MSU football coaches not fired; reports of such called "distorted"

By CAROL BLOOM

State News Staff Writer

A few people in the MSU athletic department were reading about receiving their "salaries" in the newspapers, when rumors started to circulate. A subgroup of players decided to come through with a connection to the MSU offices, and one of the coaches was fired. The new coach, however, refused to comment on the firing...

Grant funds needed

As upsurges in the demand for federal basic Education Opportunities Grants has left the HEW going through a $180 million deficit. We are wondering whether the Washington DC government will be able to meet its spending goals.

The deficit in this program reflects the financial difficulties facing many education funding agencies. Many failure in the federal government will also put a strain upon those other sources of funds, both public and private. Some suggestions have been offered to save the program:

- **HEW could initiate a wholesale cutback of already promised funds.**
- **HEW could borrow from next year's corporate surplus to make up this year's deficit.**
- The last two ideas have the benefit of a direct and deliberate effect on governmental budgets, especially since they might be used to help pay off the federal government's debts, which it does not have

**VIEWPOINT: RECRUITING NSA, go away**

By REE PETERS and others

Last Thursday, Rep. Pakistan, I, and Sen. Naftali (NSA) appeared before the Senate Intelligence Committee to answer questions before the Senate Intelligence Committee. The NSA is in the process of being closed down, and questions were raised concerning its future. It was reported that the NSA might not be able to fulfill its mission, or at least not in the same way.

The NSA was created as an executive agency of the National Security Agency (NSA) in 1950. It was formed to provide policymakers with information and advice on issues related to national security, including the conduct of foreign relations. The NSA's mission is to collect, process, and disseminate intelligence information from foreign intelligence agencies, foreign governments, and other sources.

The NSA has been accused of violating the Constitution, including the Fourth Amendment, which protects against unreasonable searches and seizures. The NSA has been criticized for its use of surveillance technology and the collection of personal data without a warrant.

The NSA has also been accused of violating the Privacy Act, which protects personal information from disclosure without proper authorization. The NSA has been accused of using its power to gather and disseminate information for political purposes, and to suppress dissent and opposition to its policies.

The Senate Intelligence Committee has been investigating the NSA's activities, and has called for a comprehensive review of the agency's policies and practices. The NSA has been accused of violating the Constitution, and has been the subject of widespread criticism and controversy.

In recent years, the NSA has come under increasing scrutiny, and has been accused of violating the Constitution. The Senate Intelligence Committee has been investigating the NSA's activities, and has called for a comprehensive review of the agency's policies and practices. The NSA has been accused of violating the Constitution, and has been the subject of widespread criticism and controversy.

Decriminalize marijuana

Carole Sklar, a member of the National Organization for the Reform of Marijuana Laws, believes that marijuana laws should be reformed. She believes that marijuana is not a dangerous drug and that its use should be legal.

The current laws surrounding marijuana use are outdated and unjust. They are based on the idea that marijuana is a harmful drug, which is not supported by scientific evidence. The laws also disproportionately affect marginalized communities, particularly low-income and minority communities. This is a form of systemic racism and should be corrected.

Legalizing marijuana would not only be more humane, but it would also have economic benefits. The tax revenue from legalized marijuana sales could be used to fund education, healthcare, and social programs. Additionally, the costs associated with the criminalization of marijuana use, such as arrests, trials, and imprisonment, would be eliminated.

In conclusion, decriminalizing marijuana is a necessary step towards achieving justice and equality. It is time for our lawmakers to take action and end the outdated and unjust laws surrounding marijuana use.

Busing: Lee County's sad experience

Lee County, Florida, is facing a severe housing crisis. Due to the lack of affordable housing, families are being forced to live far from their place of work, causing long commutes and a negative impact on their quality of life. The situation is worsened by the fact that the county has a high number of single-parent households, which are more vulnerable to housing issues.

In an attempt to address this problem, the Lee County School Board is considering a policy to implement busing for students who live far from their schools. However, the idea has received opposition from some residents, who argue that it could lead to increased traffic and safety concerns.

The issue of affordable housing is a complex one, and it requires a multi-faceted approach. While busing could be a temporary solution, it is not the ultimate answer. The root cause of the problem is the lack of affordable housing options in the area, and more investment in this area is needed to create a more equitable and sustainable community. It is essential that we work towards finding long-term solutions that address the root causes of this crisis.
Mull, Proctor and Bergman inspire laughs

By JEROME McCAHILL
Dearborn Messenger

Martin Mull — who displayed plenty of his antics this weekend — here applied Alka-Seltzer directly into his teeth. Don’t ask why.

Mull, Proctor and Bergman were in town recently to prepare for the upcoming production of “The Seagull” at the Citadel Theatre.

The play, a work by Chekhov, opens on February 11th and runs through the end of the month.

Mull, Proctor and Bergman are known for their comedic talents and have worked together in various projects before.

They are set to take on the roles of the main characters in the production, including the famous character of Konstantin Treimalov.

Tickets are available at the theatre’s box office or online through their website.

The show promises to be a hilarious and insightful look at Chekhov’s classic work.

Don’t miss the opportunity to see these talented actors bring this timeless piece to life on stage.

For more information, visit the theatre’s website.

Chamber musicians to perform Tuesday

The musicians of the Chamber Music Society of New York’s Livonian Center concert series for performing chamber music will be performing Tuesday evening at the Livonian Center.

Their program includes works by composers such as Mozart, Beethoven, and Schumann.

The concert will begin at 8:00 PM and is open to the public.

Tickets are available in advance through the Livonian Center’s website.

For more information, visit the chamber music society’s website.

A career in law — without law school

What can you do with a law degree in 2023? Now there is a way to bridge the gap between an academic degree and a legal career without the traditional law school path.

Lawyers and legal professionals weigh in on the growing trend of applying for non-law school jobs.

Some argue that the traditional path to law is still necessary, while others see the non-law school route as a viable option.

For more information, visit the law firm’s website or contact them directly.

Blues musicians Terry, McGhee and Celia.s are always successful at Mariah.

When singing songs about broken hearts, restore romantic relationships, wistful memories, or to celebrate the breaking of ties with galleries, they all favor the Spanish blues, the blues that they talked about, the blues that they loved, the blues that they sang, and the blues that they played. They were the blues that they liked, the blues that they knew, the blues that they performed, and the blues that they listened to

Terry and McGhee were both exponents of the Chicago blues, and each was known for his virtuosity. They were also known for their ability to adapt and evolve with the times, and their music reflected the changing landscape of American culture. Their performances were characterized by a mix of passion and restraint, and they were able to engage audiences with their dynamic and soulful singing.

The blues that they played were infused with a sense of history and tradition, and they were able to connect with listeners on a deep and emotional level. Their music spoke to the shared experiences of those who had lived through the challenges of the times, and it offered a sense of hope and resilience in the face of adversity.

Terry and McGhee's performances were often accompanied by their respective harmonicas, and their music was characterized by a driving rhythm and a raw intensity. They were able to create a sense of intimacy and connection with their audiences, and their music was a testament to the power of the blues to heal and inspire.

In conclusion, Terry and McGhee were two of the greatest blues artists of all time, and their music continues to influence and inspire generations of musicians and listeners. Their performances were a testament to the enduring strength and resilience of the blues, and they will always be remembered as two of the greatest voices in the history of American music.
Marathon: the cause makes it worthwhile

In Kalamazoo, 375 South Winton Blvd., John D. "Jack" Patnoff, an administrator at John D. "Jack" Patnoff, an administrator at Michigan State, is president of the Kalamazoo Marathon Club. The club, which was formed in 1973, has over 2,000 members, including former Kalamazoo Community College students. In 1976, the club sponsored its first marathon, which was attended by more than 3,000 people.

The marathon was originally planned for April 1, but due to poor weather conditions, it was moved to May 3. The race began at 8 a.m., with the first runners finishing at 11 a.m. The weather was sunny and warm, with temperatures in the high 70s.

The race was run in the Kalamazoo Regional Park, which is located near the city center. The course was 26.2 miles long, and included several hills. The leaders were followed by a large group of runners, who were cheered on by spectators along the way.

The race was well-organized, with police and volunteers on hand to ensure the safety of the runners. The participants were all smiles, despite the heat and humidity.

At the finish line, there were refreshments and music, as well as prizes for the top finishers. The winners were presented with medals and certificates, and the overall winner received a cash prize.

The Kalamazoo Marathon Club is planning to hold its next marathon in May, and is looking for volunteers to help with the race. If you are interested in volunteering, please contact the club at (269) 343-4000.
Gymnasts win two
By ANN WILLIAMSON
Gymnastics writer
Close call no more.
Gymnast with the best team record of the season, the MSU's gymnastics team manager Bob Gaye Kinsey, announced Wednesday that the MSU gymnastics team manager has won the team's second straight invitational and the second straight invitational for the MSU gymnasts. The team is looking forward to the MSU's Invitational on Saturday, where they hope to win the team's third straight invitational.

Reseacher seeks roots of job attachment

By JADA ELIOTT
State News Staff Writer

A research project now under way at MSU may get you a job when you graduate but it may make your final decision about whether to stay in school or enter the job market more rewarding.

"I help students find the jobs that may be out there," said one student in the School of Industrial Relations. "There are very few people who go out and find jobs. People follow the money. It's too easy to get stuck in the system."

Although he likes this kind of work, which he has been doing for the last ten years, Professor Thomas Helme is not sure what he wants to do after he graduates. "I'm not sure if I want to stay in school or enter the job market."

The project is sponsored by the National Science Foundation and is being conducted by Professor Thomas Helme and his colleagues in the School of Industrial Relations.

Although he likes this kind of work, which he has been doing for the last ten years, Professor Thomas Helme is not sure what he wants to do after he graduates. "I'm not sure if I want to stay in school or enter the job market."
