Carter assails Cuba for moves in Africa

BY ANNE F. HOOPER

NEWARK, N.J. -- Carter assailed Cuba for moves in Africa as part of a broad speech today in which he appealed to African leaders to halt support for revolutionaries in the Third World.

Carter's speech was delivered at the 39th annual Conference of Afro-American Societies at Seton Hall University.

"I think we need to be very clear about where we are," Carter said. "It's very understandable that Cuba is trying to do something in Africa.

"But I think it's very clear that the kind of revolutionary tactics that are being used are not acceptable." Carter then outlined a series of steps he thought would be necessary to gain support for a new era of African nationalism:

First, Africa should be called upon to support the principles of the United Nations and international law.

Second, Africa should be called upon to support the principle of non-aligned nations.

Third, Africa should be called upon to support the principle of the right to self-determination.

Fourth, Africa should be called upon to support the principle of the right to development.

Fifth, Africa should be called upon to support the principle of the right to peace.

Carter then outlined a series of steps he thought would be necessary to gain support for a new era of African nationalism:

First, Africa should be called upon to support the principles of the United Nations and international law.

Second, Africa should be called upon to support the principle of non-aligned nations.

Immigrant loses U.S. citizenship

CHICAGO A.P. - Federal Judge Alan L. Kane affirmed Frank Wales of his U.S. citizenship Thursday, and granted that Wales could not renounce his citizenship, because the past 10 years "attorney general" Andrew M. Wales had renounced his citizenship. Kane ordered Ireland to pay for the legal fees that was being charged. Wales was the only person to be charged.

The action was precipitated by a decision of the U.S. Supreme Court in the U.S. on the 10th Circuit, which had found that Wales had renounced his citizenship. The court ordered Ireland to pay for the legal fees that was being charged. Wales was the only person to be charged.

Lake project begins

by W. A. REMPAPPS

East Lansing, Mich. — Local and state officials announced Tuesday the launching of a $7.5 million project to extend the Lake Center of Michigan State University to its maximum size. Michigan State President Reginald D. Cornwell and State Sen. Gerald W. Graves will be on hand at 10 a.m. to help cut the ribbon on the new facility.

The project, which began in earnest in 1974 under Governor William G. Milliken, involves the construction of new buildings and related facilities to house the university's growing population of students.

The new facility will be completed by August 1979, according to university officials. It will include a 24,000-square-foot student center, a 1,200-seat auditorium, and additional classrooms and offices.

The project was made possible through a $4.5 million appropriation from the state legislature, with the balance of the funds coming from private sources.

The project will create jobs for more than 1,000 workers, according to university officials.

The new facility will be a significant addition to the university's facilities, and will provide much-needed space for the growing student population.

The university's enrollment has increased by more than 30 percent in the past decade, and the new facility will be essential to accommodating this growth.

The project is expected to be completed on schedule, and will be a major boost to the local economy.

The new facility will be dedicated on October 10, 1979, with a full-scale celebration and dedication ceremony.

The university is grateful to the State legislature and the private sector for their support in making this project a reality.
Olin's fate questionable; if it exists, it will cost

portunity

MSU, in its continued quest not to set a community as it is a university. Its easily defined borders and array of academic, creative, and entrepreneurial endeavors give it the appearance of a small town with its own centers of activity, governmental structure and police force. But with this community feeling comes obligations to provide these services that cities citizen expect to find within walking distance. One of these is adequate health care.

The University Health Center has, for the past few years, taken the problems of Olin in the most typical manner, occasionally proposing a solution but never dealing seriously with the charged problems of poor health care and unstaffed facilities.

So it is with the same officials being lured into remedial action by the threats of state legislators looking to cut health center funding from the state's appropriation. The realities of economics, particularly at the University, dictate that if the state should carry out its threats of cutting the money to support Olin will have to come directly from the students. While state lawmakers can argue this doesn't seem to be a short-sighted ignoring the need for student health care availability, the University is, nonetheless, at their mercy. Thus, alternative to student funding for Olin are being examined, and all too hastily, and the student does not appear likely to escape the problem unscathed.

Olin's problems are not old ones that have been traced back to a faculty and administration who have resolved nothing. The problem is external to the existence of every campus health center in Michigan.

The MSU Clinical Center on the other hand, is currently used as a teaching facility with non-student on pa tients selected by the College of Medicine and Osmanhoski's Medical Proposals to make the clinical center available to students has been met with sharp, justified protest by medical faculty fearing the loss of a needed teaching field. There are two alternatives available to funding Olin if the University decides to maintain it without student - tuition money was never intended for this result, or competitive rates for it and outpatient care.

The obligation to provide students local health care, at a cost, is the University's to assume. And students, as well, must realize that they have a social responsibility and must be willing to pay for the services they desire to receive. To not operating on a cost effective system, and the care it provides is competitive rates for it and outpatient care. Thus, alternative to student funding for Olin are being examined, and all too hastily, and the student does not appear likely to escape the problem unscathed.

Jack Kerouac’s ‘Tristessa’ reissued

Kerouac's 'Tristessa' is being reissued this week. The novel, originally published in 1960, is about a young American woman who travels to Europe and becomes involved with a European revolutionary. The novel was written in a stream-of-consciousness style, and it is considered one of Kerouac's most important works. The reissue includes a new introduction by Kerouac's son, David, as well as an essay by critic Jack H. Gross.

Books

Sayles' 'Union Dues' restates miners' plight

Sayles' 'Union Dues' is a novel about the struggles of miners and their families during the early 20th century. The novel is set in the coal mines of West Virginia and follows the story of a young miner named Hobie McNatt, who is forced to leave home and take on a grueling job in order to support his family. The novel is a powerful exploration of the impact of the coal industry on the lives of the people who worked in it.

**Women preparing for nationals**

Karen E. and Joan Garret are practicing softball and preparing for nationals. The first session for nationals begins on June 18. The Department has been working on this for a long time, and now it is finally coming to fruition. MSU's women's softball leagues, such as football and basketball, are not the only sports that are being played. The cheerleading school for girls offers the cheapest in the country. The high-driving board over at the Men's IM outdoor pool is one of those which separates the men from the boys, the entrance fees from the rest. It is not visible from the oil or hair, but it is there, and it is there to keep the boys out. It's a pretty tough one to keep young boys from swimming in the oil, but it is there. The boys are instructed by coaches for the junior class; and Mike Longaker, basketball, football, and basketball, but other school sports, such as football and basketball, are not the only sports being played. MSU student must attend a meeting at the start of the school term, according to Tom Kenney. They start calling them as she sees them behind the *IM's* only woman umpire. Westerholm is the only woman umpire in the world. The *IM's* only woman umpire was playing in the oil the other day. She is a very good umpire, and she is going to be very hard to replace. She will have sixилье of six people until the end of the season. The boys are going to be very hard to replace. She has been umpiring for six years and under. Please check one. The top seniors from each of the 14 varsity teams also received citations from the Varsity Alumni S Club. The top seniors from each of the 14 varsity teams also received the Dr. James Feurig Memorial Award. The coed programs encompass both the men's and women's teams, and the boys and girls are instructed by coaches. Other varsity athletes work with each other and in the other schools. The boys are working with each other and in the other schools. The boys are working with each other and in the other schools. The boys are working with each other and in the other schools. The boys are working with each other and in the other schools.
Belmont: The last and toughest

Can Alydar catch Affirmed in final Triple Crown race?

In Hill Monhegan:
At international track in New York City, June 30, a hard
ning way past the eighth hole, Belmont Park and Long
will begin its run for a stake in the Triple Crown.

The Belmont, of New York, will carry the starting
that provides the Belmont Stakes. It has been generally
considered the toughest of all the Triple Crown races. In
years, however, the race has become more and more
popular. Today, a victory in the Belmont Stakes is consid-
ered a complete undoing, with its long straightaways,
wide turns, and the best of all—its history.

The Belmont Stakes (nee the Long Island Stakes) was
named for its origin, in the early 1800s, when the race
was held along the Long Island Sound. The race was
popular among the New Yorksporting community, and
its history is filled with memorable moments.

The Belmont is a 1 1/2 mile race, and it is run in the
month of June. It is the last of the Triple Crown races,
and its winner is considered the best three-year-old in
the country.

'Team of Four' theater program teaches kids through storytelling

By J. S. NANNINGA

The Lansing elementary school teachers have taken a new, creative approach to teaching children in their classrooms. The 'Team of Four' program, developed by John Baldwin, professor of elementary education and recreation at Michigan State University, has been in operation for several years. It is a theater and director of youth education who is behind the program's success.

Each week the team spends three days in an elementary school. They visit second, third, and fourth grade classrooms. The team is able to have a couple of days a week to follow up. They use warm-up games, improvisation, and story dramatizations, the MST for group activities, and sometimes whole-cast readings. The MST is not conserved, like the hare, if energy is wasted.

This year the Team of Four is called 'Drive A Bargain.' It's also the oldest rental agency — rental agencies. It's also the oldest rental agency — rental agencies. For a mere $6 a day you can rent a Rambler or perhaps, if the market is right, a Ford. Baldwin said. 'Drive A Bargain' is the name given to the program by the teachers. It's called Drive A Bargain.

The program is age-graded and uses interlocking stories and transitional materials. It's designed to provide an introduction to the basic concepts with the basic principles of story dramatization. The program is age-graded and uses interlocking stories and transitional materials. It's designed to provide an introduction to the basic concepts with the basic principles of story dramatization.

The program is age-graded and uses interlocking stories and transitional materials. The program's purpose is to help students in kindergarten, first through second grade, to learn how to use storytelling in the classroom. The program is age-graded and uses interlocking stories and transitional materials. It's designed to provide an introduction to the basic concepts with the basic principles of story dramatization.

'The whole point is conserving energy,' Baldwin said. 'You can't have a couple of days without some form of education.' Baldwin said. 'You can't have a couple of days without some form of education.'

Farmer asks for help

AFRICAN WEEK CONTINUES

Black labor to be topic

Grand Rapids and West Michigan farmers are teaming up with West Michigan University to present the annual African Week, a series of lectures and discussions on African issues.

The symposium will include talks on a variety of topics, including black labor and the impact of African American culture in the United States and Africa. The event will be held at the university's main campus, with lectures taking place in Miller Hall and the Bursley Memorial Library.

The symposium is open to the public and is free of charge. For more information, please contact the university's African Studies Program at (616) 331-2537.

Lesbian losing fight for custody

MICHELLE MILLER has lost her fight to win custody of her 12-year-old adopted daughter, Jillian Ziem.

Lesbian losing fight for custody

"One time Jillian came home from school, when she was quite small, and she said the children had stood up in class and said what they were going to do," Miller said. "They said, 'I cannot live a lie. I am what I am.'" Miller said her daughter adopted at age two, did not consider a gay "I said, 'Oh my God, Jillian, you're not saying anything. You just don't do that.'" She also said she was supportive of her sexuality.

"I am not going to give up," Miller said. "I have not been marched out of the state, but through the gas chambers but we're slowly losing our rights. We're not being marched. We're not being told what we can do," she said.

"I hate to disappoint them, but sexuality to me is about this kind of parent I'm proud of," Miller said, holding her fingers an inch apart.

"One doesn't regard custody of children as a matter of love but sexuality to me is about this," Miller said, "not in a way where you have to have a certain kind of parent I'm proud of." Miller discounts the importance of her sexual preference.

"I'm not going to give up," she said. "I have not been marched out of the state, but through the gas chambers but we're slowly losing our rights. We're not being marched. We're not being told what we can do," she said.
