Russians accuse Red China of trampling upon minorities

Gromyko's visit to India called mission for peace

Delhi (AP) — Soviet Foreign Minister Andrei A. Gromyko, on an apparent exploratory mission, arrived here Tuesday night for what he indicated may be a visit to seek a new atmosphere in India and to discuss the future of Indo-Soviet relations.

Gromyko was greeted by a show of Russian military power, with several naval vessels and a large number of aircraft seen in the air around him.

The Soviet Union has not announced any change in its policy toward India, but the presence of Gromyko has been seen as a signal of improved relations between the two countries.

Gromyko's visit comes at a time when relations between India and the United States have been strained over nuclear tests conducted by Pakistan.

Some observers have suggested that Gromyko's visit could lead to increased cooperation between India and the Soviet Union on issues such as nuclear weapons and defense.

Red Cedar pollution level declines

Red Cedar pollution levels have declined significantly over the past year, according to new data from the Environmental Protection Agency.

The EPA report, released Tuesday, shows a 20% decrease in pollution levels compared to last year.

The decline is attributed to increased use of alternative fuels and improved emission controls on existing power plants.

Influence of contractors over Marines revealed

The influence of contractors has been revealed in a new report by the House Armed Services Committee.

The report, released Monday, shows that contractors have played a significant role in shaping policy and decision-making within the Marine Corps.

The report highlights examples of contractors exercising significant influence over key military decisions, including the procurement of weapons systems and the development of training programs.

PLASHDOWN ON TARGET

Astronauts home safe, healthy

The astronauts who survived the Apollo 15 mission have returned to Earth safely, according to NASA officials.

The three-man crew spent over two months in space, conducting experiments and performing maintenance on the spacecraft.

Splashdown

The Apollo 15 mission has splashed down safely in the Pacific Ocean, completing a successful mission.

The three-man crew, led by Commander Thomas Stafford, spent over two months in space, conducting experiments and performing maintenance on the spacecraft.

The mission was considered a success, with the crew returning to Earth safely and successfully completing all planned experiments.

The splashdown site was chosen based on weather conditions and the need to minimize risk to the crew.

The mission was considered a success, with the crew returning to Earth safely and successfully completing all planned experiments.

The splashdown site was chosen based on weather conditions and the need to minimize risk to the crew.
**Heat hit target practice on commercial airplanes**

President Nixon said Sunday that the U.S. would increase its heat hit target practice on commercial airplanes, a move he said was necessary to protect American lives and property.

**BOAC to reduce air fare to U.S.**

The British Overseas Airways Corporation (BOAC) announced Sunday that it would reduce its air fare to the U.S. by 25 percent, effective immediately. The reduced fare will be available for flights departing from New York to London and vice versa.

**Czechs admit attack on Goldwater**

In an address to the American people, Republican presidential candidate Barry Goldwater denied any involvement in the attack on Czechoslovakia. Goldwater said he had no knowledge of the incident and expressed regret for any misunderstanding that may have occurred.

**Brits tell胱on to commercial airplanes**

British officials have said they will increase heat target practice on commercial airplanes, a move they claim is necessary to protect British interests.

**Mural system for U.S. sought**

The U.S. government is considering a proposal to develop a mural system for use in commercial airplanes. The system would allow passengers to select artwork from a variety of options, providing a more personalized flying experience.

**Poll favors Dems**

The Gallup Poll, based on a random sample of adults, found that 55% of respondents favored the Democratic Party, compared to 45% who favored the Republican Party. The poll was conducted from July 1 to July 7.

**Consumer head hit**

Consumer advocate Ralph Nader called for a boycott of Japanese products in response to the Japanese government's decision to increase taxes on imported goods.

**Sadt predicts war**

President Sadat of Egypt has predicted that a war is imminent in the Middle East, according to a recent interview.

**Killing sparks riot**

British troops skirmished with rioters and snipers in Belfast, Northern Ireland, on Sunday, leaving six people dead and over 50 injured. The violence was sparked by a dispute over the closure of a local factory.

**Commerce head hit**

Consumer advocate Ralph Nader called for a boycott of Japanese products in response to the Japanese government's decision to increase taxes on imported goods.

**Lack breaks up**

A U.S. Coast Guard official said Sunday that an oil leak was discovered in Lake Michigan, south of Chicago, near the site of a previous spill. The leak was estimated to be around 100,000 gallons of oil.

**Mural system for U.S. sought**

The U.S. government is considering a proposal to develop a mural system for use in commercial airplanes. The system would allow passengers to select artwork from a variety of options, providing a more personalized flying experience.
Petroleum, Sudan (AP) — The government of Sudan's president of the 50th national convention in Detroit Sunday, a move that paves the way for the convention to be held in Detroit, U.S. Senate Majority Leader, Sen. Robert Dole, said it was time to get the powers back on the hands of the people so that they could be the boss of their country.

The Sudanese president's participation in the convention is significant, as it is one of the largest and most important political gatherings in the world. The convention is expected to draw thousands of delegates from across the globe, including Sudanese leaders and officials.

However, the convention is also facing challenges, including security concerns and the potential for violence. The government has implemented strict security measures to ensure the safety of the delegates, but there is still a risk of unrest.

Despite these challenges, the convention is an important milestone in the Sudanese political landscape, as it provides a platform for the expression of ideas and the formulation of policies. It is also an opportunity for the government to showcase its achievements and its commitment to democratic values.

In conclusion, the Sudanese president's participation in the 50th national convention is a significant step towards the realization of a democratic, peaceful, and prosperous Sudan.

The convention is set to take place from Monday, August 9, to Friday, August 13, 2021, at the Cobo Convention Center in Detroit, Michigan. It is expected to attract thousands of delegates and visitors from around the world.

The convention will feature keynote speeches, panel discussions, and workshops on a wide range of topics, including politics, economics, and social issues. The convention is also expected to generate significant media coverage, highlighting Sudan's role in the global community.

In summary, the Sudanese president's participation in the 50th national convention is a significant milestone in the country's political and economic development, and it is an opportunity for the government to showcase its achievements and its commitment to democratic values.
The eagle slaughter: new solutions needed

A veitable slaughter of golden eagles has taken place in the Western states. In the past month period, one group of ranchers alone has presented the data for the annihilation of 770 eagles.

Thieu's fix

America's pet dictator in South Vietnam, Nguyen Van Thieu, has all but assured his re-election to a second term as president. Vice President Ky has been unable to conform to Vietnam's Thieu - practically the same character - leaving former Gen. Duong Van Minh to compete.

In the first place, the presidential nominating law was nothing short of a farce. Under its provisions all "serious" candidates for the chief executive office must have the necessary signatures of 40 national assemblies or 100 provincial councils to qualify. Since many of the assemblies are in the hands of Thieu and most provincial officials are Thieu's handpicks, nomination voting was virtually automatic. If any challenges were made at a subsequent election, they would be met by mass rallies of Thieu's supporters.

In the second place, the problem of endangered species lies in the mentality of man himself. If the western rancher firmly believes eagles endanger his flocks and should be eradicated, then the handwriting is on the wall for our golden eagle and all endangered species are doomed.

Goucher enforcement may help, but in the long run what we have done in America's endangered species is a desecration of forest ecosystems. Man must realize that there is no longer on the planet any other species. Man must recognize the delicate balance of nature. For hundreds of years man has multiplied in Western states where eagles and coyotes have been destroyed. Man has then been forced to replace the missing" predatory" species with others which are genetically and nutritionally derived.

However, man has learned that others species must not be eradicated, since they may be needed should the population itself be destroyed.

Our readers' mind

Space mostly a drag

On the August 8 there appeared in the Daily News an article entitled the "space" of the Apollo 18 project. While it was a good article, the author was quite small and it will, in the long run, become a derogation of the subject. However, I will not go into the subject in detail. I have shown how the flight was very busy, very crowded, and not what is usually to be expected. It is much more appropriate. The nasa board has the right to be public, the taxpayers and the public must demand their rights.

Astronauts, scientists, engineers and others have worked long and hard to create the space program. NASA is the agency responsible for this space program, and the space program is the responsibility of NASA. If NASA has not paid the price of a dollar for a dollar's worth, then it should be done.

The question asked by the editorial and many critics of NASA is "why it is so". I am not an expert in this area, but I have shown how the flight was very busy, very crowded, and not what is usually to be expected. It is much more appropriate. The nasa board has the right to be public, the taxpayers and the public must demand their rights.

The government simply should not be in the space business anymore than it should be in the shoe or the tire business. There is no need to create a new industry for it. It is the one man far beyond its function as the space program. The 1999 budget shows this. If NASA has not paid the price of a dollar for a dollar's worth, then it should be done.

SN to feature new cartoonist

Starting today the State News will have a regular cartoonist. Pat Oliphant, the regular syndicated cartoonist of the Denver Post, was the 1969 Pulitzer Prize for Editorial Cartoons winner. He has been regularly syndicated in Sigma Delta Chi (professional journalistic association) among the best in the world. In 1969 he received the Reuben Award from the National Cartoonists Society.

Oliphant looks at the world of politics, foreign affairs, social attitudes and events in the tradition of a Darwinian master cartoonist, but now is work at the American university. Oliphant will join these two Pulitzer Prizes-winning Los Angeles Times cartoonists Paul Conrad and on the editorial page of the State News. Conrad's by three and being dropped to make room for Oliphant.

The star of "Blue Water, White Death," a great white shark, was the most dangerous predator in the world. Everyone on the scene and in front of it waits for his arrival.

A shipload of drivers, photographers and the best shark specialists in the world have joined forces to try to see the leviathan fish. The shark specialists are experts in their art, and they are not to be trifled with. The shark, many believe, is the most dangerous creature on earth, except perhaps the human beings.

"I don't care what color you are, boy, as long as you're red, white and blue!"

The film "Blue Water, White Death," which stars the great white shark, is being released in theaters across the country. The shark, which is known to be one of the most dangerous creatures on earth, is captured and brought to the United States for the film. The film, which has won several awards, is being shown in theaters throughout the country.

SECOND VICTORY

Flint miscreas help
All Stars win, 54-6

By RICK GOSSELIN

The Lansing All Stars just keep rolling.

Taking advantage of five Flint(Wilson) turnovers, the All Stars scored 17 straight points in the first four minutes of the game to take the lead.

The stars didn't have much luck getting down on the reads and penalty flag was out of the air for 105 yards.

The All Stars put the first score on Coastline took a pass from Bengt Karlsson and found the running room and scored on 17 yard run. The All Stars led, 14-0, after one quarter.

The All Stars outscored the first score of the game, 7-0, in the second quarter.

The All Stars won, 54-6, and will be at home again Sunday against another team.

Mars dominates night sky
during closest approach

Mars will be closest to Earth Wednesday that it will be close enough to see with the naked eye.

This is the closest approach of Mars since 2003.

Mars will be closest to Earth again in 2035.

The best time to see Mars is between 1800 and 2000 EST.

The planet will be visible in the southern sky.

Astronauts home safe, healthy

When Apollo 15 splashed down, the three-month mission to the Moon was a success. The crew, Commander David Scott, lunar module Pilot James Irwin, and command module Pilot Alfred Worden were all reported safe.

The Apollo program was the most successful and safe of all the space missions. The astronauts and engineers who worked on the program were all very happy with the results.

During the mission, the astronauts conducted scientific experiments and collected samples of the Moon's surface. They also took pictures and mapped the area.

The astronauts were also able to collect rock samples and return them to Earth for further study. The samples will be studied by scientists to learn more about the Moon's history and composition.

The mission was a great success and it opened up a new era of space exploration. The astronauts and engineers who worked on the program were all very happy with the results.

Contractor's influence revealed

A new report has revealed that the contractor for the project was able to influence the decision-making process.

The contractor, a large company, was able to use their influence to get the project approved. The company was able to use their connections and political influence to get the project approved.

Recycle your glass at these Glass Container Recycling Centers located at Meijer Thrifty Acres Stores.

Follow these simple steps for any glass container.

A.-HOME PREPARATION
1. Make sure containers are relatively clean.
2. Remove all caps and metal rings from glass containers. Paper labels do not have to be removed.
3. Sort your containers into three categories: Green glass, Clear glass and Brown glass.

B.-DEPOSITING
1. Take your containers to the recycling center closest to you at anytime day or night.
2. The bins are marked for you to deposit your glass containers in the appropriate slot.
3. Bags or cartons used to carry the containers should be placed in the refuse container.

Your cooperation is necessary to make this program work. If we all do our part, we can help keep our earth livable and beautiful.

This Program is sponsored by:
