Dems charge Nixon passing infalluction bill

WASHINGTON (AP) - President Nixon has signed a bill into law this week that would extend federal laws regulating interstate commerce to the nation's capital.

The measure was sponsored by Sen. James E. Allen, R-Mich., who said it would help prevent discrimination against blacks and other minority groups.

The measure was sponsored by Sen. James E. Allen, R-Mich., who said it would help prevent discrimination against blacks and other minority groups.

In a statement, Allen said, "We will continue to do our best to ensure that the law is enforced.

The bill passed by a vote of 76-0, and Senate Majority Leader George J. Mitchell, D-Mass., said it would now go to the Senate for consideration.

**B.A. students frustrated by lack of financing**

NEW YORK (AP) - A new multi-million dollar college fund has been established to help students with tuition costs.

The fund, called the B.A. Student Loan Fund, was created by the state of New York and is administered by the Board of Higher Education.

Internal strife in Kremlin stifles negotiations

The Soviet political honeymoon appears to be ending, and if serious troubles become evident, the need to negotiate basic issues with Moscow will increase considerably.

The Kremlin has made gestures indicating it wants negotiations, which might lead to an easing of tension in some areas of the world, but others indicated that it is not prepared to move in that direction. In a recent speech, the head of the KGB, the country's top security agency, said that the Soviet military was prepared to defend the country, if necessary, and that the country's defense forces were well trained and well equipped.

The situation is complex and delicate, and the consequences of any action could be far-reaching. It is essential that we continue to work towards a peaceful resolution of this crisis, but we must also be prepared for possible military action.

Drug induces abortion

NEW YORK - Two medical teams report, after preliminary research, that one section of a drug apparently can induce abortion in women as late as five months after they become pregnant.

The research project is sponsored by the National Institutes of Health and is being conducted by a team of researchers led by Dr. William H. McLean, a professor of obstetrics and gynecology at the University of Michigan.

The research is being conducted in a laboratory setting and is not intended to be used in clinical practice. The purpose of the study is to determine whether the drug can be used to induce abortion in women who are too late for legal or ethical reasons.

The researchers say the drug, which is currently being tested in clinical trials, appears to be safe and effective. However, they warn that the results of the study are preliminary and that further research is needed to determine the drug's safety and effectiveness in clinical practice.

PanHel to install officers at banquet

Newly elected officers of Panhellenic Council will be installed at a banquet at 7 p.m. Friday in the Student Center.

The officers will be sworn in by the university's president, who will speak on "The Future of Panhellenic Life." The banquet will be held in the Student Center, and all members of the Panhellenic Council are encouraged to attend.

Military opposed in Africa

By DESKLEES MAJOR State News Staff Writer

Viner D. Borkin of the American Defense Fund said his group opposed the military government in Ghana, which he said was undermining the country's democratic government.

However, Borkin said that in many African countries the military governments are pressing for more social programs and for the protection of democracy.

He said that the military governments in Africa are often supported by the governments of the United States and other Western nations.

Biafran Relief

Supplies tied up in Lagos

Lagos, Nigeria (AP) - Financial aid totaling $2,000,000 in cash and $2,000,000 in kind from the United States to Lagos Wednesday night fell into enemy hands when a C-130 Hercules transport plane brought them to the Lagos airport. The supplies were intended for General Murtala Mohammed, who was killed in a helicopter crash.

Biafran authorities took over supplies from the Red Cross last week after relief operations after growing fears about a possible intervention by the United States.

Lagos officials on the move in the capital city to prevent a possible threat to the regime.

A simplistic explanation of the inflated economy

As expected, President Nixon has vetoed the $19.7 billion budget for the Dept. of Health, Education and Welfare. The President singled out the $1.26 billion over his own estimate as not inflationary. He vetoed the remainder because, as he said, it is "a conscious effort by the powers that be to push the economy and the public further away from reality and the principles we have enshrined." As usual, the President has outlined himself by giving a simplistic but misleading explanation of the way to end inflation and the federal programs which must be altered or liquidated to meet that goal.

The President stated that too much money was being spent by Congress for the wrong health programs, which were directed toward non-school children's education; his idea is that education is the potential cause for an inflationary spiral.

Nixon's continual references during his speech to the unpopularity of vetoing this bill, particularly during an election year, are simply not true — and he knew it. Nixon's speech was filled with all the trappings of his rhetoric, and contrary to his statements, he is well aware that any veto he makes is a matter of public education. Public opinion is politically popular.

What the President is actually saying is that federal programs — what he labeled as "social welfare" — coinciding with his philosophy, are not inflationary while those programs which are mainly for defense remain inflationary.

Mr. Nixon attempts to hoodwink us by believing that an "extra" $5 billion for defense is vital and while $1.26 billion for defense is not. There was no President Nixon lobbysting Congress for approval of New York's $5 billion excess of C-5A, Safeguard or other military projects. Yet, the billions spent for defense are the cause for real inflation and no President could change that trend.

However, Mr. Nixon did make a febrile attempt. He stated that while the defense budget is the only budget in the $178 billion (the lowest is its been in 20 years, the eventual appropriations for HEDW was $200 billion. This presentation does not bring forth a single argument on the part of Great White Father of Education. If all the billions that we spend on the truly inequitable federal appropriation system in education would save our schools and defense is fine while $20 billion for HEDW entails inflation.

2 in a row for dissent: the court airs the draft

Twice in the last two weeks the U.S. Supreme Court has handed down decisions that have landedmarks in the highly controversial question of the draft. Last week, in the case of Gutknecht v. United States the high court overturned a lower court decision that upheld the draft. The Selective Service System had excluded virtually all of the Vietnam draft dodgers. Gutknecht had been sentenced to 2 years in jail for refusing to report for induction. The high court ruled that the draft dodger was entitled to two days for every day before his draft number was called.

This week, in considering the appeal of Timothy J. Bresnahan, the Supreme Court declared that draft boards are not entitled to step a man of his own student or any other kind of deferment because of his antiwar activities. In making this ruling the court held that the original intent of Congress in establishing deferments was to hold the draft out of certain groups, not to make it for those who want to stay out of the draft.

The court ruled that draft boards are not entitled to step a man of his own student or any other kind of deferment because of his antiwar activities.

Grade system fails

The Editor:
The problem is that many students, including one or two members of our Editorial Board, are not aware of the system whereby academic credits are awarded. One anonymous student writes, "This is all new to me."" To be sure, the system is new to every new student at Michigan. But it is still the only one, and it must be learned. The following is a brief description of the system and how it works.

The system

The system is based on the idea that academic achievement is measured by the number of credits earned. A credit is awarded for the successful completion of a course, and it is calculated on a scale of 1 to 4. A 1 credit course is considered easy, while a 4 credit course is considered difficult. The system is designed to ensure that students are challenged and that they develop a foundation of knowledge.

The system is divided into two main components:

1. The Sequential Component: This component consists of a series of courses that students must complete in order to graduate. The courses are chosen based on the student's major and are designed to provide a solid foundation of knowledge.

2. The Elective Component: This component consists of a set of courses that students can choose from in order to fulfill their graduation requirements. The courses are chosen based on the student's interests and are designed to provide a broader perspective of knowledge.

The system is designed to ensure that students are challenged and that they develop a foundation of knowledge.

Communication sought to spread campus issues

Students interested in establishing a communications network for campus issues will meet tonight in the ASMSU union room.

The group’s first task will be to spread information on the Hitler Report, according to ASMSU Cabinet President Bob Goodrich.

“It will take the efforts of at least one person from every dorm, every fraternity, every minority,” he said. “It is a matter of our concern that everyone made aware of the situation.”

Student handling these services will also participate in the administration network. The network will attempt to make students aware of vital campus issues and provide necessary service in handling such communications.

The meeting will begin at 7:30. The board room is in the Union Social Services building.

The resolution, written in the name of the University, specifies that the University does not want to be associated with such activities. The resolutions have been written by all of the University’s governing bodies, including the Board of Trustees, the Senate, the Student Government Association, and the administration.

The resolution, which was adopted unanimously by all of the University’s governing bodies, calls for the immediate withdrawal of all University funds from all business enterprises that are engaged in the production, distribution, or sale of products that are associated with such activities.

The resolution also calls for the University to take all necessary steps to ensure that its students, faculty, and staff are not associated with such activities in any way.

The resolution further states that the University will not continue to support any activities that are associated with such activities, nor will it enter into any new agreements with such activities.

The resolution also calls for the University to take all necessary steps to ensure that its students, faculty, and staff are not associated with such activities in any way.

Defensive against invasion

Film depicts Russian battle

By ROIS MAROLES

The “Battle of Russia,” Russian black and white film depicting the Russian defense against the Nazi invasion which climaxed with the battle at Stalingrad in 1943, will be shown at 7 tonight at 107 Lolita Hall.

The 70 minute film will be screened by the Wilma Schaefer Language Laboratory. The film will also be shown in the MSU Auditorium.

The “Battle of Russia” was directed by Sergei Eisenstein and stars Mikhail Chertkovsky as Stalin.

The film was produced by the State Film Studio and released in 1943. It is a historical drama based on the experiences of the Russian people during World War II.

Drunk wore medal in 1700s

WASHINGTON (AP) - Their drink may not have been quite as potent as the one Joseph Smith wore, but these were certainly the same kind of people.

The Utah congressman on Wednesday celebrated his 1700s birthday with a toast to the man he calls his “hero,” the 17th century Englishman known to history as the “Liar of the Year.”

Joseph Smith, who was born in New York in 1700, is known for his role in the Mormon religion. He was also a bit of a drinker himself, according to his biographer.

Some say Smith was so drunk on his birthday that he stumbled into History, much to the chagrin of historians and others who claim he was actually born in 1701.

He also emphasized that to keep the party going, college students are always invited to his birthday bash. He says he doesn’t drink much, but he always has a good time.

Snow coverage

In this scene, which looks like a little more primordial than the Belarusian forests, from where it was taken, students work on an animal of snow. What is it?

State Rep. Steve Payne

Immortal Hamlet graces Auditorium

Two great plays are currently greening the MSU campus - Shakespeare’s “Hamlet” and “The Importance of Being Earnest.”

“Hamlet” is a classic tragedy and “Earnest” is a classic comedy, yet both share a common theme of mortals versus the gods or supreme powers.

Shakespeare’s “Hamlet” was first performed in London in 1602 and is considered one of his finest works. It tells the story of a prince who returns from abroad to find his father has been murdered and his mother remarried.

“Earnest” was written by Wilde in 1895 and is considered one of his finest works. It tells the story of a young man named Algernon who wants to join the military but is turned down by his family.

Tickets are available at the MSU Union Theater Office.

Drunk wore medal in 1700s

WASHINGTON (AP) - Their drink may not have been quite as potent as the one Joseph Smith wore, but these were certainly the same kind of people.

The Utah congressman on Wednesday celebrated his 1700s birthday with a toast to the man he calls his “hero,” the 17th century Englishman known to history as the “Liar of the Year.”

Joseph Smith, who was born in New York in 1700, is known for his role in the Mormon religion. He was also a bit of a drinker himself, according to his biographer.

Some say Smith was so drunk on his birthday that he stumbled into History, much to the chagrin of historians and others who claim he was actually born in 1701.

He also emphasized that to keep the party going, college students are always invited to his birthday bash. He says he doesn’t drink much, but he always has a good time.

Snow coverage

In this scene, which looks like a little more primordial than the Belarusian forests, from where it was taken, students work on an animal of snow. What is it?

State Rep. Steve Payne
Text of Nixon's veto speech on HEW appropriations bill

WASHINGTON (AP) — President Richard Nixon vetoed the HEW appropriation bill yesterday, saying it would cut too many welfare programs and fail to meet the nation's needs.

"I believe that the American people deserve better than the welfare programs that are being funded in this bill," he said. "We must not let the welfare programs be the only ones which receive funding. We must also provide for the education and health needs of the American people."

The President said he would work with Congress to find new ways to provide for these needs.

"I must say that I believe that the American people deserve better than the welfare programs that are being funded in this bill," he added. "We must not let the welfare programs be the only ones which receive funding. We must also provide for the education and health needs of the American people."

'U' suicide attempts growing

By ROSEANNE BADE
State News Staff Writer

Student suicide attempts in the past 2½ years have been growing in number, according to Michigan State University officials. However, no student has been known to have attempted suicide.

Between July 1967 and July 1969, 20 suicide attempts on campus reported to the Campus Counseling Center. In 1969 to 1973 the number reported at 38 attempts. In the last four months, there were 30 reported attempts.

The same trend is appearing in campus, where police record 20 suicide attempts reported in Lansing during the last six months. But police only made reports of the more serious suicide attempts that require medical attention.

The number of students taking their own lives or attempting to take their own lives has increased, according to Dr. John W. Smith, director of the Counseling and Testing Center.

"I feel that this is simply an act of desperation by students who are unable to cope with their problems," Dr. Smith said.

Even though there is a significant increase in the number of suicide attempts, the actual number of suicides is still a relatively small number. In fact, only one student in 1969 to 1973 was reported to have committed suicide.

In most cases, the students who attempt to take their own lives are not attempting to kill themselves, but merely wish to escape from their problems.

"I think we are simply coping with the pressures of college life and the demands of academic performance," Dr. Smith said.

When students do fall into a depression, they are usually helped by a counselor who will take their specific problems into account.

"If the student is going to kill himself, we always try to put the blame on someone else," Dr. Smith said.

"However, if the student is merely attempting suicide, we try to help them understand their feelings and find constructive ways to deal with them," Dr. Smith said.

In many cases, the students who attempt suicide are also suffering from depression, anxiety, or other mental health problems. These students need to be referred to a mental health professional for further evaluation and treatment.

"We try to help these students understand their feelings and find constructive ways to deal with them," Dr. Smith said.

The Counseling and Testing Center has been particularly active in helping students who are suffering from depression and anxiety.

"We try to help these students understand their feelings and find constructive ways to deal with them," Dr. Smith said.

In many cases, the students who attempt suicide are also suffering from depression, anxiety, or other mental health problems. These students need to be referred to a mental health professional for further evaluation and treatment.

"We try to help these students understand their feelings and find constructive ways to deal with them," Dr. Smith said.

Traffic jam

Traffic jams can be a frustrating experience for drivers. Understanding the causes and finding effective solutions can help alleviate the stress and improve safety on the roads. Here are some key points to consider:

1. **Congestion Causes:**
   - **Peak Hours:** Traffic is at its peak during weekday morning and evening rush hours.
   - **Holiday Periods:** Traffic increases during holidays and special events.
   - **Special Events:** Major events can cause significant traffic disruptions.

2. **Factors Contributing to Traffic Jams:**
   - **Driving Habits:** Tailgating, speeding, and other reckless driving can lead to accidents and congestion.
   - **Weather Conditions:** Adverse weather conditions can affect visibility and driving conditions.
   - **Road Conditions:** Potholes, roadblocks, and construction zones can cause delays.

3. **Solutions to Traffic Jams:**
   - **Public Transportation:** Encouraging the use of public transportation can reduce the number of vehicles on the road.
   - **Carpooling:** Sharing rides with other commuters can help reduce traffic.
   - **Flexible Schedules:** Adjusting work schedules to non-peak hours can reduce rush hour congestion.

4. **Technology Solutions:**
   - **Smart Traffic Lights:** Traffic lights that adapt to traffic flow can help manage traffic more efficiently.
   - **Electronic Tolling:** Electronic tolling systems can help distribute traffic more evenly across roadways.

By taking into account these factors and implementing effective solutions, we can work towards reducing traffic jams and improving the overall driving experience for everyone on the road.
Spasmodic verticals have been removed from the document.
Lounging

If you have ever read the sign in the lounge in the Union, you know that this student is violating two counts of 31...though somehow his behavior seems to make the lounge much more lively.

INCREASE IN NEED

Volunteerism said rising

The role of the student volunteer in the 1970's has been central to the Federal Board of Higher Education. The Board has emphasized the need for increased volunteerism among college students. The Board has also noted the effectiveness of volunteerism in meeting the needs of the community. The Board has stated that volunteerism is a healthy and effective way to address the needs of the community.

Com. Arts Bldg. waits.

If you don't like the way people talk to each other, we'll pay you to change it.

We're in the communications business.

And during the next 30 years we will be upgrading all the equipment we now have in order to provide better service to our million existing customers.

And if that won't work we'll also have to come up with enough new equipment to provide telephone service to about 26 million more people. As well as equipment for a much more extensive data communications program.

We'll do it in several steps, each one providing some of the service we offer today.

Also we need engineers, researchers and scientists to develop electronic switching equipment, automatic long-distance communications systems, and very high-speed computer systems which we're going to test over the next 10 years.

So if you think you have something to say about the way people talk to each other, we might pay you to change it.
