British transition proposals fail

President Carter considering boost in NATO contributions, Mondale tells alliance officials

By JAMES GERTZEN
Associated Press Writer

NORTH YORK, England — President Carter is considering boosting U.S. contributions to the North Atlantic Treaty Organization to make up for the cutbacks in defense spending that occurred during his presidency, U.S. officials told the Associated Press.

The officials, who spoke on condition of anonymity, said Carter is considering increasing the U.S. contribution to NATO to $2 billion annually, a $1 billion increase from the current level of $1.5 billion.

The officials said Carter is expected to announce his decision in the coming weeks.

British Prime Minister Harold Wilson is expected to meet with Carter later this week to discuss the matter.

Carter's decision is seen as a significant step in the efforts to strengthen NATO's defense capabilities and to deter any potential threat from the Soviet Union.

However, the officials cautioned that the increase in funding is not expected to be immediate and would require approval from Congress.

The officials said that the proposed increase would be used to fund additional defense spending, including the purchase of new equipment and the development of new technologies.

The officials also noted that the increase would be in line with the recommendations of the recent review of NATO's defense capabilities.
PLANS REVIEW OF GASOLINE CONTROLS

Carter reverses Ford's order

WASHINGTON (AP) - President Carter has called on Congress to reject his energy program, an action that would reduce national gasoline supplies by 10 percent.

Carter said his energy program is needed to reduce inflation and stabilize inflation, and to provide a margin of safety against future oil shocks.

The program, which Carter said he would sign today, would reduce gasoline supplies by 10 percent and cut oil consumption by 15 percent.

"This is a necessary step," Carter said. "We must reduce our dependence on foreign oil and act now to ensure our energy security."
SATELLITE SYSTEM PROVIDES VARIETY

WKAR to increase programming

By MICHAEL BAVEL
State News Staff Writer

WKAR, the public television station for the Lansing area, will be replacing its current on-air system with a new satellite system. The channel will feature a variety of programming, including local and national news, educational programs, and cultural events.

The new system will be implemented by the Public Broadcasting System (PBS) and will replace the current system, which has been in use since 1979. The new system will allow WKAR to expand its programming and provide a wider range of educational and cultural content.

The new system will feature improved signal delivery, allowing for clearer and more reliable broadcasts. It will also provide greater flexibility in programming, allowing WKAR to offer a wider range of content to its audience.

The station is expected to begin broadcasting with the new system in early 2023, and will continue to offer a variety of programs, including educational series, news programming, and cultural events. The new system is expected to improve the overall quality and reliability of WKAR's broadcasts, providing a better viewing experience for its audience.

Serious?

We enjoyed the tangible-in-care article Thursday about CAT's board meeting. We think we could have used the article to find out if the 134 million they want to spend on the new building makes sense. In the meantime, the State Board of Education has authorized a study of the campus's debt situation. Wouldn't it be nice if they could start charging tuition like they do in a lot of other universities? For the 134 million? 

Jim Smith Student Union

Dear Editor,

I was very impressed with your article about the women's strike on the UCLA campus. It is important that women be treated fairly and equally in all aspects of life, and I believe that this strike was a step in the right direction. Thank you for covering this important issue.

Sincerely,

[Signature]

Dear Editor,

I was very disappointed to read the article about the recent election results in our college. The voting process seemed unfair, and I believe that the results were not representative of the students' true opinions. I urge the administration to take steps to ensure that future elections are conducted fairly and accurately.

Sincerely,

[Signature]

Dear Editor,

I wanted to express my support for the recent efforts to promote diversity and inclusion on our campus. I believe that it is crucial for our institution to reflect the diverse communities that we serve, and I hope that we can continue to make progress in this area.

Sincerely,

[Signature]

Dear Editor,

I was concerned to read about the recent incident involving the treatment of students by the campus security. It is important that students feel safe and respected on campus, and I hope that the administration can take steps to address this issue.

"Dirty Harry" is back, and drier than ever. In "The Enforcer," Clint Eastwood reprises the role made famous in "Dirty Harry," and the film opens after another round of law enforcement versus organized crime.

From the opening scene, Eastwood's "Harry" is a man of few words, and a man of action. He takes on a new case, and his methods are as brutal as ever. The film is a graphic portrayal of violence and law enforcement.

The plot follows Eastwood's "Harry" as he takes on a new case, and the film is a graphic portrayal of violence and law enforcement. It is a film that is not for the faint of heart, but for those who enjoy action-packed thrillers, it is a must-see.

The film is directed by Don Siegel, who has directed some of the most iconic action films of all time. Eastwood's performance is as mesmerizing as ever, and the film is a testament to his talent as an actor.

Overall, "The Enforcer" is a film that will appeal to fans of action-thrillers. It is a film that is not for the faint of heart, but for those who enjoy action-packed thrillers, it is a must-see.
Vitamin’s pros, cons reported

By JUSTICELIPPON
San Jose News Half Pint

In recent years, vitamin E has received a great deal of public attention. The vitamin is believed to have many beneficial properties, including its role in preventing heart conditions, regulating the aging process, and increasing sexual potency.

A report released this month by the Institute for Food Technologists (IFT) Expert Panel on Food Safety and Nutrition evaluated some of these claims, and concluded that there may not be enough scientific evidence to support the idea that vitamin E is as beneficial as has been claimed.

"We can’t say people should not take vitamin E if it works for them," says William W. Martin, president of the Institute.

The IFT report points out that the claims of vitamin E being beneficial in preventing heart disease, reducing the risk of cancer, and increasing sexual potency are based on limited scientific evidence.

In other cases, the report says, "The body has never seen a clinically defined case of vitamin E deficiency except when vitamin E was used in the laboratory experiments." The report concludes that "Many scientists believe that the vitamin E in foods and supplements is not enough for the body to function properly, and that vitamin E is therefore not necessary for maintaining health." However, the report states that the benefits of vitamin E are not yet clearly established and that more research is needed to determine if vitamin E is beneficial for human health.

In the meantime, it is important to remember that a well-balanced diet is the best way to ensure adequate intake of all nutrients, including vitamin E. This includes consuming a variety of fruits, vegetables, and whole grains.

Your last 2 years of college can be your first 2 years of management.

This summer, you can begin 2 years of management education to complement your college degree program. This spring, participate in a position of instant management responsibility. As an officer in the Army ROTC or Reserve Officers’ Training Corps (ROTC) program, you will be selected by your Army Reserve Officers’ Training Corps (ROTC) advisor to be a management officer who will have duties and responsibilities specific to the military. This will include, but not be limited to, managing personnel, budgeting, and other management-related tasks.

Armed forces officers receive a competitive salary, health benefits, and other benefits such as education assistance and paid time off. You will also have the opportunity to serve as a peacekeeper and to help build a better world for everyone.

The Army ROTC is the nation’s largest university-affiliated program, with over 100,000 students enrolled in ROTC programs across the country. You will gain valuable leadership skills and will be prepared for a career in the military or in the civilian workforce.

For more information about the Army ROTC, please visit their website at www. army. mil/ROTC.

Kids compute with aid of calculators

By PATRICIA LEVIN, State News Staff Writer

Computers as life-sized calculators seem to be the dream of many schoolchildren today. But calculators are already a part of the educational process in some schools.

The trend may be growing closer to becoming reality in some schools in Lansing as teachers in the three public school districts are experimenting with the use of calculators in the classroom.

The largest of the three districts, the Lansing Public Schools, has 11 of its 20 high schools using calculators. The district is still trying to decide if the program is viable, but some teachers have seen much success.

The first large-scale calculator program in the Lansing Public Schools was started in 1973 by the mathematics department.

At first, the calculators were used only in advanced mathematics classes. However, mathematics instructors in both senior high schools and some junior high schools are using calculators as a teaching tool.

The calculators are being used to teach the students how to use calculators and to solve problems that cannot be solved easily by hand.

Once the students become proficient in using the calculators, they are required to use them in their mathematics classes.

The students are also required to use the calculators in their problem-solving exercises, which are used to evaluate their understanding of the concepts taught in the classroom.

The calculators are also used to teach the students about the basics of computer programming.

The calculators are programmed with simple programs to teach the students about the basics of computer programming, such as input, output, and error handling.

The calculators are also used to teach the students about the basics of computer hardware, such as memory, processing, and input/output devices.

In addition to the mathematics classes, the calculators are also being used in other classes, such as science, economics, and business classes.

The calculators are also being used to teach the students about the basics of computer software, such as programming languages and operating systems.

The calculators are also being used to teach the students about the basics of computer networks, such as the Internet, and the basics of computer security, such as encryption and authentication.

SU encourages generic drugs

A British research council has reported a survey indicating that the use of generics could save the NHS £14 million over the next three years. The survey, conducted by the Royal Society of Medicine, found that the widespread use of generic drugs could save the NHS significant amounts of money. The council recommends that the NHS should encourage the use of generic drugs to improve patient care and reduce costs.

Listen To Tech HiFi's Return Policy:

(It takes the risk out of buying stereo.)

Tech HiFi is the safest place to buy stereo. The reason is our unique return policy.

Here's how it works. Let's say you buy a stereo system that sounded great in the showroom, but it doesn't sound so great when you play it at home.

(Because of the difference in room acoustics, this could happen to you.)

Tech HiFi will give you an entire week at home with your new equipment to decide if it sounds as good as you expected. If you're not totally pleased, you can bring it back for a full refund.

Even if you come to the conclusion that the color of the loudspeaker grillcloths clashes with your drapes, you can return the speakers for a full refund!

We'll also accept your equipment back if you find another store selling it for less within one week after your purchase (we're pretty confident of our low prices).

In Tech HiFi's experience as a stereo specialist, we've found that some people change their minds after a couple of months, wishing they had bought a more powerful receiver, or different speakers. So we have a return policy that allows you to trade in your components within three months for 100% credit towards the manufacturers' suggested retail prices on any new equipment.

And our return policy also protects you against defects. If anything goes wrong with any component within 60 days, we'll either repair it for free in three working days, or give you a new unit.

What Tech HiFi's return policy adds up to is this:

No sale is final until seven days have gone by. Within that time, we will refund your money if you are dissatisfied for any reason whatsoever. And, even after the sale is final, our return policy allows you to trade up, or to have repairs done.

All of this we put in writing, right on your sales slip.

So why risk buying stereo somewhere else?
