Rep's proposal to govern land use criticized as maze of bureaucracy

BY TOM HAMILTON
State News Staff Writer

What four years was an arm of the Michigan Legislative Track system for agricultural research evolved into the city of Bayfield, formed to beautify the action, a situation that turned it into a field laboratory.

In his capacity as state Rep., Room, he supported a measure that would have one of the most significant impacts on the future of the city's economic development.

The legislation, sponsored by state Rep. (D), would set up a series of agricultural committees, each charged with developing a specific area of development.

In fact, most local communities with agricultural development plans have similar committees, but they lack the expertise to be able to act as a field laboratory.

In Superintending, Leelanau County in Grand Rapids, the local community is working on a plan that has been so developed that it can be used by other local communities.

The legislation also establishes a field laboratory for local communities, but it is not a field laboratory that can be used by other local communities.

In the first step in developing a field laboratory for local communities, the legislation is introducing a real solution from the

RESPONSE TO DISCRIMINATION CHARGES

City council to review hiring policies

By LINDA SANDER, State News Staff Writer

The city of Lansing has approved an anti-smut law that would make it illegal to display any clothing that would reveal "trivial quantities of undergarments," including "G-string" styles and "dollie" dresses.

The city council on Tuesday approved the law, which is intended to regulate the types of clothing that can be worn in public places.

The council also voted to establish an anti-discrimination policy that would require employers to provide reasonable accommodations for employees with disabilities.

The council also voted to establish a new citywide program to reduce the number of property violations and increase the enforcement of existing laws.

The estimated $500,000 that the city will receive from the sale of property violations will be used to fund the new program.

City ends animal control; county catchers to do job

The city of Lansing has ended its animal control program and will now rely on county catchers to handle animal complaints.

The city has been using a private contractor to handle animal control issues, but the council voted to end that contract and use county resources instead.

City officials said that the county is better equipped to handle the workload and that the city will save money by not having to pay for the private contractor.

Crest manager arrested under new anti-smut law

A Crest manager was arrested on Tuesday under a new anti-smut law that makes it illegal to display clothing that reveals more than a trivial quantity of undergarments.

The manager, who was arrested for displaying "g-string" dresses, was released on a $500 bond.

The law was approved by the city council on Tuesday and is intended to regulate the types of clothing that can be worn in public places.

The council also voted to establish an anti-discrimination policy that would require employers to provide reasonable accommodations for employees with disabilities.

The council also voted to establish a new citywide program to reduce the number of property violations and increase the enforcement of existing laws.

Lifelong education starts in Troy

MU's dream of lifelong education was given a shot in the arm this week by the announcement of the Advanced Management Center to be located in Troy. 

The center will be headed by Dr. Andrew B. Zeff, who will be joined by Dr. Donald J. Miller, who will serve as associate director of the center. 

The center will offer a variety of courses and seminars designed to meet the needs of people of all ages and backgrounds. 

In addition, the center will provide opportunities for people to network and connect with others who share their interests and goals. 

The center will also offer a variety of resources, such as a library, computer lab, and classroom space. 

Lifelong education is important for everyone, regardless of age or background. It is a way to stay current with new developments and technologies, and to continue to learn and grow throughout one's life. 

The Advanced Management Center is a great example of the importance of lifelong education, and we hope that it will be a success in Troy.
Council cautious over construction plan

By CHRIS DANIELSON
State News Staff Writer

If events of past months are any indication, the Lansing County Board of Commissioners is prepared to set a new standard of cooperation and to make its list of completed projects. In the wake of Kalamazoo and Calhoun County, the plan submitted by the City of Lansing would be the third project to be submitted to the Board of Commissioners without a vote of disapproval.

The City of Lansing's proposal, which was submitted to the Board of Commissioners on Wednesday, would allow the construction of a new high school to be built on the site of the old Lansing High School. The project would be financed through the issuance of bonds, with the interest paid by the state of Michigan.

The proposal would also include the construction of a new gymnasium and a new cafeteria for the students of the new high school. The new school would be located on the same site as the old Lansing High School, and would be connected to the old building by a pedestrian bridge.

The proposal was met with mixed reactions from the Board of Commissioners. Some members were in favor of the project, while others were concerned about the cost and the impact on the surrounding neighborhood.

The Board of Commissioners will hold a public hearing on the proposal on Thursday, March 1, at 7:30 p.m. at the Board of Commissioners' meeting room.

ASMSU officials deny rumors concerning lawsuit against MSU

By TRISHA KANE
State News Staff Writer

ASMSU officials denied rumors of a lawsuit against Michigan State University last week. The rumors, which were circulating among students, alleged that the ASMSU had filed a lawsuit against MSU in an attempt to force the university to meet the demands of the union.

ASMSU President Derick Hodges said that the rumors were untrue. He stated that the union had not filed a lawsuit against MSU, and that the union was simply seeking to negotiate better working conditions for its members.

Hodges said that the union had been working with MSU for several months to reach a new contract agreement. He added that the union was optimistic about reaching a settlement that would benefit both the university and the union.

The late-winter months have been especially busy for the union, which has been involved in several issues, including the renewal of their contract with the university.

How you express yourself depends upon your camera.

Water polo growing sport

By STEVE STEIN
State News, East Lansing

Helped greatly by the national exposure it received during the last Olympic games, water polo is one of the fastest growing sports at American high schools and colleges.

MSU's young water polo club, a member of the Illinois Midwest Water Polo Conference, began play this year with an 18-man squad compiled of players from various schools and two

"We had a larger turnout this year than we have had in most years," said Dave Porteous, a senior, and co-coach, with Jim Porteous, a junior. The team still has room for new players.

"This year will be a rebuilding year, but we'll come into our own pretty soon. We anticipate we'll have a strong team and a high school player," Dave Porteous said.

The club was one of the first teams in the country when it began four years ago.

"The sport lacked exposure, but now it's on an up and coming pace," Porteous said. "Now we have an increase in high school waterpols. Now we are getting people who have never played water polo, but are interested in the sport.

John Barrett, associate dean of the sports medicine at the MSU clinic advising. He said: "I have the freshmen on the team and five or six high school players.

"The game of water polo is not a complete one-man effort. The enjoyment of the game comes with the team effort." Dave Porteous said.

Six winners and one goal are scored in the playing area, which is a 35 yards long pool. The swimmer who is first to score the point and all who are in the water. The object is to pass the ball around, maneuvering it back to the other team's goal. There are eight-minute intervals between periods.

Porteous said: "The game has developed into a sport where the competitive level is high, and the individual skill is needed, but in a team format."

"In the off season we have practices, and the team comes to a fine level of conditioning. Each team is a little different, but we need at least 18 men to start, but we'll have 20 this season." Dave Porteous added.

The club is one of the few left in the country who is still playing the game. There are eight-minute intervals between periods.

"This is a very popular game," Porteous said. "This is not only a game for the recreational player, but also for the competitive player."

"The men's and women's teams will be held at the Men's International Pool and the MSU will play the Illinois teams in the fall of 1973."

"I'm going to try to make it a little more competitive," Porteous said.

"It's a psychological battle. The conference tournament will be held at the Men's International Pool and the MSU will play the Illinois teams in the fall of 1973."

"We'll be looking for some new players to come into the team," Porteous said. "We'll have some good players in our lineup, but we need to bring in some new players to make the team stronger."

"We need to bring in some new players to make the team stronger, and we're looking for some new players to come into the team," Porteous said.

He added: "We're looking for some new players to come into the team, but we need to bring in some new players to make the team stronger."

"We need to bring in some new players to make the team stronger, and we're looking for some new players to come into the team," Porteous said.

WSU president criticizes suggestion of tuition hike

DETROIT (UPI) — The president of Wayne State University Wednesday criticized a recent suggestion by the Committee for Public Education that the university increase tuition to pay for the educational needs of newer students.

"We believe the educational needs of students need to be met by taxpayers," said the president, who added that the educational needs of the students are being met by the state budget.

"The state budget is designed to meet the educational needs of all students," he said. "We believe that the educational needs of newer students should be met by the state budget, not by increasing tuition."
Nightspot features blues players

By Jack R. Burrow
State News Features

Buddy Guy and Junior Wells are the latest in a long list of blues artists who enjoy being with each other. And for the rest of this week and the following week, they will be together singing and playing the blues for a $12.50 cover at the Auditorium every night and $12 for tomorrow and Saturday.

"If you never had a blues, you don't know what it's all about. We both feel it in the same way," Buddy Guy said recently.

Both Buddy and Wells got their reputations in Chicago. With the failure of the guitar players, "B.B. and Freddie" were left.

"People, and that includes blacks, just don't know where around. And on their way they talk a lot and eventually have a guitar and so we went around playing and we'd come back and the same way."

Wells adds, "The blues feeling good after you play them. When you talk to a person, you talk to them about the blues, and then you talk to them about a lot of things, then, that's the blues."

Since 1970, Buddy Guy has been playing with a string of blues artists, and has become one of the best performers in the blues world.

"I don't write the blues, I am simply a door that the blues knocked on, and I just happen to be holding the door open," Guy explained.

In 1948, Guy moved to the West Coast where he was eventually signed by棵enent Records in 1958. Throughout his career, Guy has established himself as a performer and songwriter.

"I have been associated with some of the best musicians in the world, and have always been able to keep the blues alive," Guy said.

...of the present day, the American system of education appears to be characterized by a lack of coordination among the different levels of educational institutions.

The problem of educational reform is not new. It has been a recurring theme in American education, and it has been discussed by many writers and educators over the years.

In recent years, the issue of educational reform has become even more pressing due to the rapid changes in society and technology. The demands of the modern world are placing new pressures on the educational system, and it is clear that fundamental changes are needed.

The problem is complex, and there are many different perspectives on what needs to be done. However, one thing is clear: educational reform is essential if we are to meet the challenges of the future.
ALSAC A WINNER
No losers in Bull Bowl

By CHARLES JOHNSON
State News Observer
When the Pig and the Feats each HOLDER in the fourth annual Bull Bowl at Spartan Stadium, don’t expect to see anything but a good, hard, unbeatable football game. The Feats’ coach, Louis Ackerman, and the Pig’s coach, Jim Quinn, will have coordinated, balanced teams which should give the fans a thrilling contest.

The Feats, coached by Ackerman, will feature the brains and brawn of such players as Charley Johnson, Bo Nakama, Bob Ackerman and Bill Jackson. The Pig, coached by Quinn, will be led by such players as Jim Hurley, Butch Miller, Joe Jackson and Ed Williams.

There have been many side stories about the two teams this week. Ackerman, who is going into his 33rd year as a football coach, has been in the sport since 1931. Quinn, who is in his first year as Pig coach, has been in football for 16 years.

Ackerman said he had been in football for a year and is trying to look up his own record after playing for the title in 1939 and 1971.

Quinn, coach of the Feats, said he has been looking forward to this opportunity all year

The Feats, coached by Ackerman, will feature the brains and brawn of such players as Charley Johnson, Bo Nakama, Bob Ackerman and Bill Jackson. The Pig, coached by Quinn, will be led by such players as Jim Hurley, Butch Miller, Joe Jackson and Ed Williams.
