"The advantages are here (at MSU)—in abundance—but the superior student can't expect Gordon Schmuck to bend him to a palm and write platter..."—MSU Merit Scholar

Each senior scholar at MSU was con-

gratulated in person by Gordon E. Schmuck, general chairman of the MSU National Merit scholarship program, through telegrams sent to the homes of the 510 students sponsored by both MSU and the Sears-Roebuck Foundation with 510

MSU in the spring of 1964. The students were selected through the 1962-63 Merit Negro-Fellowship and the Five Hundred Fellowship programs, sponsored by the National Merit Scholarship Corporation, the Sears-Roebuck Foundation, and the Adolph Coors Foundation.

In New Delhi, the Indian government, through the Inter-American Foundation, announced that it will provide $450. We have a lot of kids who want to work over there—they'd be through their answers, they evaluated the "recruitment" program, and agreed with statements made by the great numbers of students who are not MSU but MSU national students. Steve Gates has been named chairman of the MSU board of directors.

Frank H. Habetz, announcing his support for MSU, said, "We need students just as bad as we need football players. Football fans just like football fans. When a student looks at MSU and the red-faced Howick into the room. He was dying. His heart must be protected against re-

Adams scored bookstores for 'exploiting' students

By LEON AIZEN

State News Staff Writer

The Merit Scholarship Council's advertise-

ments for college scholarships are under attack from the American College Testing Program, which considers them "unsatisfactory advertisement" and "prejudicial" to the student's interest. "I'm standing with the Council," said Adams, "and I don't agree with the students. If they have an issue with the advertisements, they should go to the administration and get the facts straightened out.

Walter Adams, right, professor of economics, charged the book-

store proprietors with a "conspiracy to exploit" the students. Picture on the left is James Hawkey, manager of the MSU Bookstore.

LBJ, Eshkol to talk peace at Texas ranch

WASHINGTON, D.C.—President Lyndon Baines Johnson and Prime Minister Levi Eshkol of Israel arrived in Austin, Texas, today to go over details of the summit talks scheduled for tomorrow. The two leaders and the official party hope you find that peace which all Americans have always dreamed of.

The visit is the first by an American president, and the following year was celebrated in the United States as a "peaceful" holiday. Johnson arrived at Randolph AFB by plane, things began building up. The summit in Beirut, scheduled for May 13, was to be followed by the peace conference on the Middle East, which is expected to start in October. The summit in Beirut, scheduled for May 13, was to be followed by the peace conference on the Middle East, which is expected to start in October. Fraternity rush begins tonight

Fraternity open rush begins tonight for all eligible men.

All fraternity houses on the east side of M.A.C. Avenue will be open from 7 to 10 p.m. Thursday. Houses on the west side of M.A.C. Avenue will hold open rush on Tuesday from 7 to 10 p.m.

All houses will be open from 7 to 10 p.m. Thursday. This is the last night of open rush.

Individuality is dialogue theme

This theme will be discussed by the Symposium's five speakers, who will appear on campus beginning Jan. 15.

Chilling weeks following the 1968 University College Symposium, begin today in various informal programs in University residence halls.

Lunching until Friday, the Dialogue Week programs are largely devoted to student-student exchanges of views based on the Symposium theme, "Individuality in a Mass Society."

This theme will be discussed in the Symposium's five speakers, who will appear on campus beginning Jan. 15.

If upperclassmen have pending requests, they may write to ten percent of the population.

Sorority women showed appreciation for lunar rocket.
**NEWS ANALYSIS**

**Kiesinger OK's LBJ's program**

On the approach to his negoti­
as with President Johnson, West German Chancellor Helmut Kohl has expressed a willingness to consider a bombing cessation on Vietnam. Kohl's willingness to consider such a cessation indicates an easing of political tension between the United States and West Germany.

The relaxed attitude of the West German government toward the Vietnam war suggests a greater readiness for the United States to resume negotiations with North Vietnam. This development could have important implications for the future of the Vietnam war.

The United States has traditionally opposed a resumption of negotiations with North Vietnam, arguing that such talks would be tantamount to recognizing the communist regime. However, the West German government's willingness to consider a bombing cessation suggests a greater willingness to engage in direct talks with North Vietnam.

Such talks could potentially lead to a negotiated settlement of the Vietnam war, ending the conflict that has been raging for more than a decade. The United States and North Vietnam have both expressed a desire for a peaceful resolution of the conflict, and the West German government's willingness to consider a bombing cessation could provide a new impetus for direct talks.

In conclusion, the West German government's relaxed attitude toward the Vietnam war suggests a greater readiness for direct talks with North Vietnam. This development could have important implications for the future of the Vietnam war and for international relations in the region.

McCarthys path uncharted

He lacks a dynamic speaking manner. And hed never hit the top with a television audience. However, McCarthy does offer a much needed outlet for growing opposition to Administration policies in Vietnam, on an outlet not yet offered by Republican contenders. And he has some substantial potential. And he will test the feeling and the extent of his identification with that emotion in at least six major political primaries this spring. McCarthy then will be on the primaries in Wisconsin, New Hampshire, Ohio, Massachusetts and California. He expects the New Hampshire primary to be a rough test of his stand for peace in Vietnam.

The senator is the only one, but certainly the most important one, of the group attempting to lead the Johnsons war approach.
CONDITION 'SATISFACTORY'

Wife visits transplant patient

CAPE TOWN, South Africa—Mrs. Louis Washkansky, wife of the first human heart transplant patient, Mrs. Blaiberg, went through the glass door Sunday for the first time since Saturday, "spend a reasonable night," Joanne Washkansky said.

"Several problems have arisen in the postoperative period," the hospital said. "Mrs. Blaiberg might pass on any infection to her husband, the third heart recipient."

"He was following with a transistor," said Joanne Washkansky. A bulletin from Groote Schuur Hospital said the 58-year-old remained in "very satisfactory" condition with his operation and chatted five days with a transplanted heart.

"He is bright and cheerful," the hospital reported. "The voice was clear and strong." Mrs. Blaiberg said she expects to "look his best.""I wish him all the luck— and I am sure they will succeed,"

Etna eruptions

CABANATUN, Italy—Mt. Etna nears the end of two years of almost continuous eruption. The two-mile high volcano has sent down 1,200 feet of almost continuous eruption deposit and garbed the world with black and ash.

Etna Neared the End of Two Years of Almost Continuous Eruption

"I met him on my recent visit to Chicago and purchased the experience we had in our first heart transplant patient," Washkansky said. "Wish him all the luck and I am sure they will succeed."

ENTRY FOR THE STATE NEWS ARE INVITED.

STATE NEWS OPEN HOUSE

The State News will hold an open house of 8 p.m., Washkansky in the Student Union Building, Monday, to report in good spirits, making "amazing" progress and reaching for Blaiberg, whose progress he was following with a transistor.

Skaters split with Wolves

By Gary Walkowicz

Skaters split with Wolves

The game was an exciting back-and-forth battle, with both teams showcasing their skills and determination. The game was decided in overtime, with the Wolves scoring the winning goal. The Wolves had a strong offensive game, with several key players contributing to their victory. The Skaters, although trailing initially, fought back strongly and were within striking distance throughout the game. The game ended with a final score of 3-2 in favor of the Wolves, who secured the win with a late goal in overtime. The Skaters showed resilience and fought hard until the end, demonstrating their commitment to the sport.

After graduation, what?

Will you begin your career as an engineer or scientist or return to school for an advanced degree?

You can do both at NOL

If you are an engineer in the top third of your class or a scientist in the top quarter of your class, NOL offers you the opportunity to begin your career in one of the world's great laboratories and, at the same time, go ahead with your plans for graduate study.

From the very beginning, new staff members have an opportu-

nity to contribute directly to significant projects to be part of an organization where groups are small and

emphasis is on the individual

NOL offers you a graduate study program that is one of the

largest and most productive programs in the country. In the 1967-68 academic year, the Laboratory hired 30 gradu- ate students in the sciences and engineering. These new staff members have performed almost as good as

the Ph.D. graduates from other schools. NOL

NOL NEEDS:

Aerospace Engineers or Hydrodynamicists—design studies of high speed hypersonic aircraft and missiles, basic problems in theoretical and experimental aerodynamics, propulsion, mechanics and hydrodynamics, and aerodynamic design and development of hypersonic wind tunnels and test ranges.

Mechanical Engineers—conceptual design and development of new weapons, antennas, and special-purpose systems, linear problems in theoretical and experimental aerodynamics, propulsion, mechanics and hydrodynamics, and aerodynamic design and development of hypersonic wind tunnels and test ranges.

Electronic Engineers—design development and evaluation of electronic communications and detection systems, weapons guidance systems, influence fusing, and lense line

NOL is a laboratory in the true meaning of the word, and one of the largest and best-equipped laboratories in the world. In the 1967-68 academic year, the Laboratory had more than 1100 scientists, engineers, and technicians working on a range of projects from national defense to space exploration. The Laboratory is located on the campus of The University of Maryland, College Park, Maryland, and is the largest and most productive organization in the world for the development of new weapons and devices.

The Laboratory is divided into several major divisions, each with its own unique capabilities. The Mechanical Engineering Division, for example, is responsible for the development of new weapons and devices, including guided missiles, directed energy weapons, and hypersonic vehicles. The Electronic Engineering Division, on the other hand, is responsible for the development of new electronic systems, including communications and detection systems, weapons guidance systems, and influence fusing.

The Laboratory is committed to providing its employees with a challenging and rewarding work environment. The Laboratory offers a competitive salary and benefits package, as well as opportunities for professional development and advancement. The Laboratory also provides a range of educational assistance, including tuition reimbursement for graduate study.

If you are interested in joining the Laboratory, please visit the Laboratory's website or contact the Laboratory's Human Resources Department for more information. The Laboratory is always looking for new and talented employees to join its team.

NOL offers a range of educational assistance, including tuition reimbursement for graduate study. This allows employees to pursue their advanced degrees while working at the Laboratory, and provides a range of career opportunities for employees to advance their careers.

In addition to providing educational assistance, the Laboratory also offers a range of professional development opportunities, including on-the-job training, workshops, and seminars. The Laboratory is committed to providing its employees with the skills and knowledge they need to succeed in their careers.

The Laboratory is located in the beautiful city of College Park, Maryland, and offers a range of cultural, educational, and recreational opportunities for employees and their families. The Laboratory is also committed to providing a work-life balance, with opportunities for flexible schedules and remote work.

If you are interested in joining the Laboratory, please visit the Laboratory's website or contact the Laboratory's Human Resources Department for more information. The Laboratory is always looking for new and talented employees to join its team.

FOR RIDES CALL 353-1404(5)

(TO BE HELD AT PI BETA PHI SORORITY, 343 N. HARRISON)
Siebert will direct crime news study

Paul B. Siebert, former dean of the College of Communication, will direct a National Institutes of Health research project to determine the effect of public crime news on the mental state of the public.

Siebert will conduct a national survey of state criminal trial judges under commission from McCormick Charitable Trust and the Robert R. McCormick Foundation. The grant is an estimated $100,000 and represents the first opportunity for criminal judges to conduct a national study. The project is also supported by the University of Chicago, which is a partner in the project.

The study will involve 100 judges across the country, and Siebert plans to conduct a questionnaire for pretesting the project. The project will be an extensive literature search conducted by Siebert, and he has prepared a memorandum for the project.

The project will also involve the two world wars and their impact on the public and the media. Siebert will be assisted by a team of researchers from the University of Chicago, which is a partner in the project.

'Madman viewing' highlights TV

BY STUART ROSETHAL
State News Reviewer

"Why even bother listening to radio?"

"Flying Nun" tunes are the latest in a line of TV programs aimed at a smaller audience than the regular fare on network television. However, television programs are not necessarily the same as radio programs. In fact, many people have discovered that they enjoy television more than radio because it is more visually stimulating.

The "Flying Nun" program is about a nun who travels around the world on a motorcycle, providing a variety of services, including medical care and education. The show is set in a small village in the mountains, and the nun is the only doctor available.

Critics have praised the show for its unique concept and its ability to break away from the usual formulaic programming that dominates network television. It has been described as a "whimsical" and "heartwarming" program, and it has won several awards for its writing and acting.

Although some people may not appreciate the "Flying Nun" concept, it is a program that provides a refreshing change from the usual fare on network television. It is a program that is not afraid to take risks and try something new, and it is a program that is sure to delight audiences who are looking for something different.
General thanks MU students

Gett, William C., commander of the 1st service company of the 1st Battalion, was serving at the December 26, 1967, MSU student body gathering when President Johnson heard of this thoughtful gesture. The letter is a reminder of the important role played by the MSU Veterans Assn. in maintaining a strong bond with the veterans community.

CHINA CHARGES

Red freighter bombed by planes in N. Viet port

TOOK JAP — Red China charged Monday that a U.S. plane bombarded a Chinese freighter with 20 tons of dynamite that sank the 14,000-ton vessel and left 139 seamen dead in a Friday night massacre.

“Answer of the Chinese people to the United States,” the China Daily newspaper said, as it charged that the bomber had been identified as a U.S. B-47.

The United States on Monday said it had no comment on the charge.

The explosion, which occurred as the freighter was en route from Vladivostok to Shanghai, was described by the Chinese as the result of a “sabotage attack” by U.S. planes.

“Regrettably,” the newspaper said, “the U.S. war machine is no less frightening than the Japanese war machine of the Second World War.”

The freighter was the first of five similar ships sunk by U.S. planes in recent weeks, the newspaper said.

The attack came barely a month after the U.S. government announced it would increase its military aid to Vietnam.

The Chinese charge was posted on the front page of the newspaper, which has a readership estimated at 10 million.

In a separate report, the newspaper said that the U.S. had not yet responded to the Chinese demand for an apology and compensation.

The Chinese government has asked the United Nations to investigate the incident and has threatened to take action if the U.S. does not comply.

The Chinese government has also been critical of the U.S. for its continued military aid to the South Vietnamese government, which is fighting a guerrilla war in the north.

The Chinese government has accused the U.S. of violating international law by its continued support of the South Vietnamese government.

The Chinese government has also criticized the U.S. for its policies in Vietnam, which it says are causing further instability in the region.

The Chinese government has called for an immediate end to all forms of U.S. military aid to Vietnam and has threatened to take action if the U.S. does not comply.

The Chinese government has also criticized the U.S. for its policies in Vietnam, which it says are causing further instability in the region.
