STUDENT VOTES DEFEAT ASMSU TAX PROPOSAL

By CAROLYN LEE BRUTON

Herald News Staff Writer

ASMSU's proposed doubling of the segregated student tax has been rejected by the student body, with 53.2 percent voting against the proposal.

ASMSU was formed to advise the student government of ASU and is composed of students from all different colleges.

The results followed a week of intense campaigning by both sides, with several student leaders and politicians speaking at rallies and town meetings.

The tax increase was proposed to raise $25,000 for the student government, which would be used for various projects and activities.

However, many students opposed the tax increase, citing concerns about the government's spending practices and the need for greater transparency.

In the end, the student body voted overwhelmingly against the tax increase, marking a significant victory for those opposed to the proposal.

The matter is now expected to be taken up by the university's board of trustees, which will have the final say on the matter.
Student wins Rhodes Scholarship, MSU's fourth honoring in 5 years

Authorities award state contracts

J.P. legislators request veto ruling

SC will not rule on possible rebates until Ma Bell accounting study finished

An announcement by the House Committee on Appropriations that it will rule on the Bell case before the year's end has stirred alarm among state legislative leaders. The state House has promised to grant the bill a vote before the end of the session, but the fate of the bill remains uncertain.

The House committee will meet in special session Wednesday to discuss the bill, which would have a direct effect on state finances. The committee is expected to take up the bill in its regular session, which begins Thursday.

The bill was introduced by Rep. C. J.办公桌, a Democrat from Laramie, and sponsored by Rep. J. B.办公桌, a Republican from Cheyenne.

The House committee has been studying the bill for several months and is expected to vote on it this week.

The bill would allow the state to repay the state's portion of the money it has spent on the project, which is estimated to cost $50 million.

CONGRATS, HOLTZMAN

There are probably half a dozen honors young people can receive that retain significance for their entire lives, among them the Congressional Medal of Honor in infantry, Olympic, or American, or other top awards in sports, and the Rhodes Scholarship to study in England. MSU students should all offer their congratulations to Steven Holtzman, philosophy major, for winning the latter.

On June 21, Holtzman was named one of 33 Rhodes Scholars, out of hundreds competing from the finest colleges in the nation. The scholarship will enable him to study initially at a college in Oxford, England, for two years, then at Oxford University. This will allow him study of ordinary language philosophy and the Arts from the best teachers in the world in that field. Moreover in the ancient atmosphere of Oxford, with its famous tutor system and superb student body, he will experience a refinement of excellence at its highest.

Holtzman can be proud of such an achievement, and look forward to Four out of the last five years, MSU has had a student who fulfills Rhodes scholarship requirements with magical regularity. This year, MSU had three finalists in the Great Lakes region—more than any other school.

This fact is of importance to the University that the great diversity to which MSU presents, and the uniform difficulty in maintaining high standards at a large school with a balance of interest creates more than the territorial to that the intellectual arts, will keep us from serving successfully for a high level of education in the liberal arts. Students must demand, and family insist, a spirit of excellence appropriate to a school whose students are so high an honor.

By WILLIAM F. BURRIS

"It is required but that internally, as well as externally, there be in the best manner of the nation's living. This President Ford recognized that the impact of the CIA in the Chilean economy has been the bow and arrow against the bow and arrow of the USA.

The CIA's role has been to supplant the political and economic policies of the Allende administration. This was done by training local sympathizers who could then be used as a base for further operations. The CIA's involvement in the overthrow of Allende began in March 1973. At this time, US intelligence agencies were made aware of the growing instability in Chile. This instability was the result of a series of events that had taken place during the previous years, including the rise of the Popular Front, the increase in the support for Allende, and the growing opposition to his policies.

The CIA's role in the overthrow of Allende was to support and promote a group of military officers who had the backing of the Chilean people. This group was called the "National Mobilization Committee" and was led by General Augusto Pinochet. The CIA provided these officers with arms, training, and support. The result was that the military coup against Allende was able to take place and the Chilean people were able to rise up and overthrow the Allende government.

In conclusion, the CIA played a significant role in the overthrow of Allende in Chile. Its involvement was not just limited to providing arms and training, but also included support and training for local sympathizers. The CIA's role was to support and promote a group of military officers who had the backing of the Chilean people. This group was able to overthrow Allende's government and establish a military dictatorship in Chile. The role of the CIA in this event is a testament to the power of the CIA in shaping the course of events in other countries around the world.

Africans criticize interference, struggle for peace in Angola

AIDS AID: Despite Dr. Anthony Doll, president of the Southern African Rights Centre, who declared that much of the foreign intervention in Angola is to maintain their own status or to further their own ends, and that new turns by a brutal military junta continued to escalate the war, the government of Mozambique strongly condemned foreign intervention in Angola.

Gandhi's Parliament address denounces criticism of India

NEW DELHI, India (AP) — Prime Minister Indira Gandhi, in a striking attack on her country's foreign critics, rejected the notion that restoring India's links with Angola would undermine the country's democratic traditions.

ITALY STIKES

EUROPEAN Community leaders said they would not extend economic sanctions against South Africa to deter the country from shipping arms to Angola.

TOM BEAN, Tex. (AP) -- A thief who was struck on the head and knocked unconscious by a telephone pole is a person, Mayor Frank Gregg said Monday, "even with this inversion!

President Ford gambles, loses

WASHINGTON (AP) -- President Ford seemed to be in a gambling mood in a speech to the members of the Continental Telephone Co.

Tom, three years ago and now in Dallas and away from the Toronto area, and now down in Texas nearer the Oklahoma, said. "The police service is just something that we're not used to doing without."
TENNESSEE WILLIAMS’ ‘MEMOIRS’ AN ODD WORK

BY RALPH ELLIOTT

In the New York Times book section for January 19, 1976, there is a notice of "The Private Afternoons of Pamela Mann," written by Barbara Williams. The reviewer calls it "a odd work, perhaps the most bizarre novel ever written by an American author."

It is a novel about the life of Pamela Mann, a character created by Tennessee Williams. The novel is described as "a strange and disturbing tale of love, lust, and deception."

The reviewer notes that the novel is a departure from Williams' usual work, which is often characterized by themes of love, desire, and the human condition. However, "The Private Afternoons of Pamela Mann" is a darker and more complex work, exploring themes of sexuality, obsession, and the darker aspects of human nature.

The novel is described as "unreadable" and "unbearable," with the reviewer noting that it is a difficult and challenging read. However, the reviewer also notes that it is a work of great significance, and that it is a testament to Williams' creativity and willingness to explore new themes.

The novel is a testament to Williams' ability to create a unique and unforgettable world, and to explore the human experience in a way that is both disturbing and thought-provoking. It is a work that will challenge readers to consider new perspectives on the nature of love, desire, and the human condition.

Old rockers' talents still sharp

By DAVID MARTINO

American Press Correspondent

Detroit was the launching pad of Bob Dylan's career, and here he is returning to claim a share of the glory.

In 1962, Dylan was the leader of the folk group Peter, Paul and Mary. He had just come out with his first solo album, "The Freewheelin' Bob Dylan," and he was the focus of attention at the famous Newport Folk Festival the same year.

Since then, Dylan has had a series of hits, including "Like a Rolling Stone," "Blowin' in the Wind," and "The Times They Are A-Changin'." He has also released several albums, including " Bringing It All Back Home," "Highway 61 Revisited," and "Desire."

In his later years, Dylan has continued to write and perform, and his music has inspired many other artists. His influence can be heard in the works of Neil Young, Bruce Springsteen, and Jack White, among others.

Dylan's music has been influential in many ways, and his talent continues to be a source of inspiration for musicians around the world.

Almanac series starts

By DAVID MINTZ

American Press Correspondent

The year 1975 has been designated as the Year of the Almanac by the National Almanac Association. This year's theme is "Almanac: A Book of Knowledge and Wonder,"

The Almanac series starts with an article about the history and significance of almanacs. Almanacs have been used for centuries as a way to organize and share information about the natural world, as well as give people advice on how to live their lives.

In the past, almanacs were often published in communities as a way to provide residents with information on local events, as well as give them advice on how to grow their crops or hunt for food.

Today, almanacs are still being published, and they continue to be a valuable resource for people who want to learn more about the world around them.

The Almanac series will continue with articles about specific almanacs and their contributors. It will also feature interviews with modern-day almanac writers, as well as articles on the future of the almanac as a medium for sharing knowledge.

MOUNTAIN MAN strikes 'gold' on campus

A retiree strikes 'gold' on campus

A retiree strikes 'gold' on campus

"I don't have many nickels left," Lansing's Anthony Linse said recently. "I've spent many of my nickels in search of gold."

Anthony Linse, a retired schoolteacher, discovered a piece of metal while walking in the woods behind his home. He decided to see if he could find a piece of gold in the area, and was surprised to find a piece of metal. Linse said he was able to identify the piece of metal by its color and texture.

Linse has been a retired schoolteacher for many years, and has spent much of his time collecting and studying rocks and minerals. He said he was able to identify the piece of metal as a piece of gold by its color and texture.

The piece of metal was found in the woods behind Linse's home, and he said he was able to identify it as gold because of its color and texture. Linse said he was surprised to find the piece of metal, and he plans to keep it as a memento of his discovery.

im production, criticism studies organized to thematic program

JAMES CATTLE, associate professor of film, said that the school's film program has promoted student awareness of, and involvement in, the arts. The program is designed to encourage students to participate in various aspects of film production, including writing, acting, directing, and editing. The program provides opportunities for students to work on short films, documentaries, and experimental films. Students are encouraged to develop their own projects and to participate in collaborative efforts. The program also provides opportunities for students to gain practical experience through internships and workshops. The program aims to foster creativity, technical skill, and critical thinking in students. The program has been successful in promoting student engagement and has contributed to the development of a strong film community at the university.
Gymnastics' first test at Big Ten

By Anne Williamson

With the Big Ten season looming, these two weeks will serve as the measuring sticks for the Michigan women's gymnastics team, which has a chemically balanced squad and has been working hard to build on the team's second place finish at the Big Ten meet last year.

This weekend, the Wolverines, who placed second at the State Classic last weekend and are currently ranked 12th in the nation, will travel to Bloomington, Ind., to face the Indiana Hoosiers. The Indiana women's team is currently ranked 14th in the nation and has a veteran team.

But the program's 1986 season opener will be against the Hoosiers Saturday when the Big Ten Invitational will be held at the University of Illinois in Champaign. The meet will begin at 1 p.m. and will feature five Big Ten teams.

The team is looking forward to their first home meet of the season.

New House bill defends rights of juveniles

Skeletum and complaints in juvenile court. Parents of all children are being warned that children who are in serious trouble, as well as those who are not, should not be made to face the uncertainty of a criminal trial before the juvenile court.

The new legislation, introduced by Rep. John McGraw of Lansing, would require that a juvenile be held in a special lock-up or a jail for no more than 24 hours before being brought before a judge. The bill also would require that a juvenile be released from custody if there is no probable cause to believe he committed a crime.

The legislation would also require that a juvenile be held in a separate facility from adults if possible, and that he be allowed to have a lawyer if he cannot afford one.

The bill is intended to protect juveniles from the harsh realities of the criminal justice system, said McGraw, a Democrat who represents a district in Lansing. "Juveniles should not be treated like adults," he said. "They should not be thrown into jail for days on end simply because they are acting up or misbehaving."

The bill is one of several that have been introduced in recent weeks to address concerns about the treatment of juveniles in the criminal justice system. Other legislation would allow judges to order juveniles held for shorter periods, and to release them on their own recognizance if they are not dangerous.

The legislation is part of a broader effort to reform the juvenile justice system, which has come under scrutiny in recent years. A series of high-profile cases involving children who were killed or injured while in custody have sparked calls for reform.

"We need to do a better job of protecting our kids," said McGraw. "We need to make sure they are treated with dignity and respect, and that their rights are protected."
