Garskof fired by Psych Dept.; two-year contract terminated

By CLARENCE W. WARD [staff writer]

The Michigan State University faculty and administration have announced that the contract of Arthur L. Garskof, professor of psychology, has been terminated.

Garskof, who had taught at MSU for 20 years, was placed on leave last fall. The university said that it had found "serious and uncorrectable" problems in Garskof's work.

The university's action follows a series of incidents involving Garskof, including a 1971 incident in which he was accused of sexual harassment.

Garskof has denied the allegations and has filed a lawsuit against the university, seeking reinstatement.

The university has not commented on the suit.

Nixon adopts peacemaker role

WASHINGTON, D.C. - President Nixon said today the United States will send a team of high-level officials to Vietnam to begin peace talks with the North Vietnamese.

The announcement was made after a meeting with South Vietnamese President Nguyen Van Thieu.

The mission, led by Secretary of State Henry Kissinger, will include officials from the U.S. Department of Defense and the State Department.

The talks are expected to begin in Paris and will be aimed at ending the Vietnam War.

New proposal retains hours for first-termers

By MARILYN P. DVORAK

The Michigan State University Faculty Senate has approved a proposal to maintain the current 15-hour work week for first-termers.

The proposal, which was presented by the Senate's Personnel Committee, retains the 15-hour work week for first-year students.

The Senate's action follows a recommendation from the university's labor relations committee, which recommended retaining the 15-hour work week.

The proposal will now be considered by the university's board of trustees.

COLD, DARK CLASSES

Power strike threatens

By ROY INGRAM

The Michigan State University faculty and administration have announced that a power strike is under way at the university.

The strike, which was called by the union representing the university's faculty, is the first in the university's history.

The union is demanding a 15% raise for its members.

The university has said that it will consider the union's demands, but it has not yet made a decision on the strike.

The strike has caused some disruptions on the campus, including the closing of some buildings.

ROTC's purpose probed in today's academic realm

By MARK EICHER

The Reserve Officers' Training Corps (ROTC) is facing criticism over its role in higher education.

Many students and faculty members are questioning the purpose of ROTC in today's academic environment.

The debate is being fueled by concerns about the military's influence on the university and the impact of ROTC on academic freedom.

The Air Force ROTC program in particular has faced criticism from some sources.

The program's dual mission of preparing students for military careers and providing leadership training has been questioned.

Some argue that ROTC's role in higher education is compromised by its military nature.

Others argue that ROTC is an important part of the university's mission and provides valuable leadership training for its members.

The debate is likely to continue as the university considers the future of ROTC in its academic programs.
We find ourselves faced this week with the bleak prospect of going, without heat or electricity in some 30 per cent of the buildings on campus. University power plants, which have threatened to pull the plug, may yet be held in check in an attempt to bend the administration's ear on this important concern. Union of Operating Engineers (UOE). It is proposed that only certain "essential" buildings will remain with the electrical connections. Classroom buildings have apparently been irrevocably segregated in this case of being "essential" to the harmonious functioning of the entire university. The trial of making tomorrow's "eight o'clock" course is being heightened by a desk set with glazed from now on.

To the students of the power-plant employees seem reasonable enough at first glance. They are being represented in all labor situations by the University by the Association of Federal, State, County and Municipal Employees (AFSME), a union to which they do not belong but want nothing to do with. The engineers feel they have a right to be represented by their own union.

They feel they are not being adequately represented by AFSME. They have reported contract demands as to harrassing power-plant employees. As with any other thing, this nickel has two sides. EMU employs truck-drivers and chauffeurs and thieves. There are over 300 classification represented on campus sides operating engineers. Were the administration forced to do business with the UOE it has a higher wage-scale than the AFEMVE. Their focus of attention is much narrower and they could do a more adequate job of representing the engineers. They would be a much tougher adversary to have sitting across a bargaining table.

Actors at U-M arrested for nudity

BY DAVE SHORT

State News Staff Writer

The Michigan student branch of the American Society for the Prevention of Cruelty to Animals (ASPCA) is investigating the recent vandalism of its van in East Lansing.

The ASPCA van, which was parked in front of the student center, was spray-painted with the words "Stop Animal Cruelty" and "Veggie for Life.

A spokesman for the ASPCA said the group was concerned about the damage to their property.

The investigation is ongoing, and no suspects have been identified.

Mostov urges withdrawal from NSA; lack of benefits

BY CHARLES BROCK

State News Staff Writer

Robert Mostov, a member of the Michigan state delegation to the National Student Association (NSA), has called for the withdrawal of his state's delegation from the NSA.

Mostov cited concerns over the lack of benefits for students who participate in NSA activities.

"I believe that the NSA is not representing the interests of students," Mostov said. "I want to see changes before I will continue to participate in their activities."

The NSA has a history of disagreements with state delegations over issues such as funding and representation.

Daylight savings: losing; count to end Friday

BY JOHN PIATT

State News Staff Writer

The end of daylight savings time is just a few days away. Are you ready?

Daylight savings time begins Sunday at 2 a.m., and ends at 2 a.m. on the first Sunday in November. This year, Daylight Savings Time ends earlier than usual because of the 2008 election.

It's a good time to set your clocks back and make sure you're ready for the change.

---

Michigan News

The race for mayor of Detroit is on with the announcement that two men will seek the job now held by Jerome C. Cavanagh.

Kathy M. Upton, a 26-year-old businesswoman who was unsuccessfully run against Cavanagh in 1989, and the Rev. Raymond Shone, a 52-year-old black lawyer and member of an unofficial group called the Michigan Human Rights Council, made their announcements Saturday.

The Michigan Civil Rights Commission issued a report Monday that said Pontiac was a "city divided by race and ethnic prejudices and fears."

The commission said hostility and fear separate police and the black community, housing is segregated, and employment opportunities are lower for non-whites and there is "a conscious attempt to maintain racial separation" in some schools.

---

Crime Headline

The four-person crew of the U-M van was arrested on the campus of the University of Michigan Monday night after charges of indecent exposure, public order and reckless driving.

The charges stem from an incident that occurred near East Michigan Avenue where the group of students were seen engaging in lewd behavior.

The students were arrested for the following offenses:

- Indecent exposure
- Public order
- Reckless driving

They were arraigned Friday in the 18th District Court, where they were charged with reckless driving.

The students, who were all male and in their early 20s, were released on bond and are due back in court on March 1.

International News

Five persons were killed in a mob fight in Karachi, Pakistan Monday, boosting to 22 the toll of deaths in anti-government riots across the nation during the summer.

The present administration has been under fire for months following student demonstrations for greater student enrollment in public affairs.

- Mounting evidence indicates enemy troops will be using an array of sophisticated weapons if they launch their long-awaited offensive aimed at winning concessions in the Mideast peace talks.
- The U.S. command reported the sighting and destruction of an oil depot by John H. Piatt, Jr., anti-aircraft gun only 14 miles from the old imperial capital of Hue.

National News

The Civil Aeronautics Board ordered Monday a review of an investigation which resulted in fourteen out-of-town students and young adults removed from the campus.

The board acted on its own initiative, but a date has not yet been set for the hearing.

- The district court in Austin, Tex., has issued an order in favor of a second-year law student at the University of Texas that could affect international relations.

Campus News

Placing oral contraceptives in food was proposed by a professor of physics at the University of Michigan, Monday night.

Plait likened the proposal to the present practice of putting vitamins in bread and chlorine in water.

"Speaking to the graduating class of Eastern Michigan University, Sen. Robert P. Griffin, R-Mich., said he believed "the day's interest comes in current about the future of America."

But he added that he is opposed to those who would "separate the self-sacrificing from the self-destructing who are bent on destroying all around them."

The violence is not the rebellion of the mind, but more the result of those who are bent on destroying all around them," he said.
**Diamond outshines Seger**

By Mark McPherson  
State News Review

If you managed to break the Brothers' Room's habit of locking the books and keeping your way to the hallways locked on a Saturday night, you might have been within earshot of the popular Detroit pollster's raucous and raunchy performance.

Diamond, the soulful and magnificent Seger, performed to an audience of 125 queen candidates at the Junior 500 tea.

The Motortown Soul Revue featuring the Intruders, the Spiders, and the Segers was in full swing as the candidates entered the Civic Auditorium.

Although I have not seen the Barlow Montessori lunch, I am told the John Frankenstein's film, "The Fixer," is one of the best films I have ever seen. It is a very easy film to understand, and the man's story is easy to follow.

There are many great themes in this story, including the mysterious spirit of man, the power of music, and the power of love. There are many important lessons to be learned from this film. The Fixer is a story about a man who is struggling with his own identity and his place in the world.

In addition, there are many interesting characterizations. Technically, the Fixer is a story about a man who is struggling with his own identity and his place in the world. However, there are many other important lessons to be learned from this film. The Fixer is a story about a man who is struggling with his own identity and his place in the world.

All of these elements - the themes, the characterizations, the music - work together to make the movie a great success. The Fixer is a story about a man who is struggling with his own identity and his place in the world.

Pesticides threaten wildlife

By ERIC WYNYC

Some New Englanders are up in arms about the current crop of pesticides. They say the chemicals are killing wildlife and do not do a good job of protecting plants from insects.

"We need something better than DDT and other chemicals," said one New Englander, "but we can't afford to lose our crops to the bugs.

"DDT has been used for years," said another, "but it's time we looked for something else.

"I'm not sure what else we can use," said a third, "but I think we need to find a way to control the insects without using chemicals."

STEELERS, U-PITT GET HEAD COACHES

THE UNITED PROFESSIONAL FOOTBALL

New York (UPI) — The Bud-

Bills, the worst team in Pro

Football this season, go through

the week in the hope of finding

out what they have in the West.

The surprise selection of

Newfoundland's Coach Ralph

Gendron as the new head coac

of the Bills, who are owned by

Frankie Gifford, is due to be

announced today.

Gendron, 36, has been coach of

the Saskatchewan Rough Riders

of the Canadian Football League

for the last three seasons. He

was fired by the Rough Riders

last month, and has been out of

work since then. Gendron has

been a star player with the

Rough Riders for over 20 years.

He has also been a successful

coach, with two Grey Cup

championships to his credit.

The Bills have been in a

routinely this season, losing

13 of their 14 games so far.

They are currently at the bottom

of the American Football League

standing at 0-14.

Coach Gendron will take over

the team from interim coach

Gerry疑惑, who has been

acting as coach for the last

two weeks.

The Bills are planning to

play a series of exhibition

games in the coming weeks to

prepare the team for next

season. They will play against

the New England Patriots, the

New York Giants, and the

Philadelphia Eagles.

In his press conference after

the announcement of his

appointment, Gendron said:

"I am thrilled to be joining the

Bills. I know what a difficult

job it is, but I believe I can

make a difference. We have a
good nucleus of players and

I am confident we can turn

the team around."

By Buss Andre

Snowmobiles have come into use— and misuse— in Michigan, thanks to the joy of the outdoorsmen and the stress of many law enforcement and conservation officers.

Michigan has about 100,000 of the nation's 250,000 snowmobiles. A new law went into effect Jan. requiring all snowmobiles to be registered and displaying three high-visibility license plates on the machine. The plates must be affixed, and the machine must be registered, without exception.

Residents of the state are becoming more aware of snowmobiles, according to some law enforcement officers. Since the large-scale establishment of snowmobiles began, the use of the snowmobile has increased. One of the most important tasks of the Michigan State Police is to control the illegal use of the snowmobile.

Snowmobiles do not provide a quick, safe way to travel. They are prone to crashing which can cause serious injury or even death. In the winter, snowmobiles are often used to transport goods or people across fields or forests. The machine can go off course, or it may become stuck in the snow, so it can be difficult to find people who are lost or injured.

Winter conditions can make it difficult to see or hear the machine, and the rider may not be able to communicate with others. Some people think that snowmobiles are a good way to get around in the winter, but they are not a safe or reliable means of transportation.

One of the main reasons for using snowmobiles is to travel from one place to another, but they are not a safe way to travel. In general, snowmobiles should be used only when there is a necessity to travel, such as when a person is stranded or in danger.

Michigan is one of the states where snowmobiles are most popular, and it is important to follow the rules and regulations in place. It is important to be aware of the dangers and to use caution when using a snowmobile.

The Michigan State Police, along with other law enforcement agencies, are working to control the illegal use of snowmobiles. The use of snowmobiles is a serious problem, and it is important to be aware of the dangers and to use caution when using a snowmobile.
Iraq kills 9 Jews, Eshkol asks action

The leader of one Jewish group, in Iraq, Monday, passed word to the government in Israel that nine Jews were killed in an attack on a Jewish settlement in Iraq, as reported by the Jewish Press Agency. The attack was reportedly carried out by a group of Iraqis, who assail Jewish settlements in Iraq as a form of protest against the Israeli government's policy of not allowing Jews to settle in the area.

At Tower Guard, a tea party is being held on Wednesday to welcome the post-nuns. The event is being held in honor of the post-nuns, who have recently returned from a trip abroad. The tea will be a way to celebrate their return and welcome them back to the community.

Place of work...
Underdeveloped countries slow to accept birth control

By JANE DIPPS
State News Hall Writer

In a society that places such a high value on technological development, it is ironic that many of the world's most advanced nations are slow to accept birth control devices. In the United States, for example, it is estimated that only 15% of women of childbearing age use any form of contraception. This is in contrast to many developing countries, where contraception is widely accepted as a means of controlling population growth.

The reasons for this delay in the acceptance of birth control devices are complex and multifaceted. One reason is the cultural and social attitudes towards family size and the role of women in society. In many countries, traditional values place a high value on large families as a sign of prosperity and wealth. This can create a barrier to the adoption of birth control devices, as women may feel that they are undermining these values.

Another factor is the cost of birth control devices and the availability of alternative means of achieving the same goal, such as abortion. In countries where abortion is illegal or difficult to obtain, women may be more willing to accept birth control devices.

Moreover, the effectiveness and reliability of birth control devices vary widely, and women may be hesitant to accept a device if they feel that it may not be effective or may cause side effects. This is particularly true in developing countries, where access to medical care and information is limited.

Despite these challenges, there is growing awareness of the need for population control in many developing countries. The United Nations, for example, has set targets for reducing population growth rates in developing countries, and many governments have launched programs to promote birth control and family planning.

As these programs gain momentum, it is hoped that the acceptance of birth control devices will increase, leading to a reduction in the number of unintended pregnancies and a stabilization of population growth.

Student book contest sponsored by Library

By BARBARA JONES
State News Hall Writer

The MSU Library is sponsoring an Undergraduate Book Contest for students who have assembled and organized a personal library. Prizes of $50, $100 and $250 will be awarded in the competition.

Entries of any type will be considered for the awards, whether they are subject centered, with a particular author or of a general nature.

Collections will be judged on the basis of subject knowledge, presentation and variety of books of monetary value of a certain amount, except when a collection has been deposited in the library.

Interested students should submit a list of their books, including author titles and dates, as well as any other relevant annotations to the main office of the Library by March 31.

The winner of the contest will be announced in April. The announcement will be posted in the Library and will be featured in the State News Hall.

The purpose of this contest is to encourage students to assemble their own personal libraries, which can be a valuable asset in their future careers. The contest also serves to promote the use of the Library as a resource for research and learning.
