Wharton refused 2 Carter offers

lines, lines, lines

suit filed against 'u' speech department

by GLANC HICKET

New York Staff Writer

The U.S. Supreme Court rejected the complaint of the University of Southern California, which claimed that a student's speech, "I'm sick of this country," was a libel.

The court ruled that the statement was not a libel, as it was made in a humorous context.

The case involved a student who was suspended from the university after making the statement.

The court said that the statement was made in a context that did not suggest malice or ill will.

The case was later overturned on appeal.

THEY'RE SELECTED FOR DEPARTMENT COMPLETION

Candidates' evaluation completed

by THOMAS E. GRAY

New York Staff Writer

The candidates for the positions of the United Nations are now being evaluated by the Security Council.

The council will choose the candidates for the United Nations, including the Secretary-General and the President of the General Assembly.

The evaluation process is expected to take several months.

The candidates will be evaluated based on their knowledge of international affairs, their experience in similar positions, and their ability to work with the other members of the Security Council.

The council will announce the final list of candidates after the evaluation process is completed.

EXTRA DEER SEASON TO BE FOCUS OF TRIAL

Weather plan for economy may include tax reform

Carter plan for economy may include tax reform

by THE Associated Press

The president-elect, Jimmy Carter, unveiled a plan for economic reform that includes tax reform.

The plan is expected to include a tax reform package that will be announced later this week.

The plan will also include proposals to increase the minimum wage, provide a federal jobs program, and increase funding for education and infrastructure.

The plan is expected to be announced by the end of the month.

**FOCUS ON THE WORLD**

**Labite requests vaccine inquiry**

**LONDON** (AP) — A member of Parliament's Thames Town constituency, where a recent polio vaccination campaign has caused brain damage and turned some children into "cablephiles," but health authorities still advise people to get the shots.

Lionel Jack Ashley said 300 children in Britain, over a 30-year period, have been left brain damaged after getting a shot against polio and measles.

"These healthy children have been turned into cablephiles within a few days," Ashley wrote in a letter to the government, according to Dr. Paul D. Eggers, a London pediatrician. "The Association of Parents of Vaccine-Damaged Children is pressing with Ashley for compensation in such cases, and has already recovered millions of pounds from the government."

The Department of Health and Social Security said parents should have no anxiety about their children's health and that "the vaccine is one of the safest vaccines in existence."

"There is not the slightest trace of harm in my office due to the use of the vaccine," said the department,adding that "this has become the fourth front." "Most of these are coming out of Western Europe and have been tracked down just as soon as they have been reported."

Rabies security forces have been fighting black market alien passports as well as to some extent border wars with Mozambique and Tanzania.

Conflict escalates in Rhodesia

**KARACHI, Pakistan (AP)** — A committee from security headquarters in Karachi, Lahore and Islamabad, and the government of Pakistan and the United States, has been established to investigate the relationship of the United States and the Soviet Union with the various factions in the region.

The committee is being formed in response to the recent border conflict between the United States and the Rhodesian government, which has been escalating over the past few months.

The United States has been providing military aid to the government of Rhodesia, while the Soviet Union has been supporting the opposition movements.

The committee will include representatives from the government of Pakistan, the United States, and the United Nations, and will be chaired by a representative from each country.

**Demands continue for probe of latest Israeli party scandal**

**TESS, Israeli (AP) —** Demands for a full-scale investigation into the scandal involving Labor Party leaders continue Thursday despite Prime Minister Golda Meir's promise that "there will be no investigation of the Labor Party for as long as I am premier." The statement was made at a meeting of the Labor Party's Central Committee.

The announcement came after the Labor Party's Central Committee, after a closed-door session, reaffirmed its support for Meir's decision to end the investigation into the Labor Party's activities.

The move follows last week's resignation of Labor Party leader Yitzhak Rabin, who said he could no longer support Meir's decision to end the investigation.

Rabin's resignation came after a Labor Party conference, which had been called to investigate the activities of the Labor Party's governing bodies.

**Bacteria linked to Legionnaires disease**

**PEORIA, Ill. (AP) —** Researchers have found a tentative link between a specific bacterial species and an outbreak of Legionnaires disease that killed 29 persons in 1977 in southern Illinois.

Dr. William O. Schaffner, a University of Tennessee law professor, said Thursday that there is a "good deal of evidence" to support the theory that the bacteria is linked to the outbreak.

The bacteria, called *Legionella pneumophila*, has been linked to several outbreaks of pneumonia and other respiratory illnesses.

**Distilleries plan metric conversion**

**LOUISVILLE, Ky. (AP) —** The 1979-80 distilling program in Kentucky is relying on a new system of weights, which is expected to bring about a shift toward metric units.

The system is based on the United States Metric System, which is gaining acceptance in the beverage industry.

**Safety act deemed unenforceable**

**LANING (AP) —** State Labor Director Keith Wall told the Michigan House of Representatives on Monday that the state's new safety act is "a failure." He said the act is "too weak" to be enforced and that the state's safety inspectors are "overburdened." He also said that the act is "too expensive" to enforce.

**Martin schedules special election**

**LANING (AP) —** Gov. William G. Milliken announced Wednesday that a special election will be held March 25 to fill the Senate seat held by the late Republican Sen. S.J. Kilgore. Dr. Carl P. Kilgore, the late senator's son, has been appointed to fill the seat until the special election.

Milliken also scheduled special primary elections for Feb. 3 in the 37th and 39th Senate districts. At least two Democrats are expected to battle for Kilgore's seat.

Three county prosecutors have accused a state labor inspector of engaging in "indiscriminate and unnecessary" proceedings. The inspectors have accused the state of "improper conduct" and of "misusing" the state's power to regulate employers. The inspectors have also been accused of "unfair" and "unlawful" actions. The inspectors have asked the state to "reconsider" the matter and to "vacate" the state's orders.

The inspectors have asked the state to "reconsider" the matter and to "vacate" the state's orders.

*Michigan State News, East Lansing, Michigan*
STAFF LATINO STUDENTS WORK TO IMPROVE MACHINERY AT JMC

Two Latin-American students are working to improve machinery at JMC in hopes of creating a new opportunity for Mexican and other Latin-American students in the future.

The students, who are junior transfers from the University of Michigan, are working on a project to improve the efficiency of the machinery at JMC.

As part of their work, the students are studying the existing machinery and identifying areas for improvement.

They are also working to develop a new design for the machinery that would be more efficient and cost-effective.

The students hope that their work will help to improve the overall operation of the machinery at JMC and provide a new opportunity for Latin-American students in the future.

The project is expected to be completed by the end of the semester, and the students hope to present their findings to the management of JMC.

They believe that their work could help to create new opportunities for Latin-American students in the future and contribute to the overall success of the college.

The students are working closely with the faculty and staff at JMC to ensure that their work meets the needs of the college and its students.

They are also hoping to receive feedback from other students and faculty to improve their work and make any necessary adjustments.

The students hope that their work will be a positive contribution to the college and help to create a more inclusive environment for all students.

They believe that their work could have a significant impact on the future of JMC and help to create new opportunities for Latin-American students in the future.

The students are working hard to complete their project and hope to see positive results in the future.

They are grateful for the support and encouragement they have received from the faculty and staff at JMC.

They hope that their work will help to create a more inclusive and diverse environment for all students.

The students are looking forward to the future and are excited to see what their work will bring to JMC and the Latin-American community.

They believe that their work is an important step towards creating a more inclusive and diverse environment at JMC and hope to see positive results in the future.

They are working hard to complete their project and hope to see positive results in the future.

They are grateful for the support and encouragement they have received from the faculty and staff at JMC.

Residential college extinction: outrageous

If you can cope: boycott coffee

Shameful

Though I tried college quite a distance away, I have many opportunities to visit MSU, but the many friends that I have are increasingly obvious to me, and I am saddened that the students at MSU are incredibly passive. When we were a part of other schools, I knew the University very, very well and was a generally successful student, but the girls there now are certain to be like diffused in a bowl.

Many of the students at JMU have said that the residential college is a place of growth and development. If this is true, why are they leaving? It seems to me that if the residential college is the place of growth and development, then why are they leaving? It seems to me that if the residential college is the place of growth and development, then why are they leaving?

Further complicating the issue is the fact that the Jim Bryant Administration has made it clear that the residential college will be closed by 1978. This is a clear indication that the residential college is not the place of growth and development that it is said to be.

Sensible

Now that the residential college is being closed, it is time to consider what we can do to prevent the loss of the residential college.

The first step is to organize a boycott of the residential college. This boycott will be aimed at forcing the administration to reverse its decision.

Secondly, we need to work with the faculty to ensure that the residential college is not closed.

Thirdly, we need to work with the state legislature to ensure that the residential college is not closed.

If we do these things, we can prevent the loss of the residential college and ensure that it continues to be a place of growth and development.

Econo-crime capers—punishment bewildering

The holdup of Hannibal is but one of the many cases of econo-crime that have been committed in recent years. These crimes are not only a threat to the economy, but also a threat to the public safety.

As a member of the faculty, I am deeply concerned about the econo-crime that is taking place.

The police and the FBI have been unable to apprehend the econo-criminals, and the states have been unable to prosecute them.

The econo-crime is not only a threat to the economy, but also a threat to the public safety. The econo-criminals are not only taking money from the economy, but also taking lives.

In conclusion, the econo-crime is a serious problem that needs to be addressed.

Viewpoint: Indians

Americans’ survival threatened

In 1975, the U.S. government had a policy of forced removal of Native Americans from their lands. This policy was called the Indian Removal Act, and it was passed in 1830. The policy was based on the idea that Native Americans were a threat to the white settlers and that they should be removed from their lands.

This policy was disastrous for Native Americans. They were forced to leave their homes, their lands, and their communities. Many died on the journey, and many more died once they reached their new homes.

The policy of forced removal continued throughout the 19th century. It was used to remove Native Americans from their ancestral lands in the West and the South.

Today, the policy of forced removal continues. It is used to remove Native Americans from their lands in the Americas. It is used to remove Native Americans from their lands in the Americas. It is used to remove Native Americans from their lands in the Americas. It is used to remove Native Americans from their lands in the Americas.

In conclusion, the policy of forced removal is an ongoing threat to the survival of Native Americans. It is time for the U.S. government to stop forcing Native Americans to leave their lands.

Correction

In my previous article, I stated that Native Americans were a threat to the white settlers and that they should be removed from their lands. This statement is misleading.

Native Americans are not a threat to the white settlers. They are a part of the American history and culture.

In conclusion, Native Americans are not a threat to the white settlers. They are a part of the American history and culture.

The following is the corrected version of my previous article:

In 1975, the U.S. government had a policy of forced removal of Native Americans from their lands. This policy was called the Indian Removal Act, and it was passed in 1830. The policy was based on the idea that Native Americans were a part of the American history and culture.

This policy was disastrous for Native Americans. They were forced to leave their homes, their lands, and their communities. Many died on the journey, and many more died once they reached their new homes.

The policy of forced removal continued throughout the 19th century. It was used to remove Native Americans from their ancestral lands in the West and the South.

Today, the policy of forced removal continues. It is used to remove Native Americans from their lands in the Americas. It is used to remove Native Americans from their lands in the Americas. It is used to remove Native Americans from their lands in the Americas. It is used to remove Native Americans from their lands in the Americas.

In conclusion, the policy of forced removal is an ongoing threat to the survival of Native Americans. It is time for the U.S. government to stop forcing Native Americans to leave their lands.
tax forms assistance available

at Lansing's Treasury Building

BY STEWART

Great practical advice is on tap with the spirit and cheer of the new year coming the way of the Lansing American tax form assistance and is free of charge. But, this year, with the change in law, the help is not as readily available and it is free of charge.

People may obtain assistance with their Michigan forms at the Lansing's Treasury Building, Monday through Friday, from 8 a.m. to 4:30 p.m. Those who are unable to visit the office may phone 334-5800 for assistance from the Treasury Building's office.

Individuals with federal forms are assisted the same way, Monday through Friday, from 8 a.m. to 4:30 p.m.

In addition, there are several places that you can obtain assistance. The Lansing Public Library, 175 Trowbridge, Lansing, and the Federal Building are open on weekends with limited hours. The IRS office is open Monday through Friday from 8 a.m. to 4:30 p.m.

There is a difference!

Students Pay by Increased Room, Board Rates

Cost of dormitory tableware ripoffs high

By MICHAEL JAMES
State News Staff Writer

Despite the warnings that while they receive "free" table service from the dormitory caterers, they are paying for it in the long run.

In 1976 lunch fees from breaking and melting of dormitory tableware, which cost $49,000, which is passed on to students in the form of increased room and board.

"The students may not see it but, while the dormitory is consumed properly, we still have to cover our expenses and they are passed on to the students," said Smith, director of food services for the dormitories.

Counting the ripoffs of dormitory tableware have been impossible, administrators said.

"There is no a whole lot we can do," said Smith. Unauthorized, unreported table damage, such as these that could be done to a student's room then inspected and noted.

"Understand the thefts are usually small. They are still a small amount, which we consider as an additional cost that has to be covered by the people who buy food," said Smith. "The best figure we have over $50,000 worth of tableware, which amounts to roughly $12 for each student, which is an astronomical amount of money." The thefts were over a dozen, usually smaller dishes and silver cups.

"It would be considered a cost of dining business and we were 7 million dollars worth of goods a year in that cost may not be all that big," said Smith.

Several dormitories have been using aluminum foil and sheets instead of glass and china to prevent the purpose of taking out the worthless, but the dorm board and campus areas are the best methods to deter the thefts, despite apparent inefficience.

The city of Lansing is increasing room and board costs for students at Michigan State University, starting in the fall semester.

"It is a difficult task to determine how much is lost through breakage and how much from theft," Smith said. "However, the thefts are considered large because the breakage is difficult to break and the students do not realize this." The breakage is always at an astronomical amount of money, which is an astronomical amount of money.

"We try to control the stealing but it is extremely difficult," Smith said. "There is no way to determine who is doing it." The idea is to use the students on the meal plans to deter the thefts, despite apparent inefficiency.

HEWLETT-PACKARD CALCULATORS

WE'VE GOT WHAT YOU NEED!

THE HP 21

The great Hewlett-Packard Scientific Pocket Calculator.

Uncompromising quality at only $80.00

Now you can own a Hewlett-Packard scientific pocket calculator at a popular price—with traditional HP performance and quality. The remarkable new HP-21 gives you all these features:

- A true scientific calculator with 42 pre-programmed functions and operations, including rectangular/polar coordinate conversion, vector arithmetic, common log and antilog, and two trig operating modes.
- Full display formatting. You can choose between fixed-decimal or scientific notation with display rounded to desired number of decimal places.
- HP's error-sensing RPN logic system with 4-memory stack. You solve all problems your own way—without copying parentheses, worrying about hierarchies of re-structuring beforehand.
- HP quality craftsmanship. One reason Nobel Laureate, automotive, Electronic, and 750,000 other professionals own and depend on HP calculators.
- Smaller size. Weighs only 6 ounces.

See the new HP-21 scientific pocket calculator today. Come in and try it! We're amazed at the high performance you can take home for

only $80.00

Hewlett-Packard's scientifcally programmable calculator

THE HP 25

Hewlett-Packard's scientifcally programmable calculator

THE HP 25

The new HP 25 gives you keystroke programmability at a remarkable price-performance ratio—without the same programming design and quality that go into every Hewlett-Packard pocket calculator, regardless of price.

72 built-in functions and operations.

All log and trig functions, the latter in radians and degrees; rectangular/polar conversion; common log, hyperbolic.

Keystroke programmability.

The automatic answer to repetitive problems, switch to RPN and enter the same keystrokes you would use to solve the problem manually. Then switch to RPN and solve the entire formula with a single key.

Full editing capability.

You can review and quickly add or change steps.

Branching and conditional test capability.

Eight built-in logic comparators let you specify complex branching.

8 addressable memories.

You can fill registers with arithmetic on all eight.

Fixed decimal and scientific notation plus engineering notation.

Which displays powers of ten in multiples of three. The keys work with easily readable numbers—e.g., 3.75 X 10^4 is displayed as 3.75E+04.

RPN logic system with 4-memory stack.

A new and more powerful memory stack allows you to work without copying parentheses, worrying about hierarchies of re-structuring beforehand. You have keyboards, time-saving memories, and automatic backout.
Eagles dive, Jade Warrior exults

with another long-winded and
boringly banal track, "The
Long Road," Jade Warrior have
abandoned that search elsewhere
for much deeper and
outstanding poetic

and rejuvinated with slick, fresh
production, harmonizing on the
whole. The track "Walsh says,
"John and Larry are back.
Again, an exception to the
rule, this track is not an excerpt
from hits, their producer Bill
Szymczyk has a lot to do with
this. Maybe he is the guilty
party because some of the
qualities that were evident in the
album were not present when heard in
concert. "Hotel California," will
whelm many.

Before Sound Guard, the only way to prevent
your records from wearing out was not to play them.

The villain behind this
destruction is friction. If a
diamond cuts through steel,you can imagine what a
diamond stylus does to vinyl records. Fortunately, from
outer space has come a solu-
tion to record degradation.
It's called Sound Guard. A
by product of re-
search into dry lubricants
for aerospace applications, Sound Guard record
preservative puts a micro-
scopically thin thin film on
the grooves from damage. Yet,
remarkably, it does not
degrade fidelity.

With Sound Guard

- Provides natural protection
- Does not degrade fidelity
- Available in aerosol or liquid

If you've played any
of your records often enough, you've
most likely experienced it.

With Sound Guard, you can
enjoy your favorite records
without fear of degradation.

Milliken blasted for vetoing bill

Speaker of the House Bobby Crim, D-Davison, agreed with Plawecki that the veto meant a setback for reform. Crim said the bill, in the long run, would result in substantial improvements in the entire workers' compensation system by giving better data on "just what is happening with the system."

The critics each noted that Milliken had pledged to support reform legislation. In response, Milliken said the bill attempted to deal with the problems but did not go far enough.

"I will again offer a balanced reform package in the next session of the legislature in the sincere hope we can reach agreement and a solution to this complex problem," he said. "Until we achieve balanced and equitable reform, I will continue to veto piecemeal proposals."

MSU gymnasts to face dangerous Kent squad

By BEN DUFFY

MSU News Service Writer

The University's women's gymnastics team will have a new look this season after losing several important members of last year's conference champions.

Sue Lagerkvist, Jennifer Sevenson and Sue Breslin have declared their intention to compete in the upcoming season, and Megan Twombly is expected to return.

With the departure of these four athletes, MSU's gymnastics team will be forced to rely on younger members to fill their roles.

Younger members will be required to step up and contribute to the team's success.

The team's success will depend on the ability of the younger athletes to rise up and fill the void left by the departing seniors.

MSU gymnastics will face a challenging season as they strive to maintain their conference championship status.

The team will have to work hard to compete with the top teams in the conference and prove that they can still be a force to be reckoned with.

The season will be full of opportunities for both improvement and growth.

It will be a season of both challenges and triumphs as the team faces the road ahead.

The team's determination and hard work will be tested throughout the season, but their dedication to each other and their sport will be what propels them forward.

The team will have to rely on their resilience and strength to overcome any obstacles that come their way.

Their success will depend on their ability to work together and support each other as they strive to achieve their goals.

The season will be a time of growth and development for the team, as they learn from each other and build on their experiences.

The season will also be a time of celebration as the team celebrates their achievements and milestones.

The team's dedication and hard work will be honored and appreciated, as they strive to reach new heights and make a name for themselves in the conference.

The season will be a time of joy and accomplishment as the team works together to achieve their goals and make a lasting impact on the conference and beyond.
License renewal hearings will resume

By GEORGE RANKIN
Chicago Tribune

NEW HAVEN — The Federal Communications Commission (FCC) has ordered a public hearing to be held in New Haven, Connecticut, on Tuesday, Jan. 7, 1975, to consider renewing the license of WJIM, a radio station owned by Beefsteak, Inc., a subsidiary of the Shulman Group. The hearing is scheduled to begin at 10:00 a.m. and will continue until 5:00 p.m.

The hearing will be held at the New Haven City Hall, located at 123 Church Street. The hearing is open to the public and will be broadcast live on local television stations.

It is anticipated that the hearing will last for several days and will be attended by representatives of WJIM, Beefsteak, Inc., and other interested parties. The hearing will be conducted by the FCC's Bureau of Media, which is responsible for granting and revoking radio station licenses.

The hearing is being held to allow the FCC to consider whether to renew WJIM's license for another three-year period. WJIM's license expired on June 30, 1974, and the station has been off the air since that time.

The hearing will be conducted by a three-member panel of the FCC, and the decision of the panel will be binding on the FCC.

The hearing is expected to be a prolonged and complex process, and it is anticipated that the FCC will issue a ruling on the renewal of WJIM's license several months after the hearing.

In addition to the hearing, a public comment period will be held prior to the hearing to allow interested parties to submit written comments on the matter. Interested parties may submit comments up to 10 days prior to the hearing.

The hearing is being conducted in accordance with the provisions of the Communications Act of 1934, which requires the FCC to grant licenses on a competitive basis and to renew licenses only if the licensee is in compliance with the provisions of the law.

The hearing is expected to be a highly publicized event, and it is anticipated that it will attract a large number of media outlets and members of the public.

The hearing is a key step in the licensing process, and it is anticipated that the outcome of the hearing will have a significant impact on the future of WJIM and the radio industry in general.
**Arrests of book thieves increasing**

Police said the recent number of thefts, which have occurred at both bookstores and on campus, has increased.

In the past week, the MSU bookstore and the MSU library have each reported several instances of book theft.

The problem is that thieves are not just taking whole books, but also individual pages, and police cannot easily identify the books themselves.

At least three cases of book theft were reported last week, and police are investigating.

**Doctor makes 'cave call'**

Dr. Smith, a local pediatrician, was making a house call on Monday night when he noticed something strange in the basement.

As he descended the stairs, he heard a faint sound coming from the crawlspace.

When he打开了 the door, he found a small child trapped in a hole.

Fire station comes off back burner

By MICHAEL ROSS
State/Local News Writer

Bonding for a new fire station in East Lansing has been given a boost in recent weeks by two local foundations, the Greater Lansing Community Foundation and the Great Lakes Capital Improvements Program.

The fire station project, which would build a new fire station to replace the existing fire station on Southfield Road, has been in the works for several years. The city council had previously considered the project, but it was put on hold due to budget constraints.

However, with the recent foundation contributions, the project is moving forward. City officials are now working with the architects to finalize plans for the new station.

The new station will include state-of-the-art equipment and facilities, and it will be designed to meet the needs of the city's growing population.

The project is expected to be completed by the end of the year, and it is anticipated that the new station will improve response times and enhance public safety in the area.

In other news, the city council is considering a proposal to update the city's water system. The proposal includes funding for the installation of new water lines and the replacement of old water mains.

The council is expected to vote on the proposal at its next meeting, and if approved, the project will begin immediately.

The city is committed to improving its infrastructure to meet the needs of its residents. With the recent contributions from local foundations, the city is in a better position to move forward with these important projects.
