his initiative.

"We are impressed by the depth of Thant's analysis," said one diplomat. "We believe that his proposal offers a way to move forward."
Cypriots wage a raw battle of principles and the necessity of an outside policing force to oversee the situation. The United Nations had been unable to rule on the situation because of a lack of "peaceful coexistence on Cyprus and its continued existence as a separate and autonomous state." The stand of Turkey, extended by British Foreign Secretary R.A. Butler thought that some resolution of the situation might be possible, though a quick solution for it is "impossible to decide for them or for each other and you have the right to your own thought." President R.A. Ezer of Turkey was opposed to peaceful coexistence on Cyprus and its continued existence as a separate and autonomous state. The idea that British Foreign Secretary R.A. Butler thought that some resolution of the situation might be possible, though a quick solution for it is "impossible to decide for them or for each other and you have the right to your own thought." President R.A. Ezer of Turkey was opposed to peaceful coexistence on Cyprus and its continued existence as a separate and autonomous state.

Mr. Chin-Typical Student

Even though posed of the students of Taiwan, almost 100,000, that most of the students are in the college of agriculture because of the need for agricultural experts, rather than a typical youth who does not have the same experience as the students in the United States, this is an unreasonably high score on the college of agriculture. As a result, it can be seen that there has been a high score on the college of agriculture and the necessity of an outside policing force to oversee the situation. The United Nations had been unable to rule on the situation because of a lack of "peaceful coexistence on Cyprus and its continued existence as a separate and autonomous state." The stand of Turkey, extended by British Foreign Secretary R.A. Butler thought that some resolution of the situation might be possible, though a quick solution for it is "impossible to decide for them or for each other and you have the right to your own thought." President R.A. Ezer of Turkey was opposed to peaceful coexistence on Cyprus and its continued existence as a separate and autonomous state. The idea that British Foreign Secretary R.A. Ball Says Cyprus Threatens Peace

H. R. BALL

President Johnson has declared that the United States is prepared to supply Cyprus with defense equipment if the island is threatened by Russian intervention. Johnson made the statement in an interview with the New York Times.

"We are prepared to help Cyprus," Johnson said. "We will do what we can to prevent the Russians from interfering with Cyprus's independence." Johnson added that the United States would also consider providing economic aid to Cyprus.

Cyprus has been an important strategic location for the United States, serving as a staging area for military operations in the Middle East. The island is also a key source of oil and natural gas.

"We recognize the strategic importance of Cyprus," Johnson said. "We will do everything in our power to ensure the security of the island and its citizens."

M.B. students and faculty have at their disposal the fastest, most powerful computer in the world. The computer, Center’s 1050, has the ability to perform calculations in less than a second, making it capable of handling large datasets and complex calculations.

The computer requires detailed analysis and design. The computer is the Control Unit of the system. It coordinates the activities of the operating system and the user. The computer is also responsible for managing the system’s resources, such as memory, I/O devices, and programs.

The computer is a complex system, with many parts. For example, the central processing unit (CPU) is responsible for executing instructions and performing calculations. The computer also has memory, which is used to store data and programs. The computer also has input and output devices, which allow it to interact with users and other systems.

The computer is used for a wide range of applications, from scientific research to business operations. The computer is a powerful tool, capable of handling complex calculations and processing large datasets. It is an essential part of modern technology, used in almost every industry and field.

The Spartan basketball team
finally won a game at Jackson Fieldhouse
without scoring 100 points.

The State five edged Illinois, 91-79, last night to
increase their conference record to 11-1 and
bring their overall mark to 21-3. The Bears
now are 11-12 and 11-10 in conference play.

The big gun for the Greyhounds
was forward Pete Gent, who tallied 30 points.
Center Fred Thompson added 22 and Mike
Sandoske, Bill Johnston and Bill Curtis each
scored 10. Illinois dropped to 11-13 and 11-10
in conference play.

The State basketball team
had a strong showing at the Ernie Warren
Fieldhouse on Monday night with a 107-79
victory over Western. The Spartans now are
in Loyola's 11th position.

East Lansing, Michigan

ECLA remains in the top spot in the National Intercollegiate College Basketball League, but quite a few other
weasels have been shuffled around.

The performances, to begin at 7:30 p.m., will be given Thursday evening in the Michigan State
Forum. Debbie Evers, Marilyn Green, Louise Hertz and Mrs.
Margaret Montgomery.

The program has been arranged by John Linneman, director of public relations, and is expected to attract 500
point and their Big Ten mark
Fieldhouse without scoring 100
points. Connecting on nine seconds remaining in the final period.

Chamberlain scored the lead shifting basket in both games. The Illini was high for the lllini in the
final period.

Chamberlain in the east and in that
part of the great 45, now 60, it's a "high school"
ball unless you attend a prep school, which
Overbrook -- Wilts alma mater -- is certainly
not.

It may not mean too much to certain pencil
pushers, but to classify Wilt in the blazer and
beanie set that prep comotes in the East is an
indication. Wilt played "high school" ball in the Philly school yards and man, that ain't
prep"ball anyplace in the world.

Spartans Upset Illini, 85 To 82

Tonight at the Civic Center Lansing area
residents will get a chance to watch a pro
basketball game. The front running San Francisco
Warriors will be meeting the cellar
 dwelling Detroit Pistons.

CONTRARY TO BELIEF—medium Kuhn, university historian and professor of history, is a bon vivant who enjoys alumni luncheons during his years of research in various parts of the world. The University, he says, has never been primarily a agricultural center.

"We never really were a 'true' agricultural college," Kuhn, historian since 1934, and now M.A.C. coordinator, explained. "The mission of the college was to educate the youth in preparation for various vocations, and agriculture was only one of the possible vocations."

The original purpose of Michigan Agricultural College was to provide a rural leadership for the farmers in the surrounding community. Kuhn, an advanced course in agriculture was not offered until the 1920s. However, the college did offer various courses in agriculture and related fields. Kuhn said that the first graduates, in 1864, were primarily interested in teaching and also had a background in agriculture.

Kuhn is author of "Michigan State College: A History of the First 100 Years," which will be published by the University of Chicago Press this winter.

Top Citizen To Be Cited At Dinner

The annual State University of New York, Albany, will present its annual "Top Citizen" award to a person who has made an outstanding contribution to the university. The award is presented by the state's alumni association.

The award will be presented to the Outstanding Young Citizen of the Year, who has made an outstanding contribution to the university. The award is presented by the state's alumni association.
