MICHIGAN STATE UNIVERSITY board members have officially joined the University of Michigan and Wayne State University in opposing a state law that prohibits student elections from being held on campus. The law was signed by Governor John Engler on Monday.

The trustees voted unanimously to strike the law and file a lawsuit against the state of Michigan. The board also agreed to file a complaint with the Michigan Department of Labor and Industry.

The law prohibits student elections from being held on campus unless they are approved by the university's president. The trustees believe this is a violation of the trustees' rights and the students' right to express their opinions.

The board also voted to hire outside counsel to represent the university in the lawsuit.

Board discusses problems of governing

(continued from page one)

"It's true that we haven't done many concrete things this year but we have worked. The problems of today are a lot more complex than when we were here, and the people involved today are a lot different than they were then. There is less of an interest in the student body to be a part of what is going on." 

Bill Holscher, a former member of the ASMSU Board, said that the group should be more dedicated and focused on their own work. He said that the board members should be more active in their roles, and that they should be more accessible to the students.

Peter Griswold, a board member, disagreed. He said that the board members are already doing their best, and that they should not be expected to do more. He said that the board members are already working hard, and that they should be given more support.

The board members then went on to discuss the various committees that they have established. They said that these committees are important because they allow the board members to divide the work and to focus on specific issues.

The meeting then adjourned.
Romney will make known candidacy intentions Nov. 18

LANSING, Mich. — The state's highest ranking Republican leaders -- including state Sen. Gale McCargo, R-Midland, and state Rep. Mike Cote, D-Bay City -- will take part in a GOP meeting Saturday which will mark the beginning of the gubernatorial campaign.

The meeting, which is expected to have about 100 people in attendance, will be held at the Michigan Educational Media Foundation, 600 E. Michigan Ave., Lansing.

The state's Republican Party's executive committee will also meet at the same time and place. The committee is expected to endorse Romney as the party's nominee for governor.

Romney, who is running for the Republican nomination for governor, said he will announce his candidacy intentions Nov. 18.

Radio WEAKness

The Editors

WEAKness radio, also known as WEAK, is an informal radio outlet based in the Lansing, Michigan area. It was started by students at Michigan State University as a way to provide access to alternative music and cultural programming that might not be available on commercial radio stations. WEAK has grown in popularity over the years, and now broadcasts regularly on the internet.

Radio: WEAKness radio.

The orbital bomb

Max Lerner

The orbital bomb was a concept proposed in the 1960s by President John F. Kennedy. The idea was to use a large number of small, nuclear warheads called "bombies" to create a "ballistic shield" that could deflect incoming missiles.

But the concept was eventually abandoned due to technical challenges and budgetary constraints. The cost of developing and deploying an orbital shield would have been astronomical, and there were serious doubts about its effectiveness.

The idea of using space-based weapons has been explored on and off over the years, but as of now, it remains beyond the reach of practical implementation.

Seniors of the week

A highlight of the fall blood drive will be Diana's birthday, who was born on November 1st. The drive will be held on the main campus, with the Blood Drive Centre in the Union and the Union Annex. Diana is currently a sophomore in the College of Arts and Sciences, majoring in Chemistry. She is an active member of the Michigan State University Student Council and is a member of the Michigan State University Student Athletic Association.

Another highlight of the drive will be the Manitoba Native Women's Association, who will be providing refreshments and information about their organization. The drive will be supported by the Student Affairs Office, the Office of Student Life, and the Michigan State University Student Council.

The drive will run from 10:00 a.m. to 2:00 p.m., and there will be a raffle for a chance to win a one-year membership to the Manitoba Native Women's Association. All proceeds will go towards the organization's community outreach programs.

The drive will be organized by the Student Affairs Office and the Office of Student Life, with support from the Michigan State University Student Council. The drive will be held on the main campus, in the Union and the Union Annex.

The drive will be open to all students, faculty, and staff, and will be supported by the Student Affairs Office, the Office of Student Life, and the Michigan State University Student Council.

For more information, please contact the Student Affairs Office at 517-355-5100 or visit the Blood Drive Centre in the Union.

THE TAMING OF THE SHREW

Paul Newman

just bugs the Establishment as

COOL HAND LUKE

by Elia Kazan

Sponsored by Camera Crusaders for Christ

FRIDAY, NOVEMBER 17

TICKETS ON SALE AT UNION TICKET OFFICE

8:30 P.M.

ADM: $1.00

The Taming of the Shrew, the famous Shakespearean comedy, comes to Michigan State University as a sprawling, highly stylized production by Elia Kazan. The film stars Paul Newman as Petruchio, a man who is engaged to the fiery Katharine, played by Elizabeth Taylor. The play is a classic example of Shakespeare's comedic style, with its lively dialogue and intricate plot.

The film was released in 1967, and it was directed by Elia Kazan. The production was praised for its vivid costumes and sets, as well as its performances by the lead actors. The film won the Academy Award for Best Supporting Actress for Elizabeth Taylor.

The show will take place at the Michigan State University Auditorium, located at 2440 East Wrapped Road. The show is sponsored by Camera Crusaders for Christ, a group of students and faculty members who are passionate about film and photography.

The show will start at 8:30 p.m., and tickets can be purchased at the Union Ticket Office. There is a minimum age requirement of 16 years old for this event. Parking is available in the nearby parking garage.

The Taming of the Shrew is a classic example of Shakespeare's comedic style, with its lively dialogue and intricate plot. The film is a must-see for Shakespeare lovers and film enthusiasts alike.

For more information, please contact the Student Affairs Office at 517-355-5100 or visit the Blood Drive Centre in the Union.

Saturn rocket perfect in first flight

(continued from page one)

from the launch pad exactly on time at 9:00 A.M. It's three-stage rocket existed of which the first two stages were launched to the first stage, the second to the second stage, and the third to the third stage. The rocket itself was a massive structure, 74 feet in height and 10 feet in diameter. It was painted white and had a nose cone at the top. The first stage was 30 feet long and contained the engines. The second stage was 26 feet long and contained the engines. The third stage was 13 feet long and contained the engines.

A large crowd had gathered to watch the launch. The crowd was composed of engineers, scientists, and representatives from the government and the military. The sky was clear and the temperature was comfortable.

Three hours later, the rocket was launched. The crowd watched in awe as the rocket rose into the sky. The engines roared to life, and the rocket began to climb. The crowd cheered as the rocket reached its highest point. The rocket then began to descend, and the crowd watched as it safely landed on the launch pad.

Saturn's success was a result of the hard work and dedication of thousands of people. The rocket was designed and built by the manufacturer, Saturn, who had a long history of producing successful rockets. The rocket was a testament to the ingenuity and determination of those who worked on it. The launch was a historic event that will be remembered for generations to come.
