Hannah Cites Problems Of Mass Education

Many educators are gradually waking up to the fact that mass education is not mass education.

"In truth," said Hannah in his "Report of the University" address, "many educators are gradually waking up to the fact that mass education is not mass education."

"It is no longer possible," he said, "to teach every student the same thing. Everyone learns at a different pace, in a different way."

"We need to approach education differently," he continued. "We need to acknowledge the individuality of each student and cater to their unique needs."
EDITORIALS

Here and There

The United States Civil Rights Commission, whose chairman is President John F. Kennedy, will step into the turmoil of the struggle for Negro rights in Michigan next month. The hearings to be held at the State Capitol in Lansing, Michigan, on February 10, will consider the problem of death threats and violence by some of the state's Negro citizens.

Hannah said Sunday in announcing the hearings, "The hearings will be called to the attention of all the people in Michigan and to the national leaders who may have been looking in the wrong direction to see the great problems that are growing." The hearings, he said, will be aimed at a real search for facts and a reaction from the people of Michigan who are interested in the solution of the problem.

Hannah asserted that the attack on civil rights is not entirely the responsibility of the Negroes themselves. He said, "The Negroes are not the only blame for the trouble. Some of the other groups are not blameless."

The hearings, he said, will be held to determine the facts and to make recommendations for the solution of the problem.

Red Cedar Report

By Jim DeForest

Michigan State University

The Michigan State University Board of Trustees recently approved a proposal to change the name of Michigan State College to Michigan State University. The proposal was recommended by a committee appointed by the President of the University.

The change of name will become effective July 1, 1965, and will be reflected in all future publications and correspondence.

The University's official name, Michigan State University, will be used in all correspondence and publications. The old name, Michigan State College, will continue to be used in some publications and correspondence for a transitional period.

The change of name is expected to provide a more appropriate and descriptive name for the University, reflecting its broader mission and scope of activities.

Campus Summary

A Letter To The Editor

To the Editor:

I was interested in the letter which appeared in the last issue of the Michigan State News. I am a student at the University of Michigan and I have some comments and concerns which I would like to share.

First, I believe that the editorial in the Michigan State News about the Michigan State University Board of Trustees approving the proposal to change the name of Michigan State College to Michigan State University was quite well written. The arguments presented were clear and convincing.

Second, I was concerned with the implication that the change of name was solely a reflection of a desire to increase the University's prestige. While this may be true to some extent, I believe that there are other factors at play. For example, the change of name may also be seen as a reflection of the University's commitment to a broader mission and scope of activities.

Finally, I was pleased to see the emphasis on the University's commitment to student involvement in decision-making processes. This is an important aspect of modern higher education, and I believe that it is essential for the success of any educational institution.

I appreciate the opportunity to share my thoughts on this important issue. I look forward to continuing to follow the developments surrounding the change of name and the broader mission of the University.

Sincerely,

[Signature]

Heenan Takes Thai Post

David R. Heenan, associate professor of anthropology and director of the Center for Southeast Asian Studies at the University of Michigan, has been named as the new director of the United States Mission to Thailand.

The appointment was announced by the U.S. government, which has named Heenan to replace the late Maj. Milton L. Gage as Chargé d'Affaires ad interim for the United States in Thailand. Heenan will assume his new post in January 1965.

Heenan, who has been a member of the Michigan State University faculty since 1954, has conducted extensive research in Thailand and other Southeast Asian countries. He is a specialist in the fields of anthropology and Southeast Asian studies.

Heenan replaced Maj. Harold Gage, who had served as Chargé d'Affaires ad interim since the death of Maj. Alfred C. Gage in 1963.

Nigerian's Mother Fat

DEBUT: DEBUT: D. P. A. D. is not a hero in the Nigerian national hero.

Judge W. H. L. Ono has been named as the new director of the United States Mission to Thailand.

Heenan said he was excited to be able to work in Thailand, where he has spent much time conducting research. He is looking forward to the opportunity to build relations between the United States and Thailand.

Economics Department
Given National Rank

Michigan State University's Economics Department has been awarded the 1965 National Research Council's Award for Excellence in Research.

The award was presented to the department by the Council for its outstanding contributions to economic research.

The Economics Department at MSU is home to many of the nation's leading economists and has made significant contributions to the field of economics.

Educational TV On Increase

The TV system allows the student to choose from a variety of educational programs, including lectures, seminars, and workshops.

Tickets On Sale For Vets Dance

The tickets will be available for purchase at the Michigan State University ticket office, located in the Michigan Union.

Greek Week Committee
Rush Scheduled Tonight

The Greek Week Committee has scheduled a series of events for tonight, including a rush for coed fraternities.

Winter's Splinters For Fans Recalled By Crashing Biggie

By MIKE BROOKS
State News Sports Writer

The meet-and-greet session and autograph session was the highlight of Biggie's appearance. It was a warm and friendly atmosphere, and the fans were able to mingle with theủ. The session ended with the sound of applause, and the fans left the event satisfied. Biggie was seen laughing and chatting with the fans, and it was clear that he enjoyed the interaction. Overall, the meet-and-greet session was a great success, and Biggie's fans were thrilled to have had the opportunity to meet him.

Big 10 Onlooker
In AAU Squash

EDITOR'S NOTE: This is the first of a three-part series of articles about the Swiss international tennis player, Robert Yafie, and his experiences in AAU squash. Yafie is working as a tennis pro at the University of Michigan, and he plans to compete in the AAU nationals in the near future.

The first part of the series will focus on Yafie's experiences in AAU squash. Yafie is a native of Switzerland and has been playing squash since he was a child. He has been playing squash for over 10 years and has won numerous titles in the Swiss national championships. Yafie is currently ranked in the top 10 in Switzerland and is considered one of the top squash players in the country.

The second part of the series will focus on Yafie's experiences in AAU tennis. Yafie is a highly ranked tennis player and has been playing tennis for over 20 years. He has won numerous titles in the Swiss national championships and has been ranked in the top 5 in Switzerland. Yafie is currently ranked in the top 10 in Switzerland and is considered one of the top tennis players in the country.

The third part of the series will focus on Yafie's experiences in AAU squash and tennis. Yafie is a highly successful tennis player and has been playing squash for over 30 years. He has won numerous titles in the Swiss national championships and has been ranked in the top 20 in Switzerland. Yafie is currently ranked in the top 10 in Switzerland and is considered one of the top tennis players in the country.

The series will be published in the Michigan State News, and will be available online at the Michigan State News website. The series will be updated weekly, and will be available for free to all Michigan State News subscribers.

Rugby Club

The Michigan State rugby club will host a meet-and-greet session with the USDA's Mike Yafie on Saturday, October 15th at 3:00 PM. Yafie is a highly ranked tennis player and has been playing squash for over 30 years. He has won numerous titles in the Swiss national championships and has been ranked in the top 20 in Switzerland. Yafie is currently ranked in the top 10 in Switzerland and is considered one of the top tennis players in the country.

The meet-and-greet session will include a Q&A session and a meet-and-greet session with Yafie. The session will be open to all Michigan State students, and will be held at the Michigan State Rugby Club's facilities. The session will be free to all Michigan State students, and will be open to the public.

The Michigan State Rugby Club is a thriving sport organization with a strong history of success. The club has won numerous national championships and has produced many highly successful rugby players. The club is located at Michigan State University, and is open to all Michigan State students.

Family Council
To Discuss Youth

The Lansing area youth council will meet Saturday afternoon in the auditorium of the Lansing Public Library. Council members will attend the meeting as guests of the National Council of Family Services.

To attend the council meeting, write to James Smith, executive secretary of the Michigan Council of Family Services, P.O. Box 241, Lansing, Mich. Smith will serve as panel chairman.

Vision Of St. Anthony Is Repaired

Francisco de Zurburan, master of the 17th-century Baroque period, is represented by the work "St. Anthony of Padua." The painting, a major work of art owned by the Catholic Diocese of Lansing, was damaged by vandals.

The diocese, through the purchase of insurance, will pay the cost of repairing the painting, which is displayed in the Lansing office of the diocese.

The painting was said to be worth $1,000,000.

In London, a painting of the same subject by Zurburan was recently restored.

Hollywood Actress
Stars At Conference

Barbara Stanwyck, one of Hollywood's golden stars, has been a media center of interest since her recent appearance on television. At a conference in Michigan, Stanwyck was a star guest.

She was scheduled to speak at the Michigan State University, where she was expected to share her experiences in the film business.

The conference was sponsored by the Michigan State University's Department of Radio, Television, and Film.

The event was held in conjunction with the university's annual film festival.

Awards and Recognition

Robert Stanwyck, another Hollywood star, was also scheduled to appear at the conference. He was expected to discuss his experiences in the film industry.

Other guests scheduled to speak included filmmakers, writers, and producers who have made significant contributions to the film industry.

Math Claims Larger Enrollments At MSU

The main popular department

in college at Michigan State University is mathematics, a subject which is gaining in popularity. Mathematics, a subject which had enjoyed some prominence in the past, has now reached a new high. The Mathematics Department, which has traditionally been strong in undergraduate studies, has recently experienced a surge in interest. This is evident in the increased enrollment numbers at the university. Students from various majors are now choosing to enroll in mathematics courses. The department has responded by expanding its offerings, including new courses and seminars. This has led to a significant increase in the number of freshmen and sophomores enrolling in mathematics. The growth in enrollment is expected to continue as the demand for mathematical skills increases in various fields. The Mathematics Department is committed to providing high-quality education and fostering a strong mathematical community.

Food Fads (continued from page 7)

enjoyment, she could not be discouraged by the lack of variety or the occasional cost. In fact, she found the experience highly enjoyable. The fad was new and exciting, and she wanted to be part of it. She was excited to try something different and was eager to see what the future held.

The MSU Department of Mathematics and Statistics is well-equipped to support such a growing interest. The department offers a wide range of courses and majors in mathematics, from undergraduate to graduate levels. This allows students to explore their interests and develop their skills. The department is also home to numerous research groups and centers, providing opportunities for students to engage in cutting-edge research. With a dedicated faculty and a commitment to excellence, the Department of Mathematics and Statistics is well-positioned to continue its growth and success.

In conclusion, the growth in enrollment in mathematics at MSU is a testament to the field's growing importance and its potential for continued success. As the demand for mathematical skills continues to increase, the Mathematics Department at MSU is well-equipped to meet the needs of students and the wider community. With a strong focus on education and research, the department is poised to continue its growth and development into the future.
Hannah (continued from page 1) United, said, is to inform the legislative authorities of the need of higher education programs in agriculture. The cooperation of all states, he said, is important, and many of them may not be convinced of the need for higher education in farming unless the message comes directly from the legislature. The state committee, he said, has the responsibility of gaining the support of the various legislative bodies in the state and of convincing them of the need for higher education in agriculture.

This happens, and if educators do provide a price of student consumption, then the size of the job means little importance.

Bugs To Be Bugged

"Regulatory measures should be proposed to stop foreign pest infestations," said W. M. Cato, Michigan State University. "Otherwise, we are at the mercy of our own country and get a good start in that we have had from the Department of Agriculture," he said. "In the past we have been successful in preventing major pest outbreaks, and it is important to prevent such outbreaks from occurring in the future."

"We need a strong program of agricultural research," said L. L. Potts, director of the Michigan State University Extension Service. "This program should focus on the prevention and control of agricultural pests." He emphasized the importance of the problem in the state and the need for more research in this area.

Mr. Potts said that the state should provide more funds for agricultural research programs. He also suggested that the state should encourage more research on the use of pesticides and other chemical controls. He concluded by saying that the state should continue to support agricultural research programs and that the state should work towards developing a strong program of agricultural research.
