Mild restraint in bombing raids to explore peace talks: Rusk

WASHINGTON — In a move seen as a possibly significant step toward resuming direct negotiations with North Vietnam, President Lyndon B. Johnson is considering imposing a limited bombing halt in South Vietnam as a signal to the North that Washington is ready to talk.

The White House said there were no plans at present to halt the bombing, but Johnson has been studying the idea for some time and is expected to make a decision soon.

The move would be a departure from the strategy that has dominated the Vietnam war, which calls for military operations to continue while the United States and North Vietnam negotiate to end the war.

Johnson, who has steadfastly refused to contemplate a military stalemate in Vietnam, said recently that he would consider a bombing halt if the North showed a willingness to talk.

The United States has been negotiating with North Vietnam for several months on a military exchange program and a possible peace agreement. But the North Vietnamese have not responded positively to the United States' overtures.

Johnson has said he would consider a bombing halt if the North showed a willingness to talk, but he has also said he would not hold hostage U.S. military operations to get the North Vietnamese to talk.

The move to consider a limited bombing halt is seen as a way for Washington to signal to the North that it is ready to talk, but that it will not abandon its military strategy.

The United States has been bombing North Vietnam for more than a year, and the North has retaliated with ground attacks on U.S. bases in South Vietnam.

The move to consider a limited bombing halt is also seen as a way for Washington to signal to the North that it is willing to explore the possibility of a military solution to the war, but that it will not abandon its goal of a political solution.

**Social Science report: effort and education**

A program designed to incorporate the student into a total program in the social sciences has been proposed by the Social Science Undergraduate Multidisciplinary Program Review Committee.

The title may be a mouthful, but it is merely by choosing to hear the merits of this case before all its critical of ROTC appeared unnecessary. The original proposal, I would continue to play this and other terrible numbers which he was made to do for all he knows. And yet it was made by him. There is some core of truth in this. Not all the heroes exist only as great literature. The instantism of our time deals ruthlessly with our leaders. We use up our leaders, only to look forward to judgment for our past, and, therefore, to do. Our leaders will always possess an aura of greatness even in its absence, a reality as it was in the countries that have it. Heroes and heroism are not that of despair about a blank future, the loss of an heroic sense. Constitution in our time always goes hand in hand with the loss of a heroic past. The lack of an heroic sense always goes hand in hand with the loss of a heroic past. The loss of an heroic sense always goes hand in hand with the loss of a heroic past... heroes often exist only as great literature.
Grandmother can't win

Having survived a court challenge by protesters of Grandmother's fire, the fire was extinguished by a few minutes as police arrived. The fire was into operation.

According to Brig. Gen. Phillip B. Davidson, chief of intelligence and evaluation, the fire was into operation.

- Police took 15 minutes to re- open the parking lot and the fire department.

- All exits were opened and the people left in the fashion of a high-school fire drill.

- The fire about 12:15.

- This possibility was under- taken when a North Korean patrol boat broke into the out of control fire.

The ship probably would have been sunk by North Korean gunboats.

Wolverines come to cagers ’ rescue ’ 2nd time

By DAVIE WESCH
State News Sports Writer
Michigan's best defense wasn't able to stop the Spartans from winning, but the Wolverines got the only basket they needed.

Both teams played better than expected, according to Michigan coach Jon Briggs, who said the 94-84 loss was the most lopsided game he's seen in his five years at Michigan. "We played better than expected, but the Spartans were too good for us," Briggs said.

The Spartans, led by sophomore point guard Dennis Anagnost, outrebounded Michigan 48-34, and led 48-39 at halftime. "We played better than we expected," said Anagnost, who scored 20 points.

The game was decided in the first half, when the Spartans took a 27-12 lead. Michigan scored only 25 points in the first half, compared to 36 for the Spartans.

"We played better than expected, but the Spartans were too good for us," Briggs said. "We played better than we expected," said Anagnost, who scored 20 points.

C h e . s . at Merck... "You know that... iso thermal recrystallization process

Dink Klopfos worked out 3 times

Dink Klopfos got results from the variety of engineers and scientists he worked with, which helped him to improve his work. He said the climate and the work environment were both important factors in his success.

Dink Klopfos worked at Merck and then moved to other companies, where he continued to work as a research engineer. He said the work was challenging, but he enjoyed it.

Dink Klopfos said he was able to work with a variety of people, which helped him to learn new things. He said he enjoyed working with engineers, scientists, and others who were passionate about their work.

Steve Loker, Sports Writer at Michigan State, has some interesting stories to share about the track and field meet.

The Spartans dominated the meet, winning in every event. The team was led by Don Wehrwein, who won the 110-yard hurdle race in 14.6 seconds. Wehrwein, who has won the event for the past three years, was followed by Bob Byrum, who won the 300-yard hurdles in 40.6 seconds.

The Spartans also had strong performances in the field events. The team won the long jump, high jump, and discus. The team's performance in the field events was highlighted by the 1,500-meter run, where MSU won with a time of 3:34.6.

Scientists seek non-war study

For all that French and Japanese
physicists share in today's
American laboratories, the
expectations that the universities
are contributing to military
research are a cause for some
concern among scientists.

"The recent development of
an American policy of military
research has led many scientists
to wonder about the impact on
their work," said Nobel laureate
Ernst Ruska of the University of
California at Berkeley.

"We are in a delicate position,"
he added, "but the country
must remain free of ideological
influence in its decisions about
the future of science."
Physician cites necessity for medical system change

A physician in the health care of the United States was pre­
dated by Dr. Leon H. Beenes, regional medical director, at the annual meeting of the American Medical Association.

"I believe that the medical profession is in a state of crisis. There is a need for a new approach to the problem of health care. The current system is broken and must be replaced with a new one." said Dr. Beenes.

According to Dr. Beenes, "The current system is broken and must be replaced with a new one. The current system is broken and must be replaced with a new one."

Unity of science, philosophy topic of Isenberg lecture

Jasper O. Isenberg, professor of philosophy, spoke Friday as a replacement for Stephen Toulmin in the Isenberg lecture series.

"I believe that the philosophy of science is interrelated with the philosophy of religion. The two are not separate, but are connected in many ways." said Dr. Isenberg.

Six faculty members are up against the merger of the Men's Hall Association (MHA) and American College of Letters and Science. The public sect of men's residence halls was referred to the "committee on student affairs." The committee, according to the source, is expected to meet Tuesday and Wednesday.

The Men's Hall Association (MHA) is a private, non-profit organization that operates residence halls for men at the University of Michigan. It is one of the oldest and largest residence hall associations in the United States.

The American College of Letters and Science (ACLAS) is a private, non-profit organization that operates residential colleges for men and women at the University of Michigan. It is one of the oldest and largest residential college associations in the United States.

The merger of the MHA and ACLAS would create a new residence hall association that would operate both men's and women's residence halls at the University of Michigan.

The "committee on student affairs" is the body of the University of Michigan that is responsible for making decisions about the residence halls and students. It is composed of faculty members, administrators, and students.

The committee is expected to meet Tuesday and Wednesday to discuss the merger of the MHA and ACLAS.
