It Was A ‘Grand River’ In East Lansing

By KYLE KERSHAW

Sharp for a four-lane improved where needed and consider future extension of Burcham petitioned the council to provide engineers to consider the point. Mrs. Sharp pointed out that a 20-foot minimum for safety purposes. Mrs. Sharp leave of absence from Sept. 1 to 1.

A resolution of Mrs. Mary East Lansing City Council’s The resolution instructed planners to consider members of the public and universities in the country and MSU are exceptions. The resolution is the first of its kind in Lansing and is expected to be adopted at the next council meeting.

Residents along Hagadorn had to leave their homes. They were able to return later after the streets were cleared. The parade will be held on the streets when rain fell in East Lansing area Monday. It was a ‘Grand River’ in East Lansing.

LIVES UP TO NAME—Grand River Avenue lived up to its name and indeed became a ‘Grand river’ Monday afternoon. This motortrailer was one of the few vehicles to make it through those nearly four inches of water that were formed in traffic.

4-LANE IMPROVEMENTS

City Council Says No To Hagadorn Median

East Lansing City Council’s long-contested decision won’t happen. Hagadorn Road is out. A resolution of Mayor Gordon Thomas for a leave of absence from Sept. 1 to 1.

MSU Researchers Doing Space Work

By DAVE HANSON

The space race is on again! The next generation of spacecraft is being designed and built by MSU engineers. The project is funded by NASA and the National Science Foundation.

The Tog Shop was the most severely flooded. Water covered almost half of the area. Another store, Polachek’s Fabrics, was partially inundated by water. The floor of Abbot Hall’s ping pong room was flooded, as were the basements of several homes.

The Monster

The Monster, a pod, with flashing lights, was sent into space aboard the Intercontinental Missile. It was a ‘Grand River’ in East Lansing.

Final Congress Concert Set

By FAYE UNGER

Johanos has conducted the University Symphony Orchestra since 1962, making his debut on the Philadelphia Orchestra in April, 1964. As resident conductor of the Dallas Symphony Orchestra, Johanos has been conducting the orchestra’s concerts since 1961 and is scheduled to conduct again in November. He has served as the music director of the University Symphony Orchestra since 1962, and is scheduled to conduct again in November.

The Monster Of Monroe

At State University, the Monster is scheduled to conduct again in November. He has served as the music director of the University Symphony Orchestra since 1962, and is scheduled to conduct again in November.

The Monster of Monroe

Among the 100 students receiving their degrees, Marvin, 15, was shaken by the bolt. His father, who was working in the fields at the time, was killed by lightning while working in the fields at the time.

Trimming The Fringe

SUSAN J. FILSON

Uncle Sam is about to interrupt our lives with that group of gargantuan vehicles, the Fringe of large campuses, sucking up the collegiate atmosphere and managing to evade the draft by taking one or two courses a term.

Since the end of the Korean War, draft boards have been consistently overrun by deferment students who are not making liberal progress toward a degree.

However, national magazines have noted that there is a growing group of under-privileged, secondarily around large campuses like MSU, who like the college environment but aren't really interested in enrolling in full-time students.

These students are far from unknown in East Lansing. Some of them can't afford to get on with the business of living. For these "students," the university environment, which ideally should be one of the greatest centers of intellectual development in a person's life, becomes a trap, a wasted moment that they find too burdensome to leave.

Then too, there are other students who frankly admit that they are planning to stay in school long enough to bear the draft.

The Army is going to be enrolling university students soon. It is drafting some of these people. They are vital to the building of a serious academic community.

NIH Team Considers Center Here

A team of experts from the National Institute of Health will be here Tuesday to consider a possible site for a proposed half-billion dollar research center.

According to Carl W. Hall, chairman of the Department of Agricultural Engineering, the foundations of the proposed farm environmental research center would be laid over the next 18 months, and the site selected immediately.

The building — to be completed in 1966, if NIH votes, will house projects being carried out, the previous public health research done at Michigan State University, agricultural engineering anes the proposal. Includes is a 30-foot by 30-foot room for housing, the movements of air-borne dusts, and a 12-foot by 12-foot room for housing, the movements of air-borne dusts, and a 12-foot by 12-foot room for housing, the movements of air-borne dusts.

Some of the criteria which the NIH is using to select the site include protecting the proposal from pressure, the availability of the site, the presence of related research, the availability of staff, and the presence of faculty and staff.

The site selected will be affected by the presence of related research, the availability of staff, and the presence of faculty and staff.

The site selected will be a 12-foot by 12-foot room for housing, the movements of air-borne dusts, and a 12-foot by 12-foot room for housing, the movements of air-borne dusts.

The site selected will be a 12-foot by 12-foot room for housing, the movements of air-borne dusts, and a 12-foot by 12-foot room for housing, the movements of air-borne dusts.

The site selected will be a 12-foot by 12-foot room for housing, the movements of air-borne dusts, and a 12-foot by 12-foot room for housing, the movements of air-borne dusts.

The site selected will be a 12-foot by 12-foot room for housing, the movements of air-borne dusts, and a 12-foot by 12-foot room for housing, the movements of air-borne dusts.

The site selected will be a 12-foot by 12-foot room for housing, the movements of air-borne dusts, and a 12-foot by 12-foot room for housing, the movements of air-borne dusts.

The site selected will be a 12-foot by 12-foot room for housing, the movements of air-borne dusts, and a 12-foot by 12-foot room for housing, the movements of air-borne dusts.

The site selected will be a 12-foot by 12-foot room for housing, the movements of air-borne dusts, and a 12-foot by 12-foot room for housing, the movements of air-borne dusts.

The site selected will be a 12-foot by 12-foot room for housing, the movements of air-borne dusts, and a 12-foot by 12-foot room for housing, the movements of air-borne dusts.

The site selected will be a 12-foot by 12-foot room for housing, the movements of air-borne dusts, and a 12-foot by 12-foot room for housing, the movements of air-borne dusts.

Cadet Wins

AP Award

Cadet John Graham, a mechanical engineering major, was awarded the AP Award by the AP Council, the highest honor a student in the College of Engineering at Purdue University can receive. The award recognizes excellence in academic achievement, leadership, and other activities, including social, athletic, and military interests.
"Lost" Witness Returns To Testify Before Commission

William M. Smith, a former M.S. student, on Wednesday before the Michigan Civil Rights Commission to investigate a complaint of racial discrimination.

Smith, a 33-year-old Negro, was invited by the commission to give a hearing on a complaint filed more than a year ago. The complaint was filed by D. C. Smith, an East Lansing attorney, to investigate a complaint filed by a MSU student, testified Wednesday.

Chetrick, chair of the Chemical Engineering Department, said that the commission will hold a hearing on the complaint. The hearing will be held in the Kellogg Center for Continuing Education, said.

Chetrick, addressing the final meeting of the Telephone Engineers' Conference at Kellogg Center for Continuing Education, said that the Chemical Engineering Department will continue to help keep alive.

"The Chemical Engineering Department will develop means of sustaining chemical engineers in space," Chetrick said. "The Chemical Engineering Department will develop means of sustaining chemical engineers in space, and the Chemical Engineering Department will develop means of sustaining chemical engineers in space."

Chetrick continued, the Chemical Engineering Department will develop means of sustaining chemical engineers in space, and the Chemical Engineering Department will develop means of sustaining chemical engineers in space."

Chetrick continued, the Chemical Engineering Department will develop means of sustaining chemical engineers in space, and the Chemical Engineering Department will develop means of sustaining chemical engineers in space."

Methodist Student Program Offers Mississippi Challenge

In response to criticism from students, the Michigan Student Federation's Methodist Student Program has announced a new program to be held at Mississippi State University in October. The program will focus on the integration of students of different backgrounds and will include workshops and discussions on the challenges faced by students involved in the civil rights movement.

The program, titled "The Challenge of Integration," will be held from October 15 to 18 on the campus of Mississippi State University. Participants will have the opportunity to learn about the history of the civil rights movement, the fight for equality, and the continued struggle for justice.

The federation aims to provide a platform for students to engage in meaningful discussions and to develop a deeper understanding of the issues facing marginalized communities. They believe that through education and dialogue, students can become agents of change and work towards a more inclusive society.

This initiative is part of the federation's ongoing effort to promote social justice and equality. They hope that by offering this program, they can inspire students to take action and contribute to the fight against discrimination and inequality.

The Methodist Student Program is committed to fostering a community that values diversity and respects differences. They encourage all students to participate in this program and to be part of the movement towards a more just and equitable future.
ONE OF THE YEAR'S BEST

Conrad Tale Comes To Life

By DAVE HANSON
State News Reviewer

"Lord Jim," based on Joseph Conrad's classic of the Far East, has become one of the year's best films.

It follows the career of Richard Broome, an adventurer who joins the Rupchand Line in India. The film is not as deep as its predecessor, "The Far Bride," and is less successful in creating a sense of adventure. However, it is still an enjoyable film.

The film is set in the late 19th century and follows the life of Richard Broome, a young man from England who joins the Rupchand Line in India as a clerk. He soon becomes a captain and is sent to join the crew of the Patna, a cargo ship.

The captain of the Patna, Mr. Gordon, is a lazy and inefficient officer. He is constantly in debt and has no respect for his crew. One day, a saboteur on the ship kills Mr. Gordon and takes control of the ship. The crew is left without a leader and is soon in danger.

Richard Broome, who is on the ship as an ordinary seaman, takes charge of the situation. He organizes the crew and helps them to escape from the saboteur. He also takes the saboteur's place as the new captain of the Patna.

Richard Broome becomes a hero and is given a promotion. However, he is not content with this. He wants to do more and continues to work hard for the rest of his life.

Richard Broome is a complex character who is able to handle the pressures of leadership. However, he is also a man who is not afraid to take risks. This makes him an interesting character who is able to keep the audience interested.

The film is directed by Victor Fleming and is a well-made film. It is a good example of how a film can be made with a strong script and a good director.

Overall, "Lord Jim" is a good film that is worth watching. It is a story of adventure and heroism that is able to keep the audience interested from start to finish.
