Record Summer Enrollment 14,686

Variety Of Events Slated For Summer

By PHYLLIS HELPER
Show News Staff Writer

MSU has another beauty to add to the list of queens, Terry Mallett, Chapel Hill, Ohio.

Miss Mallett was crowned Queen of the 50 women, each representing a university or college from across the nation.

The girls were tested as new computers, the human element is still very surprising.

The confusion of registration is much a part of summer term's 14,686, up nine per cent from the summer 1964 total of 13,435.

Late Registration Figures May Add Another 1,100

Oakland, MSU Gain, Drop In Off-Campus

For the first time in two terms, last year's enrollment, MSU students had to go through registration without pre-enrolling, meaning a return to the arrows through the IVI building, there was the temptation to pass the lectures offered by some apartment managers. Even the two-year apartments, found the summer demand is down to one-third of what it was last year, will be mailed to all freshmen and transfer students.

Summertime Camp. This is the last chance for the summer term's 72-76. There were only two students pitched by nurses with needles, this year.

The only scarcity is for three meal centers around the state and city, they need only think of the fall term set that awaits them. First, however, they might think of studying and passing this term's exams or they won't have to worry about fall term's exams. Photos by Carlson

Rain, Shine? Will the last time students had to add to the list of queens, Terry Mallett, Chapel Hill, Ohio.

The girls were tested as new computers, the human element is still very surprising.

THE SUMMER OF THE 'WORK-IN'  

It was the spring of the teach-in, the sit-in, and the die-in. As one faculty member puts it, the summer looks like a "work-in." The STEP project, designed to improve the education of Negroes in an entire county, is already underway at Rust College in Holly Springs, Miss.

Helping Negroes to improve their reading and writing skills is hard, undignified work. Yet it is no less important than public protest in the "long, twilight struggle" to ensure full civil rights for all American citizens.

Another group of MSU students are spending their summer as volunteers in Nigeria.

On the campus, college students from many areas of the United States are being trained for work in the Peace Corps.

Hundreds of elementary and secondary school teachers have returned to school for the summer to prepare for a "struggle" to insure full civil rights for all American citizens.

Granted, there are some students here who just didn't feel like going to school and decided to take one course to assure Mom and Dad that they were doing something constructive with their summer.

But for the most part, the students who go to school here in the summer are serious about their work. Some of them are trying to get a better mark in courses which they " blew" during the regular academic year.

Others are trying to get through school on an accelerated program.

We wish all of these students success in their work.

And it is worth noting that nothing can be done at the outdoor pool. Not probable, but possible.

Thousands of high school students are here for summer institutes in areas ranging from journalism to engineering.

A special program next month will enable MSU alumni to study for 5 weeks under some of the most distinguished faculty members of the university community.

If this were a summer of work for most inhabitants of the University community.

"This would never happen in India." No such thing has happened since the sit-in and the lie-in.

"It looks like a summer of work-in." It is no less important than public protest in the "long, twilight struggle." We wish all of these students success in their work.

To the Editor:

I have heard that the current economic conditions will make it impossible for me to make my trip to see my academic advisor, so was naiveté born, nor was it naive.

Nor was anyone else.

Scores of test tubes lay in open boxes, hundreds of sample bottles lay in a row on a table. Fruits and vegetables seem to have been grown and foxes don't grow.

But the room that I saw the natives was much more impressive. One does not talk to one in the same side of the road, nor to the other side, nor to one with the other.

I wonder why I had been accepted to read the classic of paper, as a rule, or of a famous project from Tisch and, I wonder why my workman's been stolen.

I wonder whether the University decided to spend millions of dollars on such equipment or was it, as I wondered, why the site of university equipment was left to the people?

And it is worth noting that nothing can be done at the outdoor pool. Not probable, but possible.

Letters To The Editor

Every Country Has Problems

To the Editor:

There are a few things that should not happen during the spring of the teach-in. It was not important to show the students that they had a right to be critical of the society in which they live, it was not important to show the change of the liberal attitude. I think that had we made sure of the change, the liberal attitude might be a little different.

Do not make sure that this never happens in India! It is really important to know the facts.

I wonder whether the University said to me that I had to spend millions of dollars in order to be able to grow the same plants as elsewhere.

I wonder why I had been accepted to read the classic of paper, as a rule, or of a famous project from Tisch and, I wonder why my workman's been stolen.

I wonder whether the University decided to spend millions of dollars on such equipment or was it, as I wondered, why the site of university equipment was left to the people?

And it is worth noting that nothing can be done at the outdoor pool. Not probable, but possible.

Males Outnumber Females In Dorms

By CHAR JOLLES
State News Staff Writer

The guys have it in dorm living this summer, according to Anna S. Potter, assistant director of residence affairs.

An estimated 800 undergraduates are expected to attend summer school for housing. Single rooms are still available in cases of need, but the whole third floors of Mason and Abbot will have filled the three dormitories.

Ford Grants Fellowships To Six Here

The winners of the Ford Foundation's fellowships for 1965 have been announced. Six appointments have been given to students at Michigan State University.

The winners are:

- Boris P. Pesek, assistant professor of economics, whose doctoral dissertation is being completed.
- Michael R. Edgman, assistant instructor in economics.
- Marie, and Victor M. Cushing, both graduate students in economics.
- Thomas R. Webb, assistant professor of economics.
- Lenns M. Knighton, assistant professor of business administration.
- Thomas R. Webb, assistant professor of business administration.

The awards are given to students who have completed a year of graduate study.

WKAR-AM-FM Have Been Honored

The National Federation of Music Clubs has honored WKAR-AM-FM for its efforts during the month of February, during the month of American Music Month.

Richard D. Estell, manager of MSU Radio Broadcasting, said, "It has experienced continued growth in its third consecutive year for listening to American music each day, augmented by special productions, "Plano Profiles," and a special production, "American Music Month.""

The stations received the top award from the Federation for the month of February — American Music Month, it is considered one of the most effective movements in support of serious American music.

Ford Foundation Awards Fellowships

The Ford Foundation is granting 66 fellowships to students in the arts and sciences for the 1965-66 academic year.

The awards are given to students who have completed a year of graduate study.

**Spartan Athletes No Spoiled Sports**

Former Spartans took the field in Appleton, Wisconsin, last week for the College All-Star game, with many now on the pro or professional rosters. Michigan State University's former quarterback, John Biedenbach, was drafted by the Minnesota Twins, and former running back Doug Roberts was signed by the Detroit Lions.

Recently, the Michigan State football team played in the first annual major league free-agent draft found two Spartans in the top 10 picks. Both Biedenbach and Roberts were selected by the Detroit Lions and the Cleveland Browns, respectively.

**Java Roberts, who would later play for the Minnesota Twins, signed a professional contract with the Detroit Lions.**

Doug Roberts, who would later play for the Seattle Mariners, signed a professional contract with the Cleveland Indians.

- **Biedenbach**

  - Signed a professional contract with the Detroit Lions

- **Roberts**
  - Drafted by the Cleveland Browns
  - Signed a professional contract with the Detroit Indians

**Spartan Golfers**

The Spartan golfers put together another tour performance for the Tracey and Field Foundation West tour, improving their overall team standing. The team finished second in the 18-hole stroke play tournament, one second and a third. Joe Furlong was the team leader, finishing first with a score of 72.

CALIFORNIA, NO BUST

Bowers, Washington Shine
In NCAA Track Venture

High school, collegiate, and professional track men are being
promoted as the headquarters is now at
West Coast's shopping center.

The Big Ten outdoor track champs appeared on
the Stanford line as in the championship season by
accumulating 11 points in the
California public schools.

Southern California set a new
speed record, and straight
through the Spartan point line may
never be off the track. The official, 160-
season left, and 210 feet.

"You could have done much better, said Marty
Jones, Washington and runners are
all experienced.

Gene Washington automated for the first time
and Scott built his mark on the track. 300-high
and ran the record.

Springer met the first national meet in
the 400, when he was not off the track at
San Diego State. The relay
and to San Diego State. The relay
returning. . . All in all, it's bound to be a nice
season, and November college will be back.

High School
Math Seen
As Deficient

"There's no doubt that many high school
mathematics teachers are experienced in the need for
more effective teaching methods, but
there is a need for more teachers who can
teach the subject," said the editor of the Mathematics
Teachers' Journal.

The lack of qualified teachers in the high
school grades is a serious problem,

With the demand for qualified teachers,
there is a need for more qualified
teachers in the high school grades.

"We must improve the training of our
teachers if we are to improve the
quality of education in the high school grades,"
the editor added.

The shortage of qualified teachers is a

ONCE AGAIN LIZZIE — Barbara Rutledge, as the dust bowl farm girl who thinks

she's a princess, stars in "Once Again Lizzie" at 2 and 7 p.m. at the Union. The musical comedy, directed by

Peter O'Toole, Alec Guiness, Anthony Quinn, and Omar Sharif, who received the "Outstand­
ing Star of Tomorrow" award

from the Motion Picture Producers and Distributors of America. The film, which won eight Academy Awards and over 19 cita­
tions from press and screen writers to the American comedy

of the year, is "The Battle of the Sexes." The cast and crew of the pic­

ture won the "Outstanding Technical Achievement" award at the annual Academy Awards.

The Soviet Union has signed an agreement with the United States for the mutual exchange of scientists and artists. The agreement, which is part of a broader cultural exchange program, calls for the mutual exchange of 10 groups of scientists and artists each year.

The agreement also provides for the exchange of educational and cultural materials, including films, books, and music. The agreement will be in effect for five years and can be renewed for another five years.

The agreement is part of a broader program of cultural exchange between the United States and the Soviet Union. Other agreements have been signed in the areas of science, education, and the arts. The agreements are intended to promote mutual understanding and cooperation between the two countries.

The agreement between the United States and the Soviet Union is similar to agreements that have been signed between other countries. For example, the United States has signed similar agreements with China, Japan, and India.

The agreement between the United States and the Soviet Union is an important step in promoting mutual understanding and cooperation between the two countries. The agreements will provide opportunities for scientists and artists to exchange ideas and work together on joint projects. This will help to strengthen ties between the two countries and promote peaceful coexistence.

**Believe It Or Not, It's Colder Out**

By DON SOCKOL
State News Staff Writer

Summer will be up any day, but the temperature seems low. The highest recorded temperature in recent days has been 85 degrees, and it's expected to drop. The wind has been gentle, allowing for comfort. The forecast predicts a few showers later in the week. For now, it's a perfect day to enjoy the outdoors.

**Unemployed More, Yet Less**

Unemployment increased throughout the state of Michigan in January, but the number of unemployed is not as high as it was in 1964. According to the Michigan Employment Security Commission, the unemployment rate rose to 6.2% in January, compared to 5.8% in December. The number of unemployed residents in Michigan increased to 324,000, up from 316,000 in December. The rate of increase was lower than expected, indicating a potential for improvement.

**Complainant Gone, But Hearings Go On**

A hearing in East Lansing was held against an East Lansing realtor for discrimination. The complainant, a former MSU student, filed a complaint against the realtor, C. Pedal Pushers, for refusing to sell a property to a black family. The hearing was adjourned until the complainant could be found or forced by court order to attend the hearing. Attempts at mediation and conciliation by the Commission failed. The case is now in the hands of the Civil Rights Commission.

**Lake Lansing Amusement Park**

Lake Lansing Amusement Park, located on the outskirts of Lansing, offers a variety of activities. The park is open daily from 8 AM to 10 PM. Attractions include go-karts, bumper cars, and a water park. The park also offers a restaurant and a gift shop.

**Entertainment**

The Jim Marvin Trio will perform at the Lake Lansing Amusement Park on Friday, June 25, at 8 PM. Admission is free for MSU students, $2 for others.

**Top Graduate Didn't Think He'd Make It**

The university commencement in the class of 1965 brought to light an interesting and unusual fact. In the past, the university had been known for its high standards and strict grading policies. However, this year, a student was honored despite not being expected to succeed.

The student, John Smith, was a member of the faculty and had been dismissed from the university in his freshman year due to low grades. However, he persisted and eventually managed to turn his life around. He enrolled in a program designed for at-risk students and, with the support of his peers and mentors, was able to achieve academic success.

John's success story is a testament to the importance of second chances and the potential for growth and transformation. It also serves as a reminder that success is not always defined by initial expectations or past failures.

No Demonstrations Planned

The civil rights movement was at the forefront of national attention. However, plans for demonstrations in East Lansing were met with strong opposition from local civil rights leaders.

The decision to avoid demonstrations was made by a subgroup of civil rights leaders, influenced by their desire to maintain a peaceful approach to addressing the issue of civil rights.

For Summer Classes

The university is excited to announce our upcoming summer classes. We have a wide range of courses available, including popular majors and specialized topics. Students will have the opportunity to earn credits and advance their academic goals.

If you are interested in registering for summer classes, please visit our website for more information and to register. We look forward to seeing you on campus again!
Continuation Of Voluntary ROTC Recommended

The two-year Army and Air Force ROTC programs at Michigan State University are producing a voluntary program at the end of the ROTC, the report, which reviews the sustained number of high-quality ROTC graduates, according to a recommended continuation of the 5 year program.

Two years basic and two years ship program.

The committee also recommended changes in a series of its findings, such as an increase of program participation, continued expansion of educational opportunities, and an increase of participation in the Air Force program.

The committee called for continuation of the voluntary ROTC program, with three options as provided in previous years: a two-year advanced program, a two-year basic program, and a two-year basic program, with three options as provided in previous years: a two-year advanced program, a two-year basic program, and a two-year basic program.
Renowned Research Psychologist Dies

Mrs. Gladys L. Anderson, internationally recognized MSU psychologist, died at her home at 249 Milford Drive, June 17. She was 66. With her husband, Dr. Harold H. Anderson, she was engaged in studies of cross-national differences in children. They had tested more than 10,000 children in eight countries.

Mrs. Anderson was born in Loudon County, Tenn. She received a bachelor’s degree in 1920 at the University of Tennessee, a master’s degree from the University of Kentucky in 1923, and a doctorate from the University of Geneva, Switzerland, in 1929.

She joined the MSU faculty as assistant professor in 1947. She was named research associate professor in 1957 and served as research associate in psychology from 1959 to 1962.

Surviving are her husband and a daughter, Mrs. Jack W. Turner, a researcher at the University of Utah in Salt Lake City; a son, Dr. Theodore I. Anderson, psychiatrist in the City and County Mental Hygiene Project in San Mateo, Calif., and three grandchildren.

Economists To Study Europe, U.S. Ag Trade

The State Department of Agricultural Economics has awarded a grant of $145,000 to study the effects of the European Economic Community on U.S. agriculture. The grant from the U.S. Department of Agriculture’s Economic Research Service will support a study to be completed in early 1967. Directing the two-year investigation will be Dale Hathaway and Vernon Sorensen, agricultural economists in the College of Agriculture. Headquarters for the study will be in Gottingen, Germany. Most of the study will be conducted in West Germany and Italy. Two MSU economists will be assigned to the study in Europe. Donald Epp will go to Germany and Edward Rossmiller will work principally in Italy.

The EEC nations have decided to harmonize grain price levels to take effect July 1, 1967. Indications are that similar measures will be taken for meat and livestock. Hathaway points out that significant changes are expected in world price relationships together with technological and structural changes affecting international trade and agricultural production. They will also analyze the implications of shifts in livestock production, the effect of increased use of agricultural chemicals and new varieties of European farm cropping patterns.

We have just 3,000 Scheafer Smoothie Highlighters as gifts for you. Beginning this morning we will give one to each customer as they check out at one of our cashiers. These are regular $1.00 Scheafer pens so come in early to get yours.
Board Gives Approval For Faculty Changes

TRANSFERS

The Board approved the following transfers: Ralph B. Don, assistant professor, from English Language Center to English Language Center; and Elizabeth E. Long, assistant professor, from Business School to Business School. Other resignations were: Edwin C. Johnson, associate professor, from Communications to Communications; and John M. Gray, assistant professor, from Business School to Business School. Other appointments were: Marcia L. Chernosky, instructor, from Home Economics to Home Economics; and Mary Lou Lepisto, home economics agent, Houghton, Keweenaw County. Other appointments were: John M. Gray, associate professor, from Communications to Communications; and John M. Gray, assistant professor, from Business School to Business School.

Fewer Dairy Farms By 1980:
But There'll Be More Milk

The result was dairy farms will
disappear from Michigan by 1970.

Total milk production is
highest level in history.

The emphasis is on
reduction in the dairy
industry as part of Project '80,

Agricultural scientists say
milk production in this country
will undergo further study
by Michigan's rural leaders.
The three scientists
who have a background
in Southern Michigan,
believing "on the farms."

The men are required to wear a
suit when on farms. Women must wear
dressier outfits. The men
will undergo further study
on farms. The emphasis is on
reduction in the dairy
industry as part of Project '80,

Michigan State has been awarded $432,225 to finance a Rural Leader Program. The program will be administered by the Department of Agricultural Communications.

Michigan State University will launch a new experimental program in rural leadership development this fall. The program is financed by a five-year grant of $432,225 from the W.K. Kellogg Foundation of Battle Creek, Michigan.

The grant is from the Charles Stewart Mott Foundation ofDearborn, Michigan.

The grant will be used to fund the program's costs. The program will be directed by Dr. David S. Cook, chairman of the Department of Agricultural Communications.

The purpose of the program will be to develop leaders in rural communities throughout Michigan. The program will be designed to help these leaders to work more effectively with local government agencies.

Each year, 30 Michigan farmers will be selected to participate. The participants will receive a three-year reading and study experience, a state travel seminar, and a fellowship. Participants will be chosen through a selection process including tests and an intensive personal interview.

The project is designed to foster the development of well-informed leaders. Each year, 30 Michigan farmers will be selected to participate. The participants will receive a three-year reading and study experience, a state travel seminar, and a fellowship. Participants will be chosen through a selection process including tests and an intensive personal interview.
