Hannah To Clarify MSU's Viet Role

President, Hannah has agreed to appear before a House Finance Committee to explain the university's Viet role and plans. Hannah is scheduled to appear before the House Ways and Means Higher Education Subcommittee, Representative, D-Mich, in order to explain that MSU served as a base for Civilian Technical Assistance (CTA) operations.

Senator Surprises MSU With Law School Proposal

AN MSU LAW SCHOOL—what's that all about? Everyone and his sister seems to think it's the wave of the future, but there have been few signs that it's anything more than a distant dream. Now, a prominent worker in the Senate has surprised many people by suggesting that an MSU law school might be a good idea.

It has been suggested that such a school could be set up in cooperation with the University of Michigan, which has already established a law school. This would allow for the exchange of students and faculty between the two institutions. A law school at MSU would also provide new opportunities for the legal profession in Michigan, as well as for the state's economy.

The proposal has not yet been met with universal approval, however. Some critics argue that the state already has enough law schools and that another one would be an unnecessary duplication of resources. Others worry about the cost of establishing and maintaining a new law school.

Despite these concerns, the idea of an MSU law school continues to gain momentum. It remains to be seen whether the Senate will take up the proposal and, if so, what steps will be taken to bring it to fruition.

MINEX Offers Opportunity for World Understanding

To the Editor:

I wonder how many of the students who are currently taking the University and College News's survey on world understanding are aware of the opportunity that the MINEX program offers. MINEX, or the Michigan-Nebraska Exchange, is a program designed to promote understanding and friendship between the two states.

The exchange program involves sending high school students to the other state for a week, where they participate in various activities and learn about the culture and history of Nebraska. In return, Nebraska students come to Michigan.

MINEX offers a unique opportunity for students to gain a better understanding of the world and the people in it. By participating in this program, students can build lasting friendships, learn new skills, and gain valuable experience that will serve them well in the future.

The program is open to all high school students in Michigan and Nebraska. If you or someone you know is interested in participating in MINEX, there is still time to sign up. Please contact your local high school for more information.

Apathy Cause?

To the Editor:

It is a fact that some students at Michigan State University have an apathetic attitude towards their school. They do not participate in extracurricular activities, do not attend classes regularly, and do not show any interest in their studies.

This apathy is concerning because it is the responsibility of students to take an active role in their education. By being passive, they are not only missing out on valuable learning opportunities, but they are also failing to meet their obligations as members of the university community.

We need to take steps to address this issue and encourage our students to be more involved. This could include providing more opportunities for extracurricular activities, offering incentives for good academic performance, and implementing consequences for students who consistently fail to attend classes.

It is time for us to take responsibility for our own education and actively participate in our lives at Michigan State University. Only then can we hope to achieve the goals we set for ourselves.
Russian May Day 'Greetings' Varied

MOSCOW (UPI)—The Soviet Union's most important annual celebration began today, with the traditional May Day meeting at Moscow's Leningradskaya Square.

The Soviet government has announced that there will be no political demonstrations during the May Day celebrations, as has been the case in previous years. The Soviet authorities have also banned the distribution of political literature and the use of loudspeakers.

In Moscow, the May Day parade was held as usual, with thousands of people participating. The parade included floats, military units, and some political leaders. The parade lasted several hours and was watched by millions of Soviet citizens.

In other parts of the Soviet Union, similar May Day events were held, with each region having its own unique style of celebration. In the Kirovobad region, for example, the May Day parade included a float depicting the region's industrial achievements.

In the U.S.S.R., May Day is a day of national unity and pride, celebrated with parades, speeches, and cultural events. It is also a day for workers to express their support for the government's policies and to advocate for improved working conditions.

The Soviet government has for many years been criticized for its strict control over political activity and the media. However, May Day provides an opportunity for the government to showcase its achievements and to demonstrate its popularity among the Soviet people.

The Soviet government has also been known to use May Day as an opportunity to suppress political dissent. In previous years, dissidents have been arrested or detained during the celebrations, and political slogans have been banned.

Despite these criticisms, May Day remains a significant event in the Soviet Union, and it is expected to continue to be celebrated in the same manner in future years.

Socialist Speaks At Dubois Club Meet

The topic of the meeting was "The Role of the Communist Party in Society." The speaker was Dr. Joseph Johnson, who is a member of the Communist Party of the United States.

Dr. Johnson spoke about the importance of the Communist Party in society and how it works to promote the interests of the working class. He emphasized the need for solidarity among workers and the importance of unity in the face of capitalist exploitation.

He also discussed the role of the Communist Party in international relations, particularly in the context of the Cold War. Dr. Johnson argued that the Communist Party is committed to promoting peace and international cooperation, and he criticized the role of the capitalist powers in creating instability in the world.

The meeting was well-attended, with a large number of people in attendance. The atmosphere was positive, and there was a sense of shared purpose among the attendees.

The speaker was well-prepared, and his presentation was clear and concise. He provided a wealth of information and statistics to support his arguments, and he was able to engage the audience with his passionate delivery.

Overall, the meeting was a success, and it provided an excellent opportunity for those in attendance to learn more about the role of the Communist Party in society.
Raye Pass Sparks ‘Dull’ Scrimmage

By LARRY WERNER
State News Sports Writer

A breathtaking 87-yard pass from quarterback Jimmy Bowden, right, a senior, to freshman tight end Dan Gracik on Friday climax of the 15th fall practice of the Michigan football team.

A 6:50 kickoff by Michigan State and a Michigan State punt of 50 yards started the day and sent the teams into the end zone for the first time.

None of the 15 players who scored touchdowns during the eight plays scored on the kickoff return.

The Michigan State players scored on a 60-yard pass from quarterback Jim Apisa to senior wide receiver Jerry Youngs, who was covered by junior cornerback Vic Cavender, and a 30-yard pass from quarterback Jim Apisa to junior wide receiver Ken Raye, who was covered by senior cornerback Jim Wesley.

The Michigan State players scored on a 60-yard pass from quarterback Jim Apisa to senior wide receiver Jerry Youngs, who was covered by senior cornerback Jim Wesley.

**Polisar, Maedo Lead ‘S’ Sweep**

**Little Batsmen Whip U-D Twice**

**By JOE MITCHELL**

State News Sports Writer

State Polisar and Maedo & Co. are two of the smallest players on the Sparty's baseball team, but they know how to hit. They are two of the few players who have been successful in hitting three home runs in a single game, and they did it last Saturday.

The mammoth Polisar and Maedo set the tone in the second inning when MSU blasted five runs in a row to give the Spartans a 5-0 lead. Polisar led the team off the bat when he hit a three-run home run. Maedo followed with a solo shot to give the Spartans a 4-0 lead.

The game was a total of 13 runs, and Polisar & Maedo accounted for 10 of them. Polisar was 3 for 4 with three runs batted in, while Maedo was 2 for 3 with two runs batted in. The team went on to win the game 13-10.

**Senators Rip Tigers, Snap Win Streak, 10-4**

DETROIT — Bob Chermak’s powerhouse Senators defeated the Tigers by a score of 10-4 on Sunday. The Senators hit five home runs, including one by Polisar, who drove in three runs.

**Wings Top Hawks: Lead In Playoffs**

CHICAGO — The Detroit Red Wings are still in the lead after a 3-1 victory over the Chicago Blackhawks on Sunday. The Wings are now 3-0 in the series.

**Swim Show Opens Thursday**

**Special Promotion**

**Congratulations!**

Students can now purchase a ticket to the Michigan State University Swim Show for $5.

**Additional Information**

The show will be held at 8:00 PM on Thursday, September 15th.

‘Forget Frons English’

By FRAN ZELL

It is not often that the teacher is turned into a student. This is exactly what happened in a class at the University of Michigan, where a student was given the task of instructing the professor in speaking Frons English. The professor, who was not familiar with the language, was somewhat nervous at first, but soon relaxed and enjoyed the experience. The student, who had studied Frons English for several years, was very patient and helped the professor to become more comfortable with the language. Overall, it was a unique and enjoyable experience for both the teacher and the student. The lesson was a reminder of the importance of language learning and the value of cultural exchange.
TOO OLD, COSTLY

‘Smoky’ Silent, Waiting

By JOE MITCHE, State News Staff Writer

“Old Smoky” will move on.

Once a mighty smokestack that sent smoke and soot up into the air from three furnaces in the Union Power Plant, “Old Smoky” is no more, standing only the dusty memories of a time when a college could be a place of flaring smokestacks and industrial might.

Once she was the heart and soul of computing, a machine that brought life to the academic environment. But today, she’s gone, replaced by a new generation of technology.

With the passing of time, the smokestack became a symbol of a bygone era. Its presence was a constant reminder of the challenges and struggles faced by early leaders in the field of computing.

In her day, she was the ultimate in computing power, capable of handling complex tasks and calculations. But with the arrival of new technologies, she was no longer able to keep up.

In the wake of her departure, the campus community is left with a sense of loss and nostalgia. Yet, it is also a reminder of the constant evolution of our fields of study.

As we look back on her, we can’t help but wonder about the challenges that will face the next generation of leaders in computing. Will they be able to rise to the occasion and continue her legacy?

EUROPEAN STYLE COLLEGES

Latin American Way Differ

By ARTHUR F. KLEIN, Jr., Style News Staff Writer

European style colleges are quite prevalent among the Latin American universities. The style of education is rooted in the ideals of the Enlightenment and the revolutionary spirit of the 19th century.

In Latin American universities, the role of the professor is highly respected, and the atmosphere is conducive to intellectual and cultural exchange.

This style of education allows for a more personalized approach to teaching, with professors and students working closely together in a collaborative setting.

Despite some challenges, Latin American universities are making strides in improving their educational systems and adapting to the changing needs of the 21st century.

For more information on Latin American Education, contact the University of Latin American Studies today.

Aaron Levenson  

Washington University's social science graduate student, Aaron Levenson, took part in a demonstration yesterday which led to trouble for the university's president, Dr. Donald A. West. The incident occurred at a student meeting on campus and involved Dr. West's decision to appoint a new chairman for the university's faculty council. 

Levenson said the meeting was disrupted by the chairman's appointment and that he and other students were upset. The students were protesting the president's decision to appoint a new chairman, Levenson said. 

Chris Dunkley  

A sociology and anthropology student at the university, Chris Dunkley, was also present at the meeting. He said he was upset by the president's decision. 

The university has not commented on the incident. 

Protests Against Abroad  

By JO ANN BAER  

Students from the university and neighboring institutions were expected to demonstrate against the sending of American agents to Vietnam tomorrow. The demonstration is expected to begin at 3 p.m. in front of the university administration building. 

Soviet College Students  

By DICK CLARK  

Protesters at the university yesterday were part of a larger international student protest movement. 

The students were protesting the sending of American agents to Vietnam as part of the military's effort to increase the number of American military forces in the country. 

The students called for a stop to the sending of American agents to Vietnam and for an end to the use of American military forces in the country. 

Cold War: The Means Or End  

By STEPHEN GATES  

The university was one of the largest universities in the country to protest against the sending of American agents to Vietnam.

Meteors Spark Planetarium Show

By NORM SPERLING
State News Staff Writer

If you should have some particular fascination for meteors, you might catch the new show at the Ferndale Planetarium. The new Apollo exhibit titled "Fire in the Sky" opened recently and contains a fascinating, yet educational, display that builds the excitement of meteor watching.

The planetarium is located on the second floor of the Ferndale Public Library, 2504 Michigan Ave. The exhibit may be visited during library hours and admission is free. The exhibit runs through May 31.

The new exhibit is a device that reflects the magnitude of the national fascination with meteor watching. The study of meteorology, or the study of phenomena, is fascinating but also a necessity that can be appreciated by anyone.

Meteors are small bits of rock or metal that are thrown off the surface of the sun by a number of causes. They fall into the earth's atmosphere with such speed that they become incandescent, or glowing, and can be seen as streaks of light in the sky.

The exhibit at the planetarium features a film and a series of slides that trace the history of meteorology and its importance to society. The film traces the history of meteorology and its importance to society. The film traces the history of meteorology and its importance to society. City's Firemen Looking Ahead

By BOBBY SOREN
State News, East Lansing

East Lansing's departmental meeting was held at the East Lansing Fire Department's headquarters on Monday, April 19. The meeting featured a presentation by Fire Chief Jim Patrick on current issues facing the department.

Patrick discussed the need for additional firefighters to handle the increasing number of calls the department receives. He also highlighted the importance of continued training and education to ensure the safety of both firefighters and the public.

New Math Said Misdirected

By ELBERT STONE

New York (AP) - One of the most controversial aspects of the new math is its emphasis on abstract ideas, superficial and largely misdirected, particularly in the elementary school level.

Dr. Albert Einstein of the University of Illinois said in an interview that "We're not doing any old math. We're doing the kind of math that's good for children, the easy kind of math which enables the ability to compute or do arithmetic.

Eds. Note: In other words, the old math, however, "The old method was very bad," he said. "They memorized a great deal but got no understanding;" bought less composition in the base, but performed more—understanding by the end of what they are doing.

"That's the kind of kid we should be turning out," he said.

If you're under 22, join the TWA 50/50 Club and fly for half fare.

You can get 50% off the regular Jet Coach fare when you fly TWA in the U.S. If you're under 22 you get 50% off almost all fares! Just fill out the form below and take it with you to any TWA office. Buy your membership card for $5—$5 the sky's the limit. You'll get a stand-by basis—subject to the availability of the plane and the cost of the fare. No ID required—just fill out the form and take it with you on your next flight. For more information, call 1-800-TWA-5050.
