Truckers seek public support

Many state drivers threaten strike continuation to spur federal action

The agency's nationwide survey showed a continued trend of more than 50 percent of drivers support to strike. The survey found that drivers are more likely to strike if they have received adequate training and support.

MEXICAN POT LOSES AURA

Smuggling drops

TUCSON, Ariz. (AP) — Smuggling in the once "widespread capital of the nation's illegal drug trade" has decreased over the past year, according to a new report by the U.S. Department of Homeland Security.

The report found that the number of smuggling activities in Arizona has declined by 30 percent. While the decrease is not a complete stop to smuggling, it represents a significant reduction in the number of smuggling operations.

Anthony debates on metal dollar

(AP) — Senator Walter Mondale of Minnesota today said that the only way the American economy can be saved is by sharply cutting federal spending and by making a coordinated effort to increase the dollar value of the American currency.

The senator said that the dollar value of the currency is now too low and that it must be increased to a level that will make it more competitive in international trade.

Mid-Michigan department store third to burn

NEW YORK (AP) — Fire officials said Monday that a fire that started in a Mid-Michigan department store this morning is not expected to cause any further damage.

The fire started in the third floor of the store and was contained to that level. There were no reports of injuries from the fire, and a Mid-Michigan department store in the same area was not affected.

The fire, which started in the third floor of the store, was extinguished by fire officials and there were no reports of injuries.
Grant eligibility requirements expanded

By BESS MINASSIAN
State News Staff Writer

Another federal grant may be in the offing for Muskegon, which would add to the list of grants under new regulations published by the Department of Health, Education, and Welfare.

The regulations will allow for additional government assistance to reorganize schools, which may enable Muskegon to secure grants under new regulations published by the Department of Health, Education, and Welfare.

The changes liberalize eligibility requirements for "U" students by providing more specific determinations of a student's financial need. The 

Independent "U" students affected by liberalization

The change is the regulation allowing the arrangement to be determined by the student's financial aid officer. The new regulations are designed to provide for a more equitable distribution of financial aid to students.

The change also applies to students seeking employment in the federal government. The new regulations will allow for a greater number of students to be eligible for financial aid.

OER, which offers financial assistance, such as loans and scholarships, to students seeking employment in the federal government, will be implemented under the new regulations.

The changes allow for a greater number of students to be eligible for financial aid and will be implemented under the new regulations.

The state's education agencies have been notified of the new regulations and will be working on details in the coming weeks.

MAIL FRAUD, CONSPIRACY CHARGED

Jury indicts Berkowitz

By CHRIS PARKS

A federal grand jury Monday indicted Muneer Berkowitz, a local bank official, and Richard Austin, an official with the Federal Reserve, on charges of conspiracy to defraud the government.

The two were arrested for their roles in a scheme to defraud the government of $1 million in federal funds.

Berkowitz and Austin were arrested on charges of conspiracy to defraud the government.

The charge carries a maximum penalty of 20 years in prison and a $250,000 fine.

The grand jury indicted Berkowitz and Austin on charges of conspiracy to defraud the government.

In a separate case, the two were arrested for their roles in a scheme to defraud the government of $1 million in federal funds.

The conspiracy charge carries a maximum penalty of 20 years in prison and a $250,000 fine.

The charges were announced in the federal court in Detroit.

Berkowitz, 45, and Austin, 50, were arrested Monday on charges of conspiracy to defraud the government.

The two were arrested for their roles in a scheme to defraud the government of $1 million in federal funds.

The conspiracy charge carries a maximum penalty of 20 years in prison and a $250,000 fine.

Several raids in Diamond's estates have been conducted in the past two years. The director of the buildings has been accused of at least one charge in each of the buildings. The raids are scheduled for at least 90 minutes.

The project is expected to create 350,000 jobs.

Reo plant to be leveled in July

By JAMES KATZ

Debates of the Diamond Reo building on leveling is expected to be held in July. The building is located at 1300 South Washington, across the street from the Reo plant. The building was vacated in 1975.

Berkowitz's resignation as president of the Reo plant comes as a shock to many.

It is ironic that Berkowitz's resignation was announced just weeks before the Reo plant is scheduled to close.

The Reo plant has been in operation for 70 years and is considered a symbol of Detroit's industrial history.

The Reo plant was established in 1908 by Edward Deeds, a former police officer, who built the first successful automobile in Detroit.

The Reo plant has been a major employer in Detroit for decades.

Western cooperation is needed to help the Indochinese Exodus

The United States' obligation to Southeast Asia has been a core aspect of foreign policy for over 30 years. Every President since Vietnam has been asked the question of how far the United States will go to stop the flow of communism at whatever the price. But what the United States did in Vietnam was a battle of words, not of hardware. The United States used its economic and military power to support other countries in the region, but in the end, the United States was not in the war itself. The United States was in the battle of ideas, not the battle of forces.

Now that the United States is no longer in Vietnam, the question of how far the United States will go to stop the flow of communism at whatever the price is no longer relevant. The United States is no longer in the war itself. The United States is no longer in the battle of ideas, not the battle of forces.

But there is a way for the United States to help the Indochinese refugees. It is through the use of cooperation, not force. The United States can use its economic and military power to support other countries in the region, but in the end, the United States is no longer in the war itself. The United States is no longer in the battle of ideas, not the battle of forces.

A viable solution

When it comes to the supposedly simple act of voting, some students in East Campus have been getting the rundown. These students, while being members of the MSU community, are technically residents of Meridian Township. Subsequently, they are faced with the confusing and unnecessary task of registering to vote in that community. Fortunately, a simple and cost-effective solution to this situation has been proposed.

A small community group in Meridian Township is working on a proposal that would allow MSU students who live in the township to register to vote in that community. The proposal would allow MSU students to register to vote in the township where they live, regardless of where they are registered to vote in the state. This would simplify the process for MSU students who live in the township and would make it easier for them to vote in the primary election in November.

The proposal has been well-received by MSU students who live in the township. They see it as a way to simplify the process of registering to vote and to ensure that their voices are heard in the primary election. The proposal is currently being reviewed by the township's planning commission and is expected to be voted on in the coming months.

The proposal would be a win-win for MSU students who live in the township. It would simplify the process of registering to vote and would ensure that their voices are heard in the primary election. It would also help to strengthen the relationship between MSU and the township, which has been strained in recent years due to the issue of registering to vote.

The proposal is currently being reviewed by the township's planning commission and is expected to be voted on in the coming months. It is hoped that the proposal will be approved and that it will become a reality for MSU students who live in the township.
Detroit hosts NEA convention

Teacher stress to be main focus of meeting

By President Walter Mondale and New Holland Baker are scheduled to address delegates later this week. One of the most severe cases of burnout will be told by Dr. Albert Williams, psychiatry professor at the University of Pennsylvania. He will also be giving a seminar on burnout and its relationship to restorative measures. There will be a major discussion on the subject of stress.

The students of the National Education Association will discuss teacher burnout and its effect on the education process. The NEA has been holding seminars on the subject of stress for some time. The NEA has held a number of seminars and workshops on the subject of stress.

The NEA's 1974 annual meeting was held the last Tuesday of May in San Francisco, and it was attended by thousands of teachers.
Koko belts those blues!

By RENALDO MCELROY

If you are in the mood for something new and exciting, try Koko! Her smooth blues are sure to have you swaying in your seat and feeling the rhythm. Whether you're a fan of classic blues or just looking for a good time, Koko's performance is not one to miss. So grab your dancing shoes and come experience the magic that is Koko's blues!
Hockey ailes like MSU

By ADAM THEODOR

When John Mason left the MSU bench for the past 20 seasons, he had few enough
surprises to make a difference in the
twice-annual rivalry of Michigan
State University, which was taken
over by Brian Muller.

Muller brought with him two assistants from Bowling Green, Alabaston and
Wes Walsh. Both have known
Muller for a long time and have
himself the MSU coaching
field. Walsh has said that Bowling
Green was the perfect place for
MSU jobs, they were more time
than that.

"It's not all at Bowling Green, it's
a lot of real good. When Wes
afforded the job, he was always
in our program and he took
the job," John Mason said. "The
rule we play in (West Virginia) and the
base location of the school are great.

The school expanded on the idea of the location of the school. "We are in the hockey center of the
United States," he explained. "We are
fortified by our relationship with the
college and the East Coast and we are
one of the few places where the
junior hockey program moves around.
Mason will be primarily concerned
with recruiting, while Walsh will focus
on the on-ice matter.

"Mason always wanted to be a
head coach, and he's about to
the number one player in the
school. I don't know how
I do it, but he's always
in the top quarterback,
and he's going to the
class in every game

"The school always needed a
quarterback, and in every
work, and he's going to
the number one player in
the school. I don't know
how to do it, but he's
always in the top
class in every game

- John Mason

Jabbar realizes he's almost through

ONE MORE DRINK AND THEN I'LL BE ABLE TO FACE THE OLD BATTLE-AX

WHY IS SHE ALWAYS SO MAD AT YOU WHEN YOU COME HOME?

I THINK IT'S THAT ONE MORE DRINK...
WASHINGTON (AP) — "I know this might sound crazy, but it's very true," said acting astronaut Charles "Booji" Shoemaker, a veteran of Skylab. "One of the best ways to explain to someone what is happening in the space station is by describing it as a 3,500-pound piece of debris floating down the street and having a good time, too." "But I'm afraid that's not quite the story," said astronaut Robert "Bob" Burger. "It's a bit more complicated than that. We're dealing with a real problem here, and we're not about to waste time explaining it to the public in a simple way."

Carter gets advice on Skylab

President Carter is scheduled to meet with NASA officials tomorrow to discuss the situation with the space station. The president has expressed concern about the potential risks to astronauts and the public if the station is not brought under control. The administration is considering a range of options, including the possibility of using a space shuttle to retrieve the station and bring it back to Earth. Carter's decision on how to proceed is expected to have significant implications for the future of the space program. The president has been under pressure from both the scientific community and the public to ensure the safety of the astronauts and the integrity of the project. The meeting is also expected to be an opportunity for Carter to reinforce his commitment to the space program and demonstrate his leadership in the face of this challenging crisis. The administration is also working closely with the international community to coordinate efforts to address the situation and provide support to those affected by the incident.
