King murder prosecution called unusual

By DAVID C. MARTIN

A Camden County Superior Court judge yesterday denied the defense's motion for a change of venue and ordered the trial of Bozeman Ray, accused of killing nine-year-old Tommy Denny in 1954, to proceed in Concordia, where the incident occurred. The defense argued that the trial be moved to New York or New Jersey, and that a fair and impartial jury could not be found in Concordia.

The judge ruled that the trial would proceed as scheduled, without a change of venue. He cited the fact that there has been a full investigation and that the trial will be fair and impartial.

Bozeman Ray is accused of killing nine-year-old Tommy Denny in 1954. The trial is set to begin on October 15th.

Glimore opts for solo fight, hires lawyer while fasting

By WILLIAM H. BELL

Ajit M. Glimore, president of the Louisiana State Bar Association, has decided to fight for his re-election alone, without the support of any candidates.

Glimore made the decision after consultations with several members of the Association's Board of Directors and several prominent members of the bar.

The election is scheduled for November 3rd.

OFFICIALS CONFIRM SWINE FLU CASE

But Nobel Prize-winner Linus Pauling labels it a "nonexistent disease"

By R. O. FICK

The state Department of Health has confirmed two cases of swine flu in the state, as yet unconfirmed, bringing the total number of cases to 10.

One was a 10-year-old girl from Monroe, and the other was a 20-year-old man from Madison Parish, who is still hospitalized in Jackson, Mississippi.

The cases were confirmed by the state's health department and are expected to be reported to the local health department.

FDA backs label ruling for aerosols

By J. M. TAYLOR

The Federal Trade Commission yesterday approved the use of "nonexistent" on labels for aerosol products.

The ruling will require that all aerosol products be labeled with a "nonexistent" label on their packaging.

FDA Commissioner Richard M. Schulz announced the decision yesterday, saying that it will help consumers make informed decisions about aerosol products.

The decision was made after a long and thorough review of the evidence, and it is expected to have a significant impact on the aerosol industry.

Security forces in Rhodesia say nine killed in ambushes, fall of government predicted

BY WIRE SERVICES

KALISHITI, Rhodesia— Rhodesian security forces reported Tuesday that nine blacks had been killed in an ambush in the eastern part of Rhodesia. The report followed an attack on a black militant camp in which the visiting black politician, James Akins, was injured.

The announcement was made by the Rhodesian army, which has been working with black guerrillas in the area. The soldiers said that nine black fighters were killed in the ambush.

Arabs meet on oil prices

KUWAIT (UPI) — Arab and oil nations began a search Tuesday for a conference to reduce the price of oil and to bring about a decrease in the effect of inflation on the economy of the United Arab Republic. The meeting was called by the Arab League, which is composed of nine Arab countries.

The conference, which opened Monday, was attended by representatives of the Arab League and other nations.

Workers stay away from mine

JAMBOUR, Tanzania— Strikers have occupied a copper mine in Tanzania, said the African News Agency, which has its headquarters in Tanzania.

The mine is owned by the Allied Copper Corporation, which is controlled by the United States government.

By GEORGE MANNICH

New requirements for the National Driver's License (NDL) program were announced today by the Federal Highway Administration Office of Education. The new requirements include an additional fee for renewal, a new, more secure form of identification, and a requirement for a driver's license to be renewed every 10 years.

During the 75% of new licensing and renewal fees collected in 1975 were allocated to the
NDL program. The new requirements, which include a mandatory fee of $50 for renewal, a new, more secure form of identification, and a requirement for a driver's license to be renewed every 10 years, will be implemented in 1978.

The new regulations are intended to improve the accuracy and security of the NDL program, and to reduce the number of drivers who renew their licenses every year. The new regulations will require drivers to renew their licenses more frequently, which will help to ensure that the licenses are current and accurate. The new regulations will also help to reduce the number of drivers who renew their licenses for fraudulent purposes.

The new requirements for the NDL program will be implemented in 1978. The new requirements will be announced in the Federal Register in the near future.
When the Human Relations Dept. was organized in 1972 as an outgrowth of the Opportunity Programs, we had hoped that the discrimination within the University would cease and the hiring of minorities would increase through the affirmative action program. Unfortunately, this has not occurred.

The validity of this department must now be questioned, since MSU's goals for hiring and attracting minorities, a primary function assigned the department, have not been met. And now, with the loss of the director post in the Human Relations Dept, empty since July, the issue is fast becoming a question.

Though the MSU Board of Trustees has continually expressed its support for affirmative action, President Whitman has not fulfilled the University's obligation to the program, let alone phased it. He has only recently made it known that the post should be filled quickly. Because of his lack of attitude up to this point, we can only anticipate pressure forced due to legislation.

But we cannot forget the man who is ultimately responsible for this shaky set of circumstances: the director of the Human Relations Dept. reports directly to Robert Ferron, vice president of University and Federal relations. A former employee of the federal government, Ferron apparently has no experience of the former or the latter. As he has shown Hill, if any - rather frightening problems in interest to the department.

Employees in the department have been of great help because of the varietal directions. With little to credit, the department is no position to have his work deteriorate further.

As if all this were not enough, the University has further thrown the department's side last. In addition to the affirmative action plan aimed at equal opportunity for armed services veterans, the human relations section has been eliminated. While the intent is commendable, the program is necessary, the timing is bad. If the responsibility of a director is not exist does simply make it easy.

Recently, the former director of the department criticized MSU's affirmative action implementation, and specifically cited the lack of administrative action. It was clearly stated that he would resign. Coming from this source, it cannot be taken lightly. As President Whitman is unable to direct the program as he is disinterested in the admin.

In any case the university Press, over White, should consider the possibility that the EPA to overcome what has been obvious has been fluorocarbons. The EPA needs attention.

Ban approval smart, but surprising

By approving in principle the ban on fluorocarbons, President Bush has made a move that is in line with our policy. Considering the legal action that has been taken, it is unlikely that any attempt to change the decision will be successful. It is possible that the ban may be lifted in some cases, but this is unlikely.

First of all, it will not help to establish a judgment of any person who has been guilty of using chlorofluorocarbons.

Secondly, as I wrote in an earlier editorial regarding the ban on fluorocarbons, an EPA is likely to be forthcoming. No one, when they are using a ban, will want to use it in any way. Even if they should use it in any way, it is unlikely that it will be successful.

As for the release of the EPA, there is a possibility that the ban might be lifted in some cases, but this is unlikely. While there are some issues that need to be addressed in the current system, it is unlikely that these will be resolved.

It is unlikely that the ban will be lifted in any way. While there are some issues that need to be addressed in the current system, it is unlikely that these will be resolved.

Miamian

It appears that the Miamian is not satisfied with the State News feature story on the University's football Friday's. While the story does mention the team's accomplishments, it is more focused on the football game itself. The story is clear that the football team is important to the University, but it is not the only thing that makes the University special.

On Sunday, church services took place in the University's stadium. This is a great event, and it is something that we should all be aware of. While the story does mention the game itself, it is not the main focus of the story.

It is a great event, and it is something that we should all be aware of. While the story does mention the game itself, it is not the main focus of the story.

I hope that this information is helpful. If you have any further questions, I will be happy to answer them.
From our family to your family, Happy Thanksgiving.

We want to wish you a Happy Thanksgiving. We hope your turkey is the biggest and best ever, and that you get to eat it surrounded by all the folks you love.

And we also hope that when you pause to count your blessings, you find lots and lots of them.

We do it all for you.

At McDonald's all ears come sunny-side-up.

McDonald's East Lansing & Okemos

Complications vast in 'turkey' name-calling

Next time you call someone a "turkey," consider the most implications of the charge. Among other things, you are accusing the "turkey" in question of having no self-respect.

According to the Turkey Growers' Association, reports that turkeys have self-esteem are untrue, their knees to nose are all 4.

All turkey breeding is done by artificial insemination because the male turkeys' would crush the rib cage of a small bird.

When you call your roommate a "turkey" you are saying it is not here enough for you to come across the line.

"The turkey is a much more respectable bird than it is a feather. It was the only bird that never went2

The turkey's self-esteem is just as much of a problem for the turkey as the turkey's name-calling is for the people who are called turkeys.

The turkey's self-esteem is just as much of a problem for the turkey as the turkey's name-calling is for the people who are called turkeys.

Shot turnout low, official says

By MATTHEW CRICKN

With the peak of the flu season behind it, an official in Michigan said that the state saw a “substantial decrease” in flu cases over the past week.

The Michigan Department of Health (MDHHS) reported that there were 17,252 flu cases reported in the state during the week ending March 19, down from the 26,900 cases reported in the previous week.

“While flu activity continues to be high, we are seeing a decrease in the number of cases,” said Dr. Anthony D’Agata, the state’s chief medical officer. “We are hopeful that this trend will continue and we encourage people to continue taking precautions to prevent the spread of flu.”

Officials said that the flu season typically sees a peak in early February, but this year’s peak occurred later, in mid-March.

“While it’s too early to say for sure, it appears that the flu season is winding down,” D’Agata said. “However, we still recommend that people continue to take precautions to prevent the spread of flu.”

The state’s flu activity index, which measures the number of flu cases reported per 100,000 population, was 20.4 for the week ending March 19, down from 27.2 the previous week.

“While this is still considered high, it’s a positive sign that the flu season is ending,” D’Agata said. “We encourage people to continue to take precautions to prevent the spread of flu.”

Gridders honored at banquet

BY TURPIN SAWYER

State News Sports Writer

BATTLE CREEK, Mich. - The University of Michigan football team's Outstanding Offensive Player of the Year award was presented to Michigan State's Tom Back at a banquet Monday night.

The senior from Battle Creek, Mich., was named the offensive player of the year by the Michigan State Football Team, which was honored at the annual team banquet.

Tom Back, a tight end, was the only senior on the offensive line that was expected to return. He was named the Offensive Player of the Year after the season and was also named to the All-Big Ten team.

The award was presented to Back at the banquet by former Michigan State head coach George Perles.

Back played in 41 games over four seasons and was named to the All-Big Ten team twice. He was a key player in Michigan State's offensive success, helping the team to a 7-5 record in 1987.

The banquet was held at the Holiday Inn in Battle Creek and featured speeches by Perles and Michigan State football coach Don D'Amato.

D'Amato said the award was a well-deserved honor for Back and the rest of the Michigan State team.

"Tom Back is a great player," D'Amato said.

"He's a great leader and a great teammate. He's a real asset to the team and the community."
plastic containers packaging’s new twist

By DENISE WOLFE

The pasteboard projects and schemes in the United States have become a major issue of concern. In recent years, the use of plastic has increased, and this has raised questions about its impact on the environment.

In an effort to address this issue, the Environmental Protection Agency (EPA) has been working with various stakeholders to develop strategies to reduce the use of petroleum-based products. One area of focus has been on the use of plastic in packaging.

According to the EPA, plastic packaging materials are responsible for a significant amount of waste in the United States. The agency has been working with industry partners to develop more sustainable alternatives.

One of the challenges facing the industry is the need for new technologies to replace traditional plastic materials. This has led to increased research and development efforts.

For example, the National Renewable Energy Laboratory (NREL) has been working on developing biodegradable plastics that can be used as a replacement for traditional plastic materials. These materials are derived from sources like corn and other agricultural products, and they break down more quickly once they are discarded.

Another area of focus has been on the development of new packaging designs that can reduce the amount of plastic used. This includes the use of thinner materials, as well as the incorporation of more sustainable inks and coatings.

Despite these efforts, there is still much work to be done. The industry is facing pressure to reduce its environmental footprint, and this is likely to continue in the years ahead. As such, it will be important for companies to stay informed about the latest developments in this area and to continue to explore new and innovative solutions.

By taking these steps, the industry can help to ensure a sustainable future for all.

RHA eyeing spring concert plans

Two weeks ago, Pat Estes, co-chairperson of the Bionic Warhol committee, introduced the RHA committee to a possible spring show.

"The council was looking at the possibility of producing the May 4 spring show," Estes said. "This report was agreed on by the whole council, with the exception of one vote, and was approved by the executive board.

The council is now looking into the possibility of producing the May 4 show to the best of their knowledge."

For the "Bionic Warhol" show, the committee was given the opportunity to state their ideas and have them considered. The council is now working on a budget and will present it to their next meeting.

The committee is planning to produce a "Bionic Warhol" show, but the council has not yet decided on a specific date or location. The council is currently working on a budget and will present it to their next meeting.

Carter stresses jobs, economic growth

WASHINGTON (AP) — President Jimmy Carter today projected that he has the voters' support for an economic program that he said would ensure the nation's economic growth at a rate of 6 percent in the first year of the Carter administration.

Carter told a news conference at the Carter Center in Atlanta that he was confident that he would have the support of the public to ensure the nation's economic growth at a rate of 6 percent in the first year of the Carter administration. He said that if people thought the vote was going to be necessary to enable him to carry out his promises in the campaign, they would support Carter when they think in his right and oppose him when they think in their wrong.

Carter made his comments at the last minute but not as President Ford and the staff of the Carter Center in Atlanta.

The president's words about the need for a new level of confidence are to be added to the White House's and Congress's.

Carter also said he was a major supporter of the state and of the state's major unemployment regulations.

In general, Democrats and those who were there with Carter's campaign and those who were there were surprised and would support Carter when they think in his right and oppose him when they think in their wrong.

Angola to enter United Nations

LISBON DAYS - Angola's Marxist regime is entering the UN General Assembly on Monday to install new diplomats days after the United States withdrew its veto to the Security Council.

Angola was formerly a Portuguese colony and is now a member of the UN. The US decision to withdraw its veto was made Monday "out of respect for the sentiment and positions of the great majority of the General Assembly," according to White House sources.

The US decision came after Angola, which has been at odds with the US over its support of Marxist guerilla movements, made a request to be readmitted to the UN.

US Secretary of State Henry A. Kissinger said Monday that the US would withdraw its veto because Angola is "not a threat to peace and security of the region or to the UN itself." The US also said Angola's actions in the region were consistent with the principles of the UN.

The US decision was met with mixed reactions by other UN members. Some nations praised the US for its decision, while others criticized the US for abandoning its vetoes.

The decision to withdraw the veto was made after a meeting between Kissinger and Angolan Foreign Minister Francisco do Cormo. The two nations have been engaged in diplomatic negotiations for several weeks.

Angola has been at odds with the US over its support of Marxist guerilla movements, which the US says are a threat to peace and security in the region. The US has been pressing for Angola to withdraw its support for the guerilla movements and to use its influence to encourage them to cease their activities.

The decision to withdraw the veto is seen as a significant step in resolving the conflict between the US and Angola. It is hoped that this move will lead to a more peaceful and stable region.
