U.N. deadlocks; Arabs say civilians hit

Students strive to normalize lives, solve problems in crowded rooms

Traffic court, RHA seeks candidates for posts

Deputy registrars file forms before deadline

Inside Tuesday

Outside Tuesday
Michigan's military spending rises
Spending by the Soviet Union on its military forces in central Europe has passed $10 billion in recent months, according to new estimates by American intelligence experts.

Mary noodles skeptical
Mary noodles, the owner of a popular noodle restaurant in Lansing, was skeptical about the new military spending.

"I don't see how this will help our country," she said. "It just seems like a waste of money."

Rebel Irish leader sentenced
A special Dublin court sentenced an Irish guerrilla leader to 10 years in prison for organizing a terrorist attack.

"We will not give up our struggle for freedom," the leader said after the sentence was announced.

Citizens in defense limited
The Senate has approved a bill that limits the ability of citizens to organize defense committees in the event of a national emergency.

"This bill is a step toward undermining the democratic process," said Senator John Smith, sponsor of the bill.

Congress pushes budget role
The Senate has passed a bill that would give Congress greater control over federal budgets.

"This is a significant step toward ensuring that we have a balanced budget," said Senator Jane Doe, sponsor of the bill.

Hughes aided Agnew associate
At the request of Vice President Spiro T. Agnew, Michigan's governor, Richard L. Hughes, helped a close friend of Agnew's in his legal troubles.

"I was just doing what I thought was right," Hughes said.

2 in mass deaths pleaded innocent
Two youths accused of killing 27 people in a mass shooting in Chicago pleaded not guilty.

"I didn't do it," one of the defendants said. "I was just trying to protect myself."

High court favors large firms
A high court judge ruled in favor of a large corporation in a case involving a dispute over the sale of a subsidiary.

"The court has made it clear that we need to protect the interests of large corporations," said the judge.

Senate debates changes to clean up strip-mining
The Senate debated a bill that would require mining companies to clean up their operations and prevent water pollution.

"This is a crucial step toward protecting our environment," said Senator John Doe, sponsor of the bill.

Bump - you lose
New York Times
A child's bumper sticker says "Bump - you lose," but the sticker is not visible in the mirror of this car.

"I'm tired of seeing the sticker," said the driver.

Savings on stereo
You save money when you buy appliances at the correct time of year.

"I saved $100 on this stereo," said a happy customer.

Who's Driven One?
You have driven a Saab 99 A
"A Saab is a car that is easy to drive and has a lot of performance," said the owner.

"I love my Saab," she said.

A career in law - without law school
What can you do with a bachelor's degree in law?

"There are many options," said the lawyer. "You can work for a law firm, or start your own practice."

"I'm interested in a career as a lawyer's assistant," said the student.

University bucks national trend; enrollment increases to '71 level

By SUE MILLER State News Staff Writer

The University of Illinois at Urbana-Champaign has received a 7.5 percent increase in enrollment over the 1970-71 school year, a figure identical to last year's report. The increase marks the largest single-year rise since 1968.

The enrollment statistics were released by the Office of the Registrar.

The overall gain was due to a number of factors, including the largest increase since 1968, more students in the arts and sciences, and a slight rise in engineering.

The slight increase comes despite widespread reports of declining enrollment in many states. The University of Illinois is one of a few large public universities that have reported gains in enrollment.

The increase does not necessarily reflect small increases elsewhere. Enrollment is on the decline in the Midwest, according to the latest figures from the National Center for Education Statistics.

By DIANA BUCHANAN State News Staff Writer

Lasting Area school systems were evaluated separately for undergraduate and graduate programs in the college of education and the college of human services. The report was released by the Board of Trustees.

Lasting statistics that concern Indian education, the report said, have been generally classified by the highest dropout rate and the lowest attendance rates. The report recommended that the state's education agency look into ways to improve these statistics.

The report also recommended increasing the number of minority students in the college of education and increasing the number of graduate students in the college of human services.

The report was released by the Board of Trustees.

"I am pleased that the report reflects the concern and hard work of the college of education," said the Board of Trustees chairman. "I believe that the state's education agency should continue to look into ways to improve these statistics.

Parking rule exception sought by student group

The City Council of Bloomington has voted to reject the request of the Student Government Association for an exception to the parking rules. The SGA has been seeking an exception to the parking rules for the past year.

The City Council voted 7-2 to reject the request, with Councilman Richard Jacobson and Councilwoman Mary Jacobson voting in favor.

The SGA had been seeking an exception to the parking rules for the past year, but the City Council had repeatedly voted against the request.

"I think that this is an important step in the direction of ensuring that the student body has a voice in the decision-making process on campus," said SGA President Jim Jones.

The SGA had been seeking an exception to the parking rules for the past year, and had been successful in obtaining the exception through the Student Government Association, Jones said.

"I think that this is an important step in the direction of ensuring that the student body has a voice in the decision-making process on campus," said Jones.

The City Council of Bloomington has voted to reject the request of the Student Government Association for an exception to the parking rules. The SGA has been seeking an exception to the parking rules for the past year.

Jacobson, a state-wide lockout of students that would provide additional funding for the University of Illinois at Urbana-Champaign, is meeting 7:30 p.m. today. The City Council has been seeking an exception to the parking rules for the past year, but the City Council had repeatedly voted against the request.

"I think that this is an important step in the direction of ensuring that the student body has a voice in the decision-making process on campus," said SGA President Jim Jones.

**Answer to land use controversy not found in bureaucratic process**

The legislation sponsored by state Rep. Philip Mastin, D-Detroit, which proposes a committee to deal with land use and is a good try but bureaucratic, is a mass of pretense made in an effortless answer to land use problems.

Mastin’s plan calls for a seven-member committee under the Department of Natural Resources, including a number advisory council composed of citizens and representatives of business, labor and land grant and state land adjudicatory board under the governor’s office to hear appeals.

The principal problem with Mastin’s plan is the prolonged trial elements. Problems and solutions concerning land would have to work their way through the committee, which is another way of saying that the Legislature is not interested in speeding legislation.

Commissioners also tend to become ineffective after a period of time. Mastin intends to overcome the urgency of his proposed land use commission by providing an appointed and one appointee, but the community would still be under the authority of the already powerful Department of Natural Resources, adding even more bureaucracy to the land use plan.

These rules allow Mastin’s plan poor methods of dealing with land more slowly. Such methods in last resort to the Kalamazoo County Land Conservation Act to eliminate loopholes for contractors.

**PUBLIC INPUT NEEDED ON STREET PLAN**

Citizens who are interested in having say about how the environment is altered at East Lansing should attend public meetings this week and discuss plans to widen Eastover Street and straighten a stretch of the Red Cedar River.

The Ingham County Road Commission plans to hold public hearings this week to build a half-mile section of’s Eastover Street, which runs along the eastern edge of the campus, to Opposite Spruce Lane. Inland in the plans is to straighten the Red Cedar River and add to the road’s design.

City and county officials are making extra efforts to ensure that more public input is incorporated to the project’s planning stage. Failure to solicit as much public opinion as possible could result in another prolonged legal battle like the Michigan land Upton Road controversy.

**LETTER POLICY**

Death? The recent change is developing to be called in the State News, as the paper and it is so used to.

In order to ensure that all letters to the editor appear or are suitable to the editors, the State News, as the paper and it is so used to.

The State News, as the paper and it is so used to.

Ralph Nelson, editor-in-chief

**Faculty reps advocated**

To the Editor:

The MSU Faculty Association endorses the concept of faculty and students working together to propose to the Academic Council. The faculty should be involved in the decision-making process.

Faculty and students together form the essential constituency of the University and their participation in the university’s governance is essential for successful academic change.

The MSU Faculty Association supports the initiation of the MSU chapter of the AFT to further the proposal and claims made ready to improve it.

Mary T. Parkinson

Women's advocates in Michigan favor health bills, request funds

By MAUREEN MCDONALD
State News Staff Writer

Michigan women's advocates are mounting their efforts in the Legislature to pass a health care bill for the Michigan Women's Commission.

In a joint committee meeting, Nancy Hammond, chairwoman of the Michigan Women's Political Caucus, legislative director of the Michigan Women's Commission, and state Rep. William O'Brien, D-Lansing, introduced the women's health care bill. The proposal seeks to create a health care agency to provide medical services to women.

"The legislation is an effort to increase the health and welfare of Michigan women," Hammond said. "We must make sure that the women in our state are covered under the new health care law, even as the state moves towards health care reform." O'Brien concurred, saying, "We cannot afford to lose this important provision of women's health care."

The commission's commitment is further evidenced by the support of the state's women's organizations. A number of women's groups have already signed on to the bill, including the Michigan Women's Political Caucus, the Michigan Women's Commission, and the Michigan Women's Political Caucus. The bill is co-sponsored by Republic Janet Wu, the bill's sponsor.

"We have been told that women's health care is one of the most important issues facing women today," Hammond said. "We must make sure that women are not left behind in the fight for health care reform." Wu concurred, saying, "We cannot afford to lose this important provision of women's health care."

The legislation was introduced February 25, 2015, and will be assigned to the appropriate committee for further consideration.

Fire Dept. invites public to inspect station facilities

Anyone who's ever dreamed of becoming a fireman has quite likely made it a priority to visit a fire station in his or her community. Fire Prevention Week offers that opportunity.

Planned for Oct. 12, the open house will be held during regular business hours, and will be open to the public.

According to Assistant Fire Chief Darrell Robinson, the open house is being held to provide the community with a chance to see the facilities and meet the firefighters.

"We want people to see what goes on inside a fire station," Robinson said. "We hope to educate the public about the services we provide." The open house will be held from 10 a.m. to 2 p.m., and will include a tour of the station.

The open house will be held during regular business hours, and will be open to the public.

Politics, science and technology talk about constitutional system

A noted political scientist will speak to "The Secrecy of the Presidency" at 4 p.m. Wednesday in 12203 East Hall.

Dr. John J. Caudy, member of the Department of Political Science at the University of Michigan, will discuss the constitutional issues surrounding the presidency and whether it has been maintained in the tradition of that office.

Following Caudy's talk, students will be able to participate in "The Secrecy of the Presidency," a debate regarding the seclusion of the presidency from public scrutiny.

"As a political scientist, I have researched the relationship between leadership and presidential power," Caudy said. "I have found that the secrecy of the presidency is an important factor in maintaining public trust." The debate will be moderated by Dr. Mark F. Parti, assistant professor of political science.

Caudy is the author of several books, including "The Secrecy of the Presidency," which examines the role of the president in American politics.

Caudy's talk is part of the College of Arts and Sciences' series of seminars on "Politics, Science and Technology in the Constitution.

If you have any questions about the open house or the seminar, please contact Assistant Fire Chief Darrell Robinson at 517-335-1300.

Field hockey team faces Adrian today

The Western Michigan University hockey team will face Adrian College at 5 p.m. on Friday. Adrian is a very competitive team,” said Mike Flink, coach of the Western Michigan hockey team. “We just played them a year ago and they beat us. The Spartans aren’t able to rely only on past experience, however. There are more than 30 returning players on the team.

“We have a young and unseasoned team with many new skill sets. We’re really women’s field hockey, and so far we’ve been doing pretty well against the competition. We believe that it will become an additional sport in the future,” said Flink.

“Our speed on the field will hopefully be an advantage,” said Flink. “Last year we lacked the ruth that teams bring. That’s why we had such low wins and scoring.

In order to turn the tide, the team has had some key advancements, including a new coach. Flink has been working on an all-female coaching staff, and it is hoped that it will become an additional sport in the future. In the meantime, the team continues to focus on developing their skills and working towards improving their overall performance.

By FARBER
State News Sports Writer

This is the final match of the season for Adrian College’s field hockey team. The women’s field hockey team is currently preparing for a number of upcoming games, with a focus on improving their skills and teamwork.

Field hockey, as a sport, has been gaining popularity in recent years, particularly among women. The Western Michigan University team is one of many that continues to grow and develop, with the goal of becoming a prominent force in the sport.

The Western Michigan University field hockey team has been working hard to improve over the past few seasons, with the aim of becoming a competitive force in the sport. The team is currently ranked 20th in the nation, and is looking to continue their growth and success.

By PETERBROOK.

We've heard that the 75-year-old Pa. native is the last living member of the genus Homo sapiens. The story goes that he was discovered in a cave in the Sahara Desert by archeologists who were searching for ancient human artifacts. The man, referred to as "Mr. 75," was found to be in excellent health and was able to walk and talk. He was also found to have a large collection of diaries and notes that he had written over the years. His diaries contained detailed descriptions of his life, from his early days as a hunter-gatherer to his later years as a leader of a small tribe. Mr. 75 also had a library of ancient manuscripts, including works by the great philosophers of his time. The discovery of Mr. 75 has been hailed as a major breakthrough in the field of prehistory, and scientists are already planning a series of expeditions to locate other members of the species.

Frissbee-fy-in

The Nationals' pitcher -- and a member of the Steeler Nation -- is set to make his return to action on Thursday night. The left-hander has been out since the end of March due to a strained shoulder, but he has been working hard in the Miracle League and is expected to make a full recovery in the near future. The Nationals are currently in first place in the National League East and are looking to keep their winning streak going.

Eyes, not physique make a man a Playgirlfoldout

The new Playgirlfoldout has been making headlines recently. The model, who is known for her stunning physique, has been featured in several magazines and has become a sensation among Playgirl fans. However, the model's real beauty lies in her eyes. "It's not about the body, it's about the eye," the model has said. "It's all in the eyes." The Playgirlfoldout has been praised for her ability to use her eyes to express a wide range of emotions, from joy to sadness.

Prof seeks volunteers for study on methods to overcome anxiety

By DAVE PITIE.

Dr. L. Grayson's longitudinal study of young volunteers for a project to reduce anxiety is expected to bring some interesting results. The volunteers are being monitored from the time they enter the study until they reach the age of 65. The study will be conducted in two phases, with the first phase lasting three years and the second phase lasting two years.

Anxiety Management

Anxiety is a natural response to stress, but when it becomes overwhelming, it can lead to a variety of problems, from depression and anxiety to physical health issues. The study aims to identify the most effective methods for managing anxiety and to develop a comprehensive program for its treatment.

Television reviews

"Star Trek II: the Wrath of Khan" is a classic science fiction movie that has captured the imagination of audiences for decades. The movie, directed by Nicholas Meyer, features an all-star cast, including William Shatner, Leonard Nimoy, and DeForest Kelley. The story follows the crew of the USS Enterprise as they encounter a new enemy, the Khan Noonien Singh.

The movie is a rich tapestry of adventure, drama, and science fiction, with a cast of memorable characters and a storyline that keeps you on the edge of your seat. The special effects are groundbreaking and the music is epic. The movie is a must-see for any fan of science fiction or adventure.

COUNTRY FRIED featuring the banjo of ALAN LEE

The banjo is a unique and versatile instrument that has been a staple of American music for centuries. Alan Lee, a master of the banjo, will be performing at the Country Fried event. He will be playing a variety of traditional and contemporary tunes, showcasing his incredible skills on the instrument.

Alan Lee is a seasoned performer who has played with some of the biggest names in country music. He has won numerous awards and has been inducted into the Country Music Hall of Fame. His music is a reflection of his love for the genre and his passion for the banjo.

South Lake Theater will be hosting the event on Saturday, May 20th at 8 p.m. Tickets are available online or at the theater's box office.
Students try to cope with crowded rooms

(continued from p. 11)

With one tiny bed and one tiny desk, in fact, there isn't much room to maneuver for most of the students. In a closed situation, a few feet of space is the limit for a student's personal belongings. In addition, the living conditions are expected to be crowded and chaotic, with several people sharing a room.

The living conditions in the dorms are expected to be crowded and chaotic, with several people sharing a room. The dorms are designed to accommodate a large number of students, and there is little room for personal belongings or privacy. Despite the cramped living conditions, many students are looking forward to the experience and are willing to make sacrifices to live on campus.

Many residents of overcrowded rooms lack the opportunity to work on their studies at night, when the noise from their neighbors makes it difficult to concentrate. A combination of factors, including the size of the dorms and the large number of students living in each room, contribute to the overcrowding problem. As a result, many students are forced to share limited space and resources, leading to increased stress and anxiety.

Robert Underwood, manager of residence halls, said the current number of 800 overcrowded rooms is "a big deal." The rooms are occupied by more than 500 students, and there is little room for personal belongings or privacy. However, he said, "We always try to remain optimistic and we work very hard to get these styles and other overcrowded rooms improved.

Strike halts construction on Collingwood entrance

Construction of the Collingwood entrance is still ongoing, despite the strike. The construction project is expected to be completed in the near future, and the entrance is scheduled to open in the spring.
Scrap metal recycling woes told

By CHRISTIAN LISK
State News Staff Writer

In an age where more and more resources are being recycled, the scrap metal industry's success is being threatened by what one industry leader calls "fatally flawed," problems.

"There is no legitimate reason for the scraping of scrap metal," Scarsdale, N.Y., steel industry executive chairman of the Iron and Steel League, said.

However, scrap metal recycling experts called the situation "fatally flawed." In fact, some say it's the "go to" for recycling of scrap metal.

Anderton, president of Lansing, said that the recycling of scrap metal is declining because of a lack of regulation and enforcement.

"Any scrap metal can be recycled," Anderton said. "However, the problem is that it's being done illegally and it's not being regulated." Anderton also said that the scrap metal industry is facing a "fatally flawed" future because of the lack of regulation and enforcement.

I am trying to briege you with uncertainty, with danger, with defeat.

"I'm not sure what will happen," Anderton said. "But I'm not sure what will happen because the scrap metal industry is not being regulated." Anderton also said that the scrap metal industry is facing a "fatally flawed" future because of the lack of regulation and enforcement.

However, Anderton also said that the scrap metal industry is facing a "fatally flawed" future because of the lack of regulation and enforcement.

I am not sure what will happen.

"I'm not sure what will happen," Anderton said. "But I'm not sure what will happen because the scrap metal industry is not being regulated." Anderton also said that the scrap metal industry is facing a "fatally flawed" future because of the lack of regulation and enforcement.

I am not sure what will happen.

"I'm not sure what will happen," Anderton said. "But I'm not sure what will happen because the scrap metal industry is not being regulated." Anderton also said that the scrap metal industry is facing a "fatally flawed" future because of the lack of regulation and enforcement.
