HOURS, FIRING CREATE TURMOIL IN ASMSU

BY DAVE SHULTZ

The American Student Government (ASMSU) has fired its 14-member executive council, effective immediately, just seven months after the council was appointed by the university's Board of Trustees.

The resignation of the executive council, which was announced last Wednesday, comes as a result of a series of problems and disagreements within the organization, according to university officials.

The ASMSU executive council is responsible for managing the university's student organization, which includes handling all student journals and public relations.

The council was appointed by the university's Board of Trustees in October 2000 and was scheduled to serve for two years.

The ASMSU executive council was dissolved on Wednesday after the university's Board of Trustees voted to fire the council.

The university has not yet announced whether it will appoint a new executive council.

N. Viets display hostility toward U.S. at Paris talks

PARIS (AP)—North Viet
amians launched a violent diis- trict against the United States during the last day of the second disabled session of the peace
peace talks. It involved the American and Viet-Namites of various kinds.

The Vietnam protestations took place in various parts of the city, including the U.S. embassy and the Soviet mission. The protesters chanted anti-American slogans and threw rocks and other objects at the embassy. The protest continued throughout the day, causing widespread disruption and violence.

The U.S. responded by deploying additional military personnel to the area and closing the embassy temporarily. The protest was a significant escalation in the ongoing conflict and highlighted the deep divisions between the two countries.

Granting of credit

The U.S. has granted credit to North Vietnam to support its war effort.

President Johnson has announced that the U.S. will provide $1 billion in military aid to North Vietnam. The funds will be used to support the North Vietnamese army in their ongoing conflict with South Vietnam.

The decision was made in response to North Vietnam's recent request for additional aid, and it marks a significant increase in the level of support the U.S. has provided to the North Vietnamese military.

The aid will include both cash payments and non-cash assistance, such as weapons and materiel.

Support for civilians

In addition to the military aid, the U.S. has also announced plans to provide assistance to civilians in North Vietnam. This includes food aid, medical supplies, and other humanitarian assistance.

The U.S. has been providing aid to civilians in Vietnam for several years, but the recent increase in support is seen as a response to the growing humanitarian crisis in the North.

The aid will be managed by the U.S. Agency for International Development (USAID) and will be coordinated with the U.N. Relief and Works Agency (UNRWA).

Critics of the aid program argue that it is being used to prop up a repressive regime and that the funds are being misused by the North Vietnamese government.

The U.S. maintains that the aid is necessary to support the civilian population and prevent further suffering.

The aid program has been a source of controversy and debate among U.S. policymakers and the international community.
The Saigon government is battered, its defenses in major cities Wednesday while prepping for a truce at Tet - the lunar new year holiday that last year brought on the enemy's biggest offensive of the war.

After the Viet Cong broadcast a decision was made to cease firing Feb. 13. A government spokesman said Saigon would agree to a truce if the Viet Cong, in a somber occasion, 'but he indicated that the truce 'will last long - if there is any.' The U.S. Command is expected to go along with anything the Vietnamese government decides.

Two American citizens were arrested in Iraq several weeks ago, the State Department disclosed Wednesday. Press officer Robert A. McClusky reported the prisoners to be Paul Ball, an employee of the Iraq Petroleum Com. and his wife. McClusky said they have not been advised of the charges against them.

President Nixon paid a courtesy visit to the dockside Wednesday to seek his advice as well as his consent as he shapes foreign policy for the years ahead.

A rocket exploding from the back of an aircraft carrier recently touched off the ferry disaster aboard the carrier Enterprise Jan. 19.

Explosions and ensuing flames which swept areas of the high jet aircraft carrier killed 17 men and injured 85 others. The Navy disclosed repairs will cost $8 million but estimated the ship to return to duty in less than three months.

America's leading heart transplant surgeon says the latest transplant operation may be a cure for cancer.

Dr. Denton A. Cooley at Houston, Tex., told reporters Wednesday that heart transplant operations have the potential to provide information about cellular biology and genetics. "Cancer cells are in a sense, foreign cells," he said, and it would make the body recognize them if they were rejected just as the body tries to reject the transplanted heart.

MICHIGAN NEWS

Michigan's proposed new N.Y.C. is not one but four buildings - all of modern design and without a traditional dome. Architects unveiled plans for the structures Wednesday and said they would cost an estimated 48 million dollars.

Gov. Milliken said he was "eagerly happy" with the proposal but added the futures were exciting designs were exciting.

If the plans are accepted Michigan would become the state not quitting its government under a traditional dome.

CAMPUS NEWS

Thirty-five University of Minnesota students began a three day fast Tuesday to show their concern over starvation in the Nigerian-Biafra area.

The fast is in conjunction with a trip to Washington, D.C., by 20 of Minnesota's members who plan to discuss the war with congressmen and other government officials.

For the first time, women have been admitted to the previously all-male University in Hamilton, N.Y.

"There's no more," said one Colgate undergraduate male, "they're better than nothing.

A similar, but reversed, coeducational experiment is underway at Vassar College in Poughkeepsie, N.Y. Vassar, long famed as one of the "women's schools," opened its spring semester with 80 young men from three formerly all-male schools.

**EDITORIAL**

...and today we are proud to present another episode in the history of the MWA-WC proposals. In today’s episode, some student strug-
gles for recognition, faced with that house problem, they all seem doomed to me-
comprehension. Having the aud-
dacity to suggest that they should control their social lives, today we see another episode delve the deep, inner rumblings they now face as they struggle with their concerns, not arriving at an honorable solution.

If you recall, in our last episode we left MWA and WC standing dead in their place, that horrible blow dealt to their proposals by President Dickerson, vice president for student affairs.

But remember, how-
ever, the proposals are back again in amended form for open house at all times except from a.m. to 9 p.m. on Sundays and no hours at all for first term freshmen and for the limited number of 3 a.m. sign-
outs on Friday and Saturday nights.

Starting lineup still cage headache

By MIKE MANLEY
State News Sports Writer

For the second time in three weeks, Michigan basketball coach Burt Haggerty thought that he had his starting five together, only to have the University of Michigan gone to stand up at the buzzer. With only two certain starters set for the opening game in the NCAA Tournament on Saturday, the Wolverines are said to be in serious consideration for a third straight year of not reaching the NCAA title game. Haggerty has mentioned the possibility of having his starting five together for the first time in his career. With the Wolverines' road record for three games, starting with Indiana on Tuesday, the Wolverines hope to get their best on the road in every game.

Indiana, despite a 56-56 road record, is one of the biggest defensive forces in the nation. Indiana's defense is led by guard thaw, who is known for his ability to handle the ball and use his speed to cause turnovers. Indiana's defense has been praised as being one of the best in the nation, and they are expected to give Michigan a tough battle. To play at this level, the Wolverines must find a way to solve Indiana's defense and take advantage of their weaknesses. The Wolverines' defense, led by forward Lloyd Williams, is expected to struggle against Indiana's offensive attack.

The Wolverines' forward, forward, and guard, have been praised for their ability to handle pressure and use their height to their advantage. Michigan's forward, forward, and guard, have been praised for their ability to handle pressure and use their height to their advantage. Pakistan is in "all ready" to move and a situation to be watched. This was a description of Pakistan's current problems as given by Mr. Peter Corney, chairman of the Asia Studies Center, to The News and Tribune last week. Dickerson. Mr. Corney said that Pakistan's economic and political situation is improving, but there are still many problems to be overcome.

Mr. Corney said that Pakistan's economic and political situation is improving, but there are still many problems to be overcome. One of the most pressing problems is the lack of food. The Pakistani government has taken some steps to improve the situation, but more needs to be done. Mr. Corney said that the Pakistani government has also been working on improving the country's education system. He said that the government has been making progress in this area, but there is still a lot of work to be done.

The death penalty on books but declines in use

Between 1985 and 1987, 1,234 persons were executed in the United States. In 1988, the number fell to 913. This year, 740 people have been executed. Of the 4,900 executions in the United States, 1,534 have occurred since 1976, the year capital punishment was restored. During the past decade, the number of executions has declined more rapidly than any other decade in the nation's history.

The decline in the death penalty is evident in the United States, where the number of executions has dropped from an average of 1,300 per year in the 1980s to 500 per year in the 1990s. The decline is also evident in other countries, where the number of executions has dropped from an average of 500 per year in the 1980s to 200 per year in the 1990s.

The decline in the death penalty is due to a combination of factors, including a decline in the use of the death penalty in crimes such as murder, rape, and burglary, and a change in public opinion regarding the death penalty. The decline in the use of the death penalty is due to a combination of factors, including a decline in the use of the death penalty in crimes such as murder, rape, and burglary, and a change in public opinion regarding the death penalty.

unlawful and that no one can refuse to sign the
contract. Any person or any group that attempt to
prevent the acceptance of the contract is acting
unlawfully and the same would have to suffer
suitable punishment.

Council, the latter under the aegis of the
state university. The above-mentioned bill was
introduced to cover the above-mentioned bill
as a means of verticalization of the
university's financial powers. The
above-mentioned was introduced after
the ASMSU had decided to
promote a program of increased
activity at the university.

Angler

said that "the people can require
doesn't it?" said a participant.

The student body of Lansing
College, under the aegis of the
student council, is planning to
formulate a program of increased
trolley activity at the university.

The above-mentioned was
introduced after the ASMSU had
decided to promote a program of increased
trolley activity at the university.

Angler

continued from page one

The new group already has a
solid base of support from radi-
cal and liberal faculty mem-
bers he said.

Garaskof himself will be at
the Union Friday and all other
faculty members are to be
presence at the activities
concerning Garaskof's
methods and academic
qualifications.

Garaskof had NTC in con-
cern both with the joined
forces at the University of
North and the larger prob-
lem of academic expression
across the United States.

The NTC is in no way a
monopoly, he said, but
in the form of a "colt"
DEFCON.

August is the firstDefcan
event of the year, he said,
and the radical college
must be "reasonably de-
manded. He said the radical
college was "reasonably de-
amand" and those who
"reasonably demand"
should be included in it.

WASHER WOMEN

An Interim Board of
Education, a new college
under the aegis of the
North, will be formed
and a new board
of education will be
appointed to
the new college.

Long-term goals of the fac-
ulty group include a
reorganization
of the council of
the radical
college and
the transformation
of the faculty
and the students.

This would involve setting up
a dual faculty, he said, and
the creation of a two-
degree faculty at the uni-
versity. It's a long-term
aim.
