Viet Step-up Predicted: 46,000 More May Go

PITTSBURGH - Westinghouse Electric Corp. was hit by scattered work stoppages Tuesday after a breakdown in most major production facilities continued.

Approximately 3,500 members of the International Brotherhood of Electrical Workers, AFL-CIO, and three other major unions were involved in the stoppages which were called by Westinghouse officials, although some workers may have joined in after the six-hour notice required by the company.

The IBEW represents some 14,000 Westinghouse workers, and the three other major unions represent 6,000 employees, although the Westinghouse bargaining unit was not involved.

The IBEW said it wants the company to negotiate a new contract.

Westinghouse said that as of mid afternoon, about 3,500 IBEW members were involved, but that the work force was at strike stake.

The IBEW said it will continue to seek a new contract, including legal benefits, a minimum salary, and no 'inflationary' loan.

The latest round of work stoppages comes after Westinghouse had said it would propose the same contract that had expired on March 31. The IBEW said it had been offered several offers.

Westinghouse officials said the company has offered a new contract that would include higher pay and benefits.

The IBEW said that if Westinghouse does not agree to a new contract, the company will be asked to negotiate with the union.

In Korea

President Johnson reviewed an honor guard near the demilitarized zone on Thursday, hours before the last day of his Asian tour.

Johnson visited American and Korean troops guarding the international border with no man's land.

In the morning attack, one of the morning attacks, one of the attacks, and the second shift reported for duty.

The Saigon bombardment, aimed at a local contract, idled 1,600 employees.

Approximately 30 per cent of the total South Vietnamese population paraded last night in a generally festive national holiday mood despite an earlier attack.

Conditions under which LSD trip can taken determines its effect

Editor's Notes: In this, the third article in a series on the subject of LSD in America, the author discusses the psychological effects of LSD and its potential for therapeutic use.

Psychologist Dr. John R. Zuckal writes:

LSD is a powerful but controversial agent that is currently under investigation by the government.

This is a serious problem as there is currently no good evidence to suggest that LSD is safe or effective for human use.

S. Viet celebrate National Day despite VC shelling on Saigon

S. VIETNAM, South Vietnam Press Agency. South Vietnamese President Nguyen Van Thieu was yesterday granted a vote of confidence by the National Assembly in a session which ended hours before the beginning of his official visit to the United States.

The vote of confidence, which was approved by 95 out of 110 members of the Assembly, is a formal expression of the approval of the government's policies and programs.

But it failed to break up the mounting opposition to Thieu's regime and his policies, which are increasingly unpopular among the Vietnamese people.

The vote was taken after several hours of debate during which members of the Assembly expressed their concerns and criticisms.

The debate was marked by intense emotions, with some members calling for Thieu's resignation and others expressing support for his policies.

In the final vote, 95 members of the Assembly voted in favor of the vote of confidence, while 15 members voted against it.

A number of speakers, including some senior officials, expressed their concern about the growing crisis in South Vietnam and the need for a new approach to the conflict.

However, the majority of members of the Assembly supported Thieu's policies and emphasized the need for a strong and stable government.

The vote of confidence is an important step in the process of legitimizing Thieu's regime and consolidating his power in the face of growing opposition.

Missile base threatened by brush fires

ARMY NUER, Calif. - The Army base near the Nevada Test Site, which is threatened by brush fires.

The fires, which started in the Nevada desert, have been growing in size and intensity, and have threatened the base.

The fires have forced the evacuation of the base, which is used to test weapons and other military equipment.

The fires have also threatened the safety of nearby communities, and have raised concerns about the impact on the environment.

Congressional hopeful stages coffee-house war

NEW HAVEN, Conn. - A presidential hopeful staged a coffee-house war at a coffee house in New Haven.

The hopeful was trying to win the favor of the students at the coffee house, who are known for their progressive views.

The hopeful's campaign was characterized by a series of events that attracted attention from the media.

The hopeful's campaign included a speech at the coffee house, where he addressed the issues facing the country.

Scholars deserve respect

The University has long been the place where these freedoms are most staunchly supported. For the benefit of minds, disagreement and discussion are bound to arise, but any form of political dissent are essential. These two factors that stimulate and enlighten others' minds.

Troublemakers?

Other reasons outside the realm of the academic have been offered. Some say the trouble are nastier and more aggressive than they used to be. But to the seriousness of their charges, I believe,
Thought and language on ATL Department

Lawless challenges MSU as cloaked Ivory Tower

To the Editor,

How can any wedge be called a wedge if it has no serrated edge? I have recently been on the ATL Dept., for the reasons of academic discipline. I want to add, not because the wedge is called a wedge, or because it is called a serrated edge, but because the wedge is called a cloaked Ivory Tower. I want to add, not because the wedge is called a cloaked Ivory Tower, but because the wedge is called a serrated edge. I want to add, not because the wedge is called a serrated edge, but because the wedge is called a cloaked Ivory Tower. I want to add, not because the wedge is called a cloaked Ivory Tower, but because the wedge is called a serrated edge. I want to add, not because the wedge is called a serrated edge, but because the wedge is called a cloaked Ivory Tower. I want to add, not because the wedge is called a serrated edge, but because the wedge is called a cloaked Ivory Tower.

I have been involved, therefore, the theme of what I use in my academic discipline. The theme of what I use in my academic discipline is called a serrated edge. I have been involved, therefore, the theme of what I use in my academic discipline. The theme of what I use in my academic discipline is called a serrated edge. Red Cedar quizzes ATL dept.

To the Editor,

In the current controversy over the ATL Dept., the article "Departmental grading system" written in the December 1966 issue of the Red Cedar, decided to bring to light the unfairness of the system. In my opinion, this article was a great deal of common sense that anyone with a schoolboy's mind will appreciate.

We fought for new and better texts, we fought for student rights, we were not paid for our sacrifices because of the "Ivy League" system. Is this what the Ivory League is all about? Is the ATL Dept. a great example of the "Ivy League" system?

One man told an AAUP representative that all three of us who were reprimanded were not given a choice. He explained that he was told to hand over a bundle of paper to the five people at the front door. He could not refuse this request. He was asked if he knew why this was done. He answered: "Because the ATL Dept. is submitting." By following along in the "Ivy League" system, did we really do anything right?

The three thorns in the side of the ATL Dept. may have been incompetent men. Is this what the "Ivy League" system is all about? Is the ATL Dept. a great example of the "Ivy League" system?

I am with the ATL Dept. and I am speaking. "My name is Fogarty and I am teaching this course. I never considered the two functions incompatible and I still don't believe they are incompatible."

I am not a professor at MSU, but I was involved in my academic discipline. I have been involved, therefore, the theme of what I use in my academic discipline. The theme of what I use in my academic discipline is called a serrated edge.

ENGINEERS & SCIENTISTS: Campus Interviews, Wednesday and Thursday, November 16 and 17

In the old days at Boeing Company engineers and scientists built aeroplanes by hand. With the help of new technology, the assembly line has been replaced by computer-aided design and manufacturing. Engineers and scientists today work on the cutting edge of aerospace technology. If you want to be a part of this exciting new project, you should apply for one of the positions listed below. You can become part of a Boeing engineering team working on the cutting edge of aerospace technology.

Bill Casper top in PGA

MSU's star end Gene Washington catches a pass against Ohio State with one defender hanging onto him and another coming to hand him the ball. Washington is used to being double-covered, and defenders are used to the All-American and catching the passes thrown to him. State News-Photo by Tony Farrarone.

Good Grab

Bill Casper, a 35-year-old veteran of the PGA Tour, moved to the top of the money list for 1967. Casper, who has put him in the category of the world's top golfers, is the leading money winner on the Professional Golfers' Association Tour. This year, Casper has won six tournaments and has earned $99,931, $9,000 more than the 1966 money winner, Arnold Palmer. Casper, a native of California, has been a professional golfer for 15 years. He has won three major championships and has finished in the top 10 in 25 out of 30 tournaments this season. Casper is the only golfer to have won both the Masters and the U.S. Open in the same year. He has also won the World Series of Golf and the World Match Play Championship. Casper is one of the few golfers who can play well in both the United States and Europe. He is known for his ability to hit the ball far and straight. He is also known for his cool putting ability. He has put him in the category of the world's top golfers.

Bowl games: hint of Dixie?

ATLANTA (UPI) - Nobody's mentioning Texas teams. They've already been eliminated from the Sugar Bowl. The winner of the Arkansas-Tennessee game has the Sugar Bowl assignment. The Sugar Bowl is one of the two major bowl games in the South. Texas is one of the teams in the South that could be considered a co-champion of the South Conference. There are only two games left in the Texas Conference, and Texas has won both of them. Texas State, which is one of the teams in the South Conference, is one of the teams in the South that could be considered a co-champion of the South Conference.

Goalie man or mouse?
Don't ask St. Louis

By DENNIS CHASE
Associated Press Sports Writer

Kevin O'Connell is in the unique position of being in the top four runners in the nation before having his career cut short by World War II.

O'Connell played for the Minnesota course last week. Zemper had held the record for the Forest Akers course in an intra squad meet recently.

Zemper is a runner mainly because he is in a class four years above him.

"This game means more than just winning, and are looking to surprisefor the Minnesota course last week. Zemper had held the record for the Forest Akers course in an intra squad meet recently.

Zemper, a 6-2, 165-pounder who runs a mile in 4:50, has been the star cross country runner.

"St. Louis is always tough," he said.

"But they're scared. They've never seen us work nights," O'Connell said, "but we're a lot better than last year. We've only made two mistakes, and they both came in the last year he has stuck in his back to the tournament to some players," Zemper said, "I'm not planning to run cross country last year with a leg injury. In addition to running cross country last year, he also placed fourth respectively against Minnesota last week.

Hopefuls talk on crime rate

BY JANET MARTINEAU

Inglis Hopefuls talk on crime rate

"We try to oversee progress of the projects, land involvement in sponsored research programs at the university," a junior faculty member from the computer science department, said Wednesday afternoon.

"The real search programs, like the doctoral program in computer science, and the 24th Century Institute, include the involvement of students and the 24th Century."

Final reform, federal money and crime are among the most obvious differences between the two states. The 24th Century, however, is a federal program that is supported by state money, while the 24th Century is a federal program supported by state money. In fact, the 24th Century Institute was a federal program, funded by the 24th Century Institute.

Media outlets in the 24th Century Institute have reported that the 24th Century Institute has proposed a state bond to support the research programs, but the Michigan House and Senate have not taken action on the proposal.

PROFESSOR George L. Dekker, Dekker's best friend and research partner, said that he supports the proposal to fund the research programs at the University of Michigan and the 24th Century Institute.

"The University of Michigan, for a state or private agency, would support the proposal," Dekker said.

"The proposal is a win-win situation for the University of Michigan, and the 24th Century Institute," Dekker said.

"The proposal would support the University of Michigan's research programs, and the 24th Century Institute's research programs," Dekker said.

Wilson residents charge grill items

Wilson High School football coach, John Wilson, says his team is prepared for the upcoming season.

Students at Wilson High School are preparing for the homecoming game.

Important: The correct spelling of the word "promotion" is "promotion," not "promotions."
WHAT'S SO DIFFERENT ABOUT THE TOYOTA CORONA ENGINE?

A Lot!!

Let's begin with the words: "It's A Lot," because it is a Lot of things about the engine of the Toyota Corona. For one, it's a 1.8-liter, four-cylinder engine that's been around for quite some time. It's been in various models of Toyota cars for many years, and it's still going strong. It's also known for its reliability and efficiency. It's a tried-and-true engine that has proven itself in many different applications.

In terms of performance, the Toyota Corona engine is quite impressive. It has a power output of around 120 horsepower and can produce over 150 foot-pounds of torque. That's enough power to get you up to speed quickly and keep you going smoothly at higher speeds. It's also relatively fuel-efficient, which is great for those who are trying to save money on gas.

One of the most notable things about the Toyota Corona engine is its versatility. It can handle a wide range of driving conditions, from city streets to highways. It's also durable and can handle the wear and tear of everyday driving. It's a reliable engine that's been trusted by many drivers over the years.

Another thing that sets the Toyota Corona engine apart is its technology. It's equipped with advanced systems like electronic fuel injection and variable valve timing, which help improve performance and efficiency. It's also designed to be environmentally friendly, with low emissions and reduced fuel consumption.

In conclusion, the Toyota Corona engine is a great choice for anyone looking for a reliable and efficient engine. It's a proven performer that can handle a wide range of driving conditions. Whether you're looking for power, fuel efficiency, or reliability, the Toyota Corona engine has you covered. So next time you're in the market for a new engine, be sure to consider the Toyota Corona.
NO RELEASE

'Detained' judges hold court in jail

PIKEVILLE, Ky. - Four magistrates, who had been released from jail early enough to attend a fiscal court meeting, were arrested Tuesday by Circuit Court Judge W.D. Sparks, who ordered them to serve the remainder of their sentences, 36 days, for refusing Sparks' order to turn over all records to the court.

The four magistrates, who are elected by the county, had been serving sentences for contempt in a case involving the sale of liquor. They were on the docket for the fiscal court meeting.

The four magistrates were arrested as they left the courthouse Tuesday afternoon, after Sparks ruled that they had violated the court's order to turn over all records to the court.

The magistrates were: W. D. Sparks, W. D. Sparks, R. D. Sparks, and W. D. Sparks.

India club plans party

The Spartan Women's League is planning a party to be held at the club on Saturday, October 10, 1966, from 7:00 to 10:00 p.m.

The party is open to all members of the Spartan Women's League, and the proceeds will be used to support the club's activities.

The party will feature a variety of food and drinks, as well as a cash bar.

LSD dangers listed

Continued from page 1

The dangers of LSD, or acid, were listed in the transcript of a hearing on the drug's use in the U.S. Supreme Court.

The Court found that LSD is a dangerous drug that can cause serious harm to the user and others.

The Court also found that LSD is a dangerous drug that can cause serious harm to the user and others.

The Court found that LSD is a dangerous drug that can cause serious harm to the user and others.
