Urban Planning, Kedzie Bids Go

BY CHARLES C. WELLS

The MSU Board of Trustees met Thursday and awarded bids for construction projects. Among the contracts awarded were bids for a new building to house the College of Natural Science, a chemistry building, and a student center.

The new building, which will serve as a center for mathematics and for languages, will be ready for use by the College of Natural Science. It is three stories high and will have a root building and will be finished by May, 1966. It is three stories high and will have a root building and will be finished by May, 1966.

The amounts students can borrow have been changed at the graduation. The amounts have been increased to $1,130, Michigan State will also match this amount with a figure one-ninth the cost-price.

Can They Spare This

AND THERE still won't be enough
money to go around.

The Board of Trustees has ap­
proved an increase of more than $70,

million which represents 10 per­
cent increase over last year. Most of 
the budget increase will be used

to pay the salaries of new faculty

and staff members to teach the 36,500 
students expected to attend MSU this

September.

IT IS PERFECTLY obvious that 
most of MSU's general and regen­
teration appropriation from the State 
legislature will be swallowed up by mush­
rooming enrollment. Although the leg­

islature will be quite reluctant to cut

back the student aid we receive, it

and staff members to teach the 36,500 

students expected to attend MSU this

September.

It is equally obvious that this is es­
ential if the demands for higher educa­
cational facilities are to be ade­
quately met during the next decade.

The strain on state universities is 
going to increase, which will increase 
the pressure on the trustees and col­lege

administrators to continue to raise the

level of the student aid to the state. 

UNIVERSITIES are to devise imaginative ways to meet the demands of mass education, they are going to need bigger and better facilities than are now in existence.

Programs designed to maintain the individuality of the student cost mon­
money to go around ... AND THERE still won't be enough

money to go around ...

Washington, D.C.--The President 
asked Congress to appropriate $200

million for the Peace Corps, a pro­

gram designed to maintain the

individuality of the student cost mon­
money to go around ... AND THERE still won't be enough

money to go around ...

Bomb Russian-Made Missile Sites

Air Force jets bombed two antiaircraft missile sites in North Vietnam today amid an atmosphere of East-West tension over Vietnam.

President Johnson sent a message to the conference saying that nothing is more important than the effort to halt the spread of communism.

The French government of Charles DeGaulle has leveled a new attack on the North Atlantic Treaty Organization. The French Defense Minister has ordered members of the integrated staff of the bases.

New Cabinet Post To Be Created

President Johnson is new cabinet post to be created by the end of the week, a U.S. plane was destroyed by a ground-to-air missile fired from one of the bases.

Kaywoodies... Kirsten-Winston... Medicos-Falcons...
Researchers Learn About Learning

The child who improvises, who learns from music played by another, can learn to participate in the learning process, to feel the emotion of music, to ask questions of himself. The child who improvises, who learns from music played by another, can learn to participate in the learning process, to feel the emotion of music, to ask questions of himself.

Jimmie Davis

In the intervening years, improvisation skills seem to have been lost. Today, the average elementary child is unable to read music, let alone to learn by ear. The average high school student cannot play the instrument he has learned to read music on, much less improvise. The average college student can barely name the instruments in his own instrument family, much less play any of them. The average music student at the college level cannot sing, much less improvise. The average music teacher at the college level cannot sing, much less improvise.

The computer plays an ever more important role in both learning and research, steering us in at least three directions that threaten the establishment of the constructed system.

One of these trends concerns a computer model of the learning process. The computer can be programmed to simulate human behavior.

If the computer can tell us what happens in the learning process, and we can verify it, then we can aid human behavior in the field. In the intervening years, improvisation skills seem to have been lost. Today, the average elementary child is unable to read music, let alone to learn by ear. LEADERS HEAR ADRIAN

‘Old’ Compromise Method Urged For ‘New’ Tensions

Local governments face the most questionable period in their history with the rise of urban and special interest groups, with political action committees and Monday in Detroit.

Traditional governing patterns of the past year promise leaders of other medium-sized cities to be able to state how they are going to be extremely difficult.

Leadership in the Department of Political Science groups. "Providing leadership in solving problems," he said, "must be able to state that is going to be extremely difficult."

"The leader," Adrian said, "must listen to the happy moron. They include the civil rights movement." The difficulty in part, Adrian pointed out, is the ignorance of the happy left wing extremists, conservatives and uninformed.class and the intelligent, but uninformed should be given its appeal to America's conscience.*

He pointed out, "Leaders will have to be able to state that is going to be extremely difficult."

"Effective leadership will also require an understanding that the government will have to cooperate with diverse groups, be the basis for public policy only appeal to his romanticism is*

Hall Takes New Position

Carll H. Hall, chairman of the Department of Agricultural Engineering, has been elected vice president of the American Society of Agricultural Engineers. He is also co-president of Section IV of the Commission of Agricultural Education.

He is also co-chairman of agriculture for the United Nations and an international organization of agricultural engineers.

Hall has been corresponding to the chairman of the Department of Agricultural Engineering for several years and in 1934 represented the K. A. E. A. at a symposium in the Philippines. He has been a member of Section IV of the Commission of Agricultural Education.

1,000 Homemakers Attend College Week For Women

For the first time in history, Thursday has been designated as "Young Homemakers Day." Registration fee for one day at the conference is $1.

The 38th annual "College Week for Women" started on Thursday and will run through Saturday. It is the largest single program of continuing education offered Michigan homemakers through the Cooperative Extension Service. The conference is open to any woman who wants to attend.

Registration begins at 8:30 A.M. in the Union and continues until 4 P.M. In addition to the general afternoon sessions, there will be a special program for homemakers attending the conference for the first time. A registration fee of $1 will be charged for this special program.

The first day brought the terror! Only one in the furied history of conquest...did one man rule so yest an empire! SHOWN AT 8:30-LATE

The 1000 homemakers, many of the best in the state, will have their choice of two sets of speaker's, given by homemakers of the Cooperative Extension Service. The conference is open to any woman who wants to attend.

Horticulture Award Given To O'Rourke

For his work in plant propagation and nursery stock production, F.A. O'Rourke, professor emeritus in MSU's horticulture department, has been awarded the Homer C. College Week for Women award.

The award was named after the late Homer C. College, a member of the faculty of the college of agriculture at Michigan State University. The award is given to an individual who has made significant contributions to the field of horticulture.

Nielson Takes Washington Post

James M. Nielsen, professor of agricultural economics, resigned July 1 to accept a position as economist with the Washington Post. Nielsen, a native of Kansas, joined the faculty of MSU in 1952 after a three-year term as editor of the Journal of Farm Economics, a publication of the American Agricultural Economics Association.

**Red Doors Win Ball Title; More IM Tidbits Ahead**

Red Doors rolled over J.D.'s 8-2 in the final playoff game Monday night to claim the first intramural softball championship.

The Tigers scored two runs in the first inning, and the Red Doors capitalized on the loser's shortstop error, single and a sacrifice fly to drive in five runs. Lenick knocked in two more with a double and shortstop Keith Reinholt singled in the fourth, but both were erased In double plays.

The Tigers have their tails wagging all season long, and that will carry them into the final playoff game against J.D.'s Wednesday night to claim the first five-week Intramural softball championship.

Students in Missionary Role

The mission programs of St. John's Student Parish is making history as they reach out to the world through their students and visitors. In recent years they have been leading the way in mission work with students going to countries such as Mexico and Peru, helping to build schools and churches. They have also been sending mission teams to distant lands to help with local needs.

The students and faculty at St. John's are working hard to make their mission programs as effective as possible. They are constantly looking for new ways to reach out to people in need.

New Power Plant Has Manpower Too

Old Plant's Chimney Gets Ax–But How?

Powers Left After 57 Years

The Michigan Department of the Interior has revealed plans for the future of the old plant. The plant, which is no longer needed, will be replaced by a new power plant, which will be located in a different part of the state.

The new plant will be built on the site of the old plant, which was decommissioned in 1949. The new plant will be larger and more efficient than the old plant, and will be able to meet the needs of the growing population in the area.

The old plant's chimney, which is a landmark of the community, will be demolished in the near future. The site of the old plant will be developed for other purposes.

The demolition of the old plant will be a major step towards the future of the community. The new plant will be a source of pride for the community, and will help to ensure its continued growth and development.

PROTESTANT PERSPECTIVE

Christ Called Fully Human

By CHARLES JONES

State News Staff Writer

"I was told that the writing was on the wall, and I knew that I had to act," said the pastor. "I knew that I had to do what I could to help the people in the community."

The pastor has been active in the community for many years, and has been involved in many different projects. He has been a leader in the community, and has worked hard to make a difference.

He said that he had been inspired by the example of Jesus Christ, and that he had tried to follow in his footsteps. "I have tried to be like Jesus, and to do the things that he did," he said. "I have tried to love my neighbors, and to help them in any way that I could."

The pastor also spoke about the importance of the church in the community. "The church is the backbone of the community," he said. "It is where people come together to worship, to learn, and to help each other."

He said that he hoped that the church would continue to be a source of hope and support for the community.

"I believe that the church is important," he said. "I believe that it is a place where people can come together and be strong."

The pastor ended his speech by saying that he hoped that the church would continue to be a source of strength for the community.

"I hope that the church will continue to be a place where people can come together and be strong," he said. "I hope that it will continue to be a source of hope and support for the community."
Introduce theater-on-the-stage when the two join to sing, the blend is rewarding. Holiday's acting is lively, lovely and lyrical "Carnival."

Friday with their production of "Three Cuckolds". Directed by Sidney Berger. Musical Direction by Bryon L. Autrey. Puppets by Frank Levin. The Incomparable Rosalee, Carol Ford, is just that. Her comedy bits lack nothing and her singing voice is strong enough to carry over the orchestra than the singers and survive in spite of the techniques of phrasing given as an aid by Frank Levin's puppets. The good scenes go very well and the worst manage to get along. It is the singing, the quality of the singing, that makes this the "Carnival."
