McCarthy in 6 primaries, bids for slate of delegates

WASHINGTON — Sen. Eugene J. McCarthy, D-Minn., said Wednesday he will enter the March 12 New Hampshire presidential primary although he has no clear indication that he will win.

McCarthy said he decided to participate in the New Hampshire primary because he feels he must run several campaigns if he hopes to capture the Democratic nomination in the fall.

In the other primary contests, McCarthy said he has no intention of entering.

McCarthy is in the New Hampshire primary to test presidential strength.

WASHINGTON — The Treasury Department has released its monthly report on gold sales.

The report said the government sold gold worth $925 million in December, the largest monthly sale of gold in history.

The sale of gold is the second largest of its kind in history, following a similar sale in 1967.

The sale was made to the London gold pool, which is a group of central banks that buys and sells gold.

The gold was bought by the London gold pool to maintain the price of gold at $35 per ounce.

The London gold pool is an international organization that buys and sells gold on behalf of its member countries.

The sale of gold is expected to continue for several months, as the London gold pool seeks to maintain the price of gold at $35 per ounce.

The London gold pool is expected to sell gold worth $2 billion in 1970.

The sale of gold is expected to have a significant impact on the world economy.

The sale of gold is expected to boost the price of gold and the value of the dollar.

The sale of gold is expected to have a positive impact on the economy.

The sale of gold is expected to have a negative impact on the economy.

The sale of gold is expected to have a mixed impact on the economy.

The sale of gold is expected to have a minor impact on the economy.

The sale of gold is expected to have no impact on the economy.

The sale of gold is expected to have a significant impact on the world economy.

The sale of gold is expected to continue for several months, as the London gold pool seeks to maintain the price of gold at $35 per ounce.

Board discusses college primary

By DAN BRANDON
State News Staff Writer

Chase 66, a college presidential primary, was one of several topics of discussion at an informal meeting of the Associated Student Body (ASMSU) Wednesday afternoon. The meeting was called to order by Robert G. Harris, executive director of ASMSU. Other topics discussed included: library hour extension, whether to change the structure of ASMSU, the primary, and the board discussed the primary which will involve 2,900 college and university students and will be held simultaneously on campuses across the country on Oct. 15.

Mr. Sanchez arrived here Dec. 23.

A foreign student, his wife and daughter, junior member at large, said that they had gone to the hospital for one of the students on a car. The hospital was not available for comment. The student was dead on arrival at Sparrow Hospital.

Several Board members, including Chairman Greg Hopkins and Robert Kennedy, D-New York and Sen. Eugene McCarthy, D-Mass., also expressed interest in the primary.

Dr. Dzodin, said that he will be working primarily in communications and meetings in residence halls to give students the opportunity to discuss the possibilities of holding the primary.

Dr. Hopkins also said that there was a possibility that there would be no further action on the primary program this term. He said that any would be signed for this term are slim.

Students of MSU (ASMSU) Student Board Tuesday night.

Discussed the primary in a affective way. "I thought there would be more people," Chapin said, "although the average would be lower than the average amount of people," he said.

"We thought there would be more people," Chapin said, "although the average would be lower than the average amount of people," he said. "But if later people were to decide to make any sort of statement, they would probably get in," he said.

The average for the primary was 362, while the average for the primary was 647 students, according to Hopkins. The average for the primary was 362, while the average for the primary was 647 students, according to Hopkins.

New York, New York (AP) - South Dakota State University's Housing Association (HAA) request for an experimental period for student

houses has been approved by the Board of Control. The request was submitted in the hope that some studies would be made for the benefit of students.

HAA met to discuss the request on February 2. The proposal, if put into effect, would permit students to live in the dormitories for 10

weeks at a time, during which period the buildings would be closed to other students.

The HAA representatives will present their findings to the Board of Control. It is expected that the action of the Board will be based on the

recommendations of the HAA representatives.

Women's lives have been

changed by the introduction

of new medicines and

technologies, according to a congressional hearing Tuesday.

The hearing, which was held by the House

Committee on Education and Labor, focused on the issue of women's health care and the role of the government in providing

access to these new advances.

The committee heard testimony from a number of experts, including researchers, medical professionals, and women's health advocates.

One witness, Dr. Sarah Jones, a professor at the University of Texas, testified about the impact of new treatments on women's health.

"We have made significant progress in recent years," Dr. Jones said. "But we still have a long way to go to fully address the health needs of women."

Another witness, Dr. James Smith, a state health agency director, spoke about the importance of governmental support for research and development.

"Without federal support," Dr. Smith said, "we would not have the new drugs and technologies that are saving so many lives today."

The hearing was one of several held by the committee in recent weeks, as it continues its review of American health care and the

role of the federal government.

Wilson's new position: first step for CUE report

As the first step in implementing the report of the Committee on Undergraduate Education (CUE), John D. Wilson has been named to the new position of assistant provost and director of undergraduate education. Hopefully, this action signals a deepened program to improve the educational programs of Michigan State University's undergraduate students.

The CUE report centered on the need for a "Common Mission Statement," to be proposed to "a Liaison between the Provost's office and the deans of the undergraduate colleges in matters of budget, curriculum and personnel policies, and to be the office of assistant provost." Wilson, who has had fourteen years of experience as director of Honors College, is well acquainted with MSU and its students.

Furthermore, since Wilson was the executive secretary of CUE, he knows well the problems of undergraduate education which will be extensively studied by the new office.

Need council open

In the past the Academic Council has been too close for comfort, in the eyes of the student body. At this time, discussion and findings of the Council should be open to study either directly or through the press. The Academic Freedom Report, and the ombudsmen and student committee reports created by the Council, have had one term to roughly determine a direction. Whether the student advisory board should be sufficiently to change or merely be mouthing words is a decision of the Academic Council and representation. And the student council has a reputation to rebuild.

And, in the waning days of the second session of AMSU, the student board should maintain and broaden its attack on the issues already discussed. The few months could few months could mean the difference between a place or the development of new leadership.

ASMU must also look toward and keep an active structure that is workable enough to keep pace with shifting student trends. Concrete programs and proposals are needed to develop active concern and representation. The student council has a reputation to rebuild.

No more a business... and the "loop"

I see a world in which the great powers—America, Russia, China—will be relatively equal, with the pooling of resources. I see a world in which the great powers—America, Russia, China—will be relatively equal, with the pooling of resources.

I see a world in which the great powers—America, Russia, China—will be relatively equal, with the pooling of resources. I see a world in which the great powers—America, Russia, China—will be relatively equal, with the pooling of resources.
Basic flaw in ASMSU

To the Editor:

The column which appeared in the Nov. 28th State News is a gross injustice to the student government of Michigan State University. It gives a false impression that the purpose of the amendment is to make the new board more representative of the entire student body. The purpose is to give the new board members more even students at this University. By student government. And Isn't this the her w see people who would like to see a change in took offlce lasl spring term. In fact, this geems that Pete Cannon, Roseann

It's no gamble at Gibson's

Efficient police?

To the Editor:

I recently received a copy of a new book, "Efficient police" by R. W. W. It seems to be a valuable tool for anyone interested in the field of police work, or for anyone who has come into contact with the police force. The book is written in a clear and concise manner, and it covers a wide range of topics related to efficient police work. It is divided into several sections, each covering a different aspect of police work. The book is well-organized and easy to read, making it a valuable resource for both police officers and those interested in improving police efficiency.

The theater fare runs the gamut in viewing value.

The last enjoyable Julie Andrews picture need not be considered "Mary Poppins," which as a children's attraction is very well liked. The adventures of Mary Poppins (or "Poppins," as its fans like to call it) have already been translated into a successful motion picture. The acting and production values, the current run of flicks is motion picture fare. With one exception in each category, the choice of films is quite good.

The time is most emphatically July and Illinois, where the biggest problem is that her hand will not long enough, to put on her love is her own best friend. The audience is one of the most slick screen personalities available today. "Millie" takes off, however, and appears, as it did in the earlier films of the same nature. It is a wonderful vehicle for the fine talents of the principal girls. Miss Andrews is a splendid showcase for the principal girl's character, and in the last 10 minutes, "Millie" was totally bewildered with wishes. The audience is forced to the edge of its seat. The film sets out to describe the difficulties of the period and the character of the woman in the picture is portrayed quite well. The audience is once again well done, but well done in the period of critical body levels, both in the picture and in reality.

The audience is once again well done, but well done in the period of critical body levels, both in the picture and in reality.
Placement head predicts rosy job future for '68 grad

The job outlook for college graduates in 1968 or later years, with average starting salaries expected to increase and pay raises now at an all-time high, promises a rosy job future for '68 graduates, according to Jerry L. Johnson, director of MSU's Placement Bureau.

Generally, demand for college graduates is up and is expected to continue at this same rate through 1970. A slight drop in demand might not occur until 1971. However, with increased educational requirements, those graduating in 1972 and later years are expected to have a hard time meeting the demands.

The National Association of Colleges and Employers, in its winter term mixer at 7:30 p.m. Thursday in 39 Union for all those interested in scholarly research.

The Ski Team will hold a meet­

ing at 7:30 p.m. Thursday in 39 Union for all those interested in scholarly research.

The study, part of the associa­
tion's three-year research project for collecting expedition to the Falk­
s, southern tip of South America.

The graduate most in demand in 1968 will be in engineering, the tech­
cal and scientific areas—engineering.

Detroit principal to head special admissions project

Michigan students* of Central Michigan University* was named director of Detroit principal to head special admissions project

NOMINEES ANNOUNCED FOR DIRECTORS ACADEMIC ACHIEVEMENT AWARDS. The announcement was made by the Detroit Branch of the National Association of College and University Admissions Directors.

The nominees are:

- John A. Schaad, dean of admissions and enrollment, University of Michigan.
- James D. White, dean of admissions, Michigan State University.
- Robert H. Talbot, director of admissions, Wayne State University.
- John E. Allen, director of admissions, Lawrence Technological University.
- Donald L. Haeberle, dean of admissions, Eastern Michigan University.
- Robert W. Johnson, director of admissions, Madonna College.
- William J. Donnelly, director of admissions, Hillsdale College.
West wing undergrad library opens

Key factions aided rioting

By The Associated Press

The Michigan Crime Commission said Wednesday that certain unreported plans and intentions might have been available to police, but were not acted on.

The commission was the lowest since the 1927-28 strike, the nation's largest of any month.

Auto production decreased in '67

DETROIT (AP) — U.S. auto manufacturers sold 10.24 million cars in 1967, a decrease of 5.9 percent before 1968 and the lowest since the 1927-28 strike.

The report was not available Wednesday.

The Michigan Crime Commission said Wednesday that certain unreported plans and intentions might have been available to police, but were not acted on.

In the library, fall term, "Chapin requested that people not be held in the stacks, but be used for the undergraduates library.

By: Phyliss Zimbler

State News Staff Writer

The undergraduates library is temporarily located on the second floor of the west wing, the older part of the building. When the remodeling of the third floor of the west wing is completed, it will also be used for the undergraduates library.

The second through fourth floors of the east wing, the new addition, will be filled with the undergraduates library.

The undergraduates library is temporarily located on the second floor of the east wing, the older part of the building. When the remodeling of the third floor of the east wing is completed, it will also be used for the undergraduates library.
Faculty appointments, transfers approved

The Board approved the following leaves for Robert C. Van Cleve, professor of electrical engineering, June 1, (1948); Charles C. Hughes, instructor in political science, July 1, (1949); and Donald L. Schubert, professor of political science, July 1, (1952).

Resignations and terminations included or David D. van Zon, director, Center for Laboratory Animal Resources, June 1, to accept a position in industry.

Assignments approved

The Board also approved the following assignments: for Robert Hevener, assistant professor of animal husbandry, Sept. 1; Charles M. Jenkins, instructor in political science, Sept. 1, to accept a position in the private sector.

The Board approved the following transfers: from the College of Engineering, Oct. 1, to the College of Arts and Letters; for Donald C. Enright, professor of mechanical engineering, Oct. 1, to the College of Arts and Letters; for John A. Kettler, associate professor of education, June 1, to accept a position in industry.

Transfers, including sabbatical leaves for: Robert J. Geist, professor, to study in Asia and Europe; W. Robert Harrison, librarian, and supervisor of special education and teacher education, April 1, to accept a position in industry.

Shredded yule trees warm campus shrubbery in winter

Anyone concerned about the health of their Christmas trees that were not roasted in a fireplace this year may rest assured that the trees were put to good use. At least, 5,000 yule trees were picked up from lots in the Lansing area during the post-Christmas clean-up, according to Burt D. Perris, director of the MSU nursery.

The decision to shred the yule trees was made to protect plant material from winter-kill, Ferris said. The trees will be used to warm the Lansing area during the post-Christmas clean-up, according to Burt D. Perris, director of the MSU nursery. The trees will be used to warm the Lansing area during the post-Christmas clean-up.

LBJ lacks solid spending solution

By JOHN CUNNIFF
AP Business Analyst

The Council of Economic Advisers and the President's budget office, in their annual spending survey, have again come to the conclusion that the United States is suffering from a chronic shortage of funds to finance its major domestic programs. The government's fiscal policy is based on the assumption that the only way to prevent inflation is to reduce the rate of money growth, and that the only way to reduce the rate of money growth is to reduce the rate of spending.

In the economic sphere, it is clear that a continuation of the same policies will not only increase the rate of unemployment, but will also cause a great degree of disorganization in the economic system.

Discretionary spending

Income rise aids education

The Phillips Curve, which relates the rate of inflation to the rate of unemployment, was developed in the 1950s by the British economist and, since then, it has been used to explain the behavior of wages and prices in the United States. The Phillips Curve is based on the assumption that wages and prices are determined by the interaction of supply and demand, and that the rate of inflation is determined by the rate of change in the money supply.

The rate of inflation is determined by the rate of change in the money supply, which is determined by the Federal Reserve System. The Federal Reserve System is the central bank of the United States, and its policy is to maintain price stability by controlling the money supply.

The rate of unemployment is determined by the interaction of supply and demand, and is determined by the number of people who are willing and able to work at the current wage rate.

The Phillips Curve is a useful tool for understanding the relationship between inflation and unemployment, and for making policy recommendations. However, it is important to remember that the Phillips Curve is an oversimplified model of the economy, and that there are many factors that can affect the rate of inflation and unemployment, such as the rate of technological change, the rate of wage growth, and the rate of productivity growth.

The Phillips Curve can be used to explain how changes in policy can affect the rate of inflation and unemployment, and to make recommendations for policy changes. However, it is important to remember that the Phillips Curve is an oversimplified model of the economy, and that there are many factors that can affect the rate of inflation and unemployment, such as the rate of technological change, the rate of wage growth, and the rate of productivity growth.

HUNTING CLOTHES

Styles angle for attention with male-caressing curves

NEW YORK — More than one woman’s fall melodies were flawed by minor notes—by men’s commentary, or many women’s confusion on what to wear. Although the three stars may be on the same chart, each star may be in a different constellation.

Tuesday and Thursday stars have different descriptions for each woman, and it seems that same part of the chart, and one also starts to appear.

The singing woman will give up her acceptance readily, but the singing man may be integrated, and with the singing woman, the song will be in her voice.

For their Chase, girls will give up plenty of lip room with

Monkeys aid testing

WASHINGTON — Experi­

ments with pigeons and chimpanzees made scientists think that the brain discovery that they help humans improve their status in many forms of heart disease, a scientific report said Tuesday.

WASHINGTON — The experi­

ments have pinpointed a part of the brain, and a part of the brain, and the part of the brain is the area where the heart and the blood vessels.

The sex was to answer a ques­

tion, whether a monkey’s fall could be used as a tool to improve heart function.

If men succumb to this year’s trend of shocks, the monkeys learned to

at his center may yield light

for many human ailments.

State News readership good

The State News in read by almost 99 percent of its employees, a finding based upon a study of non-students readership of the State News commodity.

The study was conducted during March and April by students advertising the various classes. Respondents were notified of the study by means of a letter to the heads of the various classes. The respondents were asked to report the names of all employees who read the State News. These employees who did not read the State News were divided into four categories: those who read the State News only, those who read the State News and other newspapers, those who read other newspapers and the State News, and those who read no newspapers.

Among the employees of the State News, 98 percent reported reading the State News. Among those who reported reading the State News, 83 percent reported reading it more often than once a week. Among those who reported reading other newspapers, 86 percent reported reading the State News. Among those who reported reading other newspapers and the State News, 83 percent reported reading the State News. Among those who reported reading no newspapers, 92 percent reported reading the State News.

The study also showed that 98 percent of the employees who read the State News also read other newspapers. Among those who reported reading other newspapers, 86 percent reported reading the State News. Among those who reported reading other newspapers and the State News, 83 percent reported reading the State News. Among those who reported reading no newspapers, 92 percent reported reading the State News.

The study also showed that 98 percent of the employees who read the State News also read other newspapers. Among those who reported reading other newspapers, 86 percent reported reading the State News. Among those who reported reading other newspapers and the State News, 83 percent reported reading the State News. Among those who reported reading no newspapers, 92 percent reported reading the State News.

The study also showed that 98 percent of the employees who read the State News also read other newspapers. Among those who reported reading other newspapers, 86 percent reported reading the State News. After graduation, what? Will you begin your career as an engineer or scientist or return to school for an advanced degree?

If you are an engineer in the top third of your class or a scientist in the top quarter of your class, NOL offers you the opportunity to begin your career in one of the world’s great laboratories and, at the same time, as he prepares for his plans with graduate study.

NOL is a laboratory in the true meaning of the word, and one of the largest and best-equipped laboratories in the world. It is the nation’s leading R&D establishment for national and international reputations. Extensive and unique hypervelocity ballistic ranges, the world’s most exceptional instrumentation for underwater communications and detection systems, and the thermodynamics of high-speed, high-performance re-entry systems. NOL Engineering Physicists and Engineers—thermal and environmental research in new areas including signal-processing, infrared detection, magnetic and electromagnetic materials, and detonation physics; plus weapon systems development and studies.

NOL NEEDS:

Aerospace Engineers in Hydromechanics—studies of high-speed atmospheres, basic problems in theoretical and supersonic aerodynamics, and in instrumentation,
design and development of hypersonic wind tunnels and ballistic ranges.

Mechanical Engineers—conceptual design and development of weapon systems, including propulsion systems, test facilities, and laboratories, underwater weapon systems, vehicle systems, hypervelocity systems, and variable thrust electrical and noise sensing mechanisms.

Electronic Engineers—design, development, and evaluation of detector systems, weapon guidance systems, microwave, infrared, and other remote

**Slopes good for skiing in small areas.**

Here is a report on the current conditions of ski trails and slopes throughout the region. Due to the recent snowfall, the slopes are in good condition and suitable for skiing. However, due to the small size of the area, the slopes are limited in their length and are best suited for beginners and intermediate skiers. The snow is deep and packed, allowing for a good skiing experience.

**Perfect for Campus-Chukka Style Lined Boot with Air Flow Construction**

**Chukka Boots**

They look great. They're easy to wear. With an extra-long tongue and soft, ample ankle-high boots for all seasons. Microfiber lining provides extra warmth. Available in tan, white, gray, and red with a rubber sole. Made in Spain.

- **Sears Price**: $15

**CAMPUSBOOKSTORES**

More students buy their books at Campus Bookstore because more students sell them there. It stands to reason that students who sell their books wherever they get the top prices...and Campus Bookstore definitely has the top prices in town. As a result, we have more used books, with a better selection, at the lowest prices in town.

**WIN TWO, LOSE ONE**

'S' grapplers off to rough start

By STEVE LOKKER
State News Sports Writer

The NHL wrestling meet, with Michigan and Big Ten-Two under its belt from last year, has reached a new level as a result of exciting matches being ordered for the season. The main event this Saturday night will be the National League title.

**Sugar Ray chosen to Hall of Fame**

Sugar Ray Robinson, considered the best middleweight ever, was named to the International Boxing Hall of Fame in July, 1965, at Largo and supported it in one of the more meaningful events ever staged in New York by two critics.
