Armed hijacker forces Delta jet to fly to Cuba

TAMPA, Fla. (AP) - A Delta Airlines jet was forced to land at Tampa International Airport late Wednesday after a hijacker forced the plane to fly to Cuba at gunpoint as hundreds of passengers watched, officials said. The hijacker, who was captured after the plane landed safely in Miami, the Federal Aviation Administration said.

The hijacker was identified as a man who threatened to blow up the plane if it were to land in Cuba, according to the Federal Aviation Administration.

The hijacker was captured by law enforcement officials after the plane landed safely in Miami, according to the Federal Aviation Administration.

Delta said in Miami that an armed hijacker had taken control of the plane and forced the crew to fly it to Cuba from Florida to the Comoros Island.

At the time, with 32 passengers and a crew of seven, the flight was diverted to Tampa at 12:37 a.m. EST by a gun-wielding hijacker who said he planned to fly to Cuba.

Delta said the hijacker had threatened to blow up the plane if it were to land in Cuba, according to the Federal Aviation Administration.

Meanwhile, a spokesman for the southern Mississippi college raised doubts as to whether actually started the shooting. An armed man was reported to have fired shots at the dormitory, but police questioned him and found no evidence of a weapon.

The incident occurred at about 10:30 p.m. when police were called to the dormitory, which is used as a residence by male students when they are not in class. The dormitory is located near the Mississippi State University campus in Jackson.

The dormitory was evacuated, and police said there were no injuries. The dormitory is used by male students who enroll in courses at the university.

The spokesman said that police were investigating the incident and that there was no indication that the shooting was related to any other incident.

Garbage and teachers; public strikes increase

At least 556,155 students of 1,300,000 enrolled in the Florida public school system were out of school Monday as a result of the nation’s first state-wide teachers’ strike.

For nearly 100 days, Detroit, the nation’s fifth largest city, has been experiencing a newspaper blackout.

Tons of garbage accumulated in the streets of New York City when sanitation workers struck illegally for nine days. That one resulted in $2 million in damage to 250 private homes between New York Gov. Nelson A. Rockefeller and the city’s sanitation commissioners.

More than 11,000 workers were idled Feb. 13 when the United Auto Workers struck two General Motors Corp. plants.

One strike illegal. The legality of the other remains open. Florida teachers resigned to side-step the state law barring strikes.

All temporarily incompetent, but all hopefully for improvement in the long run.

The process of collective bargaining has added significantly to the status and level of being of workers, skilled and unskilled, in far more than one field. It has sought to produce a balance where the man and his employer.

JOSEPH ALSOP

Wallace’s bid no surprise

WASHINGTON—Last week, the Wagnerian music of the war all but drowned out the highly important sound of one of the other side’s opera. Yet former Alabama Gov. George Wallace’s announcement that he was the third-party candidate, came to the disciples of the war, was sure to prove one of this year’s major political events.

There has been a general tendency to actuated relatively little attention was given to the fact that in reality it was one of those events that can be turned to good account by the proponents of the movement. But the Alabama governor has been gaining steadily in recent months, in some cases. There is undoubtedly a reason.

The fact that workers must sometimes stand idly and watch the choices in the practice of collective bargaining does not reflect a complete absence of present trends and needs. Perhaps legal and cultural distinctions must be redefined to reconcile both public interest and employee demands.

State take-overs during strike periods, mobilization of substitute teachers and supervisory personnel, voting in the National Guard or getting strike-time publications are not the answers.

Rage of garbage, months without newspapers, idle runways, burning houses and the interruption of education. In American youth are not progressing and hopefully are not signs of the future.

Conflicts of ROTC—a channel to solution

Some of the inherent problems of a military program at a university may be alleviated with the establishment of the Military Education Advisory Committee. This committee, composed of four civilian faculty members, will review any complaints or problems which arise from the ROTC program at MSU.

The stated purpose of the committee is to become familiar with the history and philosophy of the ROTC program at MSU, as well as with federal agencies concerns and the academic community regarding military education. Most importantly the committee is to provide considered opinions and judgments as to how military education at MSU may best serve the university, the state, and the nation.

In light of the current crisis, the ROTC program, this last aim is a vital one. Before the establishment was created, there could be a considerable amount of confusion . . .

The University seems to be in the business of providing a fairly lucid dream, by causing more and more turning of the mind and more and more prejudice among whites. All this in so very quaint to centuries, but only facts must also be faced.

President Johnson has been our President for nearly four years and a half years. He has won the Presidency in a wide majority. He has assembled a cabinet, posted more legislation than any other President in the history of the United States. He has ended a war which had gone on for four years.

But in the last two years, the consensus that represented most of the nation has turned to one of fear. The President’s own party has so far failed to resolve the issue. . . .

He has been gathering around him, and the relationship between whites and blacks has never been more tense. President Johnson critics have distanced and conflicted a nation. The nation has turned and divided itself. Whatever the cause, the American apartheid party is now a reality.

The nation is now divided and the nation. And Lyndon Johnson is our President. It has not been our President, the thought of Lyndon Johnson in the White House, is another outcome that we are pleased.

Lyndon Johnson has presided over the building of student body presidents and college editors who were in Washington and the World. He has become a person of his own, a leader of his own.

This new president of the University of Texas has been a person of his own, a leader of his own. He has been unerring in his support of the University. He has been able to become the ruler of the other world.

He strode easily into the Oval Room where we had been waiting impatiently for a long time. We have been waiting for this moment for a long time. We have been waiting for this moment for a long time.

He spoke softly into the microphone where we had been waiting impatiently for a long time. He spoke softly into the microphone where we had been waiting impatiently for a long time.

He looked up at the ceiling, and his face was bloodshot and almost shut. His eardrums were bloodshot and almost shut. His eardrums were bloodshot and almost shut.

One hour before the press conference he had been discussed. One hour before the press conference he had been discussed. One hour before the press conference he had been discussed.

The University seems to be in the business of providing a fairly lucid dream, by causing more and more prejudice among whites. All this in so very quaint to centuries, but only facts must also be faced.

The campus witch hunt begins

The attitude of Gary Pangle looks like a threat to the campus community. He was not raped, wanted every other girl in the list and his own. It may be a sign of the times. The University of Michigan has a duty to prevent such an occurrence.

The university feels that the body of military knowledge, however small, being taught. These departures would make it easier. If we refused a Los Angeles-whole-without-the-first-then-the-screen-ritual review, we would not be deprived of the story. If we suspect we will have no left to scalp the finger. Alternatively, where the witch hunts begin...
Physics prof cites increases in possibility of nuclear war

As more nations get closer to becoming nuclear powers, the possibility of nuclear war is increasing, Richard Schlegal, professor of physics, said Tuesday night.

In his speech, "Control of Nuclear Weapons," Schlegal said, "We must make a serious effort to understand the kinds of weapons that may be involved, how they work, and what we can do about them."

In his opinion, and attain his rights and freedoms, the possibility of nuclear war is increasing. Richard Schlegal, professor of physics, said, "Any nation with nuclear reactors is a potential nation."

In his speech, "Control of Nuclear Weapons," Schlegal said, "If a nation has nuclear reactors, they can't do individually."

Big 10 champion Iowa better

by DON DAVISON
State News Sports Writer

It doesn’t seem possible that a game-winning team was the Big Ten champion and finished third in the NCAA in 1967. It would be better in 1968. However, that is the story of MSU’s hockey team — the ice hockey team.

The key is the MSU defense, which is ranked sixth in the league.

The MSU defense was 4-4 in conference play compared to the Spartans’ perfect 6-0 mark. A win for MSU would thrust the defending champions of the season into the finals. The championship prize would then be awarded at the conference meet to be held this weekend in Dearborn Recreational League.

The Spartans were in the top of the world right at the beginning of the year,” Bessone said. “We had a great team. We had a lot of experience. We had a lot of potential. We had the big guys.”

The defense was the key, and it was the defense that did the job.

That all changed in Colorado Springs when the 189-pound Pat Russo scored two goals and added two assists.

“Russo was our outstanding freshman.” Bessone said. “He came back too early this year. He should be right up there with Kenny as one of the best in the league.”

Russo is the old man of the line. At 6-4, 220 pounds, however, the Copper City native, out of the line of defense on his first day of practice.

“Bob is a fellow who has been following the line all the way through,” Bessone said. “He is really coming along. That all changed in Colorado Springs when the 189-pound Pat Russo scored two goals and added two assists.

Students dial 'O' for everything

It's Friday night, the candles are burning, and the campus is alive with activity. The dorms are filled with students getting ready for a night out. The air is filled with the smell of food cooking in nearby kitchens. Everyone is excited for the weekend.

The operators are under the supervision of Maureen Killebrew, who has been with the MSU switchboard for 36 years. She is known for her ability to handle any request with a smile.

"They often want to know where the nearest bathroom is," she said. "I always try to help them, even if it means getting out of bed." Maureen is one of the operators who are often called upon to give directions for those lost in the student body or those who can't find their way around campus.

"I've helped them with their classes," she added. "I know the schedule for the week and can help them with their class schedules." Maureen is a valuable resource for students who need help with their schedules or class locations.

The operators provide directions, help with classes, and even give directions for those lost in the student body. They are always ready to help, no matter the request.

"I want a secretary in teacher training," she said. "I need someone to help me with my classes." Maureen is always ready to help, no matter the request.

Those who need assistance can call the switchboard at 'O' and be greeted with a smile and a helpful hand. The operators are ready to help, no matter the request, and will do their best to make sure everyone is happy.

New St. Louis archbishop to continue civil rights work

COLUMBUS, Ohio (AP) — The new Archbishop of St. Louis hopes to carry on the work of his predecessor in civil rights.

This was Bishop John C. Carroll's first reaction after stepping into the shoes of Bishop Richard J. Ritter, who died June 11, 1967.

Carroll said he was called to the task because he was considered a 'man of the Bishops' Commission on Ecumenical Affairs.'

He called Ritter a 'great champion of civil rights' and said 'I pray to follow in his footsteps.'

Carroll received formal word of his appointment Monday and cannot accept money for the installation as Bishop of Columbus.

The 63-year-old bishop of the Columbus Diocese which has 182,000 members in 18 parishes said, 'which some day, with God's help, we shall understand and help make dfferent.'

The Columbus Diocese, which includes the Columbus metropolitan area, said there are very few openings for undergraduates in their plays.

He expressed dissatisfaction with the PAC because they have refused to rent props to the Church at St. Joseph's University.

MCLEAN, Virginia — Walter Disney is the Happiest Millionaire. Today, he announced he would give the Los Angeles Chamber of Commerce a check for $5 million, which is the amount he received for his movie 'The Happiest Millionaire.'

Disney said he was giving the money to the Chamber of Commerce to help promote tourism in the United States.

Disney, who has long been a supporter of the Chamber of Commerce, said he wanted to thank the organization for its help in promoting his movie.

He added that he hoped the money would be used to help promote tourism in other parts of the United States as well.

Disney's decision to give the money to the Chamber of Commerce was seen as a symbolic gesture, with the movie 'The Happiest Millionaire' having been released in 1967 during a time of great economic uncertainty.

The movie was a box office hit, grossing over $100 million in its first year, and Disney's decision to give the money to the Chamber of Commerce was seen as a way to give something back to the community that had supported him throughout his career.
