HUD grants $364,000 for city improvements

By NANCY ROBERTS

News-Press Editor

After several attempts at application, the East Lansing City Commission has received approval of a federal grant for $364,000 for the purpose of revitalizing the downtown district.

The city will use the money to improve the appearance of its business district, including the construction of new sidewalks, the planting of trees and flowers, and the installation of streetlights.

East Lansing is one of only 100 cities nationally to receive the award, which is administered by the Department of Housing and Urban Development (HUD). The city was among the first to apply for the grant, which was announced by HUD in March.

The grant money will be used to fund a variety of improvements, including the installation of new streetlights, the planting of trees and flowers, and the construction of new sidewalks. The city will also use the money to improve the appearance of its business district, including the construction of new sidewalks, the planting of trees and flowers, and the installation of streetlights.

Ford, Brezhnev sign pact

WASHINGTON (AP) — President Ford and Soviet leader Leonid Brezhnev will sign a major Soviet-American treaty today limiting the use of land-based nuclear missiles in the next 10 years, the State Department said yesterday.

The 507-page accord, which imposes limits on the number of nuclear weapons on the land of both superpowers, was reached after nearly two years of talks. It is a breakthrough in the effort to control the nuclear arms race.

The treaty, which was described as a major step toward a general disarmament, provides for inspection of each nation's nuclear weapons.

The United States and the Soviet Union have agreed to limit the number of nuclear missiles in Europe to 200 each. The agreement also limits the number of nuclear warheads to 1,000 for each side.

The treaty was signed about 10:30 a.m. EST, the equivalent of 1300 hours GMT, in the White House, Moscow, according to a presidential spokesman.

The treaty is the first major breakthrough in the long-running negotiations on nuclear arms and represents a major victory for the Soviet Union.

The agreement is significant because it is the first major breakthrough in the nuclear arms race since the end of World War II.

The United States and the Soviet Union have been working on a nuclear arms control treaty for more than two years.

The treaty involves sweeping changes in the nuclear arms race, including a reduction in the number of nuclear warheads and the development of new arms.

The treaty is expected to be signed by both sides in about six months.

Wilson acrobats amuse residents

By PAULA M. NOLES
'State News Staff Writer

The air felt electric as the athletes performed the stunts they were trained to do.

As the athletes entered the field, the audience could hear the sound of metal clashing against metal. They moved with grace and precision, their movements synchronized to perfection. The crowd watched in amazement as the athletes performed flips and tricks that would have seemed impossible to anyone else.

The athletes were not just performing for the audience; they were also performing for themselves. They were proving themselves to be the best in their field, and they were doing it with style and grace.

The athletes' performance was a testament to the hard work and dedication they put into their craft. They had spent countless hours practicing and perfecting their skills, and it showed in their performance.

The audience was left in awe as the athletes finished their routine. They had done something incredible, and it was something that would be remembered for years to come.

In the end, the athletes had shown that they were capable of anything, and they had proven that they were the best in their field. They had performed a routine that was both impressive and entertaining, and they had done it with style and grace. The audience was left in awe, and they knew that they had witnessed something truly special.
Michigan United Conservation Clubs (C) will more than likely battle up the 220,000 signatures needed to place a ballot initiative to ban bottle waste in November ballot. This bill, originally sponsored by Rep. Lynn Zendal of D-East Lansing, claims a fine waste, but now will apparently be revived due to the diligent efforts of such conservation groups as the Sierra Club.

The MUC is pushing for 350,000 signatures by June as an indication of the rising public support for the referendum. We fully support the bill and urge registered voters to sign the petition if they have not already done so.

Industrial lobby is so much for the delay in the sale of the bottle.

The governor formally supports the bill but, at least publicly, the contact of officials in other individual with the bottle has been reported to be pouring enough popular support to turn a hostile protest campaign.

The strength of the opposition to the bill is nowhere near the strength of the support. The Times-Union has reported that the opposition is to the point of confusion, as they appear to be fighting for the wrong battle.

The Times-Union reports that the opposition to the bill is to the point of confusion, as they appear to be fighting for the wrong battle.

We must act now to make sure the bottle is banned. The battle must be won before the next bottle is sold.

Plan needs modification

The proposed bikeway system designed by the East Lansing Transportation Commission is in the right direction toward accommodating the needs of cyclists and encouraging cycling along theMSU campus area is not adopted. The measure proposes a central bike lane on the pedestrian-friendly sidewalk in front of the shops and across to the park, then to the traffic light, through the park, and to the traffic light again, which is the probably the worst way of accommodating the needs of cyclists.

We support a move to enlarge the bike lane along the pedestrian-friendly sidewalk in front of the shops and across to the park, then to the traffic light, through the park, and to the traffic light again, which is the most obvious and sensible way of accommodating the needs of cyclists.

This plan would accommodate the needs of cyclists and make pleasant and safe driving conditions for all.

Brennan speaks to Republicans

Traffic accidents at the notorious intersection of Lansing’s St. Johns Avenue and Michigan Avenue (the St. Johns Avenue Viaduct) were reduced by 75% during the past year, according to a report completed in November 1986.

The Dept. of State Highway and Transportation officials said that 40 accidents occurred at the intersection of Lansing and Michigan during 1985, compared to 1,001 in 1984. These figures include all types of traffic incidents, such as 20 accidents that were identified as acts of vandalism.

In all, 25 accidents were reported during the past year, involving 27 vehicles, 21 people, and 18 people who were injured. Of those, 13 accidents were classified as acts of vandalism.

Brennan said that the reduction in accidents is due to increased public awareness and the addition of additional traffic signs and signals.

He said that the city is working to improve the intersection by adding more signs and signals, as well as by installing a new traffic light system.

The city has also added more police officers to monitor traffic and keep the intersection clear.

Brennan said that the improvements have been well-received by residents and that the city is moving forward with plans to make further improvements in the future.

He urged residents to continue to be vigilant and report any incidents to the police department.

Police catch drug dealers in NY

Moral victory: Sheen

The arrest of a Miami Beach man internationally known as a drug smuggler yesterday was yesterday a moral victory for the Miami Beach Police Department, according to police chief Herman Sheen.

His surname was not released. But Sheen said the man had previously been on a Miami Beach drug smuggling case, and that the police were now investigating his activities.

Sheen said that the man was not living in Miami Beach, but that he was a frequent visitor to the city. He added that the police had been following the man for some time, and that the arrest was a result of that investigation.

The man was charged with possession of a controlled substance and was released on $5,000 bond.

Sheen also said that the police were continuing to investigate the man's activities, and that additional charges could be filed in the future.

The man's activities are not believed to be related to any ongoing drug investigations in Miami Beach, according to Sheen.

The police chief added that the arrest was a result of the department's continued efforts to combat drug trafficking in the city.

Sheen thanked the community for its support and cooperation in the fight against drug abuse.

In addition, Sheen was asked about the issue of drug use among local school students, and he said that the police were working closely with the school district to address the problem.

The Miami Beach Police Department continues to work with other local law enforcement agencies to combat drug use in the city, according to Sheen.

The department has received positive feedback from the community for its efforts to combat drug trafficking and to promote public safety.

Sheen concluded by thanking the community for its continued support and cooperation in the fight against drug abuse.

Kickers prepare for Green-White

By JIM SHANAHAN
State News Sports Writer

The last time we heard from Daryl Brown, the
much-hyped kicker for the Spartans was pro-
ing to play against the Fighting Irish. The
young man has been那种 unknown since that day. But
it's just a matter of time before he walks into the
field for the Green-White game on Saturday.

Brown has been working on his kicking
skills, Powers said, and the kicking team is
doing its best to help him. Coach Powers even
made a visit to the kicking field himself to
make sure Brown was on the right track.

But there was no guarantee that Brown
would get the job. He had to earn it through
his hard work and dedication.

Brown is a three-time all-state selection,
who was a standout in the kicking game for
his high schools. He has been working on his
skills for months, and Powers is confident that
he will perform well in the game.

Brown was enthusiastic about the
chance to play in front of the fans, and he
said he was ready to give his all.

"I'm excited about the game," Brown said.
"I've been working hard on my kicking,
and I'm ready to show what I can do."}

B.E.S. Geostatic® speaker systems: their good looks "come closer!"

But their sound reaches out to you.

The first thing about new B.E.S. speakers is that they are "good looks." The design is simple and aerodynamic, fitting into any room with ease. The quality is second to none, with each speaker offering a pristine sound experience.

Holiday Meat Specials from the Country Butcher

Offered in celebration of the Day of the Dead, the Country Butcher is offering a special meat package. The package includes a 3 lb. sirloin, 2 lb. boneless beef, and 2 lb. chicken. The package is available for pick-up or delivery.
