Police find no suspects in Big Rapids murder

By KATHY MORAN
State News Writer

BIG RAPIDS — A spokesperson from the Big Rapids Police Department said Monday that there were no leads or suspects as far as their investigation of the death of a 21-year-old man who was found dead early Sunday morning. The body was discovered in a wooded area near the city limits.

The victim, James Johnson, was found by a motorist who noticed a vehicle parked in a wooded area. The vehicle was unoccupied and appeared to be abandoned. The初步was transported to the Kent County Medical Examiner's Office where an autopsy was performed. The cause of death was determined to be a gunshot wound to the head. An investigation is ongoing.

Meanwhile, Ferris State police have been working closely with the Kent County Sheriff's Office in an attempt to identify the victim. The investigation continues.

**News Coverage**

**W. M. D.** — President Nixon proposed Monday a $200.8 billion budget for fiscal 1974, consisting of a $31 billion increase over the current fiscal year, to be used to finance a defense and space program.

The big fiscal budget growth, according to the spokesperson, has been spurred by the increasing needs of the national defense and the desire to expand the nation's space program. The budget, the spokesperson said, would enable the nation to achieve its goals in both areas.

**Defense spending** included a $200.8 billion increase in the Department of Defense. The increase is to be used to finance new weapons systems and research and development projects. The spokesperson said that the budget would allow the nation to maintain a strong military presence and to continue its efforts to develop new and better weapons systems.

**Space program** would receive a $31 billion increase. This increase would be used to finance the continuation of the space program and to finance the development of new space vehicles and equipment. The spokesperson said that the budget would enable the nation to continue its efforts to explore and exploit space.

**Fiscal year** begins July 1, 1973, and runs through June 30, 1974.

**Budget submitted**

Budget Director Robert P. Mayo, left, is among those who took an oath to President Nixon as he signed the $200.8 billion budget for the 1971 fiscal year. After the signing in the Cabinet Room, the budget was submitted to Congress. AP/Wide World

**More regulation**

**ASMSU to consider constitutional changes**

**State News**

**ASMSU Student Body will consider several constitutional changes to its charter. If approved, the changes could allow students to vote on candidates for student government positions and would expand the role of the Student Senate.**

The changes would also establish a budget committee to oversee financial matters, and a new committee to handle complaints against student government officials.

The changes would be considered at a special meeting of the ASMSU Senate on Tuesday afternoon. The meeting is open to the public.

**Schedule book**

**State News**

**The 1971 schedule book for the Michigan State University at East Lansing will be available this week. The book includes the university's academic calendar, registration information, and a directory of campus services.**

**Merchants take hard line on shoplifting**

**State News**

**Businesses in East Lansing have taken a hard line on shoplifting. They say they will not tolerate the problem, and they are willing to spend money on security measures to prevent it.**

**Protest**

**East Lansing, Michigan**

**The merchants in East Lansing are concerned about the increase in shoplifting and are prepared to take action to prevent it. They have met with the police department to discuss ways to improve security and are considering installing security cameras and hiring security officers.**

**Public response**

**The public has been supportive of the merchants' efforts to combat shoplifting. Many people have expressed concern about the problem and have offered ideas on how to prevent it.**

**Strengthened security measures**

**The merchants have strengthened their security measures to prevent shoplifting. They have installed security cameras and hired security officers to patrol the store.
Buenos Aires wrecks kills 160

BUENOS AIRES, Argentina — Police arrested a signature runner Monday and placed mattresses at 100 persons killed and 235 injured in the 2nd largest of a series of non-safety charges and a stalled commuter train passed with no noticing witnesses.

Signatures Names Buenos Aires police said they had been on duty near the crash site, but were unable to get from Buenos Aires. The system was banned in 1952 at 9:30 a.m. near the end of a 1,000 mile journey when it plowed into the high-speed train, stalled by mechanical failure.

Police said, "It is clear that when all of a sudden everything was wrong, there was no time at all, and the train started to move.

"The teller added to the train's driving force, trucks and broken windows, and hairless steel trolley to help carry away victims. But there weren't enough. It was horrible.

"The train had the responsibility of regular service, but we don't know what happened," police said. "Some have raised the possibility that the train could have been attacked, but we don't know if it was a protest against the government, or if there was an accident.

"I've been on the train four months, and I've never seen anything like this," one of the victims said as he walked by.

The sack held 42 and 60 passengers before the train left the Upwell station. The train's route was made into the dangerous sector of the passenger train, and the train had to be moved to the other sidetrack. There was no evidence of the attack at any point before victims were freed with their lives.

Regents decline trustees' invitation

On the committee's recommendation, the Board approved unanimously a resolution declining the invitation of Oakley to be in the office of Undersecretary in Michigan. A. H. was introduced into the Michigan University Board, 21 to grant Oakley his appointment as of July, 1970. Members of the legislature with MIB and Oakley officially Monday to discuss the bill.

The Michigan University Board of Regents met Monday in Lansing, and adopted a resolution declining the invitation of Oakley to be in the office of Undersecretary in Michigan. A. H. was introduced into the Michigan University Board, 21 to grant Oakley his appointment as of July, 1970. Members of the legislature with MIB and Oakley officially Monday to discuss the bill.

do you think a bright young engineer should spend his most imaginative years on the same assignment?

Neither do we.

That's why we have a two-year Rotation Program for graduating engineers who would prefer to explore several technical areas. And that's why many of our areas are organized by function -- rather than by project.

At Hughes, you might work on spacecraft, communications satellites and other tactical missiles during your first two years. All you need is an EE, ME or Physics degree and talent.

Do you think a bright young engineer should spend his most imaginative years on the same assignment?

You may select specialized jobs, broad-based or type jobs. Or you can choose not to change assignments if you'd rather develop in-depth skills in one area. Either way, we think you'll like the Hughes approach.

It means you'll become more versatile in a shorter time.

You can help them.

Senate panel begins ABM query

WASHINGTON (AP) - A Senate panel began today a new inquiry Monday into the background and impact on the U.S. of President Nixon's proposal for a new strategic defense system. The panel's participation in the debate was called for by a recent U.S. Supreme Court decision that declared the so-called "star wars" program unconstitutional.

The Senate Armed Services Committee today held its first hearing on the proposal, which would require the United States to spend about $1 billion a year to develop and build a defense shield against both nuclear and non-nuclear weapons.

Some experts believe the program would not only create a new military threat, but also pose a danger to the economy and society. Others argue that the program is necessary to protect the nation from attack.

The committee is expected to vote on the proposal in early February, with a final decision expected in March.
Inflating the economy with the ABM system

The first phase of President Nixon's Safeguard-Anti-Ballistic Missile system plan is close, with the President signing his initial proposal and the Senate preparing for a major debate. The nuclear installations, Defne Secretary Dr. James R. Schlesinger, have been split into two phases, with the first phase covering a larger geographical area.

The Nixon proposal entails the deployment of ABM missiles, the installation of computers and radars at two ABM locations used to defend American space, and the purchase of land for ten other ABM installations around the country. The President has expressed his support for the Safeguard system, noting that it is the key to the defense of the nation.

A central issue to be debated in the Senate is whether the ABM system is capable of deterring a nuclear attack. Many senators believe that the system is not capable of fulfilling its mission, and that the United States should not rely on it as a sole means of defense.

One question is the cost of the ABM system. Many senators have expressed concern that the system is too expensive, and that the funds could be better spent on other defense programs.

Another question is the adequacy of the ABM system. Some senators believe that the system is not capable of defending the United States against a nuclear attack, and that it should be scrapped.

In the end, the Senate is likely to vote on the ABM system, and the outcome will have significant implications for American foreign policy and defense strategy.

Letter Policy

The Senate debate on the ABM system will be watched closely by policymakers and defense experts around the world. The outcome could have far-reaching implications for the balance of power in the world and the future of nuclear deterrence.

One of the key issues to be considered is whether the United States should continue to invest in the ABM system, or whether it should be scrapped in favor of other defense programs.

Another issue is the adequacy of the ABM system. Many senators believe that the system is not capable of fulfilling its mission, and that it should be scrapped.

The Senate debate on the ABM system will be watched closely by policymakers and defense experts around the world. The outcome could have far-reaching implications for the balance of power in the world and the future of nuclear deterrence.
Beatles 'Kum Back' with freely edited album

By RAY WALSH
State News Correspondent

The Beatles' latest album, "Kum Back," is a Bundler of the band's early material, much of which was edited to produce the final product.

The album contains 13 tracks, including "The Harder They Come," "I'm Done," "Help!," "Yesterday," "Yesterday's News," "Blackbird," and "Hey Jude." The album also includes a bonus track, "The Long和Winding Road," which was previously released as a single.

The album is being released in response to the growing demand for the band's early works. Many fans have been disappointed with the band's recent output and have called for a return to their earlier style.

"Kum Back" is available now at major retailers and is expected to be a commercial success.

DULL, UNORIGINAL

Viewers jeer 'Fanny Hill'

By ROBERT KOPPER
State News Reviewer

"Fanny Hill," directed byff RICHARD ATTENBOROUGH, is a dull and unoriginal adaptation of the classic novel by John Wilmot, Lord Matsen.

The film, which stars RAQUEL WELLES as the title character, fails to capture the risqué and raunchy spirit of the original work. The acting is wooden and the dialogue is stilted, making it difficult for the audience to connect with the characters.

The film's only redeeming quality is the cinematography, which is visually striking. However, this is not enough to make up for the film's lack of substance.

"Fanny Hill" is a disappointment for fans of the original novel and is not recommended for anyone seeking a well-crafted adaptation of a literary classic.

Our Far East policy brings people together.

The Jade East Manifesto! Its aim to bring and warm all over the world closer together. Our policy would allow for all sorts of skimmings, territorial gains and conquests. And still keep the peace. Just put some Jade East on your face and neck. And anywhere else. If you've got a girlfriend, take her out as planned. If you're seeing a few girls, when it's what you're doing. Now comes the best part. Since all girls are different, all reactions will be different. Some will be aggressive, others submissive. But whether our policy leads to final agreement or not, one thing's for sure. The negotiations alone will be worth the price.

Jade East
Make love, not war.
Jeff Elliott
Spartans' defense posing problems

You'll always get as seamless as which is more important—defend or offense.

"I believe you want to see in the box room, too, because we've never been there for the game," Coach Bill Scholl said.

"It's going to be the same," he said. "But we're not going to let that happen.

"We've been working on it the last two weeks. We've been trying to get the defense going and I think we're making progress.

"The defense has got to be better than we've been."
ASMSU's constitution

In 1970, the ASMSU constitution was revised to add new sections, including one that established the Student Board. This section was important because it allowed students to have a say in the governance of the university, which was a significant step towards student involvement in university affairs. The revised constitution also included provisions for representing student interests and providing a voice for the student body in decision-making processes. This was an important step towards ensuring that students had a say in the direction of the university and that their concerns were addressed in a meaningful way.
Abnormality cure foreseen in future

By ELAINE FETTKE
State News Staff Writer

In the future geneticists may be able to correct inherited abnormalities in human beings. C. H. HGugg, associate professor of zoology and human development, said during a colloquium on the subject that it may be possible to revolutionize the human species.

Today, however, the best they can do is to help a child who is already abnormal. Speaking on "Developments in Genetics and Their Implications for Families," Dr. Hugg described how DNA and RNA work to record and reproduce genetic material.

The DNA molecules contain the genetic code of the organism. During cell division the DNA molecules break up into smaller units called RNA which contain the specific information needed to reproduce the existing state of the cell. In order to prevent mistakes, RNA in turn is duplicated before it is split into DNA again.

There are two kinds of genetic errors, he explained. One involves a single gene making a mistake in reproducing itself. The other involves an initial mistake which does not show up initially although caused on a normal gene and passed on through generations perhaps to show up eventually.

Huggs discussed the fact that some errors in genetic material can take a non-hereditary form if there are only few or low chromosome present. A normal person has 46 chromosomes. Infants born with 45 or 47 instead of 46 have Down's syndrome while those born with 43 or 44 chromosomes are mosaic for Down's.

Questions will be sent by correspondence to students who have earned a college degree in the field of genetics. The correspondence course is designed to make possible for working people to earn degrees in the field of genetics.

Aides assist troubled blacks

By KAREN FITZGERALD
State News Staff Writer

Adapting to life in a large university can be bewildering and, for some minority students, especially black students, intimidating. Many students, particularly those from large, predominantly white communities, are new to this kind of environment.

Because of the Willen Hall incident last year, there was a general feeling among students that there was somehow something more than a &ldquo;normal&rdquo; atmosphere on campus. The campus wellness program hopes to help supply Black students throughout the resident hall complex.

The major purpose of the &ldquo;Black AIDS&rdquo; and &ldquo;Black Coleman&rdquo; program is to provide students in all Black dormitories a caring environment where they can talk, learn, and become friends with other Black students.

The &ldquo;Black AIDS&rdquo; program is a means of creating an overview of support programs among blacks and, by working with the resident halls, graduate advisor, and residence assistant, making them to the unique problems faced by blacks&rdquo; he explained.

Week Hall Cullom cited the purpose of the program as one of the purposes following the Willen Hall incident in which black students possessed for design in the resident hall facility as well as lack of a more personalized program in a computer and computer program.

During the summer Gary Smith, and director of Black
