

IN THE SEARCH FOR THE UNUSUAL in camera shots the studio photographer makes a portrait of Jean Harlow in a pose which will appear to defy the laws of gravity.

BOTTLE FED—This kid at the Paris children's zoo finds the position in which he is being held no handicap to satisfying his appetite. (Acme photo.)

ANN DVORAK models this smart sports suit of dark ratine with suede vest worn over a jersey. The scarf is of bright colored plaid silk.

FAMILY EQUIPAGE—The whole family goes for a ride on their camel, perhaps on a shopping tour to Delhi, near which Indian city this photograph was taken. (Associated Press photo.)

Dining outdoors at the Hotel Shoreland—55th Street at the Lake—under a canopy of stars, with Lake Michigan in the offing—is a real summer treat—fascinating, delightful. Cool—gay—a setting that even to smart, sophisticated people is unique and different. An extraordinary Shoreland menu.

Make Your Child Gain In Weight And Nerve Poise

... A Way To Do It During The Summer Months

From Switzerland Comes This Amazing Way To Add A Pound A Week In Weight, While Curbing Nervousness, Too

Mother—Accept A Trial Supply —Note The Coupon Below

"BUILD up your child in summer," say child authorities. "Don't let vacation time go by without adding to his weight—without making sure that he is replenishing his store of energy."

And now—thanks to the discovery of a Swiss scientist—you can do this in a way the average child delights in. And build him up at the rate of a pound or more each week this summer, while curbing nervousness, too.

A unique food-drink called Ovaltine will enable you to do this. It is not a medicine in any sense of the word—although 20,000 doctors advise it.

So remarkable are its building powers that, by commencing now, you may almost literally make your child over this vacation time. And send him back to school in September greatly benefited in three important ways.

First: Ovaltine increases weight.

Second: At the same time, appetite is scientifically stimulated. Not by merely "tempting" the taste. But by actually creating the sensation of hunger.

Third: As appetite and weight increase, nervousness is simultaneously curbed. This is especially significant. For child specialists have long observed that underweight and nervousness go hand in hand.

What It Is—How It Acts

This discovery is called Ovaltine. Made by a special vacuum process, it is different from any other food-drink in the world.

Ovaltine contains the remarkable food property called "diastase"—the starch digestant. Ovaltine contains so much of this element that it digests 4 to 5 times its own weight of the starch content of other foods a child eats.

FREE SHAKER to shake up Cold Ovaltine as a Summer Drink

If you are giving your child Ovaltine now, send for this 50c professional shaker free. Use it to make a new and delightful cold shake-up drink with Ovaltine. Note special offer in coupon below.

As a result Ovaltine helps to empty the stomach sooner. This—coupled with the fact that Ovaltine is rich in the appetite-producing Vitamin B—makes a child hungry. For hunger is largely the sensation of the walls of an empty stomach drawing together.

Often when a child drinks Ovaltine, he not only inclines to eat more of such healthful foods as vegeta-

Ovaltine is extremely economical to serve. For it is all food-concentrate—and contains no added sugar to give it bulk and cheapen its cost. You add your own sugar at home—so don't be misled if you're offered a sweet-tasting "sugar-loaded" substitute.

You can get Ovaltine at any drug or grocery store. Or send the coupon below for a generous trial supply. . . Note, too, the offer of a 50c professional shaker now being given free.

NOTE: Thousands of nervous people, men and women, are using Ovaltine to restore vitality when fatigued. It is also widely prescribed for sleeplessness, nursing mothers, convalescents, and the aged.

bles, oatmeal and bread—but because of better digestion—gets more nourishment out of every mouthful he takes.

In addition, Ovaltine acts to combat nervousness by supplying important calcium to the system, under the most favorable conditions to promote calcium metabolism and provide proper calcium balance in the blood.

Phosphorus—a vital element of nerve and brain tissue—is supplied too. A cup of Ovaltine, in fact, provides, in easily digested and rapidly assimilated form, the food elements often lacking in the child's daily diet, but which are absolutely necessary for building nerve, brain and muscle tissues.

Start Today

Make this a real health-summer for your child. Give Ovaltine at breakfast every morning this vacation—at meals and between meals.
