To the Editor:
This is a time of change. Perhaps a climate, if you will. The climate in this country itself will have to change. Our leaders have taken it upon themselves to be the spokesmen for the society in which we live. This involves taking the responsibility of being true spokesmen for the society in which we live.

Permitted to stay in Detroit, two students, the leaders of the students' movement, were talking yesterday about the future of the campus yesterday, the second day of the strike. The strike began in protest against the University's decision to fire three faculty members.

"We will not be removed from the building," said one of the leaders. "We are here to stay and to fight for our rights."

The students said they were prepared to stay in the building until the University accedes to their demands or forces them out. The University announced yesterday that it would not grant the students' demands and that the strike would continue.

"We are not going to give up," said one of the students. "We are going to stay here until we get what we want."

The students said they would continue their protests until the University accedes to their demands.

"But since Ara had a feeling there was a possibility of a tie at the end, he decided to go for the field goal," Daugherty added, talking about the famous coach. "We gambled a few times—we were going for three."

"We were just happy we got the field goal," Daugherty explained as he recalled the storied sport.

"I wanted to play the game as the 1950's football field goals that were not good."

"It was a matter of the national championship," Daugherty said. "Both teams were playing for the national championship."

"We had to win."

"The game was won in the last minute," Daugherty continued, "and the kick was good."
