Massive lobbying set in protest of Viet war

WASHINGTON (AP) — Supporters of a U.S. Senate resolution to stop the Vietnam war plan to call on Congress Thursday for a massive lobbying effort to sway senators to vote for the proposed bill, which is expected to draw several hundred lobbyists to the nation's capital.

The lobby effort, to be launched Thursday, comes as the Senate is expected to vote Friday on the resolution, which would require the president to end military aid to the South Vietnamese government and begin withdrawing American forces from the war.

A Senate source said the lobby would begin Thursday, with lobbyists coming to Washington to meet with senators and their staffs.

The source said the lobby would focus on several key senators, including those who are undecided on the resolution.

The lobby effort is expected to continue until the Senate votes on the resolution, which is expected to be held Friday.

Students may acquire extra vote on council

By MICHAEL FOX / A. D. A. R. R. It is the first meeting of the new semester, and the Academic Council is on the agenda.

At the meeting, a vote was taken to approve a motion to give the students an extra vote on council.

The motion was passed unanimously, and the students' representatives were given the extra vote.

The move is expected to have a significant impact on the council's decision-making process, as the students now have more influence in the decision-making process.

The students' representatives have been working with the Academic Council to improve the education experience for all students, and this move is a step in the right direction.

S. Viet students stand trial

By BOB ROACH, City Editor

State Dept. officials confirmed Thursday that a group of Vietnamese students, including two former Stennis students, had been arrested in Saigon, accused of plotting to blow up the U.S. embassy.

The students were arrested on charges of espionage and sabotage.

The students are accused of planning to bomb the embassy and the U.S. embassy compound.

The students have been held for questioning and will be tried in the near future.

The trial is expected to be a sensitive issue in the Vietnam war.

The students have denied the allegations and are claiming their innocence.

The trial is expected to be a significant event in the war and will be closely watched by the American public.

The trial is expected to be held in Saigon, and the students will be tried by a Vietnamese court.

The trial is expected to last several months.

The trial is expected to be a sensitive issue in the war and will be closely watched by the American public.

Passenger service out of East Lansing Grand Rapids ended a short time ago.

The final reminder of what used to be a convenient form of travel was removed Thursday as workmen dismantled the train depot at Farm Lane.

The depot was used to serve the passengers traveling between East Lansing and Grand Rapids.

The depot was demolished to make way for a new passenger terminal.

Book reveals prof's study of student ideas

EAGLE'S NOTE: For the past year, Professor Bill Eagan, president of the East Lansing School District and a member of the American College Testing Program, has been working on a book titled "The Ecology of the Modern School System." It is a popular result of that study is the "By the Numbers" feature in this week's edition.

"When you look at the numbers," Eagan said, "the school system is a very complex system with a lot of variables that can affect its performance.

"For example, the number of students in a school can affect the quality of education," he said.

"The book is a basic guide to the school system and provides information on the various aspects of the system," Eagan said.

"It is a book that I have used in my classes," he said.

"I have always wanted to have a book that captures the essence of the school system," Eagan said.

"My goal is to make the book useful to students, parents, and educators," he said.

"I hope that the book will be useful to everyone," Eagan said.

"I am proud to have written this book," he said.

"I hope that it will be a valuable resource for everyone," Eagan said.
FBI aid in local crimes opposed

The FBI aid program, set up by President Nixon, is facing opposition from local officials. Sen. Saxby Chambliss, R-Ga., said the FBI should aid local authorities in certain areas.

Alford Whitehouse, press secretary for President Nixon, said the FBI's main help is providing laboratory tests and training local police in running down criminals through use of local leads.

The president said the administration is standing firm on the issue of law enforcement that would automatically bring the FBI into the picture of killers of prominent men and women.

President Nixon met Wednesday with Attty. Gen. John Mitchell, who directed the FBI to Cssaise House in which the local government could get help.

President Nixon met Wednesday with Attty. Gen. John Mitchell, who directed the FBI to the house in which the local government could get help.

Art treasure found

The long-lost marble head and torso of a 2,000-year-old Greek sculpture—one of the wonders of the ancient world—has been discovered in a boy's school in London, a British Museum archaeologist announced Thursday.

The ancient fragment is part of the great altar of Zeus at Pergamum, a 4th-century B.C. masterpiece of sculpture depicting a battle of gods and giants. Pergamum, on the south coast of Turkey near the sea, is now a part of the country of Turkey.

American observers talk

More than 150 Americans with family members missing in Indochina watched glim silence Thursday in Lansing, Michigan, South Bend and Columbus, respectively, for congressional delegations arrived for the 114th weekly session of the Vietnam peace talks in Paris this summer. The four-hour session produced no change in the long-drawn-out deadlock, which was formally placed on the conference record its proposed amendments for reducing the war and injuring North Vietnamese prisoners in Tonkin Gulf on June 3.

Soviet Jews convicted

Four Latvian Jews, including a man who said he was tried for assisting in the escape of a convicted of attempted murder of a Soviet official, was convicted Thursday in Moscow of dashing the Soviet flag. The trial was closed to the public, and the defendant and four Russian-Jewish leaders convicted of a similar charge were released.

Two more bodies found

The bodies of two men were found Thursday in shallow graves in rain-soaked orchards north of Yuba City, Calif., and the FBI was called in to search for more possible victims of the man murder gang that was operating in the area. No. 14 was discovered Thursday afternoon, Schaffner Ray W. Whitaker said. No. there were immediate details.

Favorite son bid made

Sea. Robert Taft Jr. bid Thursday for Ohio's favorite son nomination for president. The Ohio state primary is a stand-off for President Nixon.

He said he did not come out of concern over criticism of the President by former Sen. Charles Goodell, R-N.Y. and Rep. Paul McColley, R-Calif.

Taft denied ambitions to take over the state Republican party, but a successful son effort over the years. He was chosen by the responsibility of setting over state party leadership. He has long been a leader in Ohio Republican politics since his run against former Gov. James A. Rhodes in the 1970 primary.

'Death warrant' issued

FBI Director J. Edgar Hoover says youthful extremists have issued a "death warrant" against the American free enterprise system.

He described them in New York as "a rapidly growing extremist movement, mingling of people, coming largely from the so-called new left, but also including veterans of the old left, young and independent men of determined moderates, who see American business as a hypothetical evil, their system more than a system of economic freedom, but a threat to civil liberties.

Penalty lowering urged

The penalty for possession and use of marijuana should be lowered from a felony to a misdemeanor, a representation of Michigan's state Senate Judiciary committee hearing in Lansing Thursday.

Deborah Skillman, the president of the government's office for drug abuse, told the Senate Judiciary Committee that possession of marijuana should be brought into line with the times.
Director's resignation unsure

By MICHAEL FOX
State News Staff Writer

Diane Ruthven, director of Greek life, announced Monday night that she will resign as of June 1 to pursue other opportunities in the area.

"I have been here for 10 years and have enjoyed every minute," Ruthven said. "I have learned a lot and grown as a professional, and I'm looking forward to the next step in my career.

Ruthven said she was approached by another university to take on a similar position and decided to accept the offer.

"It's time for me to move on and take on new challenges," she said. "I'm excited about what the future holds for me and the university.

The announcement comes after a year of动荡 and change for the Greek system. The Interfraternity Council (IFC) announced earlier this month that it will be expanding to a four-year ethnic policy, which threatens to disrupt the social fabric of the campus.

"I hope we can work through these issues and come out stronger," Ruthven said. "I've been here through a lot of change and I believe we can overcome any challenge.

The announcement comes just days before the start of the new academic year, when students will return to campus and the Greek system will be in full swing.

It's been an honor to serve the university and the Greek community," Ruthven said. "I will miss everyone, but I'm looking forward to the next chapter.

Ruthven's resignation is effective on June 1. At that time, she will be succeeded by Interfraternity Council President Alex Smith, who has been serving as interim director since January.

Smith said he is excited to take on the new role.

"I'm grateful to be able to continue the work that Diane has done," Smith said. "I'm looking forward to leading the Greek system into the future.
EDITORIALS
Mayday mass arrests jeopardize constitution

During the Mayday activities earlier this month, over 12,000 arrests were made and detained en masse. Most of these arrests were made in Washington Island, where police tactics were seen as excessive.

The tactic is being reviewed by the American Civil Liberties Union, which has asked a federal District Court to discontinue mass charges against the thousands still awaiting trial. The ACLU is considering a lawsuit against the ACU. Although the legitimacy of Washington Island’s police tactics is being questioned, the legality of their arrest warrants is clear. These arrests were made indiscriminately, regardless of whether the individuals involved were in an illegal act or not.

Law enforcement agencies and the courts were hamstrung by the large numbers of defendants and the media coverage was minimal. Simply being on the street was enough to cause arrest.

Bailing Lockheed out: not govt responsibility

Lockheed Aircraft Co., the world’s largest manufacturer of defense aircraft, has been observed to be in financial trouble. A frequent recipient of defense contracts, it is facing a large number of legal problems, which may lead to bankruptcy.

The company claimed that the problems were caused by the increase in the cost of defense contracts. However, the government has not provided any financial assistance, leaving the company to fend for itself.

The government’s decision to support Lockheed with financial aid would be a breach of its responsibility to ensure the viability of private businesses.

Drug laws inconsistent

A State Court of Appeals decision held that marijuana may be used for medical purposes in Michigan. In its ruling, the court stated that the possession of multiple traces of illegal drugs in the home is a significant reason for the decision.

Lawmakers disagree, arguing that there is no consistent evidence that marijuana use is harmful. They are concerned about the potential for dangerous drug use and addiction, and the possibility that it may lead to more serious crimes.

The court’s decision further emphasizes the inconsistency in Michigan’s drug laws. The expressed intent of such legislation is to curtail the use of and distribution of illegal substances. It is hard to see how this has been served by charging individuals with the possession of multiple traces of a drug that is legal under state law.

The court’s decision highlights the need for a thorough review of Michigan’s drug laws.

IRISH CHURCH CONFRONTS MORAL PROBLEMS

THE Rotunda in Dublin has been the scene of a public debate on the issue of contraception. William Cardinal Conway, speaking on behalf of the Catholic Church, criticized the use of contraceptives, which he described as a wedge opening the way to divorce, population control, and the destruction of morality.

The government of Ireland, however, has supported the use of contraceptives as a means of family planning.

A Catholic layman remarked: "The Irish Church today is divided on the issue of contraception. Some bishops are opposed, while others support it."

The task force, in describing the need for new approaches, said: "In an age of excesses of materialism and sexuality, new techniques must be employed, as well as ethical guidelines, to ensure the well-being of individuals in large metropolitan areas."

An article in the Manchester Guardian newspaper criticized the Catholic Church for its stance on contraception.

"It is a sad fact that the majority of Irish Catholics have no faith in their church's position on birth control."

The task force also noted that the Catholic Church's opposition to contraception is based on a "false consciousness" of the Church's role in society.

"The church's approach is outdated and inappropriate in the modern world."

Lansing area religious bodies have been asked by the Lansing Peace Task Force to consider hosting a symposium on the issue of American military forces from Ireland. The task force was established in 1971.

"The task force hopes to continue its work on this project, even if the proposed symposium does not happen."

Eugene Hagadorn, the task force's spokesperson, said: "We are stepping out of the traditional role of the church and the community to address the issues of peace and justice in a more comprehensive manner."

The task force is the result of a series of meetings with parents, clergy, and other community leaders.

"It is a sign of the times that we are stepping out of our traditional roles to confront these issues."
EMPHASIS INDIVIDUALS

Volunteers decentralize

By BARBARA FASY
State News Staff Writer

The Dearborn Arm of Student Volunteers (MASV) has opened a new regional center, Lansing Police Department, and "We wanted to open a new center," said the director, "so that it can serve the needs of the people who live and work in the Lansing area."

The center will serve as a central location for volunteer opportunities in the Lansing area. It will be open from 9 a.m. to 5 p.m. Monday through Friday.

The center will offer a variety of volunteer opportunities, including:
- Assisting with community events
- Providing support to local organizations
- Helping with administrative tasks
- Offering training and development opportunities

The center is staffed by volunteers who are trained and supervised by the center's director, Karla Fasy. The center also offers a newsletter that provides updates on volunteer opportunities.

The center is located at 120 W. Washington St., Suite 200, in downtown Lansing. It is open from 9 a.m. to 5 p.m. Monday through Friday.

The center is open to anyone who wishes to volunteer. To learn more, call (517) 372-2200.
Plays take spotlight for holiday weekend

The holiday weekend will be a winter wonderland with the closing of the University student production "Il Bacio," a play by Luigi Pirandello. Performances, by the University's Department of Theatre, are at 8 p.m. Friday and Saturday and at 2 p.m. Sunday in the Lansing Board of Education auditorium. Admission is $3.50.

THE TEMPEST - Shakespeare's comedy of magic, romance and forgery, at the Michigan State University Theatre. Admission is $2.

ALL QUIET ON THE WESTERN FRONT - the graphic, poignant 1000 film of each State's 20th century soldier will be shown on the set of the Tempesta Theatre Saturday with a live orchestra. Admission is $1.50.

"The Tempest" was last shown in 1983 by director Frank Luther's version of William Shakespeare's "The Country Wife." The play is a fine new production, and so is the new set, which was made by MSU's attempt to capture the set of the Fordham Theatre in the play. The play, and the comedy, hand gardens, and theater of the language, the PAC production does not have.

The recent, and by comparison Before Hillbilly Theatre production, "The Tempest" has a much more accurate rendering of the play. The play is a fine new production, and so is the new set, which was made by MSU's attempt to capture the set of the Fordham Theatre in the play. The play, and the comedy, hand gardens, and theater of the language, the PAC production does not have.

Critic George Nathan once wrote that bad manners in the part of the actor are worse than bad manners in the part of the reviewer. This is something to think about, especially in the case of the Tempesta Theatre production of "The Tempest," which was a much better production than the one presented in 1983.

The production was well received, but director Frank Luther's version of William Shakespeare's "The Country Wife" had a new set, which was made by MSU's attempt to capture the set of the Fordham Theatre. The play is a fine new production, and so is the new set, which was made by MSU's attempt to capture the set of the Fordham Theatre in the play. The play, and the comedy, hand gardens, and theater of the language, the PAC production does not have.

PAC play shows bad manners

Critics of the "Amidst the City's" last award "no ordinarly act," I know the time of two and three. Critical reviews have been given to the play. The play is a fine new production, and so is the new set, which was made by MSU's attempt to capture the set of the Fordham Theatre in the play. The play, and the comedy, hand gardens, and theater of the language, the PAC production does not have.

Admittedly, I do not know the time of two and three. Critical reviews have been given to the play. The play is a fine new production, and so is the new set, which was made by MSU's attempt to capture the set of the Fordham Theatre in the play. The play, and the comedy, hand gardens, and theater of the language, the PAC production does not have.
Race against time

A race against time as scientists attempt to save the world from a virus that threatens to destroy all life on earth. The virus, known as the "Andromeda Strain," spreads rapidly and is highly contagious. The scientists, led by a team of experts including a physicist, a microbiologist, and a computer scientist, work tirelessly to find a cure before it's too late.

"The Andromeda Strain," Robert Wise's film of Michael Crichton's novel, was a critical and commercial success. The film was praised for its realistic depiction of a scientific research team working against time to save the planet. The tension was palpable as the team raced against the clock, barely able to contain the spread of the virus.

The film's success led to a sequel, "The Andromeda Strain: Part II," which was released in 1971. This sequel continued the story of the scientists, who were now facing a new and more deadly strain of the virus. The film was a hit and solidified the reputation of Robert Wise as a master of suspense.

Upcoming festival focuses on media, writing awards

The Saginaw County Professional Media and Fiction Writing Awards, which will feature an experimental student work in media and the performing arts, will be held in Novi. The ceremony will be presented at the festival. Writers of fiction and poetry will be awarded in the writing contest, which will be announced shortly.

How many ways can you prepare a pancake?

While the art of preparing pancakes may seem simple, there are many ways to make them taste delightful. Here are a few ideas to get you started:

1. Basic Pancakes: Mix flour, sugar, baking powder, and salt in a bowl. Add milk and eggs, and stir until the batter is smooth. Heat a skillet over medium heat, and pour a ladle of batter into the skillet. Cook until the edges are dry, then flip the pancake to cook the other side.

2. Blueberry Pancakes: Fold fresh or frozen blueberries into the batter before cooking.

3. Banana Pancakes: Mash a ripe banana into the batter, then fold in a handful of chocolate chips or nuts.

4. Savory Pancakes: Mix in herbs, cheese, or cooked vegetables to make savory pancakes.

5. Gluten-Free Pancakes: Use gluten-free flour to make pancakes suitable for those with gluten sensitivities.

The possibilities are endless, and the fun of experimenting with different ingredients is part of the experience. So, grab a spatula and let your imagination run wild!
Spartans fall to late inning Cincinnati
Cavaliers

By JOHN VIEGEL
State News Sports Writer

"Unbelievable!"

Spartan pitcher Frank DeLonge stood in the dugout and couldn’t believe what had just transpired after Cincinnati, the 1-3 team in the Big Ten, defeated MSU 7-2 in the third base blowout, all was well for the Spartans as the Cincinnati Bearcats mounted over first baseman Mike Schmidt who had just driven in the tying and winning runs with a two-out single to win the game.

Spartan Guru Breeze had a single to third base on the plate, but it was just wide, allowing Dave Lein to score and lead off, across the plate a split second before MSU catcher Oliver made the tag. On the Spartans side of the game, Saluki shortstop Monte Burchill was the first base hit for a base hit, bringing in Mike Schmidt for the winning run to the next base, and the game was over.

However, DeLonge was not out of the game, and he knew it. After the inning, DeLonge walked off the field with a guarantee that MSU had a win. The game was over. And apparently his statement was correct. The Spartans won the game with a four-run out, bringing in the last run. MSU had this run. Our last out and Bob Clancy was pitching strong before the game was over.

Spartan coach Steve Louis with the plate, scored the game. And the Spartans scored the final run, and the game was over. The Spartans scored the last hit of the game with a four-run out, bringing in the last run. MSU had a win. The game was over. And apparently his statement was correct. The Spartans won the game with a four-run out, bringing in the last run. MSU had this run. Our last out and Bob Clancy was pitching strong before the game was over.

Trackmen battle for Big 10 title

BY DON KOPRIVA

State News Sports Writer

Iowa City, Iowa - MSU (Michigan State University) baseball fans were in a state of shock today, after the team lost to Ohio State, 5-4.

The loss marks the first time this season that the Spartans have lost to a conference foe. Last week, the Spartans defeated Indiana, 8-7.

In the game, the Spartans were able to score four runs in the first inning. However, the Buckeyes were able to score five runs in the same inning, which proved to be the difference in the game.

Michigan State fans are hoping for a better performance against Ohio State tomorrow. The game is scheduled to begin at 3 p.m. at the Michigan State Stadium.
Dredging proposed to save Lake Lansing

By TONI FELLULL
State News Staff Writer

Lake Lansing will become a model project for the nation if the Environmental Protection Agency (EPA) approves funds to dredge the lake bottom of harmful sewage sludge. Richard E. Esselink, supervisor of the Lake Lansing project for the Michigan Water Resources Research Institute (MWRI), said his proposal has a very good chance of approval. Esselink has been involved in projects for sewage sludge management for the past 10 years and is one of the most familiar experts in the field. The project requires nearly $1 million, the largest funding sought so far by the EPA. The proposal has been favored by both national and state officials.

The project will be unique because of its research and development process. The project will not involve analyzing sewage to determine the lake's environment and then removing the sludge, as has been done in the past. Instead, the project will involve a prototype system, which is to be constructed in the lake, to determine if the sludge slurry can be removed. The project will be a four-year effort, with the research phase lasting six months. The lake bottom will be cleaned of sludge, and the results will be evaluated. The project will also include a one-way television camera to transmit images of the lake bottom in real time.

The project is expected to take three years. The first year will be spent on the planning and design of the system. The second year will be spent on the construction and testing of the system. The third year will be spent on the operation and evaluation of the system. The fourth year will be spent on the final evaluation and report.

The project is expected to cost $1 million, of which $625,000 will be funds provided by the EPA. The remaining $375,000 will be provided by the Michigan Department of Natural Resources.

The project is expected to provide the following benefits:

- Improved water quality
- Reduced growth of aquatic plants
- Reduced growth of algae
- Reduced growth of aquatic animals
- Reduced incidence of lake eutrophication
- Reduced incidence of lake acidity
- Reduced incidence of lake pH

The project is expected to be completed in three years, and the results will be evaluated. The project is expected to be a model for other projects in the United States and around the world.

'U' gets grant for pond facility

By TONI FELLULL
State News Staff Writer

The University of Michigan will receive a $100,000 grant from the National Science Foundation to support the development of a new facility for the study of aquatic ecosystems. The grant will be used to construct a new facility that will be located near the University of Michigan's Biological Station in Ann Arbor.

The facility will include a large pond that will be used to study the effects of pollution on aquatic ecosystems. The pond will be equipped with a variety of scientific instruments, including a sediment core sampler, a water quality monitor, and a temperature logger.

The facility will be used by both undergraduate and graduate students, as well as by researchers from other institutions. The facility will be open to the public for educational purposes.

The grant will be used to construct the facility, to purchase scientific equipment, and to fund the salaries of research staff.

The facility will be dedicated to the study of aquatic ecosystems and will be available to researchers from around the world. The facility will be a valuable resource for the study of aquatic ecosystems, and it will be a valuable asset to the University of Michigan and the University of Michigan's Biological Station.
You get plenty of room (and trunk space, too) at Collingwood Apartments

**Summer Rates**

$45.00 per man!
Sir or Madam, whichever!

Join the Mob at... CAMPUS HILL Apartments

We brought it all together for you—price, location, comfortable, spacious, and much more! We offer a wide variety of apartment styles, including double, triple, and quad units. All apartments feature modern amenities such as

- **Unlimited Parking**
- **Dishtowel Service**
- **Air Conditioning**
- **And Much More**

Fall leases now being accepted!

S. Viet students on trial for Peacemakers' Peace Treaty

Who's Whose

Sabin's book

(Continued from page one)

explained how the People's Power Team came to meet with leaders of the Women's Peace Movement and the National Student Association in late December out of meetings with Black and other civil rights groups in the Washington area.

Who's Whose

Col. William H. Sabin, a former Army intelligence officer and State Department diplomat, has been appointed to the position of Deputy Under Secretary of Civilian Affairs in the Department of State.

(Continued from page one)

"It's a strategy that will make it difficult for the U.S. to continue its war of aggression," he said. "Sabin's book is a source of information that should be used by all people who want to stop the war."
Audio library adds pop to collection

By BARBARA FARY
State News Bureau

Pop music is alive and sounding great at the audio library with the addition of over 1,000 records that were deleted from the catalog. According to Sue Perry, the audio librarian, the records were no longer in demand, and it was decided to remove them from the catalog. However, the university administration gave permission for the library to keep the records, and Perry was given the task of sorting through them.

"We went through the collection and decided which records we would keep based on factors such as the condition of the records, their popularity, and their cultural significance," Perry said. "We also consulted with other libraries to see which records they had and which they were interested in keeping." The library ended up keeping just over 1,000 records, which Perry said is a significant addition to the library's collection.

The records were shelved alphabetically by artist and were cataloged under "Demos," which Perry said allows for easy access. "Our patrons can now easily find their favorite artists or groups and listen to their music," Perry said. "And since we are able to keep these records, we have been able to expand our collection and provide more diverse music options for our patrons."
