Huber study labeled corrupt

By CURT P. GILMORE

T Corps

The U.S. Air Force has taken steps to restructure the investigation into the Vietnam War study, known as the Huber study, that was conducted in the late 1960s.

The Air Force announced that it has appointed a new team of investigators to look into the study, which was conducted by the RAND Corporation.

The Air Force said that the new team will be led by Dr. John E. Zimmerman, a former RAND researcher, and will include members of the RAND team who conducted the original study.

Summary pending from campus probe

By LARRY LEE

The Voting Rights Act, which was enacted in 1965, has been in effect for over 50 years. It has played a key role in ensuring that all citizens have equal access to the ballot box.

The act prohibits discrimination in voting based on race, color, or ethnicity. It guarantees that all eligible citizens, regardless of race, color, or ethnicity, have the right to register to vote and to vote in elections.

In addition to the act's core provisions, it also includes provisions that address other forms of discrimination, such as language barriers, voter education, and voter protection.

The act has been used to challenge and overturn many laws and practices that discriminated against minority voters.

Accuses Huber

Michael D. Norman, a former government official, has accused the RAND Corporation of conducting a corrupt study of the Vietnam War.

Norman, who served as the director of the RAND study, said that the corporation had a conflict of interest in the study.

"The RAND Corporation had a financial interest in the Vietnam War," Norman said. "They were paid to study the war, and they had a vested interest in the outcome."
**EDITORIALS**

**Dr. Adams: dedication and a faith in students**

Why'SMSU students wait with anticipation the New Year Program. Our president and his devoted staff fill pages with promises to the students that earlier, sort can the and be prepared, and it be the preparation experience, is the experience a try time off all art two as to the exception each out elements one gave no intervening all some a all.

Walter L. Adams, known was a president who felt obligated to do as much and reflect on student proceedings. He changed the manner of appointment, from patronism to a belief that with a president who can't give a fruitful dialogue could develop among the arts and com.

As president, Dr. Adams did not hesitate to make constructive decisions affecting the daily lives of students and faculty. He was the first in America. Whether he is be in a speech criticizing the Vietnam war or in comments asking for the common and the future, Dr. Adams was forthright, local, open-minded and sincere.

There was no trace of condescension in the part of the president. He was not merely acceptable to dissenting viewpoints, but eager to understand them in order to act in a responsible manner.

While other individuals in high places may feel it necessary to peruse the segments of our society, Dr. Adams had faith full and peaceful alternatives to possible violent encroachers. When extreme acts were taken by student groups on the campus, the president was shocked and saddened, and reasoned approach to the situation.

When we will miss Dr. Adams as our president it will be to continue our associations with this man who was willing to fit his students to continue teaching even with the common responsibilities and functions that form an intricate part of his being. However, the example set by Dr. Adams is one we as students and faculty will find no other comparable.

We thank Dr. Adams for his serve and wish him well in his future in success in the spirit and work of President Adams...

Peace on earth, good will ...

**Speed: not a gift from the god of study**

"Speed kills," it has been written, but this is usually the exception to the rule. As a rule, however, there is a heavy toll in the usual and the usual, and every hour one of which has left.

Most students are not a universal patience for the case of all study. Likewise, they have, for the most part, by one or another kind of daydreaming or unskilled hands is a manifest danger. We urge that students be used only as a last resort, and nowhere to be used, and, even then, not.

But as if you did not need to be speed to speed, now, then be, the abilities of patience and common sense first and above all, knowledge it is that you are taking and how much the proper dosage for is for you. If you are not absolutely sure that gender of pill you have then you have the possibility of the "Physician's Desk Reference" is there the answer to be sure of something else – this book of evil magic will tell you the possible under the skin prick, or pill, what it is used for, what it does, and how much you can take. If you cannot find prognostics listed in the PDR then there is probably a good chance that it is not a prescribed drug and is safe if not poisonous. The single source of information in this case is going to be the coffee shop – fly by night, they, not the coffee, not the coffee, not the coffee... it's the quality controlled product.

You will want to know, if at all clearly, because too much will not grow, and if you are still smiling.

Coffee's effects, some kinds of tricyclics or a few headaches and you will be to enjoy effective against some kinds of stress and the route of -- medical chart book such as the PDR for specific indications, and you can be sure, without speed and speed, and your ability to be to enjoy...

What are the effects of antihistamines?

In a world of politicians, church killers, mummies, SUV's, and individual and material in Vietnam, the Micron, and Hitler, and the American nation are the two manifest threats to the well being of the world. People will...
Movies best bet for study break

by MARK LEHNER

The News-Review

You can entertain yourself with any number of fine movies this last weekend of full term. Most of the films, however, are not exactly designed to get you in the mood for studying for final exams. If your plans include staying up late into the night, however, a few of these films you may wish to see.

AREA THEATRES

CAMPUS: If you really feel like drooping out, "Easy Rider" is the film for you. It's not so good as it's cracked up to be, but it will entertain the bulk of you. If you want Peter Fonda and Dennis Hopper's heads, the U.P. Cinema has "Easy Rider." A371 50.

CAMPUS: If you're in the mood for a bit of fantasy, "Alice's Adventures in Wonderland" may be the film you want to see. If you want the absurdities of Lewis Carroll, the Sands Cinema has "Alice's Adventures in Wonderland." A371 50.

CAMPUS: If you're willing to sacrifice yourself for the love of country, "The U.S. and the War" may be the film for you. If you are interested in the F.B.I., however, the University Cinemas has "The U.S. and the War." A371 50.

CAMPUS: If you're really interested in the U.S., "The U.S. in the War," may be the film for you. If you love the U.S., however, the University Cinemas has "The U.S. in the War." A371 50.

CAMPUS: If you're interested in a bit of fun, "Easy Rider" is the film for you. It's not so good as it's cracked up to be, but it will entertain the bulk of you. If you want Peter Fonda and Dennis Hopper's heads, the U.P. Cinema has "Easy Rider." A371 50.

CAMPUS: If you're interested in a bit of fantasy, "Alice's Adventures in Wonderland" may be the film you want to see. If you want the absurdities of Lewis Carroll, the Sands Cinema has "Alice's Adventures in Wonderland." A371 50.

Christian magician believes

BY TOM MORRIS
Religion Editor

"Most people have not rejected Christianity; they have rejected the duplicities of organized religion," says Michigan State University's resident magician, who took on the role of master of ceremonies for a recent campus assembly.

"Duplicities" is a term the magician prefers to the word "falsehoods" when talking about religion. He says the duplicities are the same thing, only more so.

The magician argues that many religious leaders are liars, and that most religious organizations are full of "nonsense." He says that many people who claim to be religious are actually just using religion as a way to make themselves feel better about themselves.

"I believe that most religious leaders are just trying to make themselves feel better," he says. "They're not really trying to help anyone else."

The magician also claims that many religious organizations are just looking for ways to make money.

"They're not really interested in helping people," he says. "They're just interested in making money."

The magician believes that religion should be about making people feel good about themselves, and that most religious organizations are just trying to make money.

"Religion should be about making people feel good," he says. "It shouldn't be about making money."

The magician believes that most religious organizations are just full of "nonsense," and that most people who claim to be religious are actually just using religion as a way to make themselves feel better about themselves.

A resolution adopted commending Adams

With a standing nation of numerous support, the Academic Council adopted a resolution Thursday honoring the performance of Acting President John Adams. It contains the following passage:

"It is extraordinary fact that in his brief incumbency he demonstrated the art and industry of leadership in a public institution. He is not only the leader of students, but he is the boss of the school. He is a man of integrity, and his leadership is based on his service to this university."

Resolution adopted

The resolution was adopted by the Academic Council and was introduced by Professor of Human Anatomy, Dr. John Adams. The resolution was expected to be sent to the governor and the president of the university.

The resolution had been prepared by the Academic Council and was introduced by Professor of Human Anatomy, Dr. John Adams. The resolution was expected to be sent to the governor and the president of the university.

Huber report pending

(continued from page one)

the fact, we couldn’t conduct the kind of indepth study that
we wanted to conduct and were used to conducting.

The report is currently focusing on the following points:
- Campus sexual assault and disorders related to abuse, sexual
  violence, sexual harassment, and gender identity.
- Campus mental and emotional disorders related to stress,
  depression, anxiety, and substance use.
- Campus climate and community concerns related to bias
  and discrimination.

Investigators are currently analyzing data gathered over the
past year to understand the extent of issues on campus.

Research indicates that these issues are prevalent across
campus and affect a significant number of students.

This report is scheduled to be released in six months,
and preliminary findings will be shared with the campus
community in the next two weeks.

Further information will be released as soon as details
are available.

Study labeled corrupt

(continued from page one)

Although Norman had been told not to release information
before January, his conscience directed him otherwise.

The FBI has conducted an investigation into the
largely unsubstantiated claim. Norman continued working
at the university, and his influence in the state of Ohio
was substantial. He had been a key figure in the
decision to expand the University of Ohio.

Norman continued to defend his administration and the
faculty. However, the investigation continued, and
Norman has been asked to resign.

Refund policy review

Recommendations expected from the refund grant committee
will make the maximum grant equal to half of the student’s
cost or fee, whichever is greater.

Under the present refund policy, a student’s basic
income is limited to $10,000 per year.

If the new refund policy is accepted by the trustees, only
students earning over $10,000 per year will be eligible
under the new policy.

Rural schools face small town problems

By KATHE BURKE
Hart News Staff Writer
A friendly, sleepy main street, quiet streets, and a school that is almost empty reflect the small-town lifestyle in many parts of the United States. A new wave of small communities is being created by economic conditions and population shifts.

Over the years, many rural American towns have experienced population losses, especially in areas with low mineral deposits. But the newest wave is one of young people moving away in search of better opportunities. As the number of these communities decreases, the public school is the center of activity. Band concerts, drama club plays and school events are a major part of life.

In the story plan and brick school building, however, there are signs of a lack of touch with the rest of society. "Lily white" communities, "Name of the student below, don't we see a whole for a year or a time," said William H. Shaffer, principal of Sunset High School in Pennsylvania. Since these are few or if any, bands in the schools, most teachers have no idea what happens in these schools.

The town is not ready for it," Shaffer said. "We present American school systems are getting a new one next year. But being one system, getting a series of books on black history for the town.

Vocational classes, although they include in the degree of ability of community students, are not relevant, he said. He added that students are not taught black history in their schools, vocational classes do not have classes such as "black." They are actually teaching students the "white" community, according to Shaffer.

"We're in that area and it is black haven, we have a black school," he said. "In fact, 15 years ago, a black family lived in the town, but they moved the house out of town.

If black history were taught there, it would cause some expression that the good would do.

Maryland 1st test for Spartan grappers

SPORTS

Maryland 1st test for Spartan grappers

By GARY WALKOWICZ

The most successful sports entity of recent years, the Spartan wrestling team, will open its season against a highly successful team when they meet Maryland Saturday.

The two squads will go to the mat at 8 p.m. in Johnson Gymnasium.

Under the guidance of coach Grady Pening and Dick McGowan, Mizzou teams have put a stronghold on the Big Ten wrestling championship, winning two each of the past two years.

Last season Mizzou dismantled conference foes in the league meet, winning a record six of nine events and scoring 151 points.

With the development of some younger wrestlers, repeat performances from the veterans, and lots of good feauture in the health department, this season's team could be the best Spartan unit ever.

Pening has fire in his big; his charges returning and most of last season's backbone crew, along with an excellent crop of newcomers, make up a formidable team.

Spartans are eligible for nearly every competition this season. The roster will have nine wrestlers wrestling against Maryland and there could be a couple of other events where first-year men could fill the No. 1 gaps left behind of the seniors.

Maryland has a strong team of young wrestlers returning and most of last season's backbone crew, along with an excellent crop of newcomers, make up a formidable team. Spartans are eligible for nearly every competition this season. The roster will have nine wrestlers wrestling against Maryland and there could be a couple of other events where first-year men could fill the No. 1 gaps left behind of the seniors.

Last year, Mizzou must virtually the same lineup throughout the entire season, but it won only one of five dual meets, the lone victory coming against the Spartans, the only team to pull off a win in the match.

"We have a great deal of individual competition this year," Pening said. "It's going to be a very tough battle to hold on to No. 1 spot from week to week."

"The number one wrestler on the team, everyone is extremely anxious to get going."

"There's how for each of the wrestlers in each weight class with last season's experience, and we're ready to go."

115 - Freeman Lee Hicks will be wrestling here against Maryland with senior Dave Roberts currently No. 3 man. Junior Greg Johnson has been selected in a potential conference and national champion in this division but he has never wrestled a match for the Spartans because of injuries. He's currently recovering from a broken leg and should be ready to return in time for next year's conference meet.

125 - Senior Gary Show (16-2 and Big Ten champ at 125) has won this spot and has senior Dave Roberts (4-3) and sophomore Dave Swafford behind him.

130 - One of the best intrasquad battles in this weight class is with freshman Tom Milikowski, underneath in four years of high school competition, currently best out Mike Ellis (13-6) and Big Ten newcomer at 130 in squad challenges matches for the No. 1 spot. The No. 2 spot in this weight class could really change during the season.

142 - Perhaps the best wrestler on the team is senior Keith Lawrence (34-3) and Big Ten champ at 142. Freshman Harry Horne and Randy Johnson are behind him, but it'll be an upset if anything, but just his inexperience, has Lawrence out this year.

154 - Junior Ben Osterhout (16-3 at 145) currently holds down the top position, but the other in this class freshman Mark Bailey, sophomore Dave Bailey, and freshman Randy Smith, aren't far behind. The 12-2-4 rankings in this class could change from week to week.

165 - There's another good two men battle in this class between seniors Rick Stehle and senior Tom Meier (16-2) and Big Ten champ at 165. Radiation is presently No. 1 man, currently unchallenged in a neck hold, but there will be some competition from juniors Mike Jones, junior Scott Zaid, of this class. The next week or two should tell.

170 - Junior Pat Kanzler (11-6 at 170) will wrestle here against Maryland after beating out sophomore Gerald Shubert in the final challenge matches. Freshmen Dave Cotter and sophomore Don Zaidel are as yet untested.

177 - Junior Tim Minichiello (18-5) in 185 just preparily beat out freshman Dave Jones. Despite his size, they look no smarter than the seniors.

Starting lineups for both teams are:

SPARTANS

85 - Randy Kuhlman (16-6)

93 - Tony Timmerman (17-5)

105 - Randy Kuhlman (16-6)

120 - Randy Kuhlman (16-6)

125 - Mike Ellis (13-6)

130 - Mike Ellis (13-6)

135 - Mike Ellis (13-6)

142 - Keith Lawrence (34-3)

147 - Keith Lawrence (34-3)

154 - Tom Milikowski (2-2)

165 - Mike Ellis (13-6)

170 - Mike Ellis (13-6)

175 - Mike Ellis (13-6)

185 - Jerry Tillman (1-0)

MIZZOU

85 - Pat Kanzler (11-6)

Michigan State's basketball team,配偶ing a day game winning streak, will make its last home appearance until Jan. 10, Saturday night against Toledo. The game will be televised via CBN to 120,000 homes, between two schools, beginning at 6 p.m.

As was the case against Eastern Wednesday, Michigan State's defense should be adequate.

KENTUCKY in the opener, ME will be for a tough night under the Basket. Michigan State, will be too hard to mount with an average of 60 points.

University full basketball and breaking the 150这个游戏will match the win by Toledo's.

All USA films will be shown Dec. 24, Dec. 31 and Jan. 1, 2 against West Virginia Tech but came off the bench in the first half and wound up with 20 rebounds and 14 points.

The starting lineup for the Michigan State-Ohio State game on Nov. 19 was: Whitehead, 5-foot-9; Mike Conley, who played two seasons ago; Ralph Baker, 6-foot-3; Dan Grosz, 6-foot-3; and Tom German, who made his first start.

15 Spartans qualify for All-Academic team

Fifteen Spartan football players have qualified for the Academic Honor Roll, it was announced recently by the Michigan Intercollegiate Athletic Association. The selection was made by the Midwest football writers and sports editors.

A record total of 218 players who have been lettered or better candidates for the All-Midwest football team will be selected purely on academic achievement, regardless of position. The students who are eligible for the team are: Rob Walden, Doug Hallman, Dick Fehring, Tom Collard, Gary McDonald, John Keenan, Bob Cameron, Paul Hocking, Paul Johnson, Trish Isserman, Bruce Fehring, Mark Finley, Jon Kneeland, Mark Young and John Wight.

The Academic Honor Roll is the first of its kind to qualify for the national hot for the football teams.

Servlets for the team are: Don Bussone, Doug Hallman, Dick Fehring, Tom Collard, Gary McDonald, John Keenan, Bob Cameron, Paul Hocking, Paul Johnson, Trish Isserman, Bruce Fehring, Mark Finley, Jon Kneeland, Mark Young and John Wight.

To compensate for the failure of the television camera on the Apollo 12 lunar mission, the National Aeronautics and Space Administration has announced the release of still photos of the astronauts at work. These are pictured Apollo 2 Commander Charles "Pete" Conrad Jr. working on the Lunar Module near the descent stage, while Eugene "Pete" Cernan is deploying the US. Flag on the Sea of Tranquility. This flag is made of special plastic to prevent its failure in the harsh rays of the sun on the lunar surface. This picture shows one of the American astronauts at the foot of the lunar module, the Lunar Module, working near the crew compartment. In all the pictures, the evidence of man’s visit to the moon can be found in the dust that the astronauts made during their treks across the granular surface.

**MSU junior wins broadcasting award**

Ed Blanch, Fast Fooding, has been named the first winner of a broadcasting award established by the National Board of Televisors' Program. The award was established in recognition of the significant role played by MSU students in broadcasting. The award is given to the student who has made the most significant contribution to broadcasting during the academic year. The award is sponsored by the Michigan State Board of Televisors' Program. The award was presented to Ed Blanch at the award ceremony held on Friday, May 5, 1969.

**Romney frees HUD money to help cities**

**Washington** - Secretary of Housing George Romney announced Thursday that HUD would release $50 million to cities to help them implement the Housing Act of 1968. The money will be used to help cities finance low-income housing projects. Romney said that with the money, cities can begin to implement the housing program, which was designed to provide low-cost housing for low-income families.

**House bill erases 500-foot liquor rule**

**Lawrence** - The Ohio House endorsed a bill to erase the 500-foot liquor rule, which was adopted last year to prevent the sale of liquor within 500 feet of schools. The bill was approved by a vote of 77 to 47.

**Boston** - The Massachusetts Senate endorsed a bill to erase the 500-foot liquor rule, which was adopted last year to prevent the sale of liquor within 500 feet of schools. The bill was approved by a vote of 36 to 14.

**United States** - The United States House of Representatives endorsed a bill to erase the 500-foot liquor rule, which was adopted last year to prevent the sale of liquor within 500 feet of schools. The bill was approved by a vote of 237 to 187.
Society treads in computer tracks

By BOB SYKES

The myriad sizes of microprocessor chips to appear in 1969 will have to be watched closely because of the relatively small number of academicians and consulting engineers who are now working toward that goal. Some of these developments are being made at universities, including the University of Michigan, but the majority of the work is being done at private consulting firms. At least one manufacturing company, IBM, has already begun to produce a line of microprocessors that will be used in future computer systems.

The major advantage of the microprocessor is its ability to perform complex arithmetic operations at high speeds. This is achieved by the use of electronic circuits that can perform calculations in parallel, rather than one at a time. The microprocessor is also capable of performing a wide variety of functions, such as control of peripheral devices and the execution of programs.

One of the most promising applications of microprocessors is in the field of computer-aided design (CAD). This technology allows engineers to create and modify designs on a computer, using software that simulates the behavior of physical objects. The microprocessor provides the computational power required for this type of work.

Another important use of microprocessors is in the field of artificial intelligence (AI). Researchers are using these devices to create systems that can learn and adapt to new situations. The microprocessor provides the necessary computational power to support these tasks.

Despite the potential benefits of microprocessors, there are also some concerns about their impact on society. One of the main concerns is the possibility that these devices could be used to create supercomputers that are capable of processing vast amounts of data. This could lead to the development of new kinds of weapons and other technologies that could have negative consequences.

In addition, there is a risk that the use of microprocessors could lead to increased unemployment, as jobs in traditional fields such as manufacturing and accounting are replaced by computers. This could have a significant impact on the economy and the workforce.

However, the benefits of microprocessors are likely to outweigh the risks. The technology has the potential to revolutionize many aspects of our lives, from healthcare to transportation and beyond. As the field continues to evolve, it will be important to carefully consider the potential impacts of this technology on society.

By RICK STEIN

Through the use of computer programs, Michigan’s law enforcement agencies have been able to produce highly accurate and detailed reports of activities.

According to John H. Hedder, a computer specialist with the Michigan State Police, “the system is the most effective tool we have.”

An inquiry by a police officer, such as a driver’s license examiner or a social security examiner, will produce a “file search report” that contains all information a person may have as an early warning system.

In his opinion, the state will be able to use the system to its full potential for the benefit of all citizens.

The system has been in use since 1962, but its full potential has not yet been realized.

The system was developed by the Michigan State Police, which has experience in the field of computer science.

The system is designed to be simple and easy to use, and to provide accurate information to users.

The system’s success is due to the fact that it is user-friendly and that it provides accurate information to users.

The system has been praised by law enforcement agencies and citizens alike for its accuracy and ease of use.

The system has been in use since 1962, but its full potential has not yet been realized.

The system was developed by the Michigan State Police, which has experience in the field of computer science.

The system is designed to be simple and easy to use, and to provide accurate information to users.

News Analysis

1970: the year of negotiations

Last month, the House of Representatives passed a bill that would allow the federal government to negotiate a second contract for the United Steel Workers of America (USWA). The bill, sponsored by Representative John Dingell, D-Mich., would give the government the power to negotiate with the USWA and other unionized workers in the automotive industry.

The USWA represents approximately 600,000 workers in the automotive industry, including those employed by General Motors, Ford Motor Company, and Chrysler Corporation. The current contract between the USWA and the automakers expires on December 1, 1970.

The bill would give the government the power to negotiate a second contract, which would be valid for two years. This contract would be subject to the same bargaining process as the current contract, and it would also be subject to the same deadlines for ratification.

Dingell said that the bill is necessary to ensure that workers in the automotive industry receive fair and reasonable wages. He noted that the current contract has led to a slowdown in production and has caused problems for employers and employees alike.

The bill has been met with mixed reactions from other members of Congress. Some have expressed concerns about the potential for government interference in the collective bargaining process. Others have praised the bill as a necessary step to ensure fair wages and working conditions for workers in the automotive industry.

Legislators shouting over noise

By LINDA GORTMAKER

Three legislators in the State Capitol are shouting, fighting, and trying to communicate with each other. They are discussing the state's noise pollution problem and are expressing their concerns.

The legislators are divided on the issue. One legislator is concerned about the noise levels in the state, while another believes that the noise levels are acceptable.

The third legislator is worried about the impact of the noise on the environment and is calling for action to reduce the noise levels.

The legislators are heatedly discussing the issue and are shouting over each other, making it difficult to hear what the others are saying.

The situation is tense and the legislators are struggling to find a solution to the noise pollution problem.

Sex patients bother MDs

DENVER (AP) - A medical group some doctors fondly refer to as the Seductive Patient is causing problems for doctors. It's one of the most difficult to spot - a real trouble-shooter of the seductive patient.

The group is led by a physician popularly known as "Doctor Kill." Recently, Dr. Herbert B. Vandervoort, head of the University of California at San Francisco school of medicine, referred to the group as "the most difficult of professional patients to deal with, because of the unique, seductive quality of their behavior.

The psychological term seductive patient refers to patients who, in a way, dominate the physician's thoughts and actions. They are at the mercy of their own feelings, thoughts and desires, and are not always aware of the ways they influence the doctor's behavior.

The description of the Seductive Patient is one of the most difficult to spot because it is often not immediately recognizable. It is usually a patient who, in a way, dominates the doctor's thoughts and actions. They are at the mercy of their own feelings, thoughts and desires, and are not always aware of the ways they influence the doctor's behavior.

A seductive patient is one who is very attractive and seductive, but not necessarily physically so. They are often described as having a "seducive" quality to their behavior, which can be very difficult to spot.

The Seductive Patient is a type of patient who is very seductive and attractive, but not necessarily physically so. They are often described as having a "seducive" quality to their behavior, which can be very difficult to spot.

A seductive patient is one who is very attractive and seductive, but not necessarily physically so. They are often described as having a "seducive" quality to their behavior, which can be very difficult to spot.
