Cold 'nuf for ya?

By PETER FOSTER

The absence of rain and the cool temperatures recently experienced by Lansing brought the need for a heavy blanket and a hot cup of cocoa.

New gasoline prices in New York state were lower than in more than the 100,000 miles traveled around the state.

The gas price of $1.80 per gallon at Regular and High was cut to $1.50 per gallon for the coming week.

The new price is the same price as the price in the state's city of New York State.

In New York City, the price of gasoline at $1.75 per gallon for the coming week.

In New Jersey, the price at $1.25 per gallon for the coming week.

In New York City, the price of gasoline at $1.25 per gallon for the coming week.

Brake fails on ski lift, six skiers hospitalized

Hankow, Mass. (AP) — A ski lift went out of control Sunday at a New Hampshire ski resort, sending six skiers to hospital with injuries. Five were in serious condition, according to a resort official. The ski lift was at the top of a hill, and the skiers were thrown from the ski lift when it stopped.

Dr. Henry H. Heisch, a cocoa specialist, was among those injured. Heisch, who had been a cocoa specialist for the U.S. Department of Agriculture, was killed when the lift stopped.

A spokesperson for the resort said that the lift had been operating properly, but that the skiers were not wearing safety helmets.

The incident occurred on Saturday at the Mountain Top Resort in New Hampshire. The ski lift was operating at full capacity, with about 50 skiers riding it at the time of the accident.

The lifts at the resort had been operating for several years without incident, according to the spokesperson.

Bombs carried by Gaddafi followers, volunteers in London may have been involved in an attempt to shield Libyan rebels from British troops in Libya, sources reported Sunday.

One unexplained bomb blast the afternoon before the March 17 fatal bombing in London may have been triggered by Gaddafi's forces, and the same had been used in earlier bombings in London, including the March 17 operation, sources said.

Twelve bombs, five of them incendiary, were reportedly set off in a row of taverns on Manchester Road in the early-Morning hours in the United States, one of the main watering holes of a British shopping district.

Mondale arrives in Japan

JAPAN: Vice President Walter Mondale, making his first stop on his 17-nation tour, arrived here Sunday to visit Japan's Prime Minister Yasuhiro Nakasone for talks, according to a government official.

Prisoner hunger strike

TEL AVIV: Arab prisoners in Israel today ended a hunger strike which lasted more than a month, prison officials and spokesmen said.

About 40,000 striking prisoners had demanded changes in the conditions of their confinement, including less crowded cells, a shorter time in the prisonlike hospital, and more frequent visits from family. The Red Cross had supported some of the demands.

A prison spokesperson said prisoners were allowed to return to their cells.

Zambian seeks Western support

USAKA: Zambian Foreign Minister Kenneth Kaunda of Zambia today asked British and U.S. leaders for financial aid to help the country ease its financial crisis.

The British government is considering a request from Zambia for financial assistance to help the country recover from the effects of the recent drought and the resulting food shortages.

The government has announced that it will provide aid to help Zambia recover from the effects of the recent drought and the resulting food shortages.

Phosphate ban long overdue

Legislation that would improve the quality of water in Michigan is long overdue.

Two bills that would reduce the phosphorus content in laundry detergent, have been introduced in the Michigan Legislature, but only one bill is necessary.

The main intent of both bills is the same — to prohibit the sale or distribution of laundry detergents and other water conditions that contain phosphates in excess of zero per cent by weight except for those that contain incidental to manufacturing that does not exceed 0.5 per cent.

The sponsors of both bills admit that the bills have the same intent and only contain some very minor differences. These differences might be worked out so that both bills legislation is not shifted in minor things.

One of the bills, introduced by Rep. Bud, Busey, R-Detroit Heights, would allow detergents with 0.5 per cent phosphorus content to be used in medical facilities and in places where food is processed.

The first bill, sponsored by Rep. Luecle McCooling, D-Detroit, does not contain this exception. However, she said such an exception may be included in her bill after a public hearing held on Feb. 17.

Phosphates cause an acceleration of the aging process of lake water by increasing the growth of algae and other aquatic plants. This causes the taste and odor of water to change and surface slick forms on lakes.

New York and Indiana have phosphate bans for over three years. Changes have banned it since 1975 and Minnesota banned it just over a year ago.

Critics of the proposed phosphate ban, such as the Soap and Detergent Association (SDA), are concerned that residents would suffer a cost increase because they would have to wash their clothes more often, use more laundry additives and repair their washing machines more often.

McCallough said this, however, that she does not think there is any substance to that argument. She said this is "only an excess and a very poor excuse at that."

But if a cost increase does occur, then it is questionable whether it would be worthwhile if it means an improvement in the quality of our water.

The idea of reducing the amount of phosphate in laundry detergents is supported by the Department of Natural Resources, the U.S. Environmental Protection Agency, the West Michigan Environmental Action Council, the League of Women Voters, the Sierra Club and the Michigan Underground Conservation Clubs.

We look forward to this proposed legislation becoming law soon because the declining quality of our water involves high stakes.

Carter proves he can walk, chew gum too

WASHINGTON — Everyone is wuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuhuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuuu

MSU medical students staff health clinic

The Student Health Center has expanded its hours of service to accommodate the increased number of students seeking medical attention. The extended hours are made possible by the contributions of medical students who volunteer their time.

Korea tried to bribe Congress, former embassy attache says

A former Korean ambassador to the United States has revealed that his country tried to bribe members of Congress in the 1970s. Lee Yong-ryeol, a former ambassador, said that he offered to pay Congress members to support Korean interests in the region.

Fire ants winning pest battle

The fire ant, an invasive species from South America, is quickly spreading throughout the United States. These ants pose a significant threat to human health and the environment. The battle against fire ants is ongoing, and scientists are working to develop effective control strategies.

Union leaders to attend occupational health meet

Representatives from various labor unions will attend a national conference on occupational health. The conference will focus on workplace health and safety, and the role of unions in protecting workers' rights.

Theatre

"Theatre on a houseboat" is a unique performance event taking place on a houseboat docked in a local marina. The performance features a mix of traditional theatre and unconventional settings, creating a unique and entertaining experience for audience members.
WOMEN EMPLOYED IN HIGH DEMAND

Engineering opportunities abound

By KATHY HEBRACH

Despite a general belief that women are not encouraged to enter or to succeed in engineering, women are increasingly finding opportunities in the field.

The average weekly pay for a male engineer is $14,000, while the average weekly pay for a female engineer is $10,300. This is significant because it is the first time in history that the average weekly pay for women engineers has exceeded the average weekly pay for men engineers.

The percentage of women engineers has increased significantly over the past few decades. According to the National Center for Education Statistics, the percentage of women earning degrees in engineering increased from 15% in 1980 to 35% in 2018.

Many women engineers are finding success in their careers, and they are often more highly paid than their male counterparts. This is partly due to the fact that women are often given more responsibility and opportunities for advancement.

Women also face challenges in the engineering field, such as the glass ceiling and the lack of female role models. However, these challenges are slowly being addressed, and more women are entering the field.

A survey conducted by the National Society of Professional Engineers found that 58% of women engineers believe they are paid fairly compared to their male counterparts.

Several women engineers share their experiences in the field. "I've always been interested in engineering," said one woman. "But it wasn't until I saw several women working in the field that I realized it was possible for me to have a career in engineering."}

DNA EXPERIMENTATION DEBATE RAGES ON
Research seeks to private industry

By JEREMY RIFKEN

Putting a scientific twist on new forms of life, DNA research — the subject matter of recent headlines — is now opening new fronts of the hazardous arena of genetic experimentation. In the great D.C. struggle over the future shape of biotechnology, the federal government has issued a wave of new guidelines for companies that conduct genetic research. Absent from the guidelines are three broad concepts that many scientists believe are necessary to control genetic experimentation:

- That companies should be required to develop "danger" labels for certain genetically engineered products, such as recombinant DNA
- That the government should become a "primary regulator," requiring companies to obtain licenses to conduct research with particular types of DNA
- That the government should establish a "danger" level for genetically engineered products that is based on the risks to human health

The guidelines have been described as "insufficient" by some scientists who believe they do not go far enough. The guidelines were created in the aftermath of a series of recent incidents, including the accidental release of a genetically engineered virus that could pose a threat to human health. As one scientist said, "The guidelines are a step in the right direction, but they are not enough."

The guidelines also have been criticized by some scientists who believe they are too restrictive. "The guidelines are a step in the wrong direction," said another scientist. "They are too broad, and they will inhibit scientific progress."

The guidelines are a significant step forward in the struggle to regulate genetic experimentation. They provide a framework for companies to conduct research in a way that is both safe and responsible. They also provide a basis for future regulations that will be more comprehensive and effective. However, the guidelines are not perfect, and they will need to be revised as new information becomes available.

The guidelines are an important step in the ongoing struggle to regulate genetic experimentation. They provide a framework for companies to conduct research in a way that is both safe and responsible. They also provide a basis for future regulations that will be more comprehensive and effective. The northern Michigan Wolverines were no different, but the Spartans were a bit more pleased.

As the MSU team continued to take their final victory lap around the Big Ten, the prideful MSU fans who had only just started to head for the exits began to change their minds.

The Spartans were so happy to be back in control-type, which away Friday the was in control-type. MSU's Paul Farmer was noticeably happier than he had been all afternoon.

"It was the best feeling I've had in a long time," said Farmer, who coached the Spartans to a 3-1-1 record this season. "I was really looking forward to this.

"I'm glad to see that the Spartans are finally back on top."

MSU's Matt Johnson, who scored two goals for the Spartans, agreed.

"It's great to see the Spartans back in control-type. I was really excited about this game.

"I'm glad we were able to get the win."

The Spartans had been in control-type for the past few weeks, but they finally got the win they had been looking for. MSU's Matt Johnson scored two goals for the Spartans, who now have a 3-1-1 record this season.

The Spartans were in control-type for most of the game, but they finally lost it in the last few minutes.

"I'm glad we were able to get the win," said Johnson. "It's been a long time since we've been able to get a win."

The Spartans will now need to work hard to stay in control-type and make sure they don't lose another game. They have a few more games to play, but they need to be able to get the wins they need to stay in control-type.

MSU's Matt Johnson, who scored two goals for the Spartans, agreed.

"It's great to see the Spartans back in control-type. I was really excited about this game.

Planetary extravaganza falls short of entertaining

By JOHN CASEY

Singer-Songwriter "The New World" brings down the curtain on his "History of the Universe" at the Lansing Civic Center, Thursday night. The album, and his concert, is a cold and analytical examination of the universe, but one that leaves the audience with a sense of ennui.

The concert was a part of the Lansing Civic Center's "Music in the Parks" series and included the Lansing Symphony Orchestra, the Lansing Civic Chorus and the MSU Theater Ensemble. The result was a night of music that left the audience feeling somewhat, well, numb.

The concert was a cold and analytical examination of the universe, but one that leaves the audience with a sense of ennui.

The audience, which was made up of both fans of the singer-songwriter's music and music fans in general, seemed to be somewhat underwhelmed by the performance. The music was listenable, but it was not particularly memorable. The vocals were strong, but they were not particularly engaging. The overall effect was one of a cold, analytical examination of the universe, but one that leaves the audience with a sense of ennui.

Cupid coming to ‘U’ on Valentine’s Day

By Michael Sultz, Student Correspondent

Thursday, February 14, 1974, from 6 to 9 p.m., the Lansing campus will be filled with the love of the holiday, Cupid’s arrows, and the sounds of the Lansing Symphony, which will perform their seasonal concert.

The program will include pieces from the standard romantic repertoire, such as Beethoven’s “Pastoral” Symphony and Mozart’s “ Eine kleine Nachtmusik.” The concert will be held in the MSU Auditorium, and tickets are available for $3.50 at the door or by subscription.

The Lansing Symphony Orchestra is one of the finest in the country, and their concerts are always a hit. So, whether you’re in love or not, come out to the concert and enjoy the music and the holiday spirit!
