

The RECTANGLE

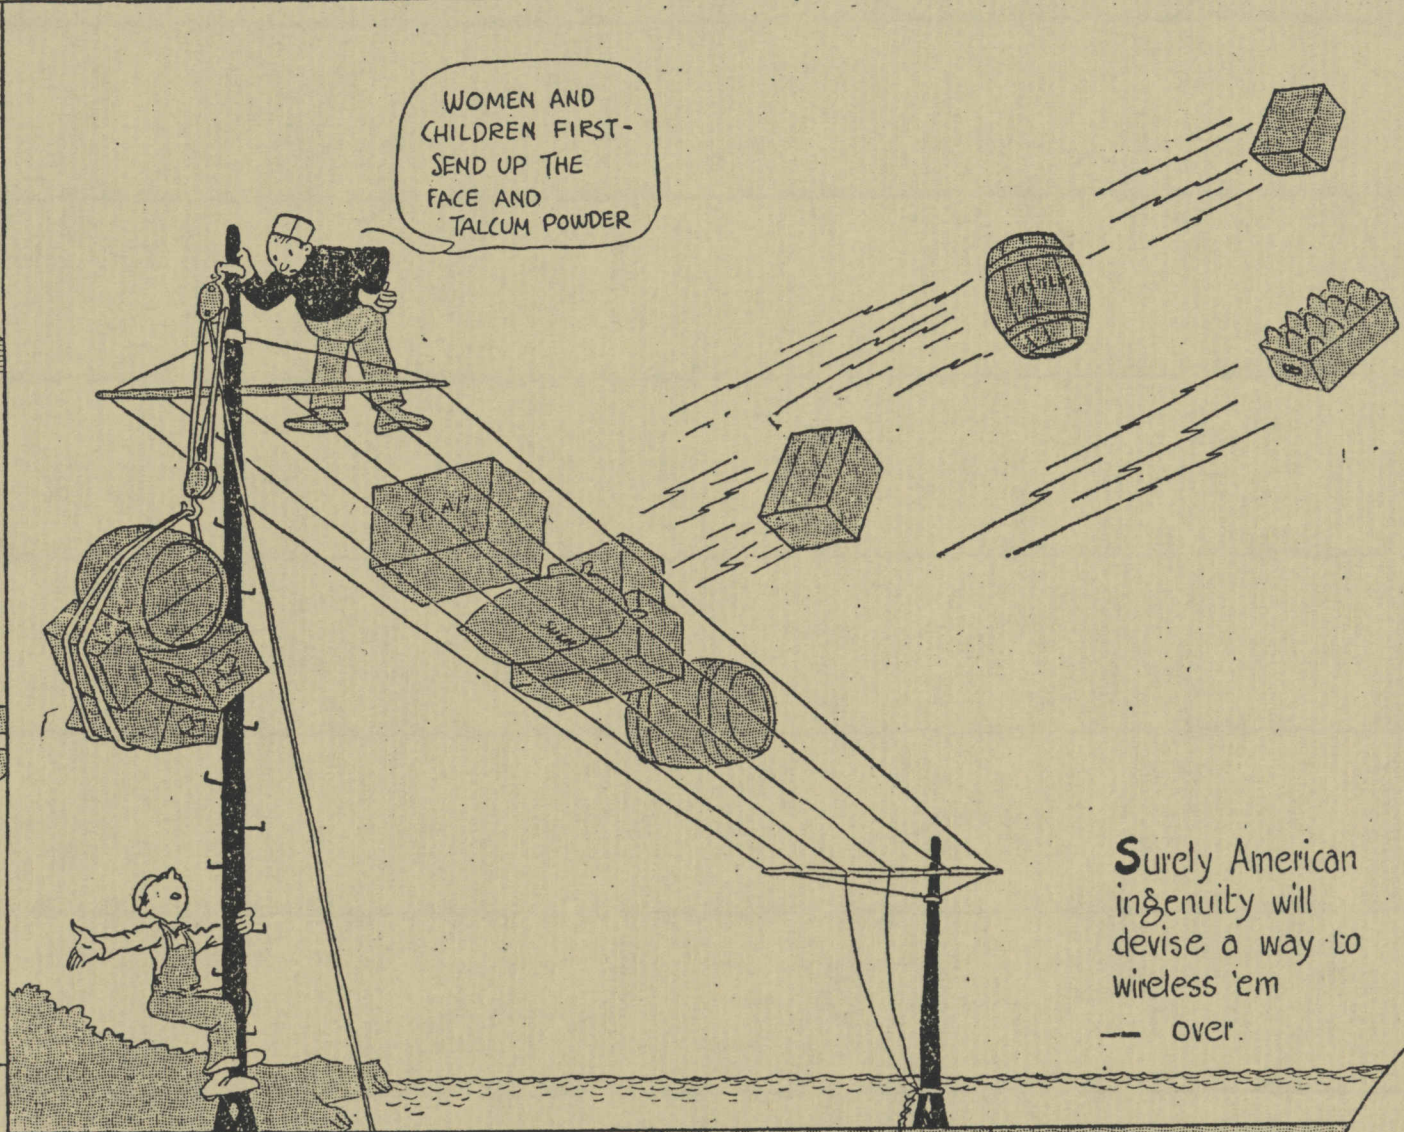

SOLVING THE PROBLEM - SUPPLIES FOR OUR ALLIES

Craft designed to impersonate whales could probably run the blockade with safety

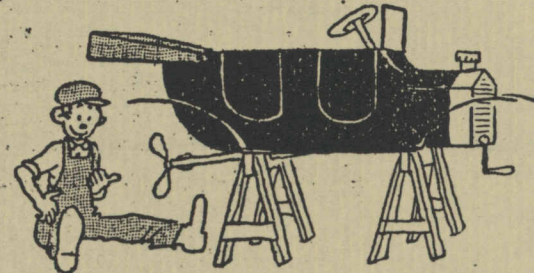

Torpedoes filled with edibles instead of explosives could be sent across.

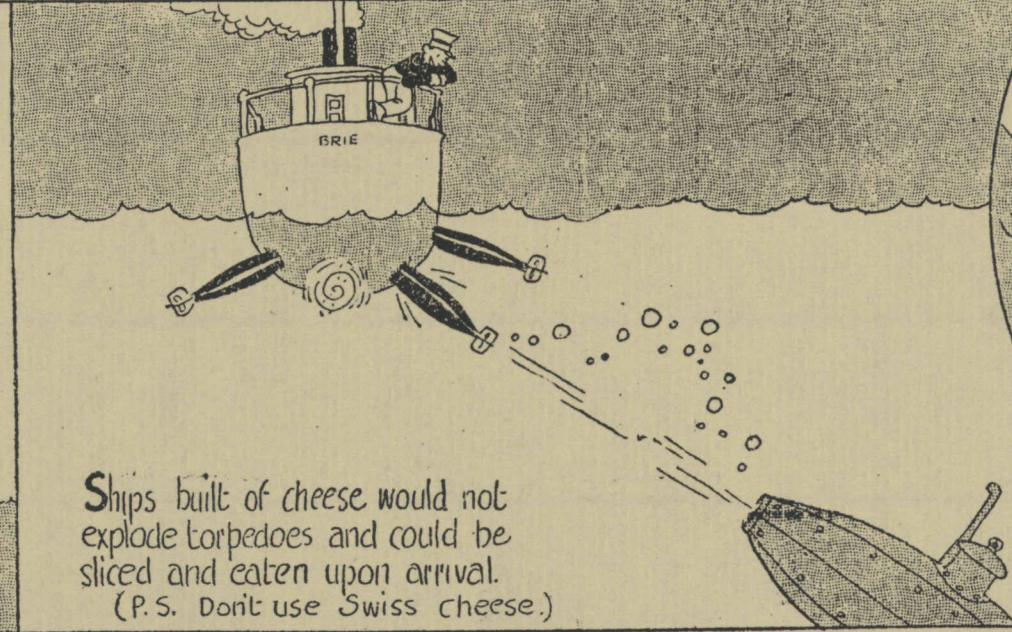

Surely American ingenuity will devise a way to wireless 'em - over.

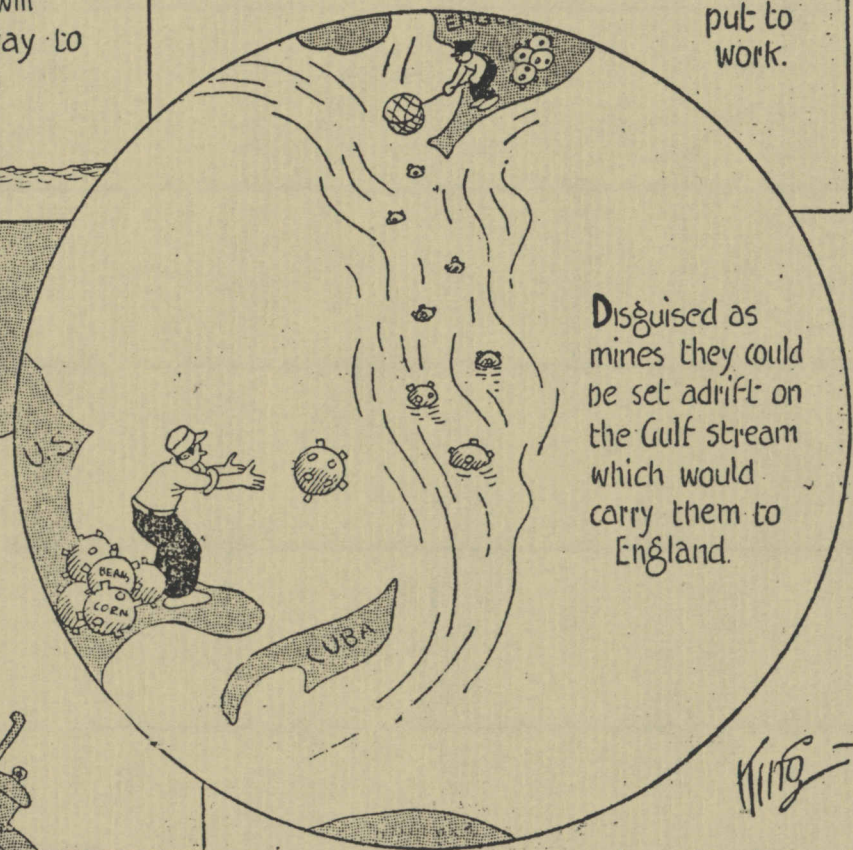

Trained seals can be put to work.

By leaving off the wheels and putting a propeller on the drive shaft these individual containers for foodstuffs could be turned out 1000 a day.

Ships built of cheese would not explode torpedoes and could be sliced and eaten upon arrival. (P.S. Don't use Swiss cheese.)

Disguised as mines they could be set adrift on the Gulf stream which would carry them to England.

Wing
