Dickerson resigns among personnel shifts

**By GEORGE BILILIANO**
Editor in Chief, 70-71

It is the house committee that has to make the final decision. Members of the bipartisan House Appropriations panel will now have to decide whether to approve the administration's request to declassify national security information related to personnel shifts in the government.

Senate votes to call for U.S. troop pullout

WASHINGTON (AP) - The Senate voted Tuesday to call for withdrawal of all U.S. forces from Indochina within nine months, provided North Vietnam frees American prisoners.

It adopted 57 to 42, the proposed measure, which leaders said would result in the immediate withdrawal of U.S. forces from the Vietnam war.

The Democratic leader voted for it after a series of roll calls on whether to condition a fixed withdrawal date with North Vietnamese recognition of the prisoners within 30 days.

The Democratic leader plotted a vote after a series of roll calls on whether to condition a fixed withdrawal date with North Vietnamese recognition of the prisoners within 30 days.

Schools told to integrate by fall term if possible

The letters represent the Board of Education’s plan for the upcoming school year. The plan calls for the integration of students in grades 7 and 8 at the same time. The plan has been adopted by the Board of Education and is expected to be implemented in September.

The letters were sent to all school districts in the state. The Board of Education said it would be sending a letter to each district that has not yet made a decision on integrating students.

The Board of Education also said it would be sending a letter to each district that has not yet made a decision on integrating students.

Gov't vs. newspapers: taste of totalitarianism

The recent New York Times and Washington Post's decision to stop publishing classified government documents under threat of fines, has sparked an issue of vital concern to freedom of the press and the public right to know. The government has the right, as one editor put it, to "farm out" their secrets to newspapers on condition they have an interest in "national security!"
The newspapers appear to have swallowed the bait. The first move, according to reports, is to stop the Times and the Post from publishing the secret Pentagon study of the Viet Nam war. The public will soon be denied the opportunity to weigh it before the government's upcoming presentation of the findings to Congress, along with a report of all other documents the Times and other papers have managed to obtain that are of concern to the Pentagon.

The government contends that the public's right to receive news information will cause "imparable damage" to national security and that the papers must be prevented from printing such material. Such a move, however, is fraught with danger, and the judiciary's historic function to check it is threatened by the courts, which will be powerless to control the content of the papers.

In the First Amendment, the Constitution states that the press cannot be compelled to testify in court. The press's right to protect its sources is an absolute one in all circumstances. The Constitution makes no such qualifications. A newspaper is legally responsible for what it prints, under no circumstances. A newspaper is legally responsible for what it prints. As a public service, the judiciary is, by the nature and function of its office, the last resort in the world to which the public can appeal against its grievances.

The new, slick Army

Several months ago, the press took an initial step towards reviewing the beginning of an unprecedented advertising campaign: The U.S. Army had gone public. Instead of a stunt or a ploy, President Nixon has declared "I want to talk to you today, as a young parent, about what the new Army is like today, the life and values that are being instilled in your children."

This report - and the new report, the news - are to be understood as a slick, slick gag designed to have the public believe that the military is having a good time. As a news report, it has enjoyed respectable circulation and has been widely believed by the public. As a news report, it has enjoyed respectable circulation and has been widely believed by the public.

The new recruitment drive stresses the positive image of the Army, showing a variety of activities and opportunities - including military service. The appeals for military service are made in a way that the interests of the Army are clearly promoted, not the interests of the public.

The report presents itself as a "new" Army, with the Army's own "new" Army. But it is not a new Army. The new Army has changed, not in any significant way, but in the way it is presented to the public. The new Army is no different from the old Army. The real change is not in the Army, but in the way it is presented to the public.

The news report is a slick, slick gag designed to make the public believe that the military is having a good time. As a news report, it has enjoyed respectable circulation and has been widely believed by the public.

HPR in summer to count in grade point averages

As a result of the recent Academic Council action which considers the addition of the various health and physical recreation courses to the curriculum, HPR courses which are taken during summer terms will be counted in computing the final grade point average. Therefore, if a student has been considering taking HPR courses during his vacation period this summer, he should do so. Students have the option of choosing the grades of the HPR courses that they are interested in taking during summer terms. However, if the HPR grades are not transferred to the student's permanent record, they will not be included as part of the HPR credits.

Students who do not wish to have the credits of the courses they take during summer terms transferred to their permanent records must inform their counselor of this requirement before enrolling in the courses.

Auditorium alterations OK

PITTSBURGH - The Allegheny County Health Dept. has ordered the 9,000-seat, $12 million, $20 million bond project by the city of Pittsburgh, to be completed by 1976.

The auditorium will be built on the site of the old city auditorium, and is expected to open in 1976 at a cost of $40 million.

The auditorium will be used for concerts, conferences, and other events. It will also house a 1,000-seat theater for musicals, and a 500-seat theater for plays.

The auditorium will have state-of-the-art acoustics, lighting, and sound systems. It will also feature a large, well-equipped stage for performances.

The project is expected to create over 4,000 jobs during construction, and will provide a much-needed cultural and entertainment center for the city of Pittsburgh.

The auditorium is part of a larger development project that includes a new convention center, a hotel, and a parking garage.

The project has faced some opposition from nearby residents, who are concerned about increased traffic and noise from the new auditorium.

But city officials say the project is vital to the city's economic development and cultural growth.

The auditorium is expected to be completed by 1976, and will be the centerpiece of the new development project.

Supporters say the auditorium will attract tourists and businesses to the city, and will help to revitalize the downtown area.

Opponents say the project is too expensive, and that the money could be better spent on other priorities.

The project is currently funded by a combination of city and state bonds, as well as private contributions.

The city expects the auditorium to generate significant revenue from ticket sales and rentals, and will be able to pay off the bond debt in a few years.

The auditorium is expected to be a major asset for the city, and will provide a much-needed cultural amenity for residents and visitors alike.
Personnel changes approved by board

The board of trustees Friday approved 19 appointments, 30 transfers and changes in assignments, 25 resignations and terminations and 4 retirements.

Included in the board action were approval of appointment of a new chemistry department chairman, Dr. E. Kay Blum, of East Lansing.

Appointments were approved of Thomas H. Boley Jr., visiting professor, engineering and mathematical and transportation administration, April 1-June 30; David R. Lens, professor and dean, School of Family and Human Services, June 1-Aug. 31; and John Franklin Bechtel, assistant professor, secondary education and administration, Sept. 1-1974.

Appointments were approved of Thomas H. Boley Jr., visiting professor, engineering and mathematical and transportation administration, April 1-June 30; David R. Lens, professor and dean, School of Family and Human Services, June 1-Aug. 31; and John Franklin Bechtel, assistant professor, secondary education and administration, Sept. 1-1974.

The board approved changes in assignments for Frank W. Hartley, assistant professor, English and modern languages, Sept. 1; and John Franklin Bechtel, assistant professor, secondary education and administration, Sept. 1; and John Franklin Bechtel, assistant professor, secondary education and administration, Sept. 1.

'Hawk' has troubles in quitting baseball

BOSTON (UP) — The retirement plan of baseball's Ken Hamrelson was at least temporarily derailed Monday when his study of quitting the gridiron for golf was interrupted by a nagging injury.

Hamrelson, 30, who hopes to gain a spot on the professional golf tour, had announced his intent to bid farewell to the Cleveland Indians in favor of the Boston Red Sox. However, he was forced to go to the hospital after losing the Boston first foul and then falling from the mound.

Hamrelson not only did not get the foul ball but was treating from the starting lineup through his irradiated Cleveland Cuba. Hamrelson informed his manager he would be used as a pinch hitter in the game.

Hamrelson, who first gained attention when he starred at the Kansas City Athletics during a dispute with his former club owner Charles Payton in 1966 which brought him to the Boston Red Sox later, has been in a heat wave where the lineup was a red Sox fixture by July 29. He was scheduled to make his first appearance in the league this week.

"Hamrelson, a noted golfer who has won the baseball player's tournament in the past for first place, and "I'm not a good pitcher at golf, I'm one of the most fortunate people who have played baseball, I could hit but I didn't have that much talent," Hamrelson, who batted only 129 in 32 games with the Indians, played 16 times of golf in 1966 and was also 129 in 32 games with the Indians.

"I've been interested in continuing my golf career," he said. "I think I can make a good contribution to the league."

The deadline for teams entering the golf tour in a state of Florida will be July 4.

The deadline for the college golf tour in a state of Florida will be July 5.

Ralph McCarville, 49.6.

Ellis, Boyd selected by pro teams

Two MSU undergraduates were drafted by professional teams in amateur drafts during the past week.

Bob Ellis, a senior who had last year's top eighth-inning pitching at MSU, chose to make his final year of baseball eligibility in 1969.

The baseball team, which drafted Ellis from the University of Chicago, was also the 17th college player drafted in a day's span of the summer open draft.

Robert Ellis was on Detroit's reserve list and will start at 1020 high.

Five runs in ninth

give Tigers a win

New York (UPI) — Dick McAuliffe drove in two runs in the final inning of the game, including one on a two-run double in the seventh inning, Tuesday to beat the El Paso Cowboys 7-4.

The Cowboys scored seven runs in six innings, including one on a two-run double, and ran out of outs in the final two runs of the ninth. The Cowboys also scored twice in the ninth on a two-run double, making it a 7-4 victory over the New York Yankees in the final game of a three-game series.

The Cowboys were 1969 champions of the American Association. The Tigers scored twice in the final two runs of the ninth, making it a 7-4 victory over the El Paso Cowboys in the final game of a three-game series.

The Tigers scored twice in the final two runs of the ninth, making it a 7-4 victory over the El Paso Cowboys in the final game of a three-game series.

MSU to study distribution of fish near power facility

MSU has received a grant of $129,990 from Commonwealth Power Company for the final phase of an "eco-study" relating to power generating plants and fish distribution.

The study, headed by Peter Tuck of MSU's Dept. of Fisheries and Wildlife, will be an 18-month project. Tuck and his assistants are collecting fish and fish food organisms around the new Commonwealth facility to be built on the Lake Michigan shore.

"The project is set up in three phases to cover a period of almost six and one-half years," said Tuck. "The first phase will involve a study of fish and fish food organisms existing in the water. The second phase will be to study the facility beginning operations. The study area will cover a section of the lake five miles up and down the shore from the plant's intake and outlet pipe."

The second and third phases of the program will be carried on simultaneously and will involve the study of the fish's growth on existing fish in the area. The facility grant will be awarded at specified intervals during the first and one-half year program.

"Operations of the Commonwealth plant may cost in the neighborhood of 1,100 cubic feet of water per second. The facility has been designed to discharge back 840-acre reservoir being built a restrictive 400 cubic feet per second above Lake Michigan," explained Tuck. "Water will be processed from the lake into the reservoir during periods of time at the facility begins operation. The study area will cover a section of the lake five miles up and down the shore from the plant's intake and outlet pipe."

The program "will be a tremendous expansion of existing power," according to Tuck, who will be impressed from the lake to the reservoir through a huge 36 feet pipe.

"It is possible that fish may be pumped up through the pipes for generating purposes," he says.

Tuck's further studies are likely to be spent on studies of water quality, wildlife, etc., at the plant and area.

IN LETTER TO ALBERT

Nixon favors welfare reform

WASHINGTON (AP) — President Nixon urged the House Tuesday to approve welfare reform, saying it is "the most important social legislation in 30 years."

In a letter to Speaker Carl Albert, Nixon, who would be the House's top-ranking Democrat in 1971, said it was "a measure to close the loopholes in the present state-federal welfare system in favor of a new, more broadly federal plan."

He said the program would "eliminate the double standards of the states and bring about uniformity in welfare eligibility, so that the same person family could receive the same maximum payment in any state."

The bill would provide also for a steep increase in payroll taxes, but set at a maximum rate of 6.5 percent. It also would include a cost-of-living increase clause above inflation. Next year's increase would be 3.5 percent. By 1979, the maximum rate would be 7 percent.

The House, which Nixon said would vote Thursday, is expected to pass the bill by a wide margin. Nixon said he will sign it if approved.

Nixon, emphasizing that the plan is a compassion effort, said that if it is adopted, "the program will provide more humane and more effective services and ensure the breakup of the dependency cycle."
Man arrested on charges of eluding patrol officers

By Jim Shlobin

State News Staff Writer

A high-speed chase through country roads by MSPS police, an overturned pickup truck, and the arrest of a deer. The police and a report of a stolen motorcycle with work in the area of a 21-year-old Michigan State University student.

Bruce Wolf remained in jail on Wednesday after he was booked into the Ingham County Jail on charges of eluding MSPS patrol officers.

The chase started about 10:00 p.m. June 12 when police officers observed a 22-year-old student, who was riding a motorcycle, pull over for speeding and rear-ended another motorcycle, one of which had no tail lights. One of the vehicles stopped, police said, but the other one without all lights, which belonged to Wolf, continued south. Officers explained they chased Wolf south at speeds up to 155 miles an hour to pull off the interaction of Wolf's vehicle at the intersection of the first road. The chase ended?

Meanwhile, police said, Wolf was stopped by an MSPS officer a few miles west of the intersection.

The world's first seedless pickle packers probably get more press coverage than President Nixon during the last week of May.

That was International Pickle Week, and that was the time that MSU and Pickle Factories, Inc., were "huffing and puffing" at the world's first seedless pickle.

Section counselors aren't new, but seedless pickles are. The mass media latched on a little and reported a lot about the new product.

Larry B. Baker, MSU vegetable breeder who developed the parthenocarpic (seedless) pickles, and the story were carried by all three television networks including a film report on ABC-TV, "The New York Times," and "Newsweek." Washington, D.C., has sent a photographer to the plant.

Both seedless pickles and related products probably will take bus ride to the national level.

Press multinational reporters from some 30 countries are involved introducing fake pickle is fragile counselor.

The result is the world's first seedless pickle.

Baker, a west, Baker believed that seedless pickles, or what are being called "giant green' pickles, will catch on because they are pretty and have the familiar flavor.

"For the salted seedless, sold in a plastic bag, which is very popular, and the more 'normal' than the plastic bag, the salted variety is very popular and have the familiar flavor.

"But both seedless pickles and related products probably will take bus ride to the national level."

At the request of the Pentagon, the Congress has approved plans for the installation of a more effective system for screening members of the armed forces. The plans, which were submitted to Congress in May, have been endorsed by the Joint Chiefs of Staff and the Department of Defense. The plans call for the establishment of a centralized system for the selection of personnel who will be assigned to military service. The system, which will be called the "Centralized Personnel System," will be operated by the Department of Defense and will replace the current system of individual service selection boards. The plans have been met with some opposition from the military services, but they have been supported by the Department of Defense and the Joint Chiefs of Staff. The plans are expected to be implemented by the end of the year.
